Articulation with UTS courses

This course offers opportunities for articulation from a graduate certificate or graduate diploma to a master's-level award.

Transfer between UTS courses

Applications for admission by internal transfer of candidature from a graduate certificate may be considered following completion of subjects totalling at least 18 credit points at a level of performance deemed by the Faculty Board in Engineering and Information Technology to be satisfactory evidence of an ability to undertake master's candidature (typically 60 per cent average).

Other information

Further information is available from:

Building 1 Student Centre

C04094v5 Master of Engineering Management

Award(s): Master of Engineering Management (MEM)

UAC code: 940337 [Autumn semester, Spring semester], 940344 [distance] [Autumn semester, Spring semester]

CRICOS code: 008685A

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

This course is also offered offshore. It is available in Hong Kong. The language of tuition is English.

Overview

The Master of Engineering Management (MEM) is the ideal course for engineers, technical specialists and others wishing to expand their managerial skills within a technology-based organisation. The MEM has been specifically designed to emphasise the interface between technology and management.

The MEM program provides an opportunity for engineers and others who are seeking a career in engineering management to undertake a formal course of relevant study at a master's level. It may also be of benefit to current engineering managers to undertake formal study and gain recognition of their knowledge and experience.

Career options

Engineering and applied science jobs are becoming increasingly multidisciplinary. Knowledge and skills in technical management gained from completing the MEM can assist in obtaining a high-quality engineering or engineering management position.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University's policy on credit recognition:

www.gsu.uts.edu.au/policies/credit-recognition.html

Students may be eligible for credit recognition based on previous postgraduate award study. Subjects undertaken as part of an undergraduate degree, irrespective of their level of study, are not normally considered for credit recognition.

Students who have completed postgraduate subjects as part of a postgraduate degree may be eligible for credit recognition of up to 12 credit points (two subjects) towards an engineering master's degree.

Students who have previously completed subjects at UTS that are part of the postgraduate degree to which they are admitted, may be eligible for credit recognition of up to 18 credit points (three subjects) towards an engineering masters' degree.

Students who have previously completed subjects as part of a UTS Engineering graduate certificate may be eligible for credit recognition of up to 24 credit points (four subjects) towards equivalent subjects in an engineering master's degree.

Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The course duration is two years if two subjects are taken per semester. The course can also be completed in one year of full-time study if four subjects per semester are completed. The program is structured for evening attendance or distance mode. Extra intensive classes may be held during Summer session for selected subjects.

Students who want to undertake the course in distance mode may have to follow a restricted course structure as not all subjects are offered in distance mode.

Course structure

The course requires 48 credit points of study. A minimum of 36 credit points (six subjects) must be completed from the list of MEM core subjects. Elective subjects are to be chosen from postgraduate subjects offered within the Faculty of Engineering and Information Technology; some subjects may require prior approval based on access conditions.

Further study at UTS

The Master of Business Administration (C04018) (see page 355) (Technology Management major) may be entered directly after completion of this course. With suitable choice of subjects from the MEM, exemptions may be granted for up to eight subjects in the MBA.

Course EFTSL: 1

Location: City campus

Overview

The flexible structure of this course allows recently graduated engineers and technical specialists to deepen the knowledge and skills gained in their first degree while expanding their managerial and policy knowledge.

Students may choose a program of study that deepens the body of knowledge acquired in their first degree as well as expands knowledge boundaries into policy and engineering management areas. The program of study is usually framed within a postgraduate program major and supervised by an experienced academic in that field. Students also have the option of not electing a major.

Career options

Students who have a basic engineering undergraduate degree are able to enhance their ability and knowledge through master's-level courses in their respective majors, enabling them to gain and hold employment in their respective engineering fields.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in engineering or another technological/applied science field.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University's policy on credit recognition:

www.gsu.uts.edu.au/policies/credit-recognition.html

Students may be eligible for credit recognition based on previous postgraduate award study. Subjects undertaken as part of an undergraduate degree, irrespective of their level of study, are not normally considered for credit recognition.

Students who have completed postgraduate subjects as part of a postgraduate degree may be eligible for credit recognition of up to 12 credit points (two subjects) towards an engineering master's degree.

Students who have previously completed subjects at UTS that are part of the postgraduate degree to which they are admitted, may be eligible for credit recognition of up to 18 credit points (three subjects) towards an engineering masters' degree.

Students who have previously completed subjects as part of a UTS Engineering graduate certificate may be eligible for credit recognition of up to 24 credit points (four subjects) towards equivalent subjects in an engineering master's degree.

Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The course requires one year of full-time or two years of part-time study.

Subjects are offered as three-hour weekly sessions in block mode. Some subjects may be available in distance mode. Subjects offered by distance mode require similar hours but at the convenience of the student.

Course structure

Students must complete eight postgraduate subjects (totalling 48 credit points) offered by UTS: Engineering. Students wishing to have a major noted on their academic transcript must complete subjects as specified under that major.

Course completion requirements

CBK90330 Major choice	48cp
Total	48cp

Course program

The tables below give details of each major: for each major there are three tables. The first lists the compulsory subjects and allowable option choices for the major. The next two tables show the subjects typically offered in Autumn and Spring semesters. Where an elective is specified, the subject is to be chosen from postgraduate subjects offered within the Faculty of Engineering and Information Technology, as listed in the elective option. Some subjects are offered in weekly mode, others in block mode, and others in distance mode or a combination of modes.

49121	Environmental Assessment and Planning	6cp
49126	Environmental Management of Land	6cp
49123	Waste and Pollution Management	6cp

Select four subjects from the following: 24cp

49049	Air and Noise Pollution	6cp
49102	Traffic and Transportation	6cp
49106	Road Engineering Practice	6cp
49107	Urban Stormwater Design	6cp
49122	Ecology and Sustainability	6cp
49125	Environmental Risk Assessment	6cp
49127	Decentralised Water and Wastewater Treatment	6cp
49109	Engineered Natural Water Treatment Systems	6cp

Local Govt Eng and Env Eng major - subjects typically offered in Autumn

49102	Traffic and Transportation	6cp
49107	Urban Stormwater Design	6cp
49108	Local Government Powers and Practice	6cp
49109	Engineered Natural Water Treatment Systems	6cp
49123	Waste and Pollution Management	6cp
49126	Environmental Management of Land	6cp

Local Govt Eng and Env Eng major - subjects typically offered in Spring

49049	Air and Noise Pollution	6cp
49106	Road Engineering Practice	6cp
49121	Environmental Assessment and Planning	6cp
49122	Ecology and Sustainability	6cp
49125	Environmental Risk Assessment	6cp
49127	Decentralised Water and Wastewater Treatment	6cp

Manufacturing Engineering and Management major

Select four subjects from the following: 24cp

49002	Managing Projects	6cp
49049	Air and Noise Pollution	6cp
49307	Internal Combustion Engines	6cp
49316	Materials Handling	6cp
49321	Energy Conversion	6cp
49322	Airconditioning	6cp
49325	Computer-aided Mechanical Design	6cp
49328	Turbomachines	6cp
49928	Design Optimisation for Manufacturing	6cp
49312	Advanced Flow Modelling	6cp

Select three subjects from the following: 18cp

49001	Judgment and Decision Making	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49306	Quality and Operations Management Systems	6cp

Select 6 credit points of electives 6cp

Manufacturing Eng and Management - subjects typically offered in Autumn

49002	Managing Projects	6cp
49316	Materials Handling	6cp
49321	Energy Conversion	6cp
49322	Airconditioning	6cp
49928	Design Optimisation for Manufacturing	6cp

Manufacturing Eng and Management - subjects typically offered in Spring

49002	Managing Projects	6cp
49049	Air and Noise Pollution	6cp
49307	Internal Combustion Engines	6cp
49312	Advanced Flow Modelling	6cp
49325	Computer-aided Mechanical Design	6cp
49328	Turbomachines	6cp

Software Engineering major

49002	Managing Projects	6cp
49262	Web Technologies	6cp
32603	Systems Quality Management	6cp
32555	Fundamentals of Software Development	6cp

Select three subjects from the following: 18cp

49001	Judgment and Decision Making	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49306	Quality and Operations Management Systems	6cp

Software Engineering major - subjects typically offered in Autumn

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
32603	Systems Quality Management	6cp
32555	Fundamentals of Software Development	6cp
49306	Quality and Operations Management Systems	6cp

Software Engineering major - subjects typically offered in Spring

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49262	Web Technologies	6cp
32555	Fundamentals of Software Development	6cp
49306	Quality and Operations Management Systems	6cp

Structural Engineering major

Select four subjects from the following:		24cp
49047	Finite Element Analysis	6cp
49131	Bridge Design	6cp
49134	Structural Dynamics and Earthquake Engineering	6cp
49136	Application of Timber in Engineering Structures	6cp
49150	Prestressed Concrete Design	6cp
49002	Managing Projects	6cp
49115	Facade Engineering	6cp
49118	Applied Geotechnics	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49135	Wind Engineering	6cp
49143	Civil Engineering Review 1	6cp
49151	Concrete Technology and Practice	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp
Select three subjects from the following:		18cp
49001	Judgment and Decision Making	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49306	Quality and Operations Management Systems	6cp
Select 6 credit points of electives		6cp

Structural Engineering major - subjects typically offered in Autumn

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49047	Finite Element Analysis	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49136	Application of Timber in Engineering Structures	6cp
49306	Quality and Operations Management Systems	6cp
49135	Wind Engineering	6cp
49151	Concrete Technology and Practice	6cp

Structural Engineering major - subjects typically offered in Spring

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49134	Structural Dynamics and Earthquake Engineering	6cp
49131	Bridge Design	6cp
49150	Prestressed Concrete Design	6cp
49306	Quality and Operations Management Systems	6cp
49118	Applied Geotechnics	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp

Telecommunication Networks major

49202	Communication Protocols	6cp
49238	Telecommunication Networks Management	6cp
Select two subjects from the following:		12cp
49048	Wireless Networking Technologies	6cp
49201	Integrated Services Networks	6cp
49215	Telecommunications Industry Management	6cp
49249	Telecommunications Engineering Review	6cp
49262	Web Technologies	6cp
32570	Enterprise Software Architecture and Middleware	6cp
49203	Telecommunications Signal Processing	6cp
32555	Fundamentals of Software Development	6cp
49110	3G Mobile Communication Systems	6cp
32001	Mobile Commerce Technologies	6cp
32118	Mobile Communications and Computing	6cp
42902	Interior Routing and High Availability	6cp
42903	Multi Protocol Label Switching	6cp

Select three subjects from the following:		18cp
49001	Judgment and Decision Making	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49306	Quality and Operations Management Systems	6cp
Select 6 credit points of electives		6cp

Telecommunication Networks major - subjects typically offered in Autumn

49001	Judgment and Decision Making	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49048	Wireless Networking Technologies	6cp
49202	Communication Protocols	6cp
49203	Telecommunications Signal Processing	6cp
49249	Telecommunications Engineering Review	6cp
49306	Quality and Operations Management Systems	6cp

Telecommunication Networks major - subjects typically offered in Spring

49001	Judgment and Decision Making	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49201	Integrated Services Networks	6cp
49215	Telecommunications Industry Management	6cp
49238	Telecommunication Networks Management	6cp
49249	Telecommunications Engineering Review	6cp

C04098v3 Master of Environmental Engineering Management

Award(s): Master of Environmental Engineering Management (MEEM)
UAC code: 940335 (Autumn semester, Spring semester), 940342 (distance) (Autumn semester, Spring semester)
CRICOS code: 027917K
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus or distance

Overview

This course is designed to enable engineers and other technical specialists to take a leadership role in the field of environmental engineering.

The course combines a set of key subjects that contain information on the nature of environmental problems together with engineering techniques for their solution. This is supplemented by management and policy subjects to empower the engineer, or technical specialist, to lead multidisciplinary teams working in the field of environmental engineering.

Career options

Career options include positions in government agencies or private corporations, or as consultants.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in engineering or another technological/applied science field. Candidates without a degree, but with suitable experience, may enrol in the Graduate Certificate in Environmental Engineering Management (C11051) (see page 486) and later transfer to the Master of Environmental Engineering Management with full credit for completed subjects.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University's policy on credit recognition:

www.gsu.uts.edu.au/policies/credit-recognition.html

Students may be eligible for credit recognition based on previous postgraduate award study. Subjects undertaken as part of an undergraduate degree, irrespective of their level of study, are not normally considered for credit recognition.

Students who have completed postgraduate subjects as part of a postgraduate degree may be eligible for credit recognition of up to 12 credit points (two subjects) towards an engineering master's degree.

Students who have previously completed subjects at UTS that are part of the postgraduate degree to which they are admitted, may be eligible for credit recognition of up to 18 credit points (three subjects) towards an engineering masters' degree.

Students who have previously completed subjects as part of a UTS Engineering graduate certificate may be eligible for credit recognition of up to 24 credit points (four subjects) towards equivalent subjects in an engineering master's degree.

Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

Most students taking two subjects a semester require two years to complete this degree. The course is also available to fee-paying overseas students on a full-time basis, taking one year to complete.

Subjects are offered as three-hour weekly sessions or in block mode. Some subjects may be available in distance mode. Each subject usually requires three hours of class attendance per week. Subjects offered by distance mode require similar hours but at the convenience of the student.

Students who want to undertake the course in distance mode may have to follow a restricted course structure as not all subjects are offered in distance mode.

Course structure

Students are required to complete 48 credit points of study, comprising 36 credit points from the core subjects and 12 credit points from 49001, 49002, 49003 or 49108.

Course completion requirements

CBK90145	Core subjects	36cp
Select 12 credit points from the following options:		12cp
49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49003	Economic Evaluation	6cp
49108	Local Government Powers and Practice	6cp
		Total 48cp

Course program

The subjects offered are listed below. As not all subjects are offered every semester, students should check the timetable and seek advice as to which subjects to take in which semester.

Select six subjects from the following:		36cp
49121	Environmental Assessment and Planning	6cp
49122	Ecology and Sustainability	6cp
49123	Waste and Pollution Management	6cp
49257	Geographic Information Systems	6cp
49125	Environmental Risk Assessment	6cp
49126	Environmental Management of Land	6cp
49116	Contaminated Site and Waste Remediation	6cp
49127	Decentralised Water and Wastewater Treatment	6cp
49049	Air and Noise Pollution	6cp
49109	Engineered Natural Water Treatment Systems	6cp
Select 12 credit points from the following options:		12cp

C04102v2 Master of Engineering Management Master of Business Administration

CRICOS code: 030558B

Commonwealth-supported place?: No

Load credit points: 96

Course EFTSL: 2

Location: City campus

Note(s)

This course is only offered to international students.

However, other students can complete the same course of study by enrolling in the Master of Engineering Management (C04094) (see page 366) and then the Master of Business Administration (C04018) (see page 355) (Technology Management major (MAJ08938)).

Overview

The Faculty of Engineering and Information Technology together with the Faculty of Business have developed a suite of master's degrees that provide all the advantages of a generalist Master of Business Administration and a focused engineering management program.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Once students have completed the Master of Engineering Management they need to submit an application for credit recognition, exempting up to eight subjects (48 credit points) towards the Master of Business Administration (Technology Management major). The faculty does not grant credit recognition based on work experience.

Course duration and attendance

The course can be completed in two years of full-time study, comprising one year each for the Master of Engineering Management and the Master of Business Administration (Technology Management major). It is also available part time. Attendance is available in weekly, block and / or distance modes.

Course structure

To complete the Master of Engineering Management, students must complete six compulsory subjects (totalling 36 credit points) and two elective subjects (totalling 12 credit points) chosen from the list of MEM electives.

To complete the Master of Business Administration (Technology Management major), students must complete six compulsory subjects (totalling 36 credit points) and two elective subjects (totalling 12 credit points) chosen from those available in the Technology Management major.

C04106v5 Master of Arts in Journalism

Award(s): Master of Arts in Journalism (MA)

UAC code: 940500 (Autumn semester, Spring semester)

CRICOS code: 006820D

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

The Master of Arts in Journalism is part of an articulated program of study for people who want to start a journalism career and for experienced journalists wanting to broaden their skills and professional technological expertise and refresh the intellectual basis of their practice.

This is the only program of its kind in Sydney, where the Australian media is increasingly concentrating. The journalism staff at UTS has a record of excellence in professional practice reflected in media contacts. In addition, the course has close links with the Australian Centre for Independent Journalism, which provides a professional setting for student work.

Course aims

Graduates of the program:

- have strong research and reporting skills and a knowledge and critical understanding of the media
- are equipped with the necessary skills to either enter professional practice in the media or continue practice with additional skills and intellectual depth
- strive to promote the important role of professional and ethical journalism in the service of the public, and
- have an understanding of the role of the media in local, regional, national and global contexts.

Career options

Career options include reporter or editor in local, corporate, national and international print and broadcast media organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who have successfully completed the Graduate Certificate in Journalism (C11058) (see page 489) or the Graduate Diploma in Journalism (C06037) (see page 441) are eligible for credit recognition for completed subjects.

Course duration and attendance

The course is one-and-a-half years of full-time or two-and-a-half years of part-time study.

Course structure

The course totals 72 credit points of study, made up of 48 credit points of core subjects and 24 credit points of elective subjects.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

C04109v7 Master of Arts in Creative Writing

Award(s): Master of Arts in Creative Writing (MA)
UAC code: 940512 [Autumn semester, Spring semester]
CRICOS code: 032331E
Commonwealth-supported place?: No
Load credit points: 72
Course EFTSL: 1.5
Location: City campus

Overview

The Master of Arts in Creative Writing is designed for experienced writers who want to further develop their theoretical knowledge and skills. Students learn valuable skills and work towards developing a major project under the guidance of an academic faculty member with expertise in creative writing.

Students study one genre in depth or explore a range of genres and media.

Course aims

Graduates of this course develop:

- general and specific skills in writing across a range of genres
- an ability to develop and critically revise their own work
- an understanding of the relationships of writing practice and publication across a range of media and contemporary cultural forms
- a critical knowledge of cultural and aesthetic debates, and
- an ability to think creatively and critically about, and contribute to, developments in cultural industries.

Career options

Career options include advertising, computing, creative writing, freelance writing and editing, journalism, media research, publishing or scriptwriting, and editing in community organisations or government departments.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements. To be eligible to articulate into the Master of Arts in Creative Writing (C04109) from the Graduate Certificate in Screenwriting (C11066) (see page 490), the Graduate Certificate in Editing and Publishing (C11071) (see page 490), or the Graduate Diploma in Creative Writing (C06041) (see page 442), students must complete at least two postgraduate writing subjects with a distinction grade or higher.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

All applicants are required to:

- explain what writing experience they have
- list their publications, if any
- attach one example of their creative writing
- supply written references from people who are familiar with their ability and potential (if the applicant does not have academic or professional qualifications).

Credit recognition

Students who have successfully completed one of the graduate certificates or the graduate diploma in the articulated program and who are admitted to this course are eligible for credit recognition for completed subjects.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or equivalent part-time basis.

Course structure

The course comprises 72 credit points, made up of five core subjects and three electives.

Students may select subjects beyond the lists of elective subjects with the approval of the graduate adviser. Not all subjects are available each semester.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

C04140v9 Master of Health Services Management

Award(s): Master of Health Services Management in [name of major] (MHSM)

UAC code: 940807 (Planning) (Autumn semester, Spring semester), 940810 (Autumn semester, Spring semester), 940817 (Clinical Leadership) (Autumn semester, Spring semester), 940821 (Health Research) (Autumn semester, Spring semester)

CRICOS code: 040694M

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Note(s)

This course offers a mid-year intake for local and international students.

Overview

This is a comprehensive course in health services management and aims to expand students' knowledge and future career opportunities. The course develops students' knowledge and skills, which leads to an enhanced capacity to manage health services in a diverse range of health settings.

Graduates of this course are exposed to academic and industry leaders who share their experience and knowledge to facilitate insight into the contemporary health service management environment.

Students can focus on health services management or complete a major in:

- Planning
- Clinical Leadership, or
- Health Research.

The Planning major provides a blend of subjects to assist graduates in planning and evaluating health services, understanding health needs, and managing change in a dynamic and complex environment.

The Clinical Leadership major provides a blend of subjects to assist graduates in maximising the efficiency, effectiveness, and safety of health services as well as ensuring that governance, quality, and risk mitigation frameworks contribute to excellence in health care delivery.

The Health Research major provides a blend of health services management, research coursework and independent study subjects to assist graduates in undertaking health services research and those who wish to be considered for admission to a doctoral program.

Course aims

This course is designed to prepare new, aspiring and middle health service planners and managers to assume a leadership role in the strategic and operational management of a wide range of health services and facilities. The content aims to develop skills in managing people, resources, systems, and processes within health services to meet the changing needs of communities, clinicians, governments and organisations.

Career options

Career options include positions as managers and/or planners in health authorities, hospitals, primary and community care, aged care services, and other healthcare facilities in the public, private, not-for-profit, government, and non-government health sectors.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

This evidence may include extensive relevant work experience in a health or human services field.

Applicants must have at least one year's full-time equivalent experience in a medium to large organisation, preferably in the health or human services area. Work experience undertaken in small work settings (e.g. private practice settings with a small number of professionals) or as part of intern requirements are not accepted.

Applicants who do not have an undergraduate degree but who have extensive relevant work experience in a health or human services field and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course duration is one-and-a-half years of full-time or three years of part-time study.

Subjects are offered via on-campus study. Part-time students usually study two subjects a semester.

Course structure

Students must complete a total of 72 credit points, choosing one of three majors (in Planning, Clinical Leadership, or Health Research) or a no-major option to complete the course. In all options, with the exception of the Health Research major, students choose two electives from the list of electives provided within each choice block. Students

who wish to undertake an elective subject that is not listed should seek advice from UTS: Health.

Course completion requirements

Articulation with UTS courses

This course is part of an articulated program made up of the Graduate Certificate in Health Services Management (C11107) (see page 492), the Graduate Diploma in Health Services Management (C07048) (see page 462) and the Master of Health Services Management.

Professional recognition

Australasian College of Health Service Management (ACHSM).

C04143v6 Master of Laws

Award(s): Master of Laws (LLM)

UAC code: 940401 (Autumn semester, Spring semester)

CRICOS code: 001125A

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

The UTS Master of Laws (LLM) caters to the changing demands of the legal profession. Providing the opportunity for law graduates to specialise in particular areas that are relevant to their area of legal practice, the UTS LLM is vocationally relevant and intellectually rewarding.

Close interaction between the legal profession and UTS: Law guarantees a close match between a first-class education and a marketable postgraduate legal qualification. Classes are taught by a mix of practising professionals, full-time academic staff and international visiting academics, and opportunities for cross-institutional study, both inside and outside Australia, are encouraged.

Career options

Specialisation and development of expertise leads to careers in a range of sought-after specialist vocations in the practice of law.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

A relevant, appropriate first degree is the Bachelor of Laws with honours, or the Juris Doctor, or a Bachelor of Laws or LPAB Diploma in Law together with a graduate certificate in the discipline of law, or equivalent or higher qualification. Students with a Bachelor of Laws from a non-common law country may be required to complete 78234 Common Law Legal Traditions. Students who have graduated with a Shari'a law degree are not eligible to apply for this course. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who have successfully completed the Master of Law and Legal Practice, the Master of Dispute Resolution (C04145) (see page 382) or the Master of International Law (C04149) (no longer offered) at UTS, or equivalent postgraduate law studies at a recognised tertiary institution, may, in line with UTS: Law policy, apply for a maximum of one quarter of the credit-point value of the course in exemptions.

Students who have successfully completed the Juris Doctor (C04236) (see page 405) at UTS and have completed 6 credit point Master of Laws equivalent subjects within the Juris Doctor may apply for these subjects to be credited towards the Master of Laws, up to a maximum of 12 credit points.

Solicitors with current specialist accreditation from the Law Society of NSW may apply for 6 unspecified credit points of exemption within this course.

Course duration and attendance

The course can be completed in a minimum of one year of full-time or two years of part-time study. Subjects may also be available in Summer session, allowing accelerated progression.

Course structure

Students in this course undertake eight 6-credit-point postgraduate subjects (totalling 48 credit points).

Students may choose to undertake one or two majors, by completing at least four subjects (24 credit points) within the area of the major. Students may also choose not to major in a particular area and instead choose eight subjects (48 credit points) from across the major areas.

As part of this course, students must complete the subject 78101 Postgraduate Legal Research. This subject can be included in any of the majors or choiceblocks. Students from a non-common law background are also required to enrol in the subject 78234 Common Law Legal Traditions.

Refer to the course entry in the *UTS: Handbook 2013* for the previous course structure. For a current listing of subjects in each course refer to the study package directory.

Course completion requirements

Select 48 credit points from the following options:	48cp
MAJ09390 Corporate and Commercial Law	24cp
MAJ09392 International Law	24cp
MAJ09400 Intellectual Property	24cp
MAJ09410 Global Business Law	24cp
MAJ09425 Dispute Resolution	24cp
CBK90400 Options (Law)	24cp
Total	48cp

Course program

The list of available majors is shown below.

Most subjects are timetabled over a two-year period and consequently not all subjects listed are offered in any one year. Timetabled subjects are offered subject to sufficient student interest. The current timetable can be found at:

<http://timetable.uts.edu.au>

Award(s): Master of Dispute Resolution (MDR)

UAC code: 940402 (Autumn semester, Spring semester)

CRICOS code: 027886A

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

The UTS Dispute Resolution program, a first in Australia, focuses on the wide range of non-adversarial dispute resolution processes. The subjects available accommodate distinct streams that include commerce, family, community and court-annexed programs.

Dispute resolution at UTS is focused on experiential learning involving a fusion of critical and reflective thinking paradigms with the application of theory in practical, work-based contexts.

The mixture of experience-based learning and formal lectures by professional practitioners give students a hands-on understanding of the full range of dispute resolution processes, from negotiation through the consensual processes to decisional theory.

Career options

Career options include arbitrator, manager, negotiator and professionals in a wide range of areas such as health and education, government and industrial relations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course can be completed in a minimum of one year of full-time or two years of part-time study.

The core introductory subject is offered in intensive block mode over several days of attendance at the beginning of semester. The other subjects are taught in intensive block mode over several full days of lectures, workshops and seminars.

Course structure

The course requires completion of a core introductory subject (6 credit points) plus a further seven subjects (42 credit points).

Subjects are regularly timetabled but not all subjects listed are offered in any one semester. Timetabled subjects are offered subject to sufficient student interest. The current timetable can be found at:

<http://timetable.uts.edu.au>

C04147v5 Master of Legal Studies

Award(s): Master of Legal Studies (MLS)

UAC code: 940406 (Autumn semester, Spring semester, Summer session)

CRICOS code: 021717M

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

The Master of Legal Studies is not a professional legal qualification. Applicants seeking to be admitted to practice should refer to the Juris Doctor (C04236) (see page 405) or the Bachelor of Laws (C10124) (see page 182). Students may apply for some subjects undertaken within the Master of Legal Studies to be credited towards these degrees.

Overview

The UTS: Law Legal Studies program meets the growing market need for non-law graduates working in the public and private sectors to have a thorough understanding of the legal and regulatory framework in which they operate. This includes an understanding of foundational legal concepts such as contract law and tort law, methods of legal research and theory, as well as the opportunity to develop expertise in specialist legal areas such as compliance and intellectual property law.

The Master of Legal Studies attracts students from a wide variety of backgrounds interested in expanding their skills to include an understanding of the legal framework, including professionals from the insurance, human resources, banking and finance industries, managers and administrators, and HSC legal studies teachers.

Career options

The program particularly benefits accountants and auditors, business development managers, compliance managers, engineers and architects, financial advisers and planners, IT professionals, law enforcement officers, paralegals, policy officers in the public, private and non-profit sectors, property developers, and public sector managers and administrators (especially those who work in Department of Foreign Affairs and Trade, Department of Communications, Information Technology and the Arts, the Attorney-General's Department and Treasury).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

An applicant's bachelor's degree must be in a discipline other than law. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course can be completed in a minimum of one year of full-time or two years of part-time study. Subjects may also be available in Summer session, allowing accelerated progression.

The course features a variety of attendance patterns, including intensive block attendance and weekly on-campus evening classes.

Course structure

The course requires completion of core subjects (30 credit points), including two compulsory introductory subjects and a choice of two further foundation subjects, plus a further three option subjects (18 credit points). (Refer to the course entry in the *UTS: Handbook 2013* for the pre-2014 course structure. For a current listing of subjects in each course, refer to the study package directory).

Core subjects are timetabled in Autumn and Spring semesters and option subjects are regularly timetabled but not all option subjects listed are offered in any one semester. Timetabled subjects are offered subject to sufficient student interest. The current timetable can be found at:

<http://timetable.uts.edu.au>

Course completion requirements

STM90689 Core subjects (Legal Studies)	30cp
CBK90588 Options	18cp
	Total 48cp

Articulation with UTS courses

Subjects undertaken within the Graduate Diploma in Legal Studies (C07074) (see page 465) are recognised within the Master of Legal Studies. Students enrolled in the graduate diploma may apply to internally transfer to the master's program. Candidates are not awarded the graduate diploma but subjects undertaken are applied towards the master's.

Subjects undertaken within the Juris Doctor (C04236) (see page 405) are recognised within the Master of Legal Studies. Students enrolled in the Juris Doctor may apply to internally transfer to the master's program. Candidates are not awarded the Juris Doctor but subjects undertaken are applied towards the master's.

UAC code: 940601 (Autumn semester, Spring semester)

CRICOS code: 040691C

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

This course is designed to enable students to achieve a comprehensive and greater understanding of information technology in specialised technical or management areas. The wide range of specialisations allow students to tailor the course to satisfy their career development needs.

It is essential to keep IT knowledge and skills up-to-date. This course provides students with an enhanced understanding of the

business context and technical developments shaping contemporary information and communications technology (ICT), and equips them to meet the challenges of working in the IT industry.

Course aims

The course provides students with an understanding of the advanced concepts of information technology in a commercial environment so they can contribute to the development of IT solutions in their organisation.

Career options

Career options include a wide variety of positions in the IT industry, including business intelligence expert, e-business developer, games developer, information systems manager, IT project manager, movie animator, software architect, software quality / testing specialist and systems analyst.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

For this course an equivalent degree can be from any discipline (as applicants for this program may apply as a non-IT graduate or an IT graduate).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Applicants with a recognised bachelor's degree in computing or information technology (or equivalent) may apply for credit recognition equivalent to the 24-credit-point Graduate Certificate in Information Technology (C11142) (see page 499).

Course duration and attendance

The course duration is one-and-a-half years of full-time or three years of part-time study.

Course structure

This course totals 72 credit points, comprising eight core subjects and 18-24 credit points of electives selected from a defined list. The number of electives depends on whether students choose a 6-credit-point or 12-credit-point research project.

Students articulating from pre-2008 version(s) of the Graduate Certificate or Graduate Diploma in Information Technology are typically eligible for advanced standing of 24 credit points equivalent to the subjects in STM90695 (thus requiring 48 credit points to complete the course).

Course completion requirements

Select one of the following:	24cp
STM90695 Core subjects	24cp

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

This course is designed for students from a wide variety of disciplines who may or may not already be working in areas of multimedia. For this reason it contains a considerable number of elective subjects to enable students to gain new areas of knowledge or broaden existing areas.

While this program is managed by the Faculty of Engineering and Information Technology, it is a joint program between the Faculty of Engineering and Information Technology, the Faculty of Arts and Social Sciences, and a number of other teaching faculties.

The program is designed to educate the innovators and future leaders of the various professions working in multimedia. Graduates acquire the fundamentals in multimedia, underpinning an up-to-date, flexible set of production skills in their own specialised area.

Course aims

A defining characteristic of multimedia education at UTS is the integration of theory and practice in all of the relevant disciplines and professions. The course aims to develop students' professional skills for direct application in the workplace, while providing a solid overview and understanding of the social, historical and industrial role of multimedia communication technologies. Graduates are prepared for a career in a rapidly growing and changing industry.

Career options

Career options include positions in digital media, the mobile web, information architecture, interaction design, new media, web design, web development and web project management. Various events are organised throughout the year to showcase student work and give students the opportunity to speak with industry professionals, including recruiters.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Unless applicants have an honours degree, or equivalent, they require:

- a three-year bachelor's degree (or equivalent), plus either two years of relevant professional experience or a credit average or better in a Graduate Certificate or Graduate Diploma in Interactive Multimedia, or
- outstanding professional experience at a senior level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Given the interdisciplinary focus and teamwork emphasis of this course, credit recognition and subject exemptions are not normally granted for other postgraduate study or work experience.

Course duration and attendance

The course can normally be completed in one-and-a-half years of full-time or three years of part-time study.

Course structure

This course comprises 72 credit points of study, made up of six core subjects, four elective subjects and a digital media project.

Industrial training/professional practice

Industrial training is available to both local and international students as a separate work-based learning course. Students can enrol into the Diploma in Information Technology Professional Practice (C20049) (see page 350) after completing a minimum of four core subjects. Students can be assisted in finding an internship, or may wish to have current relevant industry work experience recognised.

Course completion requirements

95563	Digital Media Development Process	6cp
95564	Digital Media Technologies	6cp
95565	Digital Graphics and the Still Image	6cp
95566	Digital Information and Interaction Design	6cp
95567	Digital Media in Social Context	6cp
95568	Digital Sound and the Moving Image	6cp
95569	Digital Media Project	12cp

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

This course is intended for computing science, information technology or engineering graduates, with or without networking experience, who wish to learn or extend their knowledge of networking and networking technologies. As students come from a variety of backgrounds, there is a degree of subject choice in the program to meet individual needs.

The internetworking program provides practical, hands-on learning experience using resources provided by Cisco Systems for internetworking, including routing, switching, security, wireless and VoIP. Advanced electives in internetworking are available. The program covers all aspects of the organisational use of networks: design, implementation, security, management, end systems and applications.

This course allows students to develop multiple skills across the internetworking field, according to interest and elective choices, for example, switching and routing, systems and network management and analysis, network security, mobility, and web services development.

Course aims

This program aims to:

- meet the needs of industry for networking specialists
- target a number of industry-based certifications: CCNA (Cisco Certified Network Associate) and CCNP (Cisco Certified Network Professional), Cisco Wireless LAN Support Specialist and Cisco Certified Security Professional
- retrain IT professionals wishing to move into networking and internetworking
- provide a thorough and practical grounding in networking, network design, network administration and network management
- provide a solid foundation for the writing of networked applications using Unix, Java and WWW technologies, and
- meet students' needs by allowing specialisation through project work and subject choice.

Career options

Career options include applications developer, client server architect, network administrator, network architect, network designer, network integrator, network systems programmer, programmer analyst, security architect, system support analyst or a role in data communications.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications are preferred in computing science, information technology, computer engineering, telecommunications, or a related discipline.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Two years' experience in networking or in another position in the IT industry is desirable. Applicants without work experience are also considered.

Credit recognition

Exemptions are granted only for subjects at the graduate certificate level. There are no exemptions granted for the networking subjects 32524 and 32521 without the successful completion of the challenge test for each of the above. A challenge test is required even for holders of a CCNA or CCNP certification and those who have passed the CCNA curriculum in TAFE Certificate IV and/or Diploma. These challenge tests are always held in the week prior to the commencement of classes.

Course duration and attendance

The course duration is one-and-a-half years of full-time or three years of part-time study.

Course structure

This course totals 72 credit points of study, including 48 credit points for completion of the graduate diploma, plus a further 24 credit points of elective subjects, comprising either optional research methodologies and project subjects or elective coursework subjects. In some circumstances, it may be possible to choose two electives from outside the list, provided they are approved by the course coordinator.

Where applicable, project topics should be relevant to students' professional career goals and should be an area of current research interest in their area of study.

Course completion requirements

CBK90225 Core subjects choice	42cp
CBK90476 Internetworking choice	6cp
STM90729 Core subjects	24cp
Total	72cp

Course program

A typical full-time program for students commencing in Autumn semester is shown below.

Students can enrol in 32521 WANs and VLANs as either a core subject or an elective. However, as this subject has a prerequisite of 32524 LANS and Routing, it cannot be taken during the first semester of study. Full-time students are advised to enrol in 32144 Technology Research Preparation in their first semester.

Note: Subjects listed as electives may not be offered if there is insufficient demand or a lack of necessary resources.

Year 1

Autumn semester

32118	Mobile Communications and Computing	6cp
32524	LANS and Routing	6cp
32547	UNIX Systems Programming	6cp

Award(s): Master of Business in Information Technology Management (MBus)

UAC code: 940612 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

This course focuses on the role of technology in the strategic leadership of organisations. It provides a well-balanced selection of subjects, drawn from advanced information technology and business domains, in an integrated program that is relevant to the current and future demands of the IT industry and business organisations.

IT professionals who have aspirations to senior IT roles and/or business leadership positions in organisations benefit from this course. Graduates are able to contribute constructively to the effective utilisation of information technology with respect to the strategic leadership of an organisation. IT managers who already have significant levels of experience are challenged by this course and gain new perspectives on the effective leadership of organisations in the digital era.

Course aims

The course aims to develop:

- the professional skills necessary for successfully undertaking strategic leadership roles in a variety of organisational contexts, and
- a conceptual and analytical understanding of an organisation's needs in a dynamic and challenging global knowledge economy.

Career options

Graduates can be employed in the full range of organisations - private, public and community sector organisations. Graduates can prepare to take on business leadership roles with the view to gaining executive level appointments in these organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Appropriate qualifications are the successful completion of the Graduate Diploma in Information Technology Management (C06060) (see page 444), or the successful completion of the Graduate Certificate in Information Technology Management (C11138) (see page 498) with passes in all subjects and at least a credit average over the entire course. Alternatively applicants require a recognised bachelor's degree (or equivalent) in an appropriate discipline such as information technology or commerce and a minimum of five years' professional work experience in the IT industry, plus some supervisory experience.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a three-year, part-time basis.

Course structure

Students complete 72 credit points of study, made up of seven core subjects, a research project and electives.

Course completion requirements

32553	Leadership and People Management	6cp
32930	Management Research Methods	6cp
32703	Information Technology Strategy	6cp
32005	Strategic Leadership for Innovation	6cp

Overview

The Master of Arts in Information and Knowledge Management is part of an articulated program designed for people who need to provide and manage information services and/or manage and use information and knowledge effectively within organisations.

Graduates of the program have an understanding of the relationship between individuals and information and knowledge practices; contemporary issues, trends, innovations and forces for change in information practice; and ethical practice and the ability to operate with integrity, rigour, self-reliance and cooperation in professional contexts.

Course aims

Graduates of the program have:

- demonstrated sophisticated information handling skills appropriate for professional practice in diverse environments
- an understanding of how to achieve organisational objectives by creating, sharing and using knowledge
- an understanding of contemporary issues, trends, innovations and forces for change in information and knowledge practices, as well as the broader political, policy and technological contexts
- an understanding of ethical practice and the ability to operate with integrity, rigour, self-reliance and cooperation in professional contexts
- demonstrated creative, critical, reflective problem-solving capabilities in the context of their professional roles and a commitment to lifelong learning, and
- demonstrated capabilities in planning and implementing a project.

Career options

Career options include corporate information manager, database designer, electronic information systems manager, information content developer, information designer, knowledge manager, librarian, media researcher, network manager, research officer or records manager.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who have successfully completed one of the graduate diplomas in the articulated program and who are admitted to this course are eligible for credit recognition for completed subjects.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or equivalent part-time basis.

Course structure

This course requires completion of 72 credit points. Students choose one of three streams: Information Management, Knowledge Management or Records Management. Students choose subjects from a specified list of electives. Students can choose an elective subject beyond the specified list only with the approval of the graduate adviser.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

Select 72 credit points from the following options:	72cp
STM90599 Information Management stream	72cp
STM90600 Knowledge Management stream	72cp
STM90513 Records Management stream	72cp
	Total 72cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Diploma in Information Management (C07107) (see page 468), the Graduate Diploma in Knowledge Management (C07105) (not offered in 2013) and the Master of Arts in Information and Knowledge Management.

Professional recognition

Graduates are eligible for professional membership of the Australian Library and Information Association (ALIA).

Other information

Further information is available from the UTS Student Centre on: telephone 1300 ask UTS (1300 275 887)

or +61 2 9514 1222

Ask UTS www.ask.uts.edu.au

C04207v2 Master of Engineering Studies Master of Engineering Management

CRICOS code: 047834C

Commonwealth-supported place?: No

Load credit points: 96

Course EFTSL: 2

Location: City campus

Note(s)

This course is only offered to international students.

Overview

This program allows students to complete the Master of Engineering Studies (MEStud) and the Master of Engineering Management (MEM) in two years of full-time study.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

No work experience is required.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5

overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Once students have completed the Master of Engineering Management they need to submit an application for credit recognition for two subjects from the Master of Engineering Studies. Students can, therefore, complete the combined program by completing only 84 credit points (14 subjects). The faculty does not grant credit recognition based on work experience.

Course duration and attendance

The course can be completed in two years of full-time study, comprising one year for the Master of Engineering Studies and one year for the Master of Engineering Management. The course is also available part time.

Attendance in subjects is available in weekly, block and/or distance modes.

Course structure

To complete the Master of Engineering Studies (MEStud), students must complete eight postgraduate subjects (48 credit points) offered by UTS: Engineering.

To complete the Master of Engineering Management (MEM), students must complete six core subjects (36 credit points) and two elective subjects (12 credit points) as specified under that course, however, two MEM subjects may be exempted based on subjects undertaken in the MESTud. Elective subjects are chosen from postgraduate subjects offered within UTS: Engineering.

Course completion requirements

STM90547 MEM stream	48cp
CBK90330 Major choice	48cp
Total 96cp	

Course program

The typical course program comprises the following:

- Year 1: MESTud component (as per C04097) (see page 367)
- Year 2: MEM component (as per C04094) (see page 366).

Course EFTSL: 2

Location: City campus

Overview

This course is designed to enable students to achieve a comprehensive and greater understanding of information technology in specialised technical or management areas. The wide range of specialisations allows students to tailor the course to satisfy their career development needs. The extended master's allows students to study in greater depth in their chosen field.

It is essential to keep IT knowledge and skills up-to-date. This course provides students with an enhanced understanding of the business context and technical developments shaping contemporary information and communications technology (ICT) and equips them to meet the challenges of working in the IT industry.

Course aims

The course provides students with an understanding of the advanced concepts of information technology in a commercial environment so they can contribute to the development of IT solutions in their organisation.

Career options

Career options include a wide variety of positions in the IT industry, including business intelligence expert, e-business developer, games developer, information systems manager, IT project manager, movie animator, software architect, software quality/testing specialist, and systems analyst.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

For this course an equivalent degree can be from any discipline (as applicants for this program may apply as a non-IT graduate or an IT graduate).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Applicants with a recognised bachelor's degree in computing or information technology (or equivalent) may apply for credit recognition equivalent to the 24-credit-point Graduate Certificate in Information Technology (C11142) (see page 499).

Course duration and attendance

The course duration is two years of full-time or four years of part-time study.

Course structure

The course comprises 96 credit points, made up of eight core subjects and 42-48 credit points of electives selected from a defined list. The number of electives depends on whether students choose a 6-credit-point or 12-credit-point research project.

Students articulating from pre-2008 version(s) of the Graduate Certificate or Graduate Diploma in Information Technology are typically eligible for advanced standing of 24 credit points equivalent to the subjects in STM90695 (requiring 72 credit points to complete the course).

Course completion requirements

Select one of the following:	24cp
STM90695 Core subjects	24cp
CBK90802 Choice	24cp
32144 Technology Research Preparation	6cp
32541 Project Management	6cp
32563 IT Professional and Society	6cp
CBK90844 Research choice	12cp
CBK90846 Choice	42cp
Total	96cp

Course program

The following examples show typical full-time programs for IT graduates, with and without credit recognition, and for non-IT graduates.

Note: Electives are only offered in a particular semester (or year) if there is sufficient demand and the necessary resources.

IT graduates with credit recognition

Year 1

Autumn semester

32144	Technology Research Preparation	6cp
32541	Project Management	6cp
Select 12 credit points of electives		12cp

Spring semester

32563	IT Professional and Society	6cp
Select 18 credit points of electives		18cp

Year 2

Autumn semester

CBK90844	Research choice	12cp
Select 12 credit points of electives		12cp

IT graduates without credit recognition

Year 1

Autumn semester

32144	Technology Research Preparation	6cp
32541	Project Management	6cp
Select 12 credit points of electives		12cp

Spring semester

32563	IT Professional and Society	6cp
Select 18 credit points of electives		18cp

Year 2

Autumn semester

Select 24 credit points of electives		24cp

Spring semester

CBK90844	Research choice	12cp
Select 12 credit points of electives		12cp

Non-IT graduates

Year 1

Autumn semester

32555	Fundamentals of Software Development	6cp
32524	LANS and Routing	6cp
32606	Database	6cp
32144	Technology Research Preparation	6cp

Spring semester

32557	Enabling Enterprise Information Systems	6cp
32563	IT Professional and Society	6cp
32541	Project Management	6cp
Select 6 credit points of electives		6cp

Year 2

Autumn semester

Select 24 credit points of electives		24cp

Spring semester

CBK90844	Research choice	12cp
Select 12 credit points of electives		12cp

Articulation with UTS courses

This course is part of an articulated program of study comprising the Graduate Certificate in Information Technology (C11142) (see page 499), the Graduate Diploma in Information Technology (C06058) (see page 443), the Master of Information Technology (C04157) (see page 384) and the Master of Information Technology (Extended).

Professional recognition

Graduates qualify for professional-level membership of the Australian Computer Society.

Course EFTSL: 2

Location: City campus

Overview

This course is intended for computing science, information technology or engineering graduates, with or without networking experience, who wish to learn or extend their knowledge of networking and networking technologies. As students come from a variety of backgrounds, there is a degree of subject choice in the program to meet individual needs.

The internetworking program provides students with a practical, hands-on learning experience using resources provided by Cisco Systems for internetworking including routing, switching, security, wireless and VoIP. Advanced electives in internetworking are available. The program covers all aspects of the organisational use of networks: design, implementation, security, management, end systems and applications.

This course allows students to develop multiple skills across the internetworking field, according to interest and elective choices, for example, switching and routing, systems and network management and analysis, network security, mobility and web services development.

The course allows students wishing to prepare for CCNP to complete these subjects over 18 months, rather than 12 months, meeting the prerequisite requirements more effectively. Additionally, it provides research-oriented students with the opportunity to complete a larger thesis.

With the extended program, students can pursue interests in project management and software engineering. Relevant electives in business studies and law are also options for those students who wish to multi-skill across disciplines.

Course aims

This program aims to:

- meet the needs of industry for networking specialists
- target a number of industry-based certifications: CCNA (Cisco Certified Network Associate), CCNP (Cisco Certified Network Professional), Cisco Wireless LAN Support Specialist, and Cisco Certified Security Professional
- retrain IT professionals wishing to move into networking and internetworking
- provide a thorough and practical grounding in networking, network design, network administration and network management
- provide a solid foundation for the writing of networked applications using Unix, Java and WWW technologies, and
- meet students' needs by allowing specialisation through project work and subject choice.

Career options

Career options include applications developer, client server architect, data communications, network administrator, network architect, network designer, network integrator, network systems programmer, programmer analyst, security architect and system support analyst.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications are preferred in computing science, information technology, computer engineering, telecommunications, or a related discipline.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Two years' experience in networking or in another position in the IT industry is desirable. Applicants without work experience are also considered.

Credit recognition

Exemptions are granted only for subjects at the graduate certificate level. There are no exemptions granted for the networking subjects 32524 and 32521 without the successful completion of the challenge test for each of the above. A challenge test is required even for holders of a CCNA or CCNP certification and those who have passed the CCNA curriculum in TAFE Certificate IV and/or Diploma. These challenge tests are always held in the week prior to the commencement of classes.

Course duration and attendance

The course duration is two years of full-time or four years of part-time study.

Course structure

The course totals 96 credit points of study, including 48 credit points for completion of the graduate diploma, plus a further 48 credit points of options, comprising either optional research methodologies and project subjects or elective coursework subjects. Within the course there is the option of choosing 24 credit points of subjects from outside the internetworking program, provided they are approved by the course coordinator.

Where applicable, project topics should be relevant to students' professional career goals and should be an area of current research interest in their area of study.

Course completion requirements

CBK90476 Internetworking choice	6cp
CBK90477 Internetworking choice	24cp
CBK90225 Core subjects choice	42cp
STM90729 Core subjects	24cp
Total	96cp

Course program

A typical full-time program for students commencing in Autumn semester is shown below.

Students can enrol in 32521 WANs and VLANs as either a core subject or an elective. However, as this subject has a prerequisite of 32524 LANS and Routing it cannot be taken during the first semester of study. Full-time students are advised to enrol in 32144 Technology Research Preparation in their first semester.

Note: Subjects listed as options may not be offered if there is insufficient demand or a lack of necessary resources.

C04226v4 Master of Business in Operations and Supply Chain Management

Award(s): Master of Business in Operations and Supply Chain Management (MBus)
CRICOS code: 055273J
Commonwealth-supported place?: No
Load credit points: 72
Course EFTSL: 1.5
Location: City campus

Overview

New technology, particularly in the area of information, new management approaches and the pressure of global competition, has placed a premium on those who have a broad understanding of how to plan and manage complex business processes. The Master of Business in Operations and Supply Chain Management is designed for those who wish to gain significant insight and skills in these areas.

The course is designed to cater for the needs of those employed in all sectors of business.

Course aims

The course provides professionals with advanced value chain management skills and the knowledge to enhance their understanding of the nature and contribution of the operations management, supply chain management and procurement functions at a professional level.

Career options

Career options include positions in operations management, service operations management, supply chain management and strategic procurement.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583

overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course may be completed in one-and-a-half years of full-time or three years of part-time study.

Course structure

The course totals 72 credit points and consists of a combination of core and elective subjects.

Course completion requirements

Select 72 credit points from the following options:	72cp
STM90754 Standard option (Operations Supply Chain Management)	72cp
STM90753 Procurement option (Operations Supply Chain Management)	72cp
Total	72cp

Course program

The course program is shown below.

21741	Managing Operations	6cp
21743	Business Excellence	6cp
Select one of the following:		6cp
21779	Management Skills	6cp
21877	Strategic Procurement	6cp
21797	Strategic Supply Chain Management	6cp
21844	Managing Work and People	6cp
Select 42 credit points from the following options:		42cp
22782	Business Process Integration with ERP	6cp
21827	Change Management	6cp
21811	Global Strategic Management	6cp
77942	Legal Aspects of Contracts Administration	6cp

C04227v3 Master of Business in Human Resource Management

Award(s): Master of Business in Human Resource Management (MBus)

CRICOS code: 055274G

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

The Master of Business in Human Resource Management provides students with the in-depth knowledge and skills necessary to contribute at a senior level to their organisation's human resources and industrial relations functions.

The course is designed primarily for individuals who are currently employed, or show the potential for employment, at senior policy-making levels in the fields of human resource management, industrial relations, occupational health and affirmative action.

Course aims

The course aims to provide leading-edge conceptual and practical understandings of human resource management in complex and unfamiliar workplace situations in order to facilitate management decision-making.

Career options

Career options include positions in change management and general management, human resources, and organisational training and development.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course may be completed in one-and-a-half years of full-time or three years of part-time study.

Course structure

The course totals 72 credit points and consists of a combination of core and elective subjects.

Course completion requirements

CBK90386 Electives (HRM)	18cp
STM90525 Core subjects (HRM)	54cp
	Total 72cp

Course program

The course program is shown below.

Students who wish to focus on industrial relations/industrial law may substitute the business elective with an elective from the Faculty of Law, subject to approval by the course coordinator.

21702	Industrial Relations	6cp
21720	Human Resource Management	6cp
21724	Strategic Human Resource Management	6cp

C04228v1 Master of Nursing

Award(s): Master of Nursing (in name of major) (MN)

UAC code: 940826 (Education) [Autumn semester, Spring semester],

940828 (Advanced Nursing Practice) [Autumn semester, Spring semester],

940829 (Health Research) [Autumn semester, Spring semester]

CRICOS code: 055628J

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: Kuring-gai campus

Note(s)

This course also has a mid-year intake.

The Nurse Practitioner major (MAJ06214) is not offered in 2014 for new admissions.

Overview

This course is designed to provide registered nurses with the specialist skills and knowledge required for advanced practice. Students undertake one of four majors and a sub-major chosen from a wide range of specialty areas.

Students can customise their program to meet personal learning needs or workplace requirements. Majors and sub-majors can be combined in a variety of ways to achieve either generalist or highly specialised skills in addition to leadership expertise.

Students choose one of the following majors: Advanced Nursing Practice, Nurse Practitioner, Health Research (domestic students only), Education, Management.

Students complete a sub-major from the following specialty areas: acute care nursing, anaesthetics and recovery room nursing, child and family health nursing, children's nursing, clinical management,

clinical teaching, critical care nursing, diabetes education and management, mental health nursing, neonatal nursing, neuroscience nursing, and perioperative nursing.

Elective subjects planned within the course give students the opportunity to explore areas of interest in addition to their selected major.

Course aims

This course aims to:

- develop students' careers as advanced clinicians, managers, educators or nurse practitioners
- extend and enhance existing skills
- build confidence and leadership skills
- provide academic experience and qualification.

Career options

Career options include advanced practice (e.g. clinical nurse specialist or consultant), nursing management, nursing education or nurse practitioner positions in both clinical and community health settings.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

International applicants must be a registered nurse in their own country or place of residence and hold a current Authority to Practise.

Local applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

Applicants to the Master of Nursing in Health Research must have completed four subjects (24 credit points) at the postgraduate level (excluding the core subjects in the Health Research major).

Applicants to the Nurse Practitioner major need to demonstrate the following additional requirements:

- current registration as a nurse in Australia
- length and depth of experience: a minimum of five years, full-time equivalent (FTE) experience as a registered nurse, including three years FTE as a registered nurse in a specialty area and one year FTE at an advanced practice level in the relevant specialty area of practice
- requisite education or equivalent in a specialty field as entry to the Nurse Practitioner program: Bachelor of Nursing or equivalent and a postgraduate qualification in a specialty field that has prepared the student for advanced practice (either as a prerequisite or integrated into the master's degree)
- required professional activity: active involvement in professional organisations and contribution to the ongoing development of the profession
- confirmed support for the applicant to complete all professional experience requirements of the course.

For further information on additional requirements, contact the course coordinator.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or three-year, part-time basis.

Course structure

Students must complete a total of 72 credit points (12 subjects) comprising one major, which also includes a choice of one sub-major.

Course completion requirements

Select one of the following:	72cp
STM90595 Domestic students	72cp
STM90596 International students	72cp
	Total 72cp

Course program

C04229v3 Master of Business in Management

Award(s): Master of Business in Management (MBus)

CRICOS code: 055272K

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

The Master of Business in Management provides knowledge, skills and conceptual frameworks to enable students to identify and resolve complex issues that will characterise the working environments of senior managers in the future. Students acquire the conceptual and analytical skills necessary for successful management performance in a range of contexts, including the business, public and non-profit sectors, and a variety of professional settings.

The course provides students with knowledge and experiences to enhance their professional skills and understanding of the management of people, resources and organisational processes. An innovative, flexible structure provides students with maximum choice in selecting subjects and programs of study tailored to meet their personal and professional needs.

Course aims

The Master of Business in Management is designed to meet the needs of individuals, client organisations and professional bodies for management education.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course may be completed in one-and-a-half years of full-time or three years of part-time study.

Course structure

The course totals 72 credit points and consists of a combination of core and elective subjects.

Course completion requirements

CBK90382 Electives choice	18cp

Course EFTSL: 1

Location: City campus

Overview

UTS is a leading provider of language and literacy education and e-learning courses, with academics who are published authors and internationally recognised experts in these fields. This course may be completed as a general Master of Arts degree or as a Master of Arts with a major in e-learning or applied linguistics.

The Master of Arts in e-Learning provides students with the capacity to enhance learning in their diverse workplaces through new technologies, and to discover the possibilities for innovative learning. Students study e-learning models, theories, technologies and design, with electives available in the areas of digital media, graphics, imagery and information.

The Master of Arts in Applied Linguistics is designed to enable language educators and other professionals to gain a firm theoretical grounding in applied linguistics and explore its relevance to their professional practice. The course integrates theory and practice and is an internationally recognised qualification.

The Master of Arts (no specified major) contains a core of two subjects and allows students to choose a further six subjects in an area of their choice. Students may, for example, choose to specialise in the area of training and human resource development. Students wishing to study offshore (e.g. Hong Kong) should apply for the offshore equivalent course, the Master of Arts in Training and Human Resource Development (C04249) (see page 424).

Course aims

The Master of Arts in e-Learning aims to assist students to develop an understanding of the structures, functions and dynamics of a variety of e-learning systems, both locally and internationally, and become familiar, as learners, designers and teachers, with a range of e-learning environments in different disciplines, designed for different educational purposes and with different underlying values.

The Master of Arts in Applied Linguistics aims to provide a rigorous theoretical grounding in applied linguistics relevant to the needs of language educators and other professional groups; develop students' understanding of the linguistic dimensions of cultural diversity, globalisation and social change; and develop skills in the application of linguistic theory to a range of professional practice.

The Master of Arts (no specified major) aims to provide students with opportunities to relate new knowledge and skills to their own practice. The core subjects and electives are designed to promote the notion of the reflective practitioner, i.e. educate participants to critically examine and learn from their own professional experience and that of others.

Career options

Career options are dependent on the major chosen.

Master of Arts in e-Learning: graduates work in e-learning roles in community education, corporate, community and education settings, human resource development, knowledge management, learning and development and primary, secondary or tertiary education.

Master of Arts in Applied Linguistics: graduates work in educational consultancy, management and leadership, research and teaching roles in the fields of TESOL, adult basic education or linguistics.

Master of Arts (no specified major): graduates work in a wide variety of areas, providing leadership in work-based learning in a variety of national and international contexts.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Local applicants apply through the Universities Admissions Centre.

International students

International students apply through UTS International.

Course duration and attendance

The course can be completed in one year of full-time or two years of part-time study, depending on subject choice. Subjects are offered in weekly, block or distance mode.

Attendance is dependent on students' chosen major and electives. The e-Learning major requires attendance at City campus. The Applied Linguistics major and the general Master of Arts are offered in a choice of distance or face-to-face mode. Not all electives within this course are offered by distance. Students may only complete this course by distance if they select electives which are offered by distance.

This course is available for mid-year entry for full-fee-paying students in the following areas:

- Master of Arts
- Master of Arts in Applied Linguistics
- Master of Arts in Applied Linguistics (distance).

Course structure

Students must complete a total of 48 credit points. Students completing the e-learning or applied linguistics major are required to complete specified core subjects and additional electives. Students not completing a major are required to complete two core subjects and six electives.

Overview

UTS is a leading university provider of adult, teacher and general education courses in Australia with many academics recognised as leaders in this field. This course is designed to meet the specific educational needs of those wanting to be at the forefront of learning and development in educational, vocational, organisational or community settings.

The Adult Education major introduces students to an in-depth study of adult learning practice and traditions, approaches to program planning, adult development psychology, and education policy contexts.

The Indigenous Studies major is for students wanting to be at the forefront of learning and change in Indigenous education and development.

Students who select the no specified major choose a variety of subjects to form a program of study that suits their professional development needs. Given the faculty's strengths in adult and school education, students are provided with distinct opportunities to study learning and education across many educational sectors.

The Organisational and Workplace Learning major is ideally suited for people working in learning and development units, human resource management, vocational and workplace policy, organisational learning areas and those who are responsible for leading and facilitating formal and informal learning in the workplace.

The Popular Education and Social Change major is designed to meet the specific educational needs of those wanting to be at the forefront of learning in areas of social change and social movements of various kinds. It is ideally suited for people who are working with others in campaigning, organising, advocacy and activism.

Students across all majors, select electives from a wide variety of areas including educational leadership, policy, e-learning, human resource development, curriculum, communication management, assessment, program development, and many others.

Course aims

The course aims to develop a wide range of expertise, depending on the major selected. The expertise, knowledge and skills covered in this degree are:

- expertise in understanding, planning and managing learning
- locating one's practice in historical and contemporary contexts
- new and more advanced knowledge in designing, implementing and evaluating educational programs
- examining contemporary ideas and practices in social movements, new media and story making and social change, and
- examining contemporary ideas and practices in professional and organisational learning and changes in work.

Career options

Career options vary depending on the major selected, but include a diverse range of educational, policymaking, campaign organising and leadership roles such as community and health education, e-learning, higher education, human resource development, indigenous development, membership-based organisations, non-government, organisational learning and development, religious education, social movement and vocational education and training.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Students majoring in Indigenous Studies apply by direct application.

Local students

Local applicants apply through the Universities Admissions Centre.

International students

International students apply through UTS International. International applicants should check the course program to determine which majors are offered in full-time mode.

Course duration and attendance

The course can be completed in one year of full-time or two years of part-time study, depending on subject choices.

The mode of delivery of electives may vary, with subjects offered in weekly, block or distance mode. Students are able to take a combination of modes. Students taking the Indigenous Studies major are able to complete their core subjects by block mode.

Note: not all electives within this course are offered by distance and/or block. Students may only complete this course by distance/block if they select electives which are offered in those modes.

Course structure

Students must complete a total of 48 credit points.

Students completing the course with a specified major are required to complete six core subjects and two electives.

Students completing the course without a specified major are required to complete two core subjects and six electives.

C04235v2 Master of Architecture

Award(s): Master of Architecture (MArch)

UAC code: 940110 (PDFP) (Autumn semester, Spring semester), 940120 (CSP) (Autumn semester)

CRICOS code: 061397B

Commonwealth-supported place?: Yes

Load credit points: 96

Course EFTSL: 2

Location: City campus

Overview

The Master of Architecture is a focused, professional degree and is required to become a practising architect. It is the second of two degrees, undertaken after the successful completion of the Bachelor of Design in Architecture (C10004) (see page 129) or equivalent.

This course is an innovative and flexible professional degree. Through a non-sequential structure, which allows students to select from a range of core and elective subjects, it gives students choice regarding their professional specialisation that can best serve them in their future careers. Architectural design subjects enhance a critical understanding of architecture as both a discipline with an existing body of knowledge and a set of practices that continuously challenge and add to that body of knowledge. Research is undertaken as a preliminary to design decision-making, during design and in reflection on design development. Architectural practice subjects prepare students for expanded practice in emerging media and markets, contemporary business practice and global economies and within challenging social, environmental, political and regulatory contexts. Students who complete a Master of Architecture and subsequent practical experience are eligible to become registered architects.

Course aims

The course aims to produce graduates who are able to:

- work collaboratively in local and international architectural practices of differing scale, structure and operation
- be strategic and enterprising practice leaders
- critically analyse, evaluate, question and engage in informed argument
- communicate ideas effectively
- extend knowledge and understanding through research skills and to transfer this creatively through the design process
- put forward accurate and persuasive architectural proposals, and
- apply ethical, environmental, cultural, aesthetic and technological considerations in architectural practice.

Career options

Career options include architect, designer or urban designer.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

From 2016, applicants with a UTS recognised bachelor's degree must have either: (i) completed it with a WAM of 65 or above, or (ii) completed it with a WAM below 64.99 and have submitted evidence of potential to pursue graduate studies. Applicants relying primarily on a UTS recognised bachelor's degree with a WAM below 60 will not be eligible for admission to the Master of Architecture.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Students applying from other institutions, or UTS Bachelor of Design in Architecture graduates not proceeding directly to this course, must apply through UAC. Students from other institutions must also submit a portfolio of their architectural projects from previous studies.

Course duration and attendance

The course is offered on a two-year, full-time or part-time equivalent basis.

Course structure

This course comprises 96 credit points, made up of 24 credit points of core architectural practice subjects, 48 credit points of architectural design subjects and 24 credit points of electives.

C04236v3 Juris Doctor

Award(s): Juris Doctor (JD)

UAC code: 940422 (FT) (Autumn semester, Spring semester, Summer session), 940423 (PT) (Autumn semester, Spring semester, Summer session)

CRICOS code: 060932C

Commonwealth-supported place?: No

Load credit points: 144

Course EFTSL: 3

Location: City campus

Overview

The Juris Doctor (JD) is a graduate law degree that builds on the established reputation of UTS: Law to provide high-calibre, graduate-level education in the theory and practice of the law. It is specifically designed for graduates of disciplines other than law. The Juris Doctor qualifies as an Australian Qualifications Framework level 9 master's degree. The flexible nature of the JD allows students to work while they study and to tailor their workload to suit professional and personal commitments.

The JD offers an alternative pathway to practise as a lawyer for graduates who have successfully completed a first degree. In a globalised environment, the JD is internationally recognised as a graduate-level law qualification. UTS: Law integrates flexible learning options, including day and night classes, block intensive classes and online learning.

Career options

Career options include, but are not limited to, lawyer within a private firm, government department or community law centre, regulatory affairs and policy adviser in the public or private sector or legal specialisation related to students' previous degree or enhanced career options within an existing professional sphere.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

For this course the equivalent qualification required is a bachelor's degree in a discipline other than law or a law qualification from an overseas jurisdiction. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Bachelor of Laws or combined Bachelor of Laws (or equivalent) students who transfer to the Juris Doctor can receive credit for no more than half of the subjects within the Juris Doctor based on subjects completed within their undergraduate law studies. This equates to a maximum of 72 credit points.

Course duration and attendance

The standard course can be completed in three years of full-time or five years of part-time study. There are three intakes a year (in Summer, Autumn and Spring).

Students who commence in Summer session complete the introductory core law subject 70102 Foundations of Law before the start of Autumn semester, thereby accelerating their progression and completing an essential introductory area of law before the commencement of their remaining academic program.

Course structure

The course comprises a total of 144 credit points. The study components for course completion are as follows:

- 108 credit points of compulsory core law subjects (15 subjects),
- 30 credit points of law options (five subjects), and
- a 6-credit-point legal theory option (one subject).

Refer to the course entry in the UTS: Handbook 2013 for the pre-2014 course structure.

Refer to the course entry in the UTS: Handbook 2011 (Spring) for students admitted to the Juris Doctor before Summer session 2012.

Industrial training/professional practice

To practise as a lawyer in NSW, students need to successfully complete an accredited legal qualification and an accredited course of practical legal training (PLT), such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 519).

Course program

The introductory core law subject, 70102 Foundations of Law, and select core subjects may also be timetabled in Summer session.

Students in the standard full-time program enrol in between 24 and 26 credit points in Autumn and Spring semesters. Optional subjects are regularly timetabled but not all options are offered in any one semester. Optional subjects are timetabled subject to sufficient student interest.

Levels of award

The Juris Doctor may be awarded with honours. An additional year of study is not required. To qualify for honours, a student must complete 77740 Research Paper within CBK90920 Options (JD). The rules governing the Juris Doctor with honours (current and pre-2013) can be found in postgraduate course information (see page 101). See coursework research on the UTS: Law website for information on how to apply to enrol.

Articulation with UTS courses

Students who successfully complete the Juris Doctor at UTS and have completed Master of Laws (C04143) (see page 382) equivalent subjects within the Juris Doctor, may apply for these subjects to be credited towards the Master of Laws (C04143) (see page 382).

Transfer between UTS courses

Subjects undertaken within the Juris Doctor are recognised within the Master of Legal Studies (C04147) (see page 383) and the Graduate Diploma in Legal Studies (C07074) (see page 465). Students enrolled in the Juris Doctor may apply to internally transfer to the master's or graduate diploma. Candidates are not awarded the Juris Doctor but subjects undertaken are applied towards the master's or graduate diploma.

Professional recognition

This course satisfies the requirements for admission as a lawyer to the Supreme Court of NSW, provided students undertake a PLT program, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 519).

C04237v2 Master of Professional Accounting Extended

Award(s): Master of Professional Accounting (MProfAcc)

CRICOS code: 061286J

Commonwealth-supported place?: No

Load credit points: 96

Course EFTSL: 2

Location: City campus

Overview

The Master of Professional Accounting Extended is designed to provide non-accounting graduates with the necessary skills and knowledge required for a career in professional accounting. The completion of the course satisfies the academic requirements for entry to the professional programs of CPA Australia and the Institute of Chartered Accountants in Australia (ICAA).

The Master of Professional Accounting Extended provides the ideal academic foundation to pursue a career in accounting. The course provides the necessary knowledge, understanding and expertise necessary for employment in the accounting profession. Further, the professional recognition of the course by CPA Australia and ICAA provides students with internationally recognised qualifications that enhance both their employment and promotion opportunities.

Course aims

The course aims to provide local and international graduates with the requisite knowledge in accounting and the role accounting plays in providing information products supporting all areas of business activity. In addition to providing a professionally recognised qualification, the course comprises a mix of accounting, finance, legal,

communication and economics subjects that collectively provide a range of essential business skills and knowledge that are necessary for employment in today's dynamic business environment.

Career options

Career options include management-level positions in industry or government, as well as not-for-profit organisations. With the CPA and ICAA qualification being recognised internationally, the prospect for overseas employment is also enhanced.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions based on credit recognition, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course may be completed in two years of full-time or four years of part-time study.

Classes are offered over three teaching periods each year (namely Autumn and Spring semesters, and Summer session). Not all subjects are available in Summer session.

In most cases, subjects are offered on the basis of one three-hour lecture per week, over a 13-week period, however, certain subjects may be delivered in intensive mode and be completed over a shorter time period.

Course structure

The Master of Professional Accounting Extended comprises 96 credit points, made up of 13 core subjects (totalling 78 credit points), plus three elective subjects (totalling 18 credit points).

Course completion requirements

STM90696 Core subjects	78cp
CBK90807 Electives	18cp
	Total 96cp

Course program

The course program is shown below.

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Professional Accounting (C11206) (see page 508), the Master of Professional Accounting (C04238) (see page 407) and the Master of Professional Accounting Extended.

Professional recognition

CPA Australia; Institute of Chartered Accountants Australia; Institute of Public Accountants (IPA)

C04238v3 Master of Professional Accounting

Award(s): Master of Professional Accounting (MProfAcc)

CRICOS code: 061285K

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

The Master of Professional Accounting is designed to provide graduates with little or no accounting exposure with the necessary skills and knowledge required for a career in professional accounting. The course satisfies the academic requirements for entry to the professional programs of CPA Australia and the Institute of Chartered Accountants in Australia (ICAA).

This course provides the ideal academic foundation to pursue a career in accounting, with the subjects providing the necessary knowledge, understanding and expertise necessary for employment in the accounting profession. Further, the professional recognition of the course by CPA Australia and ICAA provides students with internationally recognised qualifications that enhance both their employment and promotion opportunities.

Course aims

The course aims to provide local and international graduates with the requisite knowledge in accounting and the role accounting plays in providing information to support business activities. In addition to providing a professionally recognised qualification, the course comprises a mix of accounting, finance, legal and economics subjects which collectively provide a range of essential business skills and knowledge that are necessary for employment in today's dynamic business environment.

Career options

Career options include management-level positions in industry or government, as well as not-for-profit organisations. With the CPA Australia and ICAA qualification being recognised internationally, the prospect for overseas employment is also enhanced.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions based on credit recognition, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course may be completed in one-and-a-half years of full-time or three years of part-time study.

Classes are offered over three teaching periods each year (namely Autumn and Spring semesters, and Summer session). Not all subjects are available in Summer session.

In most cases, subjects are offered on the basis of one three-hour lecture per week, over a 13-week period, however, certain subjects may be delivered in intensive mode and be completed over a shorter time period.

Course structure

The course totals 72 credit points, made up of 12 core subjects.

C04239v2 Master of Management

Award(s): Master of Management in [name of Management major]

CRICOS code: 064653M (three semesters)

Commonwealth-supported place?: Yes

Load credit points: 72

Course EFTSL: 1.5

Location: City and Kuring-gai campuses

Note(s)

The Community and Not-for-Profit Management stream is only available to students as a commonwealth-supported place.

Overview

This course provides students with an opportunity to develop skills and knowledge leading to a career in the ever-expanding experience economy and its key sectors. The core of the Master of Management has been designed to provide a business underpinning to a series of industry sector-focused majors in arts, events, sport and tourism.

In practical terms the course recognises and embraces the general notion that professionals in this new economy need to understand and plan for the experience rendered to their clients. The majors allow students to specialise and to develop a depth of understanding of management issues, challenges and approaches within a particular sector of the experience economy. The Community and Not-for-Profit Management stream develops critical and analytical skills for people working in non-profit and community organisations. Students have the opportunity to apply research skills to a project focusing on a specific aspect of community and not-for-profit management.

The Master of Management and its four industry-focused majors provide a unique suite of offerings at the postgraduate level. Sydney is the largest tourist gateway in Australia (accounting for more than two-thirds of international tourists), a major sporting hub, the home of Australia's hallmark arts companies and an international events destination. UTS is consequently in a unique position to capitalise and position itself within the growing experience economy with this course and its associated majors.

The course provides a combination of intellectual rigour with the development of a range of significant general management skills. Coupled with these is a strong practical orientation to the specialist industry sectors associated with the course's majors which provides students with opportunities to gain exposure to and experience within their specialist industry sector.

The graduate student body in the school is culturally diverse. Both domestic and international students come from a range of cultural and ethnic backgrounds. Class engagement and participation recognises and embraces this diversity. A number of the school's staff have experience in international teaching in China, Malaysia, Cambodia, Thailand, Singapore, the United Kingdom and Europe, and are thus able to bring a global perspective to the international environment in which they engage.

The well-developed industry focus of the course, the strong connections to the Sydney market, the opportunities for professional engagement and a global outlook in classroom interactions are all significant markers of this program.

The Community and Not-for-Profit Management stream provides an opportunity to study at a professional level those factors contributing to the effective management of non-profit organisations. Students develop an understanding of this 'third sector' and its social and economic context, and are introduced to ways of thinking systematically about non-profit organisations and their management. Students also gain knowledge of the range of non-profit organisations, their structure and distinguishing features.

Course aims

The aim of the course is to prepare forward-thinking, work-ready graduates with the business, management and interpersonal skills to function effectively as professionals within their selected industry sector of the arts, events, tourism, sport or community and not-for-profit organisations.

Career options

The course provides for a wide range of career opportunities within each of the four industry sectors linked to its specialist majors.

In Arts Management, graduates may pursue careers in such fields as:

- cultural policy
- marketing performing arts
- cultural venue management
- arts and cultural development management
- gallery and museum management
- dance, theatre and popular music.

In Event Management, graduates may pursue careers in such fields as:

- event planning and development
- conference management
- event marketing
- exhibition management
- corporate event management
- festival and special event management
- place management.

In Sport Management, graduates may pursue careers in such fields as:

- sport marketing
- sport event management
- venue and facility management
- sports development
- sports administration
- operations management.

In Tourism Management, graduates may pursue careers in such fields as:

- tourist attraction management
- tour wholesaling and operations
- tourism marketing
- tourism research
- tourism planning and development
- hotel development, marketing and management
- airline and transportation management
- ecotourism operations and management.

In Community and Not-for-Profit Management, career options include managing non-government or non-profit organisations, working in the field of corporate social responsibility, or in government particularly in roles that work with community or not-for-profit organisations such as:

- social and community welfare
- environment advocacy
- arts and culture
- fundraising
- education
- international aid and development
- professional associations and unions.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions, of which four compulsory subjects may be approved from prior undergraduate study. Compulsory subjects, in this context, include core subjects plus the required subjects to complete a specific major.

Course duration and attendance

The course duration is one-and-a-half years, full time; or three years, part time.

The Community and Not-for-Profit Management stream is taught in flexible mode, including three intensive workshops of five days each, self-managed learning packages and learning partnerships to develop peer-supported networks.

Course structure

The course comprises 72 credit points, made up of five core subjects (30 credit points) and seven elective subjects (42 credit points) comprising a major in either tourism, arts, sports or event management. Within each major there are five compulsory subjects that must be completed for a student to be credited with that major. The remaining two elective subjects may be selected from subjects offered in other majors, or students may elect to do an industry-based research project or professional internship placement.

The Community and Not-for-Profit Management stream comprises 72 credit points of study, made up of eight core subjects (48 credit points) and four elective subjects (24 credit points).

Course completion requirements

Select 72 credit points from the following options:	72cp
STM90774 Standard options (Management)	72cp
STM90776 Community and Not-for-Profit Management	72cp
Total	72cp

Course program

Example course programs for each major are provided below.

Arts Management

Year 1

Autumn semester

27753	Arts and Cultural Industries	6cp
27755	Arts Organisations and Management	6cp
21751	Management Research Methods	6cp
22747	Accounting for Managerial Decisions	6cp

Spring semester

27763	Arts and Cultural Policy	6cp
27734	Marketing for the Experience Industries	6cp
27778	Innovative Services Management	6cp
27717	Venue and Facility Management	6cp

Year 2

Autumn semester

27729	Legal Issues for the Experience and Not-for-Profit Industries	6cp
27733	The Experience Economy	6cp

Select 12 credit points of electives 12cp

Event Management

Year 1

Autumn semester

27727	Event Creation Workshop	6cp
27765	Event Management	6cp
21751	Management Research Methods	6cp
22747	Accounting for Managerial Decisions	6cp

Spring semester

27726	Event Concepts and Contexts	6cp
27737	Event Risk Management	6cp
27717	Venue and Facility Management	6cp
27734	Marketing for the Experience Industries	6cp

Year 2

Autumn semester

27733	The Experience Economy	6cp
27729	Legal Issues for the Experience and Not-for-Profit Industries	6cp

Select 12 credit points of electives 12cp

Sports Management

Year 1

Autumn semester

27732	Sport Organisations	6cp
27715	Sport Business	6cp
21751	Management Research Methods	6cp
22747	Accounting for Managerial Decisions	6cp

Spring semester

27717	Venue and Facility Management	6cp
27734	Marketing for the Experience Industries	6cp
27721	Sport Globalisation	6cp
27778	Innovative Services Management	6cp

Year 2

Autumn semester

27733	The Experience Economy	6cp
27729	Legal Issues for the Experience and Not-for-Profit Industries	6cp

Select 12 credit points of electives 12cp

Tourism Management

Year 1

Autumn semester

27735	Tourism and the Industry	6cp
27767	Tourist Behaviour	6cp
21751	Management Research Methods	6cp
22747	Accounting for Managerial Decisions	6cp

Spring semester

27706	Managing Tourism Services	6cp
27734	Marketing for the Experience Industries	6cp
27700	Sustainable Tourism Management	6cp
27778	Innovative Services Management	6cp

Year 2

Autumn semester

27733	The Experience Economy	6cp
27729	Legal Issues for the Experience and Not-for-Profit Industries	6cp

Select 12 credit points of electives 12cp

Community and Not-for-Profit Management

Year 1

Autumn semester

21766	Managing Community Organisations	6cp
21778	Resource Mobilisation	6cp
22747	Accounting for Managerial Decisions	6cp
21751	Management Research Methods	6cp

Spring semester

21767	Not-for-Profit Sector Theory and Context	6cp
21817	Volunteer Management	6cp

Select 12 credit points of electives 12cp

Year 2

Autumn semester

21879	Corporate Social Responsibility and Measuring Social Impact	6cp
27729	Legal Issues for the Experience and Not-for-Profit Industries	6cp

Select 12 credit points of electives 12cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Event Management (C11038) (see page 481), the Graduate Diploma in Event Management (C06017) (see page 440), the Graduate Certificate in Tourism Management (C11035) (see page 480), the Graduate Diploma in Tourism Management (C07027) (see page 459), the Graduate Certificate in Arts Management (C11033) (see page 479), the Graduate Diploma in Arts Management (C07028) (see page 460), the Graduate Certificate in Sport Management (C11037) (see page 480), the Graduate Diploma in Sport Management (C07029) (see page 460), the Graduate Diploma in Community and Not-for-Profit Management (C07019) (see page 457), the Graduate Certificate in Community and Not-for-Profit Management (C11024) (see page 478), and the Master of Management.

Professional recognition

The Community and Not-for-Profit Management stream is accredited by the Nonprofit Academic Centers Council (NACC).

C04240v1 Master of Advanced Architecture

Award(s): Master of Advanced Architecture in (name of specialisation) [MAdvArch]

UAC code: 940114 (Autumn semester, Spring semester)

CRICOS code: 065866A

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

The Master of Advanced Architecture is a post-professional coursework degree leading to either one of two qualifications: the Master of Advanced Architecture in Urban Design or the Master of Advanced Architecture in Design Technologies.

The Design Technologies specialisation focuses on computationally driven architectural design and its expansion into digital manufacturing, prototyping, and materials technologies, as well as the realisation of responsive environments. This degree is an evolution of UTS's Master of Digital Architecture.

The Urban Design specialisation addresses the intersecting challenges of social and political change, environmental degradation and globalisation through the design of the urban fabric, including infrastructure, buildings and open spaces.

Project-based learning is a core focus of the course with projects adapted from practice situations as vehicles for advancing the professional practice of architecture and urban design. Relevant and challenging projects faced by industry are tested as vehicles in an academic setting.

The course has a strong element of internationalisation through the inclusion of intensive master classes and a global field studio that sees key international urban designers, architects and theorists teach into the course each year.

The Master of Advanced Architecture combines subjects in research and theory, with the development of advanced design and technical skills. The two qualifications share an emphasis on project-based coursework through which students learn to apply digital techniques to spatial research and design at the scale of the city or the architectural project.

Subjects include spatial research, demonstration projects oriented towards industry and competition subjects ensure strong integration between urbanism, architecture and new technologies at the cutting edge of design. This provides a breadth of exposure and responsibility unique in Australian architectural education.

Course aims

The Master of Advanced Architecture in Design Technologies equips architecture professionals with the research and design skills to effectively develop and lead the architecture profession locally and internationally in the emerging disciplinary field of architecture, computation and digital manufacturing. Its content is based on the close relationship between new technologies for architectural design related to analysis, synthesis, prototyping, implementation and management of our built environment and the challenges of producing socially and environmentally sustainable buildings and cities in complex political, economic and social conditions. Accordingly the course balances theory with practice, ethics and development, creative speculation and applied research. Through project-based research studios, students explore new design technologies and their capacity for design production and analysis integrating material and spatial informatics towards advanced experimental design research.

The Master of Advanced Architecture in Urban Design trains students to shape the physical environment of the city through ideas, plans and policies. Rather than apply existing solutions for a city, the course encourages students to re-frame the challenges of the urban environment, to become a central participant in the larger political context and to implement advanced architectural design in cities. New methods for mapping and experiencing cities are used to develop urban design responses that take into account existing knowledge and develop alternative futures.

Career options

Career options are focused on leading design and technical innovation roles in architecture and urban design.

Graduates in the Design Technologies specialisation can also take roles in manufacturing and RP modelling, systems and strategic design and analysis, architectural animation and visualisation.

Career options for graduates with the Urban Design specialisation include positions in urban design, urban strategy and policy and architectural design.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants require a five-year full-time or equivalent professional entry degree from an accredited program in architecture or a four-year full-time or equivalent degree from an accredited program in landscape architecture.

Alternatively applications can demonstrate an equivalency through a portfolio and relevant experience in an allied design profession.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

All applicants must submit a portfolio of work demonstrating their design skills for examination in addition to a statement of interest in the course.

Course duration and attendance

The course is offered on a one-year, full-time or two-year, part-time basis.

There is also the possibility of international field trips.

Course structure

The course comprises 24 credit points of classes in Autumn semester (over 14 weeks), a 12-credit-point studio in July session (over four weeks), 24 credit points of classes in Spring semester (over 14 weeks), and a 12-credit-point demonstration project in Summer session (over eight weeks).

Course completion requirements

11520	Spatial Research	6cp
11525	Demonstration Project	12cp
CBK90623	Advanced Architecture	12cp
CBK90624	Advanced Architecture Studio	42cp
		Total 72cp

Transfer between UTS courses

Entry into this course can occur via one of the following UTS pathway courses: the Master of Architecture (C04235) (see page 404), the Graduate Diploma in Architecture (C07115) (see page 470) or the Graduate Certificate in Architecture (C11212) (see page 511).

CRICOS code: 071909M; 072904G (Accelerated)

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Overview

This course is designed to cater for two distinct groups of students: professional scientists wishing to update their industry-related skills for career advancement and students considering a research degree.

The course contains a compulsory core of professional subjects relevant to all science disciplines. The subjects in the core provide a backbone of skills important to a professional scientist; be they engaged in research, science businesses, industries or government organisations. These are the skills of communication, critical analysis, project management and innovation and commercialisation. The professional strand is complemented by a choice of major study in a specific science or mathematics discipline, or in science management. Students also have the option of undertaking a research project, subject to approval by the faculty. For students with suitable achievement levels considering a research degree, this course provides a pathway to a PhD.

Students in the Marine Science and Management major are exposed to multi-disciplinary and cross-institutional coursework, with a capstone project taught at the Sydney Institute of Marine Science (SIMS) and multiple lecture series and practical components using real-life data from the Australian Integrated Marine Observatory System.

Course aims

The course provides graduates with analytic tools and disciplinary knowledge, combined with creative, logical approaches to problem-solving and professional skills that facilitate real world application of the science such as project management, IP management and commercialisation.

Career options

Career options vary according to the major chosen, but all graduates have training in the professional attributes that employers seek. The skills learnt expand career horizons and enhance prospects for promotion in the rapidly evolving science professions. Graduates in all majors may also proceed to a career in research through entry to a PhD.

- Graduates of the **Biomedical Engineering major** will be well prepared for careers in medical device and biotechnology companies, government policy and regulation, hospitals, and research organisations where the ability to combine biology and engineering knowledge and skills is required.
- Graduates of the **Marine Science and Management major** can pursue careers worldwide in private and public agencies, or as private consultants in fields such as policy and conservation, fisheries, environmental sustainability and management, impact assessment, tourism, and education.
- Graduates of the **Environmental Change Management major** may find management and leadership positions in government agencies, the private sector and community organisations concerned with biodiversity, coastal zone management, climate change adaptation, environmental policy, environmental remediation, environmental sustainability, fisheries, infrastructure, land and water resources, national parks and wildlife, planning, and natural resources management.
- **Forensic Science major** graduates may take up positions in police forensic laboratories, state and federal law enforcement agencies, government and private forensic or drug detection laboratories, customs and border protection agencies, and environmental protection agencies.
- Graduates of the **Mathematical and Statistical Modelling major** may expect to apply their logistic, statistical and modelling skills in careers in a wide range of diverse organisations and industries,

including banking and finance, health, information technology, and market research.

- Career options for **Medical Biotechnology major** graduates include senior positions in public health units, hospitals or government departments, or as policy analysts or consultants, providing links with bodies such as state health departments. Graduates may also pursue management positions in diagnostic medical laboratories, or in pharmaceutical or biotechnology companies.
- Graduates of the **Science Management major** are focused towards careers in management of science industries and organisations. This major is specifically designed for science graduates who are making, or expect to make, the transition to management roles in their place of employment.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Entry into any of the majors requires a minimum of a Bachelors degree in a related discipline.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students enrolled in this course may be eligible for credit recognition of up to 24 credit points if the subjects previously studied are deemed by UTS: Science to be equivalent to those specified for their course.

To be considered for credit recognition, subjects must normally have been completed no more than five years prior to the commencement of this course.

Course duration and attendance

The standard course duration is 18 months of full-time study.

The course may also be completed in part-time mode, typically over 36 months. Part-time students must be prepared to attend some afternoon or morning classes during each teaching week.

Course structure

The course requires 72 credit points of study, comprising 24 credit points of professional stream subjects and a 48-credit-point major.

A non-specified major in which cross-disciplinary subject selection is possible is also offered.

Course completion requirements

STM90522 Professional stream	24cp
CBK90644 Major choice	48cp
	Total 72cp

Course program

Example programs for the accelerated mode commencing in either Autumn or Spring semesters for all majors except Forensic Science and Biomedical Engineering are shown below.

The Forensic Science major (MAJ01123) contains a mix of subjects from different forensic disciplines and example programs are more difficult to predict because subject choices are influenced by prior study. A typical 18-month program focusing on the forensic chemistry discipline with admission in Autumn semester is shown below, as well as a typical 18-month program focusing on the forensic biology discipline with admission in Spring semester. Students with appropriate backgrounds wishing to choose a mixture of forensic chemistry and forensic biology subjects should seek advice from their program advisers.

The Biomedical Engineering major (MAJ03470) contains a mix of subjects from different science and engineering disciplines and example programs are more difficult to predict because subject

choices are influenced by prior study. Typical 18-month programs for students admitted in either Autumn or Spring semester, with prior backgrounds in either biomedical or physical science are shown below. Depending on selection of electives, the number of elective credit points in a given semester may differ from that listed below.

The Marine Science and Management major (MAJ01130) requires two subjects to be chosen from external partner universities and the subject chosen may affect the course duration, depending on semester of offer of the selected subject. Example programs for the accelerated mode commencing in either Autumn or Spring semesters are shown below, however it should be noted that these are possible only if the specific optional subjects illustrated are chosen.

C04242v1 Master of Communications Law

Award(s): Master of Communications Law (MCommLaw)
UAC code: 940430 (Autumn semester, Spring semester)
CRICOS code: 071753D
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus

Overview

Emerging as a critical media and legal specialisation, communications law at UTS offers an opportunity for non-law as well as law graduates to develop an understanding and demonstrate their expertise as media professionals and commentators, policy makers and lawyers, managers and researchers in this important area.

Students are exposed to key issues within the field such as: the roll-out of the national broadband network (NBN); cyber-security; legal perspectives on the internet; the role of law and regulation in communications, media and entertainment; and the relationship of intellectual property and technology.

Career options

Career options exist for non-law professionals to enhance prospects as communications policy advisors, editorial and management positions, online/social media consultants, lobbyists, researchers for public interest groups and industry commentators. Practising lawyers can expand their legal specialisations in areas including communications law, intellectual property, media and entertainment law, telecommunications law, technology law and corporate law.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course can be completed in a minimum of one year of full-time study or two years of part-time study.

Course structure

Two streams are available in the course:

- Students who hold an undergraduate legal qualification must complete six option subjects (48 credit points).
- Students who hold an undergraduate degree in a discipline other than law must complete one core introductory subject (8 credit points) followed by an additional five subjects (40 credit points).

Students who have completed an undergraduate legal qualification should contact the UTS Student Centre during enrolment if their study plan includes the Non-law graduate entrant stream (STM90543).

Subjects are regularly timetabled but not all subjects listed are offered in any one semester. Timetabled subjects are offered subject to sufficient student interest. The current timetable can be found at: <http://timetable.uts.edu.au>

Course diagram

Law graduate entrants

Master of Communications Law

6 x 8-credit-point options
Total 48 credit points

Non-law graduate entrants

Core subject

1 x 8-credit-point subject
Total 8 credit points

Master of Communications Law

5 x 8-credit-point options
Total 40 credit points

Course completion requirements

Select one of the following:	48cp
STM90543 Non-law graduate entrant stream	48cp
STM90542 Law graduate entrant stream	48cp
Total	48cp

Levels of award

To qualify for honours, candidates must attain a weighted average mark of 80 per cent across all subjects attempted.

Articulation with UTS courses

Students enrolled in the Graduate Certificate in Communications Law (C11217) (see page 513) may apply to transfer to the Master of Communications Law. Successful candidates are not awarded the graduate certificate but subjects undertaken within the graduate certificate are recognised and applied towards the master's.

C04243v2 Master of Design

Award(s): Master of Design in (name of Design major) (MDesign)

UAC code: 940107 (Autumn semester, Spring semester)

CRICOS code: 071751F

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

Unique in Australia, the Master of Design is intellectually vibrant, socially engaging, visionary, practice focused and actively linked to industry. This course is centred around building a design community network. The course has two main components: specialised master classes led by a studio leader and industry partners and theory and technology subjects taught across the program.

The program focuses on and integrates research, industry collaboration, internationalisation and a design culture through the delivery of specialist, core and trans-disciplinary subjects. It provides a postgraduate education that is flexible in both its practice orientation and research integration.

With a focus on design evolution, innovative integration of new technologies, practice and student experimentation, this Master of Design is delivered by experienced studio leaders who are acknowledged leaders in the specific industries and professions.

Course aims

Designed to produce a balance between high levels of specialisation and lateral thinking, the program enables students to examine design from a trans-disciplinary perspective.

It enables students to explore design issues under the supervision of a practice leader, to learn new strategies and the application of research and theory. It supports best practices in postgraduate design education through learning and research strategies that critically examine design practice.

Graduates of this course are leaders in design and related industries through their expertise in product and service development. They are able to utilise strategic processes, creative tools and research skills for innovation in design.

The program provides a suite of subjects for postgraduate designers in the areas of interaction, strategy and enterprise, lighting design, technotextiles, and text and image. Common subjects explore related conceptual challenges and questions of visual expression in the quest to develop useful, usable and resonant designs. These include understanding and articulating the importance of 'user experience', the role of design in humanising information, the aesthetic and conceptual dynamics of effective communication, strategic thinking, and aspects of design management, branding and communication.

Career options

Graduates' careers are enhanced by high-level professional knowledge and skills for the workplace, with possession of specialised knowledge in advanced textiles, space and materials, interaction, sustainable design and innovation.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

In addition to the above qualifications, applicants need to satisfy all of the following:

- a bachelor's degree in a design-related field with a mid-credit (70) average from a UTS recognised university including identified study that relates to the applicant's specified major/cluster
- a CV that clearly articulates the applicant's design or related experience and may include documentation/examples of previous work
- a digital portfolio of six A4 landscape pdfs: five of these pdfs must be digital files of scans and/or photographs or original design work appropriate to the master's studio being applied for
- one of the pdfs must be a statement of 300 words stating studio preferences and addressing the applicant's reasons for undertaking study in the nominated specialisation.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or three-year, part-time basis.

Course structure

Students must complete 72 credit points comprising 36 credit points of core subjects and 36 credit points of design expertise subjects.

Course completion requirements

CBK90665 Design major choice	36cp
CBK90890 Theory and Technology subjects (Design)	36cp
Total	72cp

Exit award

Students can exit this course after completing 48 credit points of specified subjects with a Graduate Diploma in Design (C07119) (see page 473) or after completing 24 credit points of specified subjects with a Graduate Certificate in Design (C11225) (see page 516).

C04244v1 Master of Arts in Non-fiction Writing

Award(s): Master of Arts in Non-fiction Writing (MA)
UAC code: 940530 (Autumn semester, Spring semester)
CRICOS code: 071748A
Commonwealth-supported place?: No
Load credit points: 72
Course EFTSL: 1.5
Location: City campus

Overview

The Master of Arts in Non-fiction Writing is designed for experienced writers who are prepared to undertake advanced work in the growing field of non-fiction. In Australia, the non-fiction book market is much larger than the fiction market.

The course builds on the research and teaching strengths in areas of creative writing, journalism, media arts and production, and information and knowledge management.

It focuses on writing and research skills including identifying a subject, using archives, examining methods, exploring genres and structuring material for a full-length non-fiction book. In this course, non-fiction includes biography, life writing, true crime, travel writing, sports writing, the personal essay and other forms of sustained and structured non-fiction narrative. Students can study one genre in depth or explore a range of genres and media.

Students learn valuable skills and work towards developing a major project under the guidance of an academic faculty member with expertise in non-fiction.

Course aims

Graduates of this course develop:

- general and specific skills in non-fiction writing across a range of genres
- an ability to develop and critically revise their own work
- an ability to structure and sustain a book-length narrative
- an understanding of the relationships of writing practice and publication across a range of media and contemporary cultural forms
- a critical knowledge of aesthetic debates and modern developments in non-fiction, and
- an ability to think creatively and critically.

Career options

Career options include biographical and historical writing, freelance writing and editing, life writing, media research, publishing, professional writing, true crime writing, and editing in cultural organisations or government departments.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

All applicants are required to:

- explain what writing experience they have
- list their publications, if any
- attach one example of their non-fiction writing
- supply written references from people who are familiar with their ability and potential (if the applicant does not have academic or professional qualifications).

Credit recognition

Previous study is assessed at the time of application to determine whether completed study satisfies course completion requirements.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or two-and-a-half-year, part-time basis.

Course structure

The course comprises 72 credit points, made up of five core subjects and three elective/sub-major subjects. Students may select subjects beyond the lists of elective subjects with the approval of the graduate adviser. Not all subjects are available each semester.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

CBK90828 Electives/Sub-major (Non-fiction Writing)	24cp
STM90556 Core subjects (Non-fiction Writing Project)	24cp

C04245v1 Master of Arts in Teaching English to Speakers of Other Languages

Award(s): Master of Arts in Teaching English to Speakers of Other Languages (MA)

UAC code: 940224 (CSP) (Autumn semester), 940225 (PDFP) (Autumn semester, Spring semester), 940226 (qualified teachers only distance CSP) (Autumn semester), 940227 (qualified teachers only distance PDFP) (Autumn semester, Spring semester)

CRICOS code: 071629G

Commonwealth-supported place?: Yes

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

UTS is a leading provider of postgraduate language and literacy courses, with academics who are published authors and internationally recognised experts in the field. This course meets the professional development needs of a wide range of English language teachers in Australia or internationally; teaching children, teenagers or adults. It caters to those seeking an initial teaching qualification in teaching English to adult speakers of other languages. It is also well suited

to applicants who already possess a teaching qualification and wish to gain a specialist degree in the field as they are eligible for credit recognition. The course consists of subjects that equip teachers with skills and in-depth knowledge in the areas of teaching practice, pedagogical grammars, global Englishes, discourse analysis, phonology and pronunciation, language teaching technologies, language development, language for specific purposes and more.

This course is designed for those who wish to pursue a specialist area and to understand in more detail the theoretical basis of TESOL practice. The course is tailored to cater to the needs of participants who as yet have no teaching experience, as well as to the needs of participants with experience but no recognised initial teaching qualification. The subjects are designed for those with teacher qualifications and experience, particularly in the field of TESOL. The course features flexible study options with classes held at times suitable for full-time workers. Students who receive a minimum of 24 credit points of credit recognition may complete the course by distance, but only if relevant distance subjects are selected.

The course explicitly meets the needs of students and educators in the following contexts:

- working with migrants and Indigenous students across all levels of education
- teachers wishing to change discipline areas
- teaching English in countries outside of Australia
- international students wishing to study TESOL at master's level.

Course aims

The course aims to produce TESOL teachers who are knowledgeable, reflective and engaging in their practice, have well developed interpersonal skills, are keen to put current developments in learning and teaching into practice, and have a commitment to lifelong learning.

Career options

Career options include a teacher of English as a second language in Australia or a teacher of English in overseas contexts (applicants are advised to check with potential employing bodies regarding employment requirements).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications**Local students**

Local applicants apply through the Universities Admissions Centre.

Credit recognition

Graduates of the Graduate Certificate in Teaching English to Speakers of Other Languages (C11223) (see page 515), or equivalent teaching qualification (such as a primary or secondary school teaching qualification or an adult education teaching qualification), are eligible for 24 credit points of credit recognition.

Graduates of the Graduate Diploma in Teaching English to Speakers of Other Languages (C07118) (see page 471), or equivalent postgraduate teaching qualification, are eligible for 48 credit points of credit recognition.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or three-year, part-time basis.

Students who receive a minimum of 24 credit points of credit recognition may complete the course by distance, but only if relevant distance subjects are selected.

The subjects in STM90529 are run in standard weekly mode for TESOL students, except for 010071 Professional Practice 2 Language Literacy and Numeracy, which is run in block mode.

Course structure

The course comprises 72 credit points, made up of five compulsory core subjects (totalling 30 credit points) and seven elective subjects (totalling 42 credit points).

Industrial training/professional practice

There is a practicum placement for subjects 010070 Professional Practice 1 Language Literacy and Numeracy and 010071 Professional Practice 2 Language Literacy and Numeracy.

C04246v1 Master of Health Services Management and Planning

Award(s): Master of Health Services Management and Planning (MHSMPlan)

UAC code: 940811 (Autumn semester, Spring semester)

CRICOS code: 071627K

Commonwealth-supported place?: No

Load credit points: 96

Course EFTSL: 2

Location: City campus

Note(s)

This course offers a mid-year intake for local and international students.

Overview

This is a comprehensive course in health services planning and management and aims to expand students' knowledge and future career opportunities. The course develops students' knowledge and skills, which leads to an enhanced capacity to plan and manage health services in a diverse range of health settings.

Graduates of this course are exposed to academic and industry leaders who share their experience and knowledge to facilitate insight into the contemporary health service management environment.

Course aims

This course is designed to prepare new, aspiring, and middle health service planners and managers to assume a leadership role in the strategic and operational management of a wide range of health services and facilities. The content aims to develop skills in planning and evaluating health services, understanding health needs, and managing people, resources, systems and processes within health services to meet the changing needs of communities, clinicians, governments and organisations.

Career options

Career options include positions as managers and/or planners in health authorities, hospitals, primary and community care, aged care services and other healthcare facilities in the public, private, not-for-profit, government and non-government health sectors.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

This evidence may include extensive relevant work experience in a health or human services field.

Applicants must have at least one year's full-time equivalent experience in a medium to large organisation, preferably in the health or human services area. Work experience undertaken in small work settings (e.g. private practice settings with a small number of professionals) or as part of intern requirements are not accepted.

Applicants who do not have an undergraduate degree but who have extensive relevant work experience in a health or human services field and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course duration is two years of full-time or four years of part-time study.

Subjects are offered via on-campus study. Part-time students usually study two subjects a semester and full-time students usually study four subjects a semester.

Course structure

Students must complete a total of 96 credit points, comprising 14 core subjects offered by UTS: Health and UTS: Business and two electives offered by UTS: Health and UTS: Design, Architecture and Building. Students who wish to undertake an elective that is not listed should seek advice from UTS: Health.

C04247v1 Master of Midwifery

Award(s): Master of Midwifery (MMid)

Master of Midwifery in Health Research (MMid)

CRICOS code: Pending

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Note(s)

Students admitted to the Master of Midwifery (Conversion) before 2011 should refer to the course entry in the 2010 handbook.

This course is not offered in 2014 for new admissions.

This course is not offered to international students.

Overview

This course aims to provide registered midwives with an opportunity to develop both their practice and professional roles and to develop the skills, attitudes and knowledge to meet the developing role of a midwife. In addition, the course aims to provide students with an avenue through which to further their clinical, research, teaching, leadership and/or management roles. The course is designed to offer students the opportunity to customise their program to meet personal learning needs or workplace requirements.

The course enhances the professional development of the midwife through the investigation of varied theoretical perspectives pertinent to midwifery issues. Students develop a complex understanding of issues related to interdisciplinary collaboration in the development of maternity services, and engage in critical thinking in order to inform clinical judgment and decision-making within the midwifery context of woman-centred practice. Recognising and building on extensive midwifery practice, the course prepares students as scholars, leaders and change agents within midwifery.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a midwife in Australia.

Registered midwives who have completed a certificate in midwifery leading to registration as a midwife or completed a graduate diploma in midwifery or equivalent leading to registration as a midwife are also considered eligible.

Where large numbers of applicants are eligible for admission to any of the faculty's courses and places are limited, preference is given on the basis of:

- general educational qualifications
- previous academic grades, and
- CV which demonstrates professional experience and activities, e.g. post-registration certificates and scholarly activities such as research and publications.

Applicants to the Master of Midwifery in Health Research must have completed four subjects (24 credit points) at the postgraduate level (excluding the core subjects in the Health Research major).

Students' current midwifery registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students who hold an existing Graduate Diploma in Midwifery are eligible to apply for credit recognition in the form of exemptions from four specified subjects (24 credit points).

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or three-year, part-time basis.

Course completion requirements

Select 72 credit points from the following options:	72cp
STM90530 Level 1 subjects (Midwifery)	24cp
STM90531 Level 2 subjects (Midwifery)	24cp

C04248v1 Master of Media Arts and Production

Award(s): Master of Media Arts and Production (MMAP)

UAC code: 940503 (Autumn semester, Spring semester)

CRICOS code: 032718G

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

This course is designed for graduates in media production, or those with significant experience in the field, to allow them to advance their skills and theoretical understanding of the consumption and production of media products. The course further develops professional, specialised skills and knowledge in at least one area of media production: digital media, sound, interaction and moving image. With guidance from faculty experts, students can also create a major piece of production work in film, video, sound, radio, digital media, performance or installation.

Course aims

This course aims to provide students with the opportunity to develop advanced production and conceptual skills in media production. Through the research and production of a creative project, students increase their capacity for developing independent, creative and innovative projects. The course gives students the option to experience the creative and technical development of a significant production, or to focus their skills in one key area of the media industries.

Career options

Career options include taking part in a creative team as writer, producer, director, or working in particular roles in production and post-production of moving image, sound, digital media and interaction. Graduates have the capacity and experience to develop, initiate and produce their own media projects.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who have successfully completed the graduate certificate or the graduate diploma in the articulated program are eligible for credit recognition for completed subjects.

Course duration and attendance

The course is one-and-a-half years of full-time or two-and-a-half years of part-time study.

Course structure

Students complete 72 credit points of study made up of three core subjects and six elective/sub-major subjects.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

CBK90800 Electives/Sub-major (MAP)	48cp
STM90555 Core subjects (Media Arts and Production)	24cp
Total	72cp

Course program

Below are examples of typical programs for full- and part-time students. Students can choose to complete core subjects and elective/sub-major subjects in any order, however, prerequisites may apply.

Students considering enrolling in the Journalism or Screenwriting sub-major should commence their sub-major as soon as possible or in their second semester, so as to satisfy all prerequisite requirements and to complete on time.

C04249v1 Master of Arts in Training and Human Resource Development

Award(s): Master of Arts (MA)

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: Hong Kong

Note(s)

This course is only offered offshore. It is available in Hong Kong. The language of tuition is English.

This is an offshore course offered in Hong Kong. Students wanting to study in Australia should apply for the equivalent onshore course, the Master of Arts (C04231) (see page 398).

Overview

This course is intended for those who wish to develop their knowledge and competence in the theory and practice of management and leadership in international training and educational resources.

This course has been designed to meet the educational needs of training professionals and human resource development managers. The subjects are drawn from the general masters-level subject bank and have been selected to offer a specific focus on human resource development. Students study the same core subjects as students enrolled in the Master of Arts (no specified major) (C04231) (see page 398). It is ideally suited to those seeking a qualification for strategic positions in learning and development units, human resource management, vocational and workplace policy, organisational learning areas, and those who are responsible for leading and facilitating formal and informal learning in the workplace.

Course aims

This course aims to:

- provide opportunities for participants to relate new knowledge and skills to their own practice
- promote the notion of the reflective practitioner, i.e. educate participants to critically examine and learn from their professional experience and that of others
- develop strategic ways of analysing practice situations, modes of analysis and research which account for the complexity of HRD practices and reveal ways of working within that complexity

- enable students to consolidate or extend their specialist professional competence as practitioners in fields of practice relating to human resources development
- strengthen students' understanding of the relevant theoretical underpinning, particularly in relation to knowledge about adult learning and development
- enable students to apply new understandings about training, leadership and management to their own professional practice.

Career options

Career options include educational and training leadership roles in various capacities, such as policy making, research, consulting, planning, curriculum development, and management in teaching and learning organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants previous qualifications should be in a related field of study. In addition to the English language requirements detailed below, other acceptable equivalent English language qualifications as approved by UTS Academic Board, are, for example, the successful completion of a UTS recognised course that was taught in English and was equivalent to at least one full time or full time study or evidence of successful completion of a diploma or advanced diploma from TAFE and other private colleges recognised by UTS; or completion of a UTS recognised foundation program with a pass in a unit of study in English for Academic Purposes with a duration of at least one semester.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course duration is four semesters of full-time or six semesters of part-time study.

Course structure

This degree is awarded on completion of eight 6-credit-point subjects. All subjects are offered in face-to-face mode and delivered through a combination of intensive weekend seminars, study group meetings, self-directed study and online distance support.

Course completion requirements

C04250v2 Juris Doctor Master of Business Administration

Award(s): Master of Business Administration (MBA)

Juris Doctor (JD)

UAC code: 940436 (Autumn semester, Spring semester, Summer session)

CRICOS code: 074765J

Commonwealth-supported place?: No

Load credit points: 192

Course EFTSL: 4

Location: City campus

Overview

The Juris Doctor Master of Business Administration (JDMBA) is a graduate law and business degree that builds on the established reputations of UTS: Law and the UTS Business School to provide high-calibre, graduate-level education in the theory and practice of the law and business. It is specifically designed for graduates of disciplines other than law.

This course provides students with an integrated exposure to professional practice in both legal and business contexts.

Career options

Career options include, but are not limited to, lawyer within a private firm, government department or community law centre, regulatory affairs and policy adviser in the public or private sector or legal specialisation related to students' previous degree or enhanced career options within an existing professional sphere.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in a discipline other than law or a law qualification from an overseas jurisdiction. Admission is at the discretion of the associate dean (teaching and learning), Faculty of Law.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time study. Subjects may also be available in Summer session.

Course structure

The course comprises a total of 192 credit points. The study components for course completion are as follows:

- 96 credit points of compulsory core law subjects (13 subjects)
- 48 credit points of compulsory core business subjects (eight subjects)

- 18 credit points of law options (three subjects)
- a 6-credit-point legal theory option (one subject)
- 24 credit points of business law sub-major subjects (four subjects).

Industrial training/professional practice

To practise as a lawyer in NSW, students need to successfully complete an accredited legal qualification and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in the Juris Doctor Master of Business Administration who wish to practise as lawyers in NSW can complete the requirements by undertaking a PLT program, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 519).

SMJ09059 Business Law	24cp
CBK90921 Options (Legal Theory PG)	6cp
CBK90949 Options	18cp
Total	192cp

Course program

Students in the standard full-time program enrol in between 24 and 26 credit points a semester. Core subjects are timetabled every semester. The introductory core law subject 70102 Foundations of Law and select core subjects may be timetabled in Summer session. Optional subjects are regularly timetabled but not all options are offered in any one semester. Optional subjects are timetabled subject to sufficient student interest. The current timetable can be found at:

Levels of award

The Juris Doctor component of the JD MBA may be awarded with honours. An additional year of study is not required. To qualify for honours, a student must complete 77740 Research Paper within

CBK90949 Options. The rules governing the Juris Doctor with honours (current and pre-2012) can be found in Postgraduate course information (see page 101) in the handbook. Consult the Coursework research page on the UTS: Law website for information on how to apply to enrol.

Articulation with UTS courses

Students who completed postgraduate electives as part of their Juris Doctor (C04236) (see page 405) candidature may apply to have credit towards the Juris Doctor Master of Business Administration (C04250) (see page 425).

C04251v1 Master of Intellectual Property

Award(s): Master of Intellectual Property (MIP)

UAC code: 940433 [distance] [Autumn semester, Spring semester]

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

UTS has established expertise in and a reputation for providing courses relevant to the needs of the patent and trade mark professions. The UTS Master of Intellectual Property is the first at an Australian university that fulfils the entire educational requirements for registration as a registered trade marks attorney and patent attorney in Australia under the relevant regulations.

The unique feature of this course is that it may be undertaken entirely online, removing the need for students to attend face-to-face classes.

Course aims

This course provides graduates with an understanding of the principles of the registered trade mark system, the protection of unregistered marks and related forms of protection against misleading or unfair trading conduct in Australia. In addition, graduates understand the content and implication of a patent specification, enabling them to advise upon possible questions of infringement, validity and compliance.

Career options

Depending on the subjects taken, graduates may seek registration as a trade mark attorney and/or patent attorney in Australia. Arts administrators or media professionals may enhance career options through building expertise in the commercialisation or management of intellectual property assets. Other career options include patent and trade marks attorney, IP lawyer, IP portfolio manager, policy maker and government regulator.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications can be in any discipline. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

UTS may grant successful applicants advanced standing or exemption from one or more subjects but the Professional Standards Board for Patent and Trade Marks Attorneys (PSB) has no authority to recognise, for the purpose of registration as a patent attorney or trade marks attorney, such exemptions. Students intending to seek registration need to seek exemption from the PSB. Exemptions are generally not granted for subjects not primarily directed to Australian law. Further information is available from:

The Secretary

Professional Standards Board for Patent and Trade Marks Attorneys

PO Box 200

Woden ACT 2606

telephone +61 2 6283 2345

fax +61 2 6285 1048

email mail.psb@ipaustralia.gov.au

www.psb.gov.au

Course duration and attendance

The course can be completed in one-and-a-half years of full-time study or two-and-a-half years of part-time study.

Most subjects within this course can be studied by distance online and require no on-campus attendance. All lectures, tutorials, course materials and assessments are distributed by a combination of web-based technology and electronic media. Students conduct all communication with the lecturer by electronic means. A number of subjects are concurrently offered in traditional face-to-face, on-campus format.

Course completion requirements

CBK90711 Choice

48cp

Total 48cp

Articulation with UTS courses

Subjects undertaken within the Graduate Certificate in Trade Mark Law and Practice (C11130) (see page 497), Graduate Certificate in Intellectual Property (C11229) (see page 518) and Graduate Diploma in Intellectual Property (C06099) (see page 447) are recognised within the Master of Intellectual Property. Students enrolled in either graduate certificate may apply to internally transfer to the master's program. Candidates are not awarded the graduate certificate but subjects undertaken are applied towards the master's program.

Professional recognition

The educational requirements for registration as a patent attorney and trade marks attorney in Australia with the Australian Government's Professional Standards Board for Patent and Trade Marks Attorneys can be fulfilled by completing this course. Prospective students should check with the Patent Attorney Registration Board for specific subjects required to be completed for registration at:

www.psb.gov.au/attorney-registration/registration-requirements/knowledge-requirements

C04252v1 Master of Pharmacy

Award(s): Master of Pharmacy (MPharm)
UAC code: 940900 (Autumn semester)
CRICOS code: 074915M
Commonwealth-supported place?: Yes
Load credit points: 120
Course EFTSL: 2.5
Location: City campus

Overview

This course is a focused, professional postgraduate degree leading to eligibility for registration as a pharmacist. The core component provides students with the required detailed knowledge, skills and experience to achieve this. Elective subjects provide students with the opportunity to tailor their study to their individual career focus. The course incorporates a range of subjects relevant to contemporary pharmacy practice, including professional services, integrated therapeutics and the pharmaceutical sciences. Students undertake clinical practice in a variety of settings throughout the degree.

The course is delivered in an integrated, practice-oriented and student-focused manner, making use of innovative technologies and strong links with the pharmacy profession. After successful completion of this course and a subsequent pre-registration period, students are eligible for registration as a pharmacist.

This course is for students who have completed an undergraduate science or related bachelor's degree and wish to enter the healthcare profession as a pharmacist. This degree not only provides candidates with the knowledge, skills and experience necessary to gain registration, but also prepares them for expanded practice in emerging professional environments, and within changing medical, social, political and regulatory contexts. Candidates have the opportunity to develop leadership skills, gain experience with emerging technologies, and learn from internationally recognised researchers and teachers.

Career options

Career options for registered pharmacists include areas such as: community pharmacy; hospital pharmacy; research and development; the pharmaceutical industry; consultancy; education; government and policy; the armed forces; and non-profit organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Entry is competitive and applicants are assessed on their grade point average (GPA). As a guide, in 2013 the entry GPA was a credit result. The GPA is calculated based on the latest three-year (full-time) or equivalent academic record.

Applicants must have also completed the following at a tertiary level:

- two pharmacology subjects
- two chemistry subjects
- one biochemistry subject
- one human physiology subject, and
- one mathematics or statistics subject.

A human biology and/or microbiology subject is also desirable.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.5 overall with a 7.0 in each subtest; or TOEFL: paper based: 610-633 overall with TWE of 5.0, internet based: 102-109 overall with a score of 24 for reading and listening, 23 for speaking and 27 for writing; PTE: 73-78 overall with a 65 in each subtest; or CAE: 74-79

Eligibility for admission does not guarantee offer of a place.

International students

Upon graduation, international students intending to apply for provisional registration with the Pharmacy Board of Australia must meet the Pharmacy English Language Skills Registration Standard.

For further information, refer to the following standards:

- Pharmacy English Language Skills Registration Standard
- Pharmacy Implementation of the English Language Skills Registration Standard.

These are available for download at:

www.pharmacyboard.gov.au/Registration-Standards.aspx

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Shortlisted applicants who meet the entry requirements receive a conditional offer and are required to sit an interview.

International students

International students should apply via UTS: International.

Course duration and attendance

The course is an intensive two-year, full-time degree which is equivalent to a three-year degree. In addition to coursework during semesters, students are required to undertake weekly clinical placements during semester and block clinical placements during mid-semester breaks.

Course structure

This course comprises a total of 120 credit points. Students undertake a total of 16 6-credit-point subjects and three clinical subjects (two 6-credit-point subjects and one 12-credit-point subject).

C04254v1 Master of Arts in Communication Management

Award(s): Master of Arts in Communication Management (MA)

UAC code: 940509 (Autumn semester, Spring semester)

CRICOS code: 018985F

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Overview

The Master of Arts in Communication Management provides advanced contemporary study and practice in professional communication management. It is suitable for current and aspiring practitioners who want to attain the relevant expertise to achieve their career goals. Students can major in the areas of Public Relations, Integrated Communication, or Organisational Change and Communication. Alternatively, students can elect to complete generalist studies which provide a foundation for the broad field of communication management practice.

Academic staff involved in the course have substantial industry experience and have undertaken research in the field.

Course aims

Graduates of this course have:

- advanced understanding of communication and its management
- the ability to synthesise communication theory and practice
- the ability to analyse, design, cost and evaluate a communication strategy
- a sensitivity to ethical and legal issues related to communication
- a capacity to reflect on the roles and responsibilities of communicators
- the capacity to apply perspectives that are intercultural and global, and
- a sensitivity to issues of exclusion, equity and justice.

A full list of the graduate attributes of the course is available from UTS: Communication.

Career options

Career options cover the fields of public relations and communication management, including those positions related to communication advising, community relations, corporate communication, integrated communication, internal communication, international communication, media liaison or public affairs.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who have successfully completed the Graduate Diploma in Communication Management (C06105) (see page 452), Graduate Diploma in Public Relations (C06103) (see page 451), Graduate Diploma in Integrated Communication (C06101) (see page 448), or

the Graduate Diploma in Organisational Change and Communication (C06102) (see page 450) are eligible for credit recognition for completed subjects.

Students who have graduated with a Bachelor of Arts in Communication (Public Communication) (C10248) (see page 266) may be granted up to one third of the postgraduate course in credit recognition. Other relevant qualifications are considered on a case-by-case basis.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or equivalent part-time basis.

Course structure

The course totals 72 credit points of study made up of three core foundation subjects (24 credit points), two core master's subjects (16 credit points), a major choice (24 credit points) and an elective (8 credit points).

Students can choose one of three majors, each consisting of three compulsory 8-credit-point subjects, or select No specified major for the generalist course.

The No specified major option includes two compulsory 8-credit-point subjects and an 8-credit-point elective.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

C04257v1 Master of Local Government

Award(s): Master of Local Government (MLG)
CRICOS code: Pending
Commonwealth-supported place?: No
Load credit points: 72
Course EFTSL: 1.5

Note(s)

This course is not offered to international students.

Overview

The Master of Local Government provides professionals, managers and leaders in local government with an advanced body of knowledge and skills to reflect critically on theory and practice. This enables them to apply this knowledge in their roles in strategic thinking, planning and shaping local communities.

This course provides an interdisciplinary program with teaching, learning, research and development activities ranging across and beyond the faculty. It is informed by the research and capacity building activities of both the UTS Centre for Local Government and the Australian Centre of Excellence for Local Government. An education program is developed to match the requirements of each participant's individual requirements, and subjects can be studied in the workplace, through intensive block release, or in some cases through online delivery mode. The program provides graduates with an evidence-based learning approach to build a high level of influence and leadership in their local government workplace.

Course aims

Graduates of this course have a sound understanding of current issues faced in the local government environment, as well as an ability to relate this knowledge back to their own workplace. They have enhanced knowledge and skills in various technical aspects of local government practice, as well as an understanding of the theoretical background of leadership, management and organisational principles. Graduates also gain learning skills that allow them to continue their own professional development through short courses or further academic study.

Career options

Graduates are able to progress their careers as managers and leaders in councils.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

For this course, applicants must have completed a graduate certificate or a graduate diploma or a similar level of qualification in local government. Applicants who do not possess such graduate qualifications must have sufficient professional experience in local government and must demonstrate evidence of meeting AQF Level 7 learning outcomes in local government.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students who have completed relevant previous studies may apply to the course coordinator for credit recognition.

Course duration and attendance

The course is offered on a three-year, part-time basis with students undertaking one or two subjects a semester.

Course structure

Students must complete 72 credit points made up of 36 credit points of core subjects and 36 credit points of electives.

Course completion requirements

STM90795 Core subjects	36cp
CBK90877 Options	36cp
Total	72cp

Articulation with UTS courses

This course is part of an articulated program of study. Students can exit this course after completing:

- 24 credit points of specified subjects with a Graduate Certificate in Local Government Management (C11053) (see page 487)
- 48 credit points of specified subjects with a Graduate Diploma in Local Government Management (C06033) (see page 440).

Other information

Further information is available from the Centre for Local Government:

C04258v1 Master of Business in Finance Extended

Award(s): Master of Business in Finance (MBus)
CRICOS code: 077375K
Commonwealth-supported place?: No
Load credit points: 96
Course EFTSL: 2

Overview

The Master of Business in Finance provides a comprehensive range of skills and expertise expected of leading practitioners in the banking and finance sectors.

The finance program provides participants with the opportunity to acquire knowledge of finance theory and techniques for leading-edge professional practice purposes. The additional elective subject choices provide an opportunity to specialise more deeply in the finance discipline and to further enhance students' skills, professional practice, specialist knowledge and capabilities.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applicants with a relevant graduate certificate must have completed it with at least a credit average.

Credit recognition

Students may be granted a maximum of eight subject exemptions, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course is two years of full-time or four years of part-time study.

Course structure

The course comprises 96 credit points, made up of eleven core subjects (totalling 66 credit points) plus elective subjects (totalling 30 credit points).

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Finance (C11027) (see page 479), the Graduate Diploma in Finance (C07021) (see page 458) and the Master of Business in Finance (C04048) (see page 359).

Professional recognition

This course covers a broad range of the specialist knowledge areas required to be ASIC RG146 registered. Completion of the course meets the education requirements of membership at the level of Certified Finance and Treasury Professional (CFTP). It also meets the educational requirements at the level of Senior Associate (SA Fin), in conjunction with work experience, at the Financial Services Institute of Australasia (FINSIA). The course has also been awarded postgraduate partnership status by CFA Institute (USA). The curriculum is closely tied to global professional practice and is well suited to students preparing to sit for CFA® (Chartered Financial Analyst®) program examinations.

C04259v1 Master of Business in Management Extended

Award(s): Master of Business in Management (MBus)

CRICOS code: 077377G

Commonwealth-supported place?: No

Load credit points: 96

Course EFTSL: 2

Location: City campus

Overview

The Master of Business in Management provides knowledge, skills and conceptual frameworks to enable students to identify and resolve complex issues that will characterise the working environments of senior managers in the future. Students acquire the conceptual and analytical skills necessary for successful management performance in a range of contexts, including the business, public and non-profit sectors, and a variety of professional settings.

The course provides students with knowledge and experiences to enhance their professional skills and understanding of the management of people, resources and organisational processes. An innovative, flexible structure provides students with maximum choice in selecting subjects and programs of study tailored to meet their personal and professional needs.

The additional elective subject choices provide an opportunity to specialise more deeply in the management discipline and to further enhance students' skills, professional practice, specialist knowledge and capabilities.

Course aims

The Master of Business in Management is designed to meet the needs of individuals, client organisations and professional bodies for management education.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

C04260v1 Master of Business in Human Resource Management Extended

Award(s): Master of Business in Human Resource Management (MBus)

CRICOS code: 077380B

Commonwealth-supported place?: No

Load credit points: 96

Course EFTSL: 2

Location: City campus

Overview

The Master of Business in Human Resource Management provides students with the in-depth knowledge and skills necessary to contribute at a senior level to their organisation's human resources and industrial relations functions.

The course is designed primarily for individuals who are currently employed, or show the potential for employment, at senior policy-making levels in the fields of human resource management, industrial relations, occupational health and affirmative action.

The additional elective subject choices provide an opportunity to specialise more deeply in the human resource management discipline and to further enhance students' skills, professional practice, specialist knowledge and capabilities.

Course aims

The course aims to provide leading-edge conceptual and practical understandings of human resource management in complex and unfamiliar workplace situations in order to facilitate management decision making.

Career options

Career options include positions in change management and general management, human resources, and organisational training and development.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583

overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

C04261v1 Master of Business in Marketing Extended

Award(s): Master of Business in Marketing (MBus)

CRICOS code: 077379F

Commonwealth-supported place?: No

Load credit points: 96

Course EFTSL: 2

Location: City campus

Overview

The Master of Business in Marketing provides the opportunity for students to extend their knowledge in the areas of communications, sales management, the development and introduction of new products, business-to-business marketing, technology and marketing, as well as the legal constraints on and the ethical implications of marketing in Australia.

The marketing program provides contemporary theoretical marketing knowledge and the practical skills required for superior performance in Australian and international markets. The additional elective subject choices provide an opportunity to specialise more deeply in the marketing discipline and to further enhance students' skills, professional practice, specialist knowledge and capabilities.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. C04262v1 Master of Arts in International Studies

Award(s): Master of Arts in International Studies (MAInternationalStudies)

UAC code: 940527 (Autumn semester)

CRICOS code: 043443F

Commonwealth-supported place?: No

Load credit points: 72

Course EFTSL: 1.5

Location: City campus

Note(s)

Students intending to complete the Master of Arts in International Studies are encouraged to enrol directly into this program rather than enrolling initially in the graduate diploma and transferring to this course. This assists students and UTS: International Studies with planning an appropriate sequence of subjects.

The in-country study component of this course has a higher subject fee. Refer to the fees calculator for details at:

www.sau.uts.edu.au/fees/calculators.html

Overview

The Master of Arts in International Studies is part of an articulated program of study in which students develop or enhance their knowledge of the language and culture of a country chosen from the range offered in the international studies program.

This course enables students from any disciplinary background to study a language and culture other than English and thus add an international dimension to their qualification. Students have the opportunity to spend a semester at a partner university in their country of study.

Course aims

The program aims to enable students to communicate competently in the language of their specialisation, learn about contemporary society in their chosen country of study, develop intercultural sensitivity, critically reflect on ethical issues in international research, and learn and apply a variety of interdisciplinary skills and knowledge to research contemporary issues and trends in international studies through a capstone in-country study experience.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

A minimum of two years' language study at an approved tertiary institution is recommended, but not required. Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who have successfully completed the Graduate Diploma in International Studies (C06106) (see page 453) are eligible for credit recognition for completed subjects (48 credit points).

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or equivalent part-time basis.

Note: international students in Australia on a student visa are required to undertake full-time (FT) study as a condition of their visa.

Course structure

The course totals 72 credit points of study and focuses on developing or extending students' experience of language and culture. There are three compulsory components: a country major choice block which includes two semesters of study of a language and culture other than English, a contemporary society subject, and one semester studying overseas; the Research in International Studies subject; and two elective subjects.

Students can focus on one of the following countries or majors: Argentina, Canada (Québec), Chile, China, Colombia, France, Germany, Italy, Japan, Latino USA, Mexico, Spain or Switzerland.

Students may select subjects beyond the lists of elective subjects with the approval of the graduate adviser. Not all subjects are available each semester.

Full-time students undertake 24 credit points a semester. Part-time students should undertake 16 credit points a semester.

Overseas study

Students may spend a semester overseas at an institution of higher education in the country of their language and culture major. The cost of travel between Sydney and the student's place of study overseas are paid by UTS. Visa fees are also paid by UTS and students are covered by the UTS Overseas Insurance Policy. Students must pay the costs of accommodation and other living expenses during the period of in-country study.

Course EFTSL: 2

Location: City campus

Overview

This course is designed and developed for film and television graphic artists, special effects engineers, computer and simulator game designers, traditional and experimental animators, and visual designers. It combines coursework, research and project work in traditional film animation, 2D and 3D digital animation, game design, motion capture and other specialised areas of animation studies. The course offers a depth of research and innovation through concentrated specialisation in animation or game design.

The course involves a cross-disciplinary study of animation offered by three course areas: Information Technology, Communication, and Design, Architecture and Building. It reflects their teaching strengths in digital design, animation, programming and production. It is the first postgraduate course in Australia to offer a master's rather than a major in animation.

Course aims

The course comprises a combination of coursework, research and project work. Coursework areas include traditional film animation, 2D and 3D digital animation, graphic visualisation, object-oriented programming and animation studies, culminating in the production of a short animated work. Animation production is undertaken as project work in the final semester and provides an opportunity for students to explore an area of particular interest or professional benefit. This may be undertaken as individual work or as part of a collaborative team.

Career options

Career options include positions in animation, including animation for web, architecture and character design; computer game software design; experimental animation; feature film production; film and television graphics; special effects; and storyboard design.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in an area of animation, design, media studies, production, information technology or visual arts. Applicants must also have a demonstrated interest in animation design, animation studies or animation production. Applicants with considerable professional experience but without formal qualifications may be admitted to the course on the basis of their professional experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying

on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applicants must submit:

- a showreel of one or more animated/moving image works not longer than 10 minutes in total viewing time that demonstrates their capabilities in animation and/or video/film. The showreel should be on DVD (able to play in all regions) and in an accessible file format, e.g. QuickTime/AVI or Flash (.swf only). Alternatively, showreels viewable as a linked URL are also accepted. Applicants should include a list of the works and a brief synopsis (not more than 50 words each) for each work/sequence. If applicants worked collaboratively on the works/sequences, they should indicate their role in the creation of the work/sequence.
- a print portfolio of images that demonstrates other aspects of their ideas and skills for animation and filmmaking. It may include drawings, illustrations, storyboards, the design of 3D objects and visualisations, photomedia, scripts, and other forms of visual expression that explore the moving image. The portfolio should consist of a maximum of 10 pages in either A4 printed form or as an Adobe PDF Portfolio placed onto the showreel disc or linked to the URL.
- a CV clearly articulating their design-related experience, with a personal statement that should be a maximum of 300 words and must address the reasons for wishing to undertake a Master of Animation, in either printed form, or as an Adobe PDF file placed onto the showreel disc or linked to the URL.

Course duration and attendance

The course may be completed in two years of full-time or equivalent part-time study.

Course structure

The course comprises 96 credit points of study, made up of:

- 4 x 6-credit-point introductory subjects (totalling 24 credit points) to be completed prior to entry into the first of the studio major subjects
- 30 credit points of core subjects, 24 credit points of project subjects and 18 credit points from an approved program of elective subjects.

Each student is assisted by the course coordinator to develop a pattern of study best suited to their needs.

Course EFTSL: 1

Location: City campus

Overview

The Graduate Diploma in Property Development is designed for both property practitioners and graduates in other fields who wish to extend their qualifications and expertise in property development and management. Graduates have a commitment to professionalism in the property sector.

This course is for property professionals who want to upgrade their qualifications or expertise, or for those who wish to enter the property industry. Property development and planning students study a common first year, which develops an understanding of how to balance private and public interests in urban development.

Course aims

This course is focused on development and delivered with a practical focus. It provides a thorough and advanced grounding in all aspects of the property development process, markets and institutions, including the political, managerial, legal and physical systems which contribute to the effective management and development of property assets, property investment portfolios and development proposals. It is designed to provide valuers and other property practitioners with opportunities to enhance their qualifications and expertise, and provide professionals from other fields with an understanding of property development and investment issues and techniques.

Career options

Career options include positions in banking and government instrumentalities, finance, management and development, and property investment.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Admission is at the discretion of the course director. If applicants are not graduates from the UTS Graduate Certificate in Property and Planning (C11001) (see page 475), they must possess an advanced diploma in valuation or equivalent qualification. Applicants may also be required to provide proof of professional experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course duration is one year of full-time or two years of part-time study.

All subjects are offered in intensive blocks. The attendance pattern for each subject is generally two separate two-and-a-half-day blocks, usually held over a Thursday evening, Friday and Saturday.

Course structure

Students must achieve a total of 48 credit points, comprising 36 credit points of core subjects and 12 credit points of electives. With the approval of the director of program, students may substitute one subject with any other postgraduate property subject.

Course completion requirements

STM90502 Core subjects (Property and Planning)	24cp
STM90706 Core subjects (Property)	12cp

Course EFTSL: 1

Location: City campus

Overview

The Graduate Diploma in Business Administration provides a basis for the development of a career in management for graduates who have not previously undertaken an administrative studies degree course.

Course aims

General management skills are developed to provide expertise in strategic thinking, critical analysis, developing and implementing business plans, decision-making under uncertainty, understanding organisational dynamics, effective communication and promoting change.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of five subject exemptions in the Graduate Diploma in Business Administration, of which two core subjects can be approved from prior undergraduate study.

Course duration and attendance

The course duration is one year of full-time or two years of part-time study.

Course structure

The course comprises seven of the core Master of Business Administration subjects, plus one elective, totalling 48 credit points of study.

Course completion requirements

C06017v6 Graduate Diploma in Event Management

Award(s): Graduate Diploma in Event Management (GradDipEM)
CRICOS code: 046112A
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus, although some subjects may be available at Kuring-gai campus.

Overview

The Graduate Diploma in Event Management is designed to develop high-level management skills and knowledge sufficient to allow students to manage or play a significant role in the management of large-scale events.

The course enhances students' professional competence, personal development and ability to engage in critical thinking by offering a combination of core subjects associated with the areas of event creation, management, marketing and accounting.

Course aims

The aim of the course is to develop knowledge, understanding and professional management skills relevant to the organisation, planning, marketing and operation of various forms of events in both Australian and international contexts.

Career options

Career options include festival organiser, conference organiser/meeting planner, charity event coordinator, sport event manager, hotel/resort/cruise ship event coordinator, exhibition organiser, venue manager and event creative director.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The equivalent qualification required is a bachelor's degree in any discipline or satisfactory completion of a relevant graduate certificate.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

C06033v4 Graduate Diploma in Local Government Management

Award(s): Graduate Diploma in Local Government Management (GradDipLGM)
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus

Note(s)

This course is not offered to international students.

Overview

Today's local government manager must have a high level of professional expertise together with a broad range of managerial skills and a sound understanding of the special characteristics of local government. This course is tailored to the local government environment, allowing managers to meet their differing professional needs while keeping up-to-date with the latest issues.

The course offers the opportunity to build an education program that responds to individual needs as it allows students to develop a study plan that matches the requirements of their professional development. Subjects can be studied in the workplace, through intensive block release or, in some cases, at a university or college closer to home. The program can also be used as a stepping stone to a Master of Local Government (C04257) (see page 433).

Course aims

The course aims to provide students with knowledge, skills and competencies in the principles and practices of local government management, with particular reference to their own organisation. Through the course, students have access to a combination of both general and specialist study units via a range of flexible delivery modes. Students develop the learning skills that allow them to continue their own professional development through short courses or further academic study.

Career options

Career options include local government manager in councils.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Enrolment is also available to people who do not have a degree but who can demonstrate substantial relevant work experience.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students who have completed relevant previous studies may apply to the course coordinator for credit recognition.

Course duration and attendance

This course is normally offered on a four-year, part-time basis, with students undertaking one subject a semester.

In some circumstances, students may complete two subjects a semester and therefore complete the course in two years.

Course structure

The course totals 48 credit points, made up of eight subjects.

Course completion requirements

STM90714 Core subjects	18cp
CBK90633 Options	30cp
	Total 48cp

Course program

A typical program is shown below.

Select 30 credit points from the following options:	30cp
15602 Social Planning and Development	6cp
15603 Integrated Strategic Planning	6cp
15606 Vocational Competencies 1	6cp
15607 Vocational Competencies 2	6cp
15609 Local Environmental Management	6cp
15610 Local Government Leadership: Personal and Professional Skills	6cp
15618 New Perspectives in Local Government Leadership	6cp
15608 Corporate Management and Organisational Change	6cp
15611 Managing Local Enterprise	6cp
15604 Local Government Management Principles and Practice 1	6cp

Exit award

Students can exit this course after completing 24 credit points of specified subjects with a Graduate Certificate in Local Government Management (C11053) (see page 487).

C06037v4 Graduate Diploma in Journalism

Award(s): Graduate Diploma in Journalism (GradDipJournalism)

UAC code: 940501 (Autumn semester, Spring semester)

CRICOS code: 032351A

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

The Graduate Diploma in Journalism is part of an articulated program of study for people who want to start a journalism career and for experienced journalists wanting to broaden their skills and professional technological expertise and refresh the intellectual basis of their practice.

This is the only program of its kind in Sydney, where the Australian media is increasingly concentrating. The journalism staff at UTS has a record of excellence in professional practice reflected in media contacts. In addition, the course has close links with the Australian Centre for Independent Journalism, which provides a professional setting for student work.

Course aims

Graduates of the program:

- have strong research and reporting skills
- have a knowledge and critical understanding of the media
- are equipped with the necessary skills to either enter professional practice in the media or continue with additional skills and intellectual depth
- strive to promote the important role of professional and ethical journalism in the service of the public, and
- have an understanding of the role of the media in local, regional, national and global contexts.

Career options

Career options include reporter or editor in local, corporate, national or international print or broadcast media organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who successfully completed the graduate certificate in the articulated program are eligible for credit recognition for completed subjects.

Course duration and attendance

The course is one year of full-time or one-and-a-half years of part-time study.

Course structure

The course totals 48 credit points of study, made up of 24 credit points of core subjects and 24 credit points of electives.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

STM90818 Core subjects (Journalism)	16cp
CBK90897 Electives (Journalism)	24cp
CBK90899 Choices (Journalism PG)	8cp
Total	48cp

Course program

Example programs are shown below.

Autumn commencing, full time

Year 1

Autumn semester

57011 Research and Reporting for Journalism	8cp

Select one of the following:

57012 Regulation of the Media	8cp
57138 International and Comparative Journalism	8cp

Select 8 credit points of electives	8cp

Spring semester

57151 Storytelling with Sound and Image	8cp

Select 16 credit points of electives	16cp

Autumn commencing, part time

Year 1

Autumn semester

57011 Research and Reporting for Journalism	8cp

Select one of the following:

57012 Regulation of the Media	8cp
57138 International and Comparative Journalism	8cp

Spring semester

57151 Storytelling with Sound and Image	8cp

Select 8 credit points of electives	8cp

Year 2

Autumn semester

Select 16 credit points of electives	16cp

Spring commencing, full time

Year 1

Spring semester

57011 Research and Reporting for Journalism	8cp

Select one of the following:

57012 Regulation of the Media	8cp
57138 International and Comparative Journalism	8cp

Select 8 credit points of electives	8cp

Year 2

Autumn semester

57151 Storytelling with Sound and Image	8cp

Select 16 credit points of electives	16cp

Spring commencing, part time

Year 1

Spring semester

C06041v6 Graduate Diploma in Creative Writing

Award(s): Graduate Diploma in Creative Writing (GradDipCreativeWriting)

UAC code: 940513 (Autumn semester, Spring semester)

CRICOS code: 032361K

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

The Graduate Diploma in Creative Writing is part of an articulated program designed to meet a range of needs for people who want to start a career in writing and for experienced writers wanting to further develop their theoretical knowledge and skills.

Course aims

Students develop:

- both general and specific skills in writing across a range of genres, studying one genre in depth or exploring the potential of a range of genres and media
- an ability to develop and critically revise their own work
- an understanding of the relationships of writing practice and publication across a range of contemporary cultural forms
- a critical knowledge of cultural and aesthetic debates, and
- an ability to think creatively and critically about, and contribute to, developments in cultural industries.

Career options

Career options include advertising, computing, freelance writing and editing, journalism, media research, publishing, scriptwriting, and editing in community organisations or government departments.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who successfully completed either of the graduate certificates in the articulated program are eligible for credit recognition for completed subjects.

Course duration and attendance

The course duration is one year of full-time or equivalent part-time study.

Course structure

The course totals 48 credit points, consisting of three core subjects and three electives. Students may select subjects beyond the list of elective subjects with the approval of the graduate adviser. Not all subjects are available each semester.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

STM90815 Core subjects	24cp
CBK90528 Electives	24cp

CRICOS code: 001117A

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

This course provides a broad introduction to the fundamental aspects of information technology and is primarily designed for those who have studied little or no IT in their previous degree.

Students gain the necessary knowledge and skills to equip them for a career in IT. As well as gaining a broad foundation, students are able to choose elective subjects from a wide range of options.

Career options

Career options include database manager, e-business developer, information systems manager or systems analyst.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

For this course an equivalent degree can be from any discipline (as applicants for this program may apply as a non-IT graduate or an IT graduate).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Applicants with a recognised bachelor's degree in computing or information technology (or equivalent) may apply for credit recognition equivalent to the 24-credit-point Graduate Certificate in Information Technology (C11142) (see page 499).

Course duration and attendance

The course duration is one year of full-time or two years of part-time study.

Course structure

The course totals 48 credit points of study and consists of five core subjects and 18 credit points of electives selected from a defined list.

Course completion requirements

Select one of the following:	24cp
STM90695 Core subjects	24cp
CBK90802 Choice	24cp
CBK90803 Choice	18cp
32144 Technology Research Preparation	6cp
Total	48cp

Course program

The following three examples show typical full-time programs for non-IT graduates, IT graduates with credit recognition and IT graduates without credit recognition, commencing in Autumn semester. The selection of subjects for part-time students is dependent upon the commencing semester and the availability of evening subject offerings. Part-time students should contact the course coordinator for further information.

Note: Electives are only offered in a particular semester (or year) if there is sufficient demand and the necessary resources.

Non-IT graduates

Year 1

Autumn semester

32555	Fundamentals of Software Development	6cp
32524	LANS and Routing	6cp
32606	Database	6cp
32144	Technology Research Preparation	6cp

Spring semester

32557	Enabling Enterprise Information Systems	6cp
Select 18 credit points of electives		18cp

IT graduates with credit recognition

Year 1

Autumn semester

32144	Technology Research Preparation	6cp
Select 18 credit points of electives		18cp

IT graduates without credit recognition

Year 1

Autumn semester

32144	Technology Research Preparation	6cp
Select 18 credit points of electives		18cp

Spring semester

Select 24 credit points of electives		24cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Information Technology (C11142) (see page 499), the Graduate Diploma in Information Technology, the Master of Information Technology (C04157) (see page 384) and the Master of Information Technology (Extended) (C04218) (see page 391).

Professional recognition

Graduates are eligible for associate-level membership of the Australian Computer Society (ACS).

Award(s): Graduate Diploma in Information Technology Management (GradDiplInfTechM)

UAC code: 940613 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

This course is not offered to international students.

Overview

This course focuses on the role of technology in the strategic leadership of organisations. It provides a well-balanced selection of subjects, drawn from advanced information technology and business domains, in an integrated program that is relevant to the current and future demands of the IT industry and business organisations.

IT professionals who have aspirations to senior IT roles and/or business leadership positions in organisations benefit from this course. Graduates are able to contribute constructively to the effective utilisation of information technology with respect to the strategic leadership of an organisation. IT managers who already have significant levels of experience are challenged by this course and gain new perspectives on the effective leadership of organisations in the digital era.

Course aims

The course aims to develop:

- the professional skills necessary for successfully undertaking strategic leadership roles in a variety of organisational contexts, and
- a conceptual and analytical understanding of an organisation's needs in a dynamic and challenging global knowledge economy.

Career options

Graduates can be employed in the full range of organisations - private, public and community sector organisations. They can prepare to move from a senior IT management position into the CIO (chief information officer) role.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous bachelor's qualifications must be in information technology or commerce, and applicants must have a minimum of five years' professional work experience in the IT industry plus some supervisory experience. Applicants who have successfully completed the Graduate Certificate in Information Technology Management (C11138) (see page 498) must have passes in all subjects and a credit average over the entire course.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a two-year, part-time basis.

Course structure

Students complete 48 credit points of study, consisting of five core subjects and three electives.

Course completion requirements

32553	Leadership and People Management	6cp
32005	Strategic Leadership for Innovation	6cp
42990	Organisational Design for the Knowledge Era	6cp
CBK90151	Electives (IT Management)	18cp
32561	Managing Organisational Change	6cp
32562	Strategic Business Management	6cp
		Total 48cp

Course program

A typical part-time program for students commencing in Autumn semester is shown below.

Note: Subjects listed as electives are only offered in a particular semester (or year) if there is sufficient demand and the necessary resources. Students can apply to the course coordinator to enrol in an alternative subject as an elective.

Year 1

Autumn semester

42990	Organisational Design for the Knowledge Era	6cp
32553	Leadership and People Management	6cp

Spring semester

32005	Strategic Leadership for Innovation	6cp
Select 6 credit points of electives		6cp

Year 2

Autumn semester

32561	Managing Organisational Change	6cp
Select 6 credit points of electives		6cp

Spring semester

32562	Strategic Business Management	6cp
Select 6 credit points of electives		6cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Information Technology Management (C11138) (see page 498), the Graduate Diploma in Information Technology Management and the Master of Business in Information Technology Management (C04161) (see page 387).

C06096v3 Graduate Diploma in Adult Literacy and Numeracy Teaching

Award(s): Graduate Diploma in Adult Literacy and Numeracy Teaching (GradDipAdLitNumTeach)

UAC code: 940248 (CSP) (Autumn semester), 940249 (PDFP) (Autumn semester, Spring semester)

CRICOS code: 058399D

Commonwealth-supported place?: Yes

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

UTS is a leading provider of postgraduate language and literacy courses with the longest tradition of adult basic education (ABE) teacher training of any university in NSW.

This course is for people who wish to gain an initial specialist qualification as an adult basic education practitioner. It provides graduates with a widely recognised specialist teaching qualification that enables them to work in the field of adult literacy and numeracy education in both the public and private sectors and registered training organisations. The course includes two practicums and a range of subjects that integrate relevant theoretical perspectives on adult basic education with practical teaching and learning applications.

Course aims

The course aims to provide students with:

- a sound understanding of practices and policies in teaching literacy and numeracy to adults
- up-to-date teaching and learning strategies
- skills in designing, implementing and evaluating a variety of learning activities and curricula, and
- theoretical approaches to literacy and numeracy education.

Career options

Career options include adult basic education practitioner in community colleges, corrective services, AMES, TAFE and public and private adult education institutions that design and deliver programs for adults to learn and build on basic literacy and numeracy skills; provide learner support for students in VET programs; and design and deliver workplace literacy and numeracy programs.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Graduates of the Graduate Certificate in Adult Numeracy Teaching (C11220) (see page 513) are eligible for 24 credit points of credit recognition.

Course duration and attendance

The course can be completed in one year of full-time or two years of part-time study.

Course structure

Students must complete 48 credit points comprising eight core subjects.

Course completion requirements

STM90549	Core subjects (Adult Numeracy Teaching)	24cp
STM90554	Core subjects (Adult Literacy and Numeracy Teaching)	24cp
		Total 48cp

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

Holders of the UTS Bachelor of Science in Mathematics or Bachelor of Science in Statistics degree or equivalent are not eligible for admission to this course. Instead, they should consider the Graduate Certificate in Mathematics (C11210) (see page 509).

Overview

A sound knowledge of mathematical and statistical methods is in ever growing demand in various government organisations, ranging from defence to education, and in such diverse fields as finance and public health, construction industry and agriculture, manufacturing and transportation. Despite the demonstrated and continuing demand for specialists trained in mathematics and statistics, most university graduates do not acquire the required knowledge in their bachelor's degrees.

This course is designed for applicants who need more mathematics and/or statistics in their everyday work or who wish to broaden their career choices.

Course aims

This course aims to provide a solid mathematical and statistical background by means of a flexible study program that can be tailored to suit university graduates who need this knowledge in their work or plan to pursue further studies.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants are expected to have knowledge in mathematics comparable with the following UTS Mathematical Sciences foundation stream subjects:

- 35101 Introduction to Linear Dynamical Systems
- 35102 Introduction to Analysis and Multivariable Calculus
- 35151 Introduction to Statistics.

Applicants who do not satisfy this requirement should instead consider enrolment in the Graduate Certificate in Mathematics (C11210) (see page 509).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students can apply for exemption only from core subjects.

Course duration and attendance

The duration of the course depends on the choice of subjects and their availability. As a guide, minimum full-time attendance is one year of study and part-time attendance is two years of study. Applicants should be aware that subjects may require attendance at daytime classes. The current timetable is available at:

<http://timetable.uts.edu.au>

Course structure

Students are required to complete 48 credit points, comprising three core subjects and five electives (options). Elective subjects can be chosen from the list of options below but are not limited to it. Any elective which is not in the list of options below must be approved by the course director, postgraduate programs.

Many subjects offered by the Department of Mathematical Science have prerequisites. It is students' responsibility to check that they have the required knowledge specified by these prerequisites. Students are strongly advised not to enrol in any subject if they do not have knowledge equivalent to the subject's prerequisites.

Course completion requirements

35353	Regression Analysis	6cp
35363	Stochastic Models	6cp
35241	Optimisation in Quantitative Management	6cp
Select 30	credit points from the following options:	30cp
35100	Introduction to Sample Surveys	6cp
35111	Applications of Discrete Mathematics	6cp
35140	Introduction to Quantitative Management	6cp

C06099v1 Graduate Diploma in Intellectual Property

Award(s): Graduate Diploma in Intellectual Property (GradDiplIP)

UAC code: 940434 [distance] [Autumn semester, Spring semester]

Commonwealth-supported place?: No

Load credit points: 36

Course EFTSL: 0.75

Location: City campus

Overview

UTS has established expertise and a reputation for providing courses relevant to the needs of the patent and trade mark professions. The UTS Intellectual Property program is the first at an Australian university that fulfils the entire educational requirements for registration as a trade marks attorney and patent attorney in Australia under the relevant regulations.

The unique feature of this course is that it may be undertaken entirely online, removing the need for students to attend face-to-face classes.

Course aims

This course provides graduates with an understanding of the principles of the registered trade mark system, the protection of unregistered marks and related forms of protection against misleading or unfair trading conduct in Australia. In addition, graduates understand the content and implication of a patent specification, enabling them to advise upon possible questions of infringement, validity and compliance.

Career options

Depending on the subjects taken, graduates may seek registration as a trade mark attorney and/or patent attorney in Australia. Arts administrators or media professionals may enhance career options through building expertise in the commercialisation or management of intellectual property assets. Other career options include: patent and trade marks attorney, IP lawyer, IP portfolio manager, policy maker and government regulator.

This course enables overseas registered attorneys to undertake the necessary subjects that the Professional Standards Board requires for Australian registration.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications can be in any discipline. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

UTS may grant successful applicants advanced standing or exemption from one or more subjects but the Professional Standards Board for Patent and Trade Marks Attorneys (PSB) has no authority to recognise, for the purpose of registration as a Patent Attorney or Trade Marks Attorney, such exemptions. Students intending to seek registration need to seek exemption from the PSB. Further information is available from:

The Secretary
Professional Standards Board for Patent and Trade Marks Attorneys
PO Box 200
Woden ACT 2606
telephone +61 2 6283 2345
fax +61 2 6285 1048
email mail.psb@ipaaustralia.gov.au
www.psb.gov.au
Exemptions are generally not granted for subjects not primarily directed to Australian law.

Course duration and attendance

The course can be completed in one year of full-time or one-and-a-half years of part-time study. Students commencing in Spring semester may require an additional semester to complete the course.

Most subjects within this course can be studied by distance online and require no on-campus attendance. All lectures, tutorials, course materials and assessments are distributed by a combination of web-based technology and electronic media. Students conduct all communication with the lecturer by electronic means. A number of subjects are concurrently offered in traditional face-to-face, on-campus format.

Course structure

The course requires completion of 36 credit points of subjects. Subjects are timetabled annually, but not all subjects are offered every semester. The current timetable can be found at:

<http://timetable.uts.edu.au>

Course completion requirements

CBK90713 Choice 36cp
Total 36cp

Articulation with UTS courses

Subjects undertaken within the Graduate Certificate in Trade Mark Law and Practice (C11130) (see page 497) or Graduate Certificate in Intellectual Property (C11229) (see page 518) are recognised within the Graduate Diploma in Intellectual Property (C06099) (see page 447). Students enrolled in either graduate certificate may apply to internally transfer to the graduate diploma program. Candidates are not awarded the graduate certificate but subjects undertaken are applied towards the graduate diploma program.

Professional recognition

Subject to final board approval, where applicants have a requisite tertiary qualification as stipulated by the Professional Standards Board for Patent and Trade Marks Attorneys, this course satisfies the educational requirements necessary for registration as a Registered Trade Marks Attorney in Australia.

Overview

In the Graduate Diploma in Integrated Communication, students develop specialised skills in integrated communication applicable to the private, not-for-profit and public sectors. Students enhance their knowledge of advertising and media relations and explore the relationship between public relations and marketing in integrated communication practice.

This course is suitable for either current practitioners in this field or for those wishing to specialise in this area of practice. Academic staff

involved in the course have substantial industry experience and have undertaken research in the field.

Course aims

Graduates of this course have:

- advanced understanding of communication and its management
- the ability to synthesise communication theory and practice
- the ability to analyse, design, cost and evaluate an integrated communication strategy
- a sensitivity to ethical and legal issues related to communication
- a capacity to reflect on the roles and responsibilities of communicators
- the capacity to apply perspectives that are intercultural and global, and
- a sensitivity to issues of exclusion, equity and justice.

A full list of the graduate attributes of the course is available from UTS: Communication.

Career options

Career options include roles in public relations for the corporate sector, as well as those related to integrated marketing communication, corporate communication, fundraising, international communication, media liaison and public affairs.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who have graduated with a UTS Bachelor of Arts in Communication (Public Communication) (C10248) (see page 266) may be granted up to one third of the postgraduate course in credit recognition. Other relevant qualifications are considered on a case-by-case basis.

Course duration and attendance

The course is offered on a one-year, full-time or equivalent part-time basis.

Course structure

This course totals 48 credit points of study consisting of three core foundation subjects (24 credit points) and three core subjects in the Integrated Communication specialisation (24 credit points).

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Overview

The Graduate Diploma in Organisational Change and Communication develops students' capacities for managing internal communication as organisations initiate and adapt to changes in their environments. Students learn about change communication management, communicating with internal publics such as employees or members, and learning in organisations.

The course is suitable for either current practitioners in this area or for those wishing to specialise in this field of practice. Academic staff involved in the course have substantial industry experience and have undertaken research in the field.

Course aims

Graduates of this course have:

- advanced understanding of communication and its management
- the ability to synthesise communication theory and practice
- the ability to analyse, design, cost and evaluate a communication strategy
- a sensitivity to ethical and legal issues related to communication
- a capacity to reflect on the roles and responsibilities of communicators
- the capacity to apply perspectives that are intercultural and global, and
- a sensitivity to issues of exclusion, equity and justice.

Career options

Career options include roles in communication management, particularly change communication and internal communication. Other roles include public relations managers, community relations, corporate communication and international communication.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Overview

The Graduate Diploma in Communication Management explores foundation studies and skills for professional communication practice. It is designed for current and prospective communication professionals seeking a professional qualification and scholarly development in the broad field of communication management.

Academic staff involved in the course have substantial industry experience and have undertaken research in the field.

Course aims

Graduates of this course have:

- advanced understanding of communication and its management
- the ability to synthesise communication theory and practice
- the ability to analyse, design, cost and evaluate a communication strategy
- a sensitivity to ethical and legal issues related to communication
- a capacity to reflect on the roles and responsibilities of communicators
- the capacity to apply perspectives that are intercultural and global, and
- a sensitivity to issues of exclusion, equity and justice.

A full list of the graduate attributes of the course is available from UTS: Communication.

Career options

Career options include roles in the field of communication management such as public relations, communication advising, community relations, corporate communication, integrated communication, internal communication, international communication, media liaison and public affairs.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Note(s)

Students intending to complete the Master of Arts in International Studies (C04262) (see page 436) are encouraged to enrol directly into it, rather than enrolling initially in the graduate diploma and transferring to the master's. This assists students and UTS: International Studies with planning an appropriate sequence of subjects.

Overview

The Graduate Diploma in International Studies is part of an articulated program of study in which students develop or enhance their knowledge of the language and culture of a country chosen from the range offered in the international studies program.

The program provides opportunities for students from any disciplinary background to study a language and culture other than English and thus add an international dimension to their qualification.

Course aims

The program aims to enable students to communicate competently in the language of their specialisation, learn about contemporary society in their chosen country of study, develop intercultural sensitivity, critically reflect on ethical issues in international research, and learn a variety of interdisciplinary skills and knowledge to research contemporary issues and trends in international studies.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

A minimum of two years' language study at an approved tertiary institution is recommended, but not required. Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time or equivalent part-time basis.

Course structure

The course totals 48 credit points. There are three compulsory components: two semesters of study of a language and culture other than English and a contemporary society subject; the Research in International Studies subject; and two elective subjects.

Students can focus on one of the following countries or majors: Argentina, Canada (Québec), Chile, China, Colombia, France, Germany, Italy, Japan, Latino USA, Mexico, Spain or Switzerland.

Students may select subjects beyond the lists of elective subjects with the approval of the graduate adviser. Not all subjects are available each semester.

Full-time students undertake 24 credit points a semester. Part-time students should undertake 16 credit points a semester.

Course completion requirements

CBK90891	Language, Culture and Society choice	24cp
979508	Research in International Studies	8cp
CBK90900	Electives (International Studies)	16cp
		Total 48cp

Course program

The example programs below show subject choices for the German Language and Culture option. Students undertaking one of the other language options undertake a similar sequence of subjects.

The part-time program shows the three compulsory subjects (i.e. two language and culture subjects and International Studies Research Seminar) and, as electives, a further two language and culture subjects plus Contemporary Germany.

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Diploma in International Studies and the Master of Arts in International Studies (C04262) (see page 436). Students who successfully complete this course and who are admitted to the master's course are eligible for credit recognition for completed subjects (48 credit points).

Students who want to proceed to a period of in-country study must advise UTS: International Studies at least one semester prior to wanting to go overseas.

Note(s)

This is an exit-only course. There is no direct admission to it. Current UTS students may be able to transfer into this course. Check with your faculty.

Transfer is only for students enrolled in the Master of Planning (C04007) (see page 353).

Overview

This course provides students with a thorough understanding of the economic, sociological, environmental and other theoretical and practical knowledge underpinning the governance in urban management and urban development. It has a strong focus on sustainable urban development.

With an engaged and practical approach, this course focuses on urban planning and development processes, sustainability and creative development control and enhances knowledge and skills in urban management, property development, urban design and environmental policy. Property development and planning students study a common first year, which develops a mutual understanding of how to balance private and public interests in urban development.

Course aims

Graduates of this course understand the nature and methods of planning and urban management and the interdependency of various urban policy fields, agencies and institutions that enable sound urban outcomes. They can responsibly participate in planning debates, apply sound and appropriate urban design principles, communicate at a superior level and constructively reflect on planning methods and practice.

Graduates also recognise and develop ethical, just and professional methodological approaches and practices.

Career options

Skills in planning and environmental law, development control, strategic planning, community planning and infrastructure management open up careers in government departments and agencies, local government, major development companies and private consulting firms.

Course duration and attendance

The course can be completed on a one-year, full-time basis.

Course structure

The course requires the completion of eight 6-credit-point subjects, totalling 48 credit points of study.

Course completion requirements

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

This is an exit-only course. There is no direct admission to it. Current UTS students may be able to transfer into this course. Check with your faculty.

Transfer is for students enrolled in the Master of Project Management (C04006) (see page 352).

Overview

With close industry contact, the course is delivered through block workshops designed to emulate project environments, giving students the opportunity to directly develop their ability to manage real projects. The program is rigorous, and is globally recognised for its tradition of excellence. The UTS program was the first Australian program to be accredited by the Project Management Institute's (PMI) Global Accreditation Centre. The foundation subjects are compatible with the structures used by the PMI and Australian Institute of Project Management (AIPM) to certify practitioners.

This program provides practice-based knowledge, skills and tools for the delivery of different types and sizes of projects and programs across all industry sectors, underpinned by theory and research. At the forefront of industry trends, the UTS program incorporates project complexity, program management, governance, reflective practice and leadership.

Course aims

1. Successful graduates of the course can: select and critically apply relevant theory to practice
2. develop and apply appropriate project management methodologies to suit different project and organisational contexts
3. demonstrate application of reflective practice

4. communicate in a variety of forms across culturally diverse project and organisational contexts
5. demonstrate the capacity to take a leadership role in project, program and portfolio management
6. demonstrate advanced-level skills in managing relationships between key stakeholders in a variety of contexts both in Australia and internationally
7. exhibit an understanding of the application of ethical practice to project governance in a variety of settings both in Australia and internationally
8. select and apply creative problem-solving skills to all phases of the project life cycle
9. apply critical thinking, analytical and research skills to a range of project and program management contexts
10. understand, select from and apply a range of systems thinking approaches to a variety of project and organisational contexts.

Career options

The course is highly regarded by industry as providing in-demand, 'professionally excellent' graduates. Its focus on leadership, program management and governance increases the employability of graduates at senior levels in many local and international industries, including banking and finance, construction and engineering, event management, government, health and IT.

Credit recognition

Applicants with a four-year degree in a related field of study may be given up to 24 credit points of exemptions.

Course duration and attendance

The course can be completed on a one-year, full-time basis.

Course structure

Students choose 48 credit points from a list of available subjects.

C07023v3 Graduate Diploma in Quantitative Finance

Award(s): Graduate Diploma in Quantitative Finance (GradDipQF)
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus

Note(s)

This course is not offered to international students.

Overview

The Quantitative Finance program provides the opportunity to acquire the detailed specialised knowledge and the professional competency required to work as a quantitative finance analyst in the modern finance industry.

This course provides the core knowledge of the modern financial instruments and the fundamentals of the specialised quantitative finance skills required for a basic professional competency in quantitative finance.

Career options

Career options for graduates include positions as quantitative analysts, risk management analysts, quantitative structures, quantitative developers, forecasters, traders, investment analysts and financial engineers across investment banks, trading banks, hedge funds, investment management companies, consulting companies, energy and mining companies, regulatory bodies and government organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in finance or with a strong mathematical background. Entry to the course is at the discretion of the course director.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students may be granted a maximum of five subject exemptions in the Graduate Diploma in Finance, of which two core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course duration is two years of part-time study.

Course structure

The course totals 48 credit points, comprising core subjects and options.

C07027v7 Graduate Diploma in Tourism Management

Award(s): Graduate Diploma in Tourism Management (GradDipTourismM)
CRICOS code: 006583A

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: Kuring-gai campus, although subjects may also be selected from among those offered at City campus (Haymarket)

Overview

The Graduate Diploma in Tourism Management is designed to develop critical, interpretive and problem-solving skills, and to provide a broad coverage of the tourism management field and some opportunity for studying areas of specific interests.

The course has been developed to meet the demand for professionals with a high level of management expertise.

Course aims

Throughout the course, emphasis is placed on the acquisition of strategic planning skills for tourism development, management and marketing.

Career options

Career options include management, marketing and policy-analysis roles in national and regional tourism offices, hotels, airlines, tour operators, tourist attractions and events.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The equivalent qualification required is a bachelor's degree in any discipline or satisfactory completion of a relevant graduate certificate.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of five subject exemptions, of which two core subjects can be approved from prior undergraduate study.

Course duration and attendance

The course is one year of full-time or two years of part-time study. It is offered at Kuring-gai campus, although some subjects may be offered at City campus.

Course structure

The course comprises 48 credit points, consisting of eight subjects.

Course completion requirements

27735	Tourism and the Industry	6cp
27767	Tourist Behaviour	6cp
21751	Management Research Methods	6cp
27733	The Experience Economy	6cp
27706	Managing Tourism Services	6cp

C07028v7 Graduate Diploma in Arts Management

Award(s): Graduate Diploma in Arts Management (GradDipAM)

CRICOS code: 009676E

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus (Haymarket), although some subjects are offered at Kuring-gai campus

Overview

The Graduate Diploma in Arts Management builds on the graduate certificate to develop students' critical, interpretive and problem-solving capabilities. It provides a solid grounding in the fundamentals of arts management and cultural policy, while providing room for some specialisation and the development of specific interests.

The course offers a combination of core management subjects specifically designed for the arts environment. The Graduate Diploma is an extremely popular course and is held in high regard by the arts industry.

Course aims

The course provides both theoretical and applied knowledge relevant to Australia's contemporary arts and cultural environment and related industries.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The equivalent qualification required is a bachelor's degree in any discipline or satisfactory completion of a relevant graduate certificate.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. C07029v6 Graduate Diploma in Sport Management

Award(s): Graduate Diploma in Sport Management (GradDipSportM)

CRICOS code: 014223C

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: Kuring-gai campus, although subjects may be selected from among those offered at City campus (Haymarket)

Overview

The Graduate Diploma in Sport Management is designed to develop critical, interpretive and problem-solving skills and to provide a broad coverage of the sport management field.

The course provides specific training in sport management and offers some opportunity for the development of specific interests.

Course aims

The course provides the theoretical knowledge needed to understand the changing nature of the Australian sport environment.

Career options

Career options include sport marketing and sponsorship, sport public relations, sport venue management, sport event management, human resource management in sport, player management, and sport policy development.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The equivalent qualification required is a bachelor's degree in any discipline or satisfactory completion of a relevant graduate certificate.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

C07031v6 Graduate Diploma in Marketing

Award(s): Graduate Diploma in Marketing [GradDipMktg]
CRICOS code: 008678M
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus

Overview

The Graduate Diploma in Marketing provides a thorough understanding of the basic principles of marketing, marketing research, the motivations of customers and marketing management.

The course assists students in developing the ability to identify and analyse marketing management problems and fosters skills in generating marketing strategies to solve problems in the marketing domain, both in Australia and overseas.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience or satisfactory completion of a relevant graduate certificate from UTS or other recognised higher education institution.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of five subject exemptions, of which two core subjects can be approved from prior undergraduate study.

Course duration and attendance

The course can be completed in one year of full-time or two years of part-time study.

Course structure

The course comprises 48 credit points, made up of four core subjects (24 credit points) and a choice of one of three specialised streams (24 credit points each) or a generalist choice block (24 credit points).

Course completion requirements

STM90720	Core subjects (Marketing)	24cp
Select one of the following:		24cp
CBK90635	Marketing streams	24cp

C07044v3 Graduate Diploma in Nursing

Award(s): Graduate Diploma in Nursing [GradDipN]
UAC code: 940830 (Autumn semester, Spring semester)
CRICOS code: 000360J
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: Kuring-gai campus

Note(s)

This course also has a mid-year intake.

Overview

This course is designed to provide registered nurses with a wide range of options to further their study in the field of nursing. Students gain knowledge, expertise and competencies in one of many clinical specialty areas, clinical teaching or clinical management (international students must undertake the Clinical Teaching sub-major or the Clinical Management sub-major).

Students can customise their program to meet personal learning needs or workplace requirements in order to further their career with sub-majors available in acute care nursing, anaesthetics and recovery room nursing, child and family health nursing, children's nursing, clinical management, clinical teaching, critical care nursing, diabetes education and management, mental health nursing, neonatal nursing, neuroscience nursing and perioperative nursing.

Course aims

This course aims to:

- develop the student's career as a clinician, manager or educator
- extend and enhance existing skills
- help build confidence and leadership skills
- provide academic experience and qualification
- enhance career prospects.

Career options

Career options include advanced clinical practice, nursing management and nursing education, in both clinical and community areas.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

Applicants must hold a current Authority to Practise, or be a registered nurse in their own country or place of residence and hold a current Authority to Practise.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time or two-year, part-time basis.

Course structure

Students must complete a total of 48 credit points (eight subjects).

The course comprises two core subjects, one sub-major (in a clinical specialty, clinical teaching or clinical management) and two elective subjects.

Note: International students can only undertake the Clinical Teaching sub-major or the Clinical Management sub-major.

Course completion requirements

Select one of the following:	48cp
STM90597 Domestic students	48cp
STM90598 International students	48cp
	Total 48cp

Course program

The part-time program for this course corresponds to the first two years of the Master of Nursing (C04228) (see page 395). An example program for the Critical Care Nursing sub-major in part-time mode is shown below.

Critical Care Nursing sub-major, part time

Year 1

CRICOS code: 040692B

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

This course offers a mid-year intake for local and international students.

Overview

This is an intermediate-level course in health services management and aims to expand students' knowledge and future career opportunities. The course develops students' knowledge and skills, which leads to an enhanced capacity to plan and manage health services.

Graduates of this course are exposed to academic and industry leaders who share their experience and knowledge to facilitate insight into the contemporary health service management environment.

Course aims

This course is designed to prepare new, aspiring, and middle health managers for roles in health services management in a variety of settings.

Career options

Career options include positions in health authorities, hospitals, primary and community care, aged care services, and other healthcare facilities in the public, private, not-for-profit, government and non-government health sectors.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who do not have an undergraduate degree but who have extensive relevant work experience in a health or human services field may also be considered eligible.

Applicants must have at least a minimum of one year, full-time (or part time equivalent) experience in a medium to large organisation. Health or human services experience is preferred. Work experience undertaken in small work settings (e.g. private practice settings with a small number of professionals) or as part of intern requirements are not accepted.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time or two-year, part-time basis.

Subjects are offered via on-campus study. Part-time students usually study two subjects a semester.

Course structure

Students must complete a total of 48 credit points, comprising six core subjects offered by UTS: Health, and two electives offered by UTS: Health and UTS: Business.

Course completion requirements

STM90763 Core subjects (Health Services Management)	36cp

C07070v5 Graduate Diploma in Midwifery

Award(s): Graduate Diploma in Midwifery (GradDipMid)

UAC code: 940805 (CSP) (Autumn semester)

Commonwealth-supported place?: Yes

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

Students admitted to the Graduate Diploma in Midwifery before 2012 should refer to the course entry in the 2011 handbook.

Limited commonwealth-supported places are available.

Applications are now open for the Autumn semester 2014 intake.

This course is not offered to international students.

Overview

This course is designed to meet the graduate needs of registered nurses wishing to gain registration to practise in the area of midwifery. It provides a broad theoretical and clinical study in midwifery, and includes a discussion of professional, sociopolitical and ethico-legal issues related to the family, and research skills that enhance midwifery practice and interpersonal processes. Students undertake concurrent employment as a student midwife in an accredited midwifery unit.

Midwives are in high demand at present, in both the public and private health systems, and the current shortage is expected to continue for some time.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

- Applicants must be a registered nurse in Australia.
- Applicants are required to apply for employment in a midwifery student position through the centralised recruitment process. This process is administered by the New South Wales Department of Health Nursing and Midwifery Office. Applications open in July and close in August.
- In addition, applicants need to apply to UTS for a position in the Graduate Diploma in Midwifery. This is either through the Universities Admission Centre (UAC) or directly to the University on specific postgraduate information evenings (check UTS website for details). Acceptance in the Graduate Diploma in Midwifery at UTS is dependent on the applicant securing employment as a student midwife.
- Applicants also need to be available to attend classes from early February, for the first week of midwifery classes.
- Students' current nursing registration will be confirmed via the National Register of Practitioners at: www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx
- Students should ensure that details of their registration are up-to-date on this register.
- Applicants are selected on academic merit based on their grade point average.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

This course is offered over a 14-month, full-time period.

Course structure

Students must complete a total of 48 credit points, comprising eight compulsory subjects.

Industrial training/professional practice

The course requires concurrent employment in an accredited midwifery unit for one year (four days a week) in order for students to meet the requirements to gain midwifery registration with the National Board of Nursing and Midwifery.

Course completion requirements

92873	Midwifery Practice 1	6cp
92785	Midwifery in Complex Situations	6cp
92893	Midwifery Practice 2	6cp
92927	Evidence-based Practice (Midwifery)	6cp
92922	The Meaning of Birth	6cp
92636	Preparation for Midwifery Practice	6cp
92631	Midwifery as Primary Health Care	6cp
92637	Supporting Families	6cp
		Total 48cp

Course program

A typical program is shown below.

Year 1

Autumn semester

92636	Preparation for Midwifery Practice	6cp
92873	Midwifery Practice 1	6cp
92631	Midwifery as Primary Health Care	6cp
92927	Evidence-based Practice (Midwifery)	6cp

Spring semester

92785	Midwifery in Complex Situations	6cp
92637	Supporting Families	6cp
92922	The Meaning of Birth	6cp
92893	Midwifery Practice 2	6cp

Further study at UTS

Students who complete the Graduate Diploma in Midwifery may be eligible to apply for 24 credit points (four specified subjects) of exemptions in the Master of Midwifery (C04247) (see page 422).

Professional recognition

Nursing and Midwifery Board of Australia. See the faculty rules for more information.

C07073v5 Graduate Diploma in Australian Law

Award(s): Graduate Diploma in Australian Law (GradDipAustLaw)

UAC code: 940408 (Autumn semester, Spring semester)

CRICOS code: 016613F

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

This course is not appropriate for applicants who are already admitted to practise as a lawyer in NSW.

Overview

This course is designed to permit appropriately qualified lawyers from jurisdictions outside Australia to satisfy the academic requirements for admission as a lawyer of the Supreme Court of NSW.

Each student's course is individually tailored to their academic requirements, as assessed by the Legal Profession Admission Board of the Supreme Court of NSW (LPAB).

Career options

Career options include lawyer in NSW within a government or corporate department, private law firm or community law centre, providing students also undertake a course in practical legal training (PLT).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold a bachelor's degree in law from outside Australia or be admitted as a lawyer in a jurisdiction outside Australia.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Before lodging an application, applicants must contact the LPAB to determine the subjects they are required to complete to be eligible for admission to practise in NSW. Further information about admission is available at:

www.lawlink.nsw.gov.au/lpab

Notification from the LPAB, listing the subjects required, must accompany the application for admission into the course.

Assumed knowledge

Appropriately qualified knowledge of a legal system.

Course duration and attendance

Full-time students can complete this course in a minimum of one year. Part-time students can complete the course in a minimum of one-and-a-half years.

Course structure

The course requires completion of a minimum of 48 credit points. However, each candidate's course of study varies depending on the number of subjects they are required to take in order to be admitted to practice in NSW. Subjects other than those listed below may be substituted depending on what subjects the LPAB requires applicants to complete to be eligible for admission to practice.

Industrial training/professional practice

Applicants should note that in order to gain admission as a lawyer of the Supreme Court of NSW they may also be required to undertake a course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 519).

Course completion requirements

CBK90942 Options

48cp

Total 48cp

Professional recognition

This course may satisfy the requirements for admission to the Supreme Court of NSW. The Legal Profession Admission Board may recognise subjects attempted within this course. Applicants are advised to obtain written confirmation of the LPAB in recognition of subjects attempted within this course prior to enrolling.

Award(s): Graduate Diploma in Legal Studies (GradDipLS)

UAC code: 940407 (Autumn semester, Spring semester, Summer session)

CRICOS code: 021718K

Commonwealth-supported place?: No

Load credit points: 36

Course EFTSL: 0.75

Location: City campus

Note(s)

The Graduate Diploma in Legal Studies is not a professional legal qualification. Applicants seeking to be admitted to practice should refer to the Juris Doctor (C04236) (see page 405) or the Bachelor of Laws (C10124) (see page 182). Students may apply for some subjects undertaken within the Graduate Diploma in Legal Studies to be credited towards these degrees.

Overview

The Graduate Diploma in Legal Studies meets the growing need for non-law graduates working in the public and private sectors to have a thorough understanding of the legal and regulatory framework in which they operate. This includes an understanding of foundational legal concepts such as contract law and tort law, methods of legal research and theory, as well as the opportunity to sample specialist legal areas such as compliance and intellectual property law.

The course attracts students from a wide variety of backgrounds interested in expanding their skill portfolio to include an understanding of the legal framework, including professionals from the insurance, human resources, banking and finance industries, managers and administrators, and HSC legal studies teachers.

Career options

This course particularly benefits accountants and auditors, business development managers, compliance managers, engineers and architects, financial advisers and planners, IT professionals, law enforcement officers, paralegals, policy officers in the public, private and non-profit sectors, property developers and public sector managers and administrators (especially those who work in Department of Foreign Affairs and Trade, the Attorney-General's Department and Treasury).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in a discipline other than law. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course can be completed in a minimum of one year of full-time or one-and-a-half years of part-time study. Subjects may also be available in Summer session, allowing accelerated progression.

The course is offered in a variety of attendance patterns, including intensive block attendance and weekly on-campus evening classes.

Course structure

The course requires completion of core subjects, including two compulsory introductory subjects and a choice of two further foundation subjects (30 credit points), plus a further option subject (6 credit points). (Refer to the course entry in the *UTS: Handbook 2013* for the pre-2014 course structure. For a current listing of subjects in each course, refer to the study package directory).

Core subjects are timetabled every semester and option subjects are regularly timetabled but not all option subjects listed are offered in any one semester. Timetabled subjects are offered subject to sufficient student interest. The current timetable can be found at:

<http://timetable.uts.edu.au>

Articulation with UTS courses

Subjects undertaken within the Graduate Diploma in Legal Studies are recognised within the Master of Legal Studies (C04147) (see page 383). Students enrolled in the graduate diploma may apply to internally transfer to the master's. Candidates are not awarded the graduate diploma but subjects undertaken are applied towards the master's.

Subjects undertaken within the Juris Doctor (C04236) (see page 405) are recognised within the Graduate Diploma in Legal Studies. Students enrolled in the Juris Doctor may apply to internally transfer to the graduate diploma. Candidates are not awarded the Juris Doctor but subjects undertaken are applied towards the graduate diploma.

Course EFTSL: 1

Location: City campus

Overview

This course is designed for students from a wide variety of disciplines who may or may not already be working in areas of multimedia. For this reason, it contains a considerable number of elective subjects to enable students to gain new areas of knowledge or broaden existing areas.

While this program is managed by the Faculty of Engineering and Information Technology, it is a joint program between the Faculty of Engineering and Information Technology, the Faculty of Arts and Social Sciences, and a number of other teaching faculties.

The program is designed to educate the innovators and future leaders of the various professions working in multimedia. Graduates acquire the fundamentals in multimedia, underpinning an up-to-date, flexible set of production skills in their own specialised area.

Course aims

A defining characteristic of multimedia education at UTS is the integration of theory and practice in all of the relevant disciplines and professions. The course aims to develop students' professional skills for direct application in the workplace, while providing a solid overview and understanding of the social, historical and industrial role of multimedia communication technologies. Graduates are prepared for a career in a rapidly growing and changing industry.

Career options

Career options include positions in digital media, the mobile web, information architecture, interaction design, new media, web design, web development and web project management. Various events are organised throughout the year to showcase student work and give students the opportunity to speak with industry professionals, including recruiters.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Alternatively, applicants can have a diploma from any field and substantial relevant professional experience, or substantial senior professional experience. Applicants with a three-year undergraduate degree (or equivalent), must also have either one year of relevant professional experience or a credit average or better in a Graduate Certificate in Interactive Multimedia.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Given the interdisciplinary focus and teamwork emphasis of this course, credit recognition and subject exemptions are not normally granted for other postgraduate study or work experience.

Course duration and attendance

The course is usually completed in one year of full-time or two years of part-time study.

Course structure

The course comprises 48 credit points of study and consists of four core subjects and four elective subjects (which may include core subjects for students intending to exit the program at graduate diploma level).

Industrial training/professional practice

Industrial training is available to both local and international students as a separate work-based learning course. Students can enrol into the Diploma in Information Technology Professional Practice (C20049) (see page 350) after completing a minimum of four core subjects. Students can be assisted in finding an internship, or may wish to have current relevant industry work experience recognised.

Course completion requirements

CBK90085 Core subjects	12cp
CBK90303 Electives (Interactive Multimedia)	24cp

Select 12 credit points from the following options:	12cp
95563 Digital Media Development Process	6cp
95564 Digital Media Technologies	6cp
95565 Digital Graphics and the Still Image	6cp
Total	48cp

Course program

The example below shows a typical full-time program for a student commencing in Autumn semester. Part-time students choose two subjects per semester and usually complete the core requirements in their first three semesters of study. Elective subjects may be chosen from across the University and must be approved by the multimedia program leader and then the relevant faculty.

Year 1**Autumn semester**

Select 12 credit points from the following options:	12cp
95563 Digital Media Development Process	6cp
95564 Digital Media Technologies	6cp
95565 Digital Graphics and the Still Image	6cp
Select 12 credit points of electives	12cp

Spring semester

Select 12 credit points from the following options:	12cp
95566 Digital Information and Interaction Design	6cp
95567 Digital Media in Social Context	6cp
95568 Digital Sound and the Moving Image	6cp
Select 12 credit points of electives	12cp

Articulation with UTS courses

This course forms part of an articulated program of study comprising the Graduate Certificate in Interactive Multimedia (C11143) (see page 500), the Graduate Diploma in Interactive Multimedia, and the Master of Interactive Multimedia (C04158) (see page 385).

Award(s): Graduate Diploma in Internetworking (GradDipInternetworking)

UAC code: 940610 (Autumn semester, Spring semester)

CRICOS code: 043340B

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

This course is intended for computing science, information technology or engineering graduates with or without networking experience who wish to learn or extend their knowledge of networking and networking technologies. As students come from a variety of backgrounds, there is a degree of subject choice in the program to meet individual needs.

The Internetworking program provides practical, hands-on learning experience using resources provided by Cisco Systems for internetworking including routing, switching, security, wireless and VoIP. Advanced electives in internetworking, in addition to CCNA and CCNP preparation subjects, are available. The program covers all aspects of the organisational use of networks: design, implementation, security management, end systems and applications.

Course aims

The program aims to:

- meet the needs of industry for networking specialists
- target a number of industry-based certifications: CCNA (Cisco Certified Network Associate) and CCNP (Cisco Certified Network Professional)
- retrain IT professionals wishing to move into networking and internetworking
- provide a thorough and practical grounding in networking, network design, and administration and management, and
- provide a solid foundation for the writing of networked applications using Unix, Java and WWW technologies.

Career options

Career options include applications developer, client server architect, data communications, network administrator, network architect, network designer, network integrator, network systems programmer, programmer analyst, security architect or system support analyst.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications are preferred in computing science, information technology, computer engineering, telecommunications, or a related discipline.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Two years' experience in networking or in another position in the IT industry is desirable. Applicants without work experience are also considered.

Credit recognition

Exemptions are granted only for subjects at graduate certificate level. There are no exemptions granted for the networking subjects 32524 and 32521 without the successful completion of the challenge test for each of the above. A challenge test is required even for holders of a CCNA or CCNP certification and those who have passed the CCNA curriculum in TAFE Certificate IV and / or Diploma. These challenge tests are always held in the week prior to the commencement of classes.

Course duration and attendance

The course duration is one year of full-time or two years of part-time study.

Course structure

The course totals 48 credit points of study, made up of four core subjects comprising the graduate certificate (a total of 24 credit points), a research preparation subject (6 credit points), plus a further 18 credit points chosen from a prescribed list. In some circumstances it may be possible to choose one elective from outside the list, provided it is approved by the course coordinator.

Course completion requirements

CBK90465 Internetworking choice	18cp
CBK90476 Internetworking choice	6cp
STM90729 Core subjects	24cp
Total	48cp

Course program

Below is a typical example of a full-time program commencing in Autumn semester.

Students wishing to take 32521 WANs and VLANs can enrol in this subject as either a core or an elective. 32521 has a prerequisite of 32524 LANS and Routing and therefore cannot be taken during the first semester of study. 32521 can be undertaken in the second semester in conjunction with one of the CCNP subjects with the course coordinator's approval.

A student wishing to undertake subjects in order to sit the Cisco CCNA certification exam must speak to either the course coordinator or the course administrator about subject choices and subject load.

Note: Electives are only offered in a particular semester (or year) if there is sufficient demand and the necessary resources.

Year 1**Autumn semester**

32118	Mobile Communications and Computing	6cp
32524	LANS and Routing	6cp
32547	UNIX Systems Programming	6cp
32144	Technology Research Preparation	6cp

Spring semester	
CBK90476 Internetworking choice	6cp
Select 18 credit points of options	18cp

Articulation with UTS courses

This course forms part of an articulated program comprising the Graduate Certificate in Internetworking (C11145) (see page 500), the Graduate Diploma in Internetworking, the Master of Science in Internetworking (C04160) (see page 386) and the Master of Science in Internetworking (Extended) (C04224) (see page 393).

Professional recognition

Students can prepare for Cisco CCNA and CCNP industry certification.

C07107v3 Graduate Diploma in Information Management

Award(s): Graduate Diploma in Information Management (GradDiplInfM)

UAC code: 940517 (Autumn semester, Spring semester)

CRICOS code: 032347G

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

The Graduate Diploma in Information Management is designed for people who wish to provide information services to others, or who need to manage and use information effectively within organisations.

In this course, graduates gain an understanding of the relationship between individuals and information and knowledge practices.

Course aims

Graduates have:

- demonstrated sophisticated information-handling skills appropriate for professional practice in diverse environments
- an understanding of the relationship between individuals and public/private recorded information and knowledge practices, tacit/explicit knowledge and how these can be valued, captured, structured and shared for effective use
- an understanding of contemporary issues, trends, innovations and forces for change in information practice as well as the broader political, policy and technological contexts
- an understanding of ethical practice and the ability to operate with integrity, rigour, self-reliance and cooperation in professional contexts
- demonstrated creative, critical, reflective problem-solving capabilities in the context of their professional roles and a commitment to lifelong learning.

Career options

Career options include information architect, information consultant, information content developer, information designer, information manager, librarian, media researcher or research officer.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification may submit a personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time or equivalent part-time basis.

Course structure

The course consists of four compulsory subjects plus two electives chosen from a specified list. Students can choose an elective subject beyond the specified list only with the approval of the graduate adviser.

Students should undertake 57087 Knowledge Management and the Organisation or 57089 Information Research and Data Analysis as their elective subject if they are planning to articulate to the Master of Arts in Information and Knowledge Management (C04203) (see page 388).

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

C07112v3 Graduate Diploma in Operations and Supply Chain Management

Award(s): Graduate Diploma in Operations and Supply Chain Management (GradDipOSCM)
CRICOS code: 055275G
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus

Overview

The Graduate Diploma in Operations and Supply Chain Management extends the Graduate Certificate and provides the opportunity for some specialisation.

Course aims

The course seeks to enhance professionals' understanding of the nature and contribution of supply chain and operational management functions in the organisational context.

Career options

Career options include management-level positions in service industry and areas traditionally associated with business operations management.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience or satisfactory completion of a relevant graduate certificate from UTS or other recognised higher education institution.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of five subject exemptions, of which two core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course is offered on a one-year, full-time or two-year, part-time basis.

Course structure

The course totals 48 credit points and consists of a combination of core and elective subjects.

Course completion requirements

Award(s): Graduate Diploma in Human Resource Management (GradDipHRM)

CRICOS code: 055276F

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

The Graduate Diploma in Human Resource Management provides an opportunity to study, at a professional level, those factors contributing to the complexity of decision-making in Australian and international employment relations.

Course aims

The Graduate Diploma in Human Resource Management is designed to meet the career needs of professionals with some experience in an area related to employment relations.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience or satisfactory completion of a relevant graduate certificate from UTS or other recognised higher education institution.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

CRICOS code: 065844G

Commonwealth-supported place?: No

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

This course is a tailored bridging course that provides a pathway into the Master of Advanced Architecture (C04240) (see page 410). It provides new skills and knowledge for students who have obtained professional qualifications prior to the introduction of digital software for design and documentation in architectural education (prior to 2000).

This is a highly flexible course which enables specialisation in either urban design or design technologies. Each student has a tailored program of architectural design and architectural practice subjects, based on their needs and experience.

The course equips graduates with skills of entrepreneurship, marketing, business and management necessary for leadership in the profession.

It provides a more flexible entry point for international students into the Master of Advanced Architecture (C04240) (see page 410).

Course aims

This course provides an alternative pathway for students from outside UTS, or with previous qualifications obtained prior to the use of digital software for design generation, building performance analysis and documentation, to gain the skills, knowledge and academic experiences that make them eligible to continue into the Master of Advanced Architecture (C04240) (see page 410) in either urban design or design technologies.

Through the core architectural design studio subjects, graduates are equipped with strategic thinking, spatial organisation and visual design skills, and develop further their verbal and written communication abilities. Project-based studio subjects explore research, design concepts, implementation strategies and presentation techniques. Through the core professional practice subjects, students develop their knowledge of all aspects of industry and practice management, furthering their capacity for leadership in the profession, locally and internationally.

Career options

Career options are focused on leading design and technical innovation roles in architectural and urban design practice.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants require a professional entry degree of five-years, full-time or equivalent from an accredited program in architecture or a four-year, full-time or equivalent degree from an accredited program in landscape architecture. All applicants must submit a portfolio of work demonstrating their design skills for examination in addition to a statement of interest in the course.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time basis.

Course structure

The course totals 48 credit points of selected Master of Architecture subjects made up of two 12-credit-point subjects in the architectural design stream, two 6-credit-point architectural practice subjects and two 6-credit-point electives.

Course completion requirements

CBK90631 Architectural Practice	12cp
Select one of the following:	12cp
CBK90815 Electives	12cp

C07118v1 Graduate Diploma in Teaching English to Speakers of Other Languages

Award(s): Graduate Diploma in Teaching English to Speakers of Other Languages (GradDipTESOL)

UAC code: 940228 (CSP) (Autumn semester), 940229 (PDFP) (Autumn semester, Spring semester), 940230 (qualified teachers only distance CSP) (Autumn semester), 940231 (qualified teachers only distance PDFP) (Autumn semester, Spring semester)

CRICOS code: 008684B

Commonwealth-supported place?: Yes

Load credit points: 48

Course EFTSL: 1

Location: City campus

Overview

UTS is a leading provider of postgraduate language and literacy courses, with academics who are published authors and internationally recognised experts in the field. This course meets the professional development needs of a wide range of English language teachers and educators teaching children, teenagers or adults. It caters for those seeking an initial teaching qualification in teaching English to adult speakers of other languages. It is also well suited to applicants who already possess a teaching qualification and wish to gain a specialist degree in the field as they are eligible for credit recognition.

Students study subjects that equip them with skills and knowledge to teach English in a variety of contexts, both local and international. The course features flexible study options with classes held at times suitable for full-time workers. It is designed by a team of experienced

TESOL professionals who are familiar with the full range of English language teaching contexts. The graduate diploma explicitly meets the needs of students and educators in the following contexts:

- working with migrants and Indigenous students across all levels of education
- teachers wishing to change discipline areas
- teaching English in countries outside of Australia
- international students wishing to study TESOL with the possibility of extending into the master's of TESOL.

Course aims

The course aims to produce TESOL teachers who are knowledgeable, reflective and engaging in their practice, have well developed interpersonal skills, are keen to put current developments in learning and teaching into practice, and have a commitment to lifelong learning.

Career options

Career options include a teacher of English as a second language in Australia or a teacher of English in overseas contexts (applicants are advised to check with potential employing bodies regarding employment requirements).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Local applicants apply through the Universities Admissions Centre.

International students

International students apply through UTS International.

Credit recognition

Graduates of the Graduate Certificate in Teaching English to Speakers of Other Languages (C11223) (see page 515) or equivalent teaching qualification (such as a primary or secondary school teaching qualification or an adult education teaching qualification) are eligible for 24 credit points of credit recognition.

Course duration and attendance

The course is offered on a one-year, full-time or two-year, part-time basis.

Students who receive 24 credit points of credit recognition may complete the course by distance, but only if relevant distance subjects are selected.

The subjects in STM90529 are run in standard weekly mode for TESOL students, except for 010071 Professional Practice 2 Language Literacy and Numeracy, which is run in block mode.

Course structure

The course comprises 48 credit points, made up of four compulsory core subjects (totalling 24 credit points) and four elective subjects (totalling 24 credit points). Not all electives are offered every semester.

Industrial training/professional practice

There is a practicum placement for subjects 010070 Professional Practice 1 Language Literacy and Numeracy and 010071 Professional Practice 2 Language Literacy and Numeracy.

Course completion requirements

Location: City campus

Note(s)

This is an exit-only course. There is no direct admission to it. Current UTS students may be able to transfer into this course. Check with your faculty.

Overview

Unique in Australia, the course is intellectually vibrant, socially engaging, visionary, practice focused and actively linked to industry. This course is centred around building a design community network.

The course has two main components: specialised master classes led by a studio leader and industry partners and theory and technology subjects taught across the program.

The program focuses on and integrates research, industry collaboration, internationalisation and a design culture through the delivery of specialist, core and trans-disciplinary subjects. It provides a postgraduate education that is flexible in both its practice orientation and research integration.

With a focus on design evolution, innovative integration of new technologies, practice and student experimentation, the course is delivered by experienced studio leaders who are acknowledged leaders in the specific industries and professions.

Course aims

Designed to produce a balance between high levels of specialisation and lateral thinking, the program enables students to examine design from a trans-disciplinary perspective.

It enables students to explore design issues under the supervision of a practice leader, to learn new strategies and the application of research and theory. It supports best practices in postgraduate design education through learning and research strategies that critically examine design practice.

Graduates of this course are leaders in design and related industries through their expertise in product and service development. They are able to utilise strategic processes, creative tools and research skills for innovation in design.

The program provides a suite of subjects for postgraduate designers in the areas of interaction, strategy and enterprise, lighting design, technotextiles, and text and image. Common subjects explore related conceptual challenges and questions of visual expression in the quest to develop useful, usable and resonant designs. These include understanding and articulating the importance of 'user experience', the role of design in humanising information, the aesthetic and conceptual dynamics of effective communication, strategic thinking, and aspects of design management, branding and communication.

Career options

Graduates' careers are enhanced by high-level professional knowledge and skills for the workplace, with possession of specialised knowledge in advanced textiles, space and materials, interaction, sustainable design and innovation.

Course duration and attendance

The course is offered on a one-year, full-time or two-year, part-time basis.

Course structure

Students must complete 48 credit points of subjects.

Course completion requirements

C07120v1 Graduate Diploma in Media Arts and Production

Award(s): Graduate Diploma in Media Arts and Production (GradDipMAP)
UAC code: 940504 (Autumn semester, Spring semester)
CRICOS code: 032358E
Commonwealth-supported place?: No
Load credit points: 48
Course EFTSL: 1
Location: City campus

Overview

The Graduate Diploma in Media Arts and Production is part of an articulated program in media arts and production that includes moving image, sound, digital media and interaction, and the interplay among these media.

Course aims

This course aims to provide students with core skills in moving image, digital media or sound production; expertise in one area of media arts and production; a capacity to think creatively and critically about, and contribute to, developments within the media industries; an awareness of industry practices in media production; the capacity to develop and critically revise their own work; and project management skills in the context of a media project.

Career options

Career options include various roles in a creative team across multiple modes of production and post-production of moving image, sound, digital media and interaction. Graduates have skills to develop their own media projects.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students who successfully completed the graduate certificate in the articulated program are eligible for credit recognition for completed subjects.

Course duration and attendance

The course is offered on a one-year, full-time or one-and-a-half-year, part-time basis.

Course structure

Students complete 48 credit points of study made up of three core subjects and three elective subjects.

Full-time students are required to undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

CBK90806 Electives (MAP)	24cp
STM90555 Core subjects (Media Arts and Production)	24cp
Total	48cp

Course program

Below are examples of typical programs for full- and part-time students. Students can choose to complete core subjects and elective/sub-major subjects in any order, however, prerequisites may apply.

Autumn commencing, full time

Award(s): Graduate Certificate in Property and Planning [GradCertPropPlan]
 UAC code: 940102 (Autumn semester, Spring semester)
 Commonwealth-supported place?: No
 Load credit points: 24
 Course EFTSL: 0.5
 Location: City campus

Note(s)

This course is not offered to international students.

Overview

This course provides a unique environment for planners and property developers to develop a mutual understanding of how to balance private and public interests in urban development. It has a strong focus on sustainable urban development.

The Graduate Certificate in Property and Planning is a foundation course for students who go on to study the Master of Planning (C04007) (see page 353) or the Master of Property Development (C04008) (see page 354). Both disciplines require close cooperation and this course shows students how to achieve better urban outcomes through closer partnerships between those building cities with those planning them.

Course aims

The course gives property development students an introduction to the rationale of planning and its legal framework, an introduction to the principles and practice of sustainable urban development and experience in developing a plan for a real-world urban renewal site. It gives planning students a greater understanding of key issues in property development, such as valuation and feasibility.

The course provides students with a combination of experiential learning experiences, team working, exposure to practical skills development, together with a thorough understanding of economic, environmental and other knowledge underpinning urban management and development.

Career options

Career options are in banking and property investment, finance, government departments and agencies, local government, major development companies, management and development, and private consulting firms.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Appropriate first degrees include a bachelor's degree in planning, architecture, geography, economics, property economics, commerce, law, engineering and building. Students can hold an advanced TAFE diploma in a property-related discipline. Other qualifications may be accepted if supported by extensive relevant work experience.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-semester, full-time or one-year, part-time basis. It is delivered in face-to-face mode.

Course completion requirements

STM90502 Core subjects (Property and Planning) 24cp
 Total 24cp

Course program

An example course program is provided below.

C11005v5 Graduate Certificate in Project Management

Award(s): Graduate Certificate in Project Management [GradCertPM]
 UAC code: 940104 (Autumn semester, Spring semester)
 Commonwealth-supported place?: No
 Load credit points: 24
 Course EFTSL: 0.5
 Location: City campus

Note(s)

This course is not offered to international students.

Overview

With close industry contact, the course is delivered through block workshops designed to emulate project environments, giving students the opportunity to directly develop their ability to manage real projects. The program is rigorous, and is globally recognised for its tradition of excellence. The UTS program was the first Australian program to be accredited by the Project Management Institute's (PMI) Global Accreditation Centre. The foundation subjects are compatible with the structures used by the PMI and Australian Institute of Project Management (AIPM) to certify practitioners.

This program provides practice-based knowledge, skills and tools for the delivery of different types and sizes of projects and programs across all industry sectors, underpinned by theory and research. At the forefront of industry trends, the UTS program incorporates project complexity, program management, governance, reflective practice and leadership.

Course aims

Successful graduates of the course can:

- select from and apply a broad range of tools and methods used to manage projects
- demonstrate an understanding of reflective practice
- exhibit an understanding of the application of ethical principles to project management practice in a variety of settings both in Australia and internationally
- demonstrate an understanding of communication in a variety of forms across culturally diverse project contexts
- understand appropriate information systems for application within a project management context
- understand principles involved in managing relationships between key project stakeholders

- understand the principles of project team leadership in culturally diverse teams
- apply foundation level skills to problem analysis and decision-making.
- apply critical thinking and creative problem solving skills to project management contexts
- understand and apply basic research skills
- demonstrate foundation-level knowledge of systems thinking as it applies to project management.

Career options

The course is highly regarded by industry as providing in-demand, 'professionally excellent' graduates. Its focus on leadership, program management and governance increases the employability of graduates at senior levels in many local and international industries, including banking and finance, construction and engineering, event management, government, health and IT.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Admission is at the discretion of the course director. Students require a recognised undergraduate degree plus six months industry experience, or five years industry experience, or a recognised professional qualification with six months relevant work experience.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-semester, full-time or one-year, part-time basis.

The course is delivered in face-to-face mode (on campus or offshore in conjunction with selected education partners).

Course structure

Students complete four compulsory subjects totalling 24 credit points.

Course completion requirements

CBK90603 PM Foundation 24cp
Total 24cp

Course program

A typical course program is shown below.

Year 1

Autumn or Spring semester

Select 24 credit points from the following options:	24cp
15315 Project Management Principles	6cp
15459 Project Management Methodologies	6cp
15316 Project Management Knowledge Areas	6cp
15312 Communication and Critical Thinking	6cp

Articulation with UTS courses

The course may be taken as a separate award or can articulate into, and form part of, the Master of Project Management (C04006) (see page 352). The project management program structure allows students a choice of entry requirements and study paths leading to the award of graduate certificate (24 credit points), Graduate Diploma in Project Management (C07004) (see page 455) (48 credit points), Master of Project Management (C04006) (see page 352) (72 credit points) and Master of Business Administration (Project Management major) (C04018) (see page 355) (96 credit points). Each stage is self-contained and can be undertaken through part-time or full-time study.

Professional recognition

This program is accredited by the Project Management Institute's (PMI) Global Accreditation Centre and the Royal Institute of Chartered Surveyors (RICS). It is endorsed by the Australian Institute of Project Management (AIPM), which is a member of the International Project Management Association (IPMA).

C11008v6 Graduate Certificate in Business Administration

Award(s): Graduate Certificate in Business Administration

(GradCertBusAdmin)

CRICOS code: 018156K

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

The Graduate Certificate in Business Administration provides foundation skills used in the general management of a business enterprise for non-graduates who have extensive business experience.

Course aims

General management skills are developed to provide expertise in strategic thinking, critical analysis, developing and implementing business plans, decision-making under uncertainty, understanding organisational dynamics, effective communication and promoting change.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants without a degree require eight years' full-time relevant work experience and evidence of a general capacity to undertake tertiary education.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course may be completed in one semester of full-time or one year of part-time study.

Course structure

The course comprises four of the core MBA subjects, totalling 24 credit points.

Course completion requirements

23706 Economics for Management	6cp
22747 Accounting for Managerial Decisions	6cp
21800 Management and Organisations	6cp
21878 Organisational Dialogue: Theory and Practice	6cp
	Total 24cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Business Administration, the Graduate Diploma in Business Administration (C06009) (see page 439) and the Master of Business Administration (MBA) (C04018) (see page 355). Students who complete the graduate certificate at credit level or above may apply directly for admission into the MBA program.

C11015v7 Graduate Certificate in Accounting and Finance

Award(s): Graduate Certificate in Accounting and Finance (GradCertAccFin)

CRICOS code: 022411K

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

The Graduate Certificate in Accounting and Finance provides a general understanding of the basic elements of accounting and finance.

The course is designed for students without a strong undergraduate background in accounting and/or finance who need some of the key basic building blocks before proceeding to advanced-level subjects in a master's program. It is also appropriate for students who have no undergraduate degree but extensive practical experience and who can use the program to prove their ability to undertake postgraduate study.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants without a degree require eight years' full-time relevant work experience and evidence of a general capacity to undertake tertiary education.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course duration is one-semester of full-time or one-year of part-time study.

Course structure

The course comprises 24 credit points of core subjects.

Course completion requirements

25742	Financial Management	6cp
22747	Accounting for Managerial Decisions	6cp
23706	Economics for Management	6cp
79708	Contemporary Business Law	6cp
		Total 24cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Accounting and Finance, the Graduate Diploma in Accounting and Finance (C07012) (see page 456) and the Master of Business in Accounting and Finance (C04038) (see page 358).

C11024v4 Graduate Certificate in Community and Not-for-Profit Management

Award(s): Graduate Certificate in Community and Not-for-Profit Management (GradCertCommunityNFPM)

Commonwealth-supported place?: Yes

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

The Graduate Certificate in Community and Not-for-Profit Management provides a basic introduction to the field and develops skills and knowledge in the areas of financial management and funding.

The course is industry-relevant and flexible study modes are offered.

Career options

Career options include managing non-government or non-profit organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants without a degree require eight years' full-time relevant work experience and evidence of a general capacity to undertake tertiary education.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course duration is one year of part-time study.

It is taught in flexible mode including three intensive workshops of five days each, self-managed learning packages and learning partnerships to develop peer-supported networks.

Course structure

The course comprises 24 credit points of study, made up of four compulsory subjects.

Course completion requirements

21766	Managing Community Organisations	6cp
21767	Not-for-Profit Sector Theory and Context	6cp
21817	Volunteer Management	6cp
21778	Resource Mobilisation	6cp
Total		24cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Community and Not-for-Profit Management, the Graduate Diploma in Community and Not-for-Profit Management (C07019) (see page 457) and the Master of Management (C04239) (see page 408).

Overview

This course is designed to provide an opportunity for practising professional engineers or technologists to extend their engineering knowledge and to update their knowledge and skills in line with

recent advances. It also allows graduates in related disciplines to undertake formal study in engineering, and may be of value to professionally qualified immigrant engineers seeking orientation to Australian conditions and practice.

This course is designed to provide an opportunity for practising professional engineers or technologists to extend their engineering knowledge and to update their knowledge and skills in line with recent advances. It also allows graduates in related disciplines to undertake formal study in engineering, and may be of value to professionally qualified immigrant engineers seeking orientation to Australian conditions and practice.

Career options

This course allows participants to enhance their ability to understand some principles of engineering either at a basic level or in the choice of their major.

This course is also popular among potential students who have been away from study for a while, and who want to gain current knowledge and understanding in their choice of major.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Candidates without a degree, but who have a TAFE diploma or equivalent and with suitable work experience, may also apply for this course. All applications are assessed individually.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University policy on credit recognition (www.gsu.uts.edu.au/policies/credit-recognition.html). The maximum amount of credit recognition granted is 6 credit points (without exception). Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The course may be taken on a one-semester, full-time or one-year, part-time basis. Attendance in subjects is available in weekly, block and/or distance modes.

Classes are usually held in the evenings, in block and/or in distance mode.

Course structure

Students complete 24 credit points of study. Program details vary with the major and are determined prior to enrolment, in consultation with, and with the approval of, an academic adviser designated by the Director, Postgraduate Coursework Programs, UTS: Engineering.

Some program majors may require students to complete prescribed subjects with or without an opportunity for electives. In these cases, the area of program major is recognised on the candidate's academic record.

Subject selection should be clearly related to a professional theme.

A major need not be selected, though a major is granted if three subjects (18 credit points) are completed within a particular postgraduate program major.

Course completion requirements

CBK90329 Major choice	24cp
Total 24cp	

Course program

The tables below give details of each major: for each major there are three tables. The first lists the compulsory subjects and allowable option choices for the major. The next two tables show the subjects typically offered in Autumn and Spring semesters. Where an elective is specified, the subject is to be chosen from postgraduate subjects offered within the Faculty of Engineering and Information Technology, as listed in the elective option. Recommended programs take account of the semesters in which subjects are offered and the way the timetable is designed to avoid clashes. Some subjects are offered in weekly mode, others in block mode, and others in distance mode or a combination of modes.

List of majors

MAJ03453 Civil Engineering	24cp

Civil Engineering major

Select three subjects from the following:	18cp
49002 Managing Projects	6cp
49102 Traffic and Transportation	6cp
49105 Water Supply and Wastewater Management	6cp
49106 Road Engineering Practice	6cp
49107 Urban Stormwater Design	6cp
49109 Engineered Natural Water Treatment Systems	6cp
49115 Facade Engineering	6cp
49121 Environmental Assessment and Planning	6cp
49126 Environmental Management of Land	6cp
49131 Bridge Design	6cp
49136 Application of Timber in Engineering Structures	6cp
49150 Prestressed Concrete Design	6cp
49143 Civil Engineering Review 1	6cp
49254 Advanced Soil Mechanics and Foundation Design	6cp
49258 Pavement Analysis and Design	6cp
49119 Problematic Soils and Ground Improvement Techniques	6cp
49118 Applied Geotechnics	6cp

Select 6 credit points of electives 6cp

Civil Engineering major - subjects typically offered in Autumn

49002 Managing Projects	6cp
49102 Traffic and Transportation	6cp
49105 Water Supply and Wastewater Management	6cp
49107 Urban Stormwater Design	6cp
49109 Engineered Natural Water Treatment Systems	6cp
49126 Environmental Management of Land	6cp
49136 Application of Timber in Engineering Structures	6cp

Civil Engineering major - subjects typically offered in Spring

49002 Managing Projects	6cp
49106 Road Engineering Practice	6cp
49115 Facade Engineering	6cp
49121 Environmental Assessment and Planning	6cp
49131 Bridge Design	6cp
49150 Prestressed Concrete Design	6cp
49118 Applied Geotechnics	6cp

Computer Control Engineering major

Select one subject from the following:	6cp
49261 Biomedical Instrumentation	6cp
49274 Advanced Robotics	6cp
49275 Neural Networks and Fuzzy Logic	6cp
Select two subjects from the following:	12cp
49048 Wireless Networking Technologies	6cp
49261 Biomedical Instrumentation	6cp
49262 Web Technologies	6cp
32555 Fundamentals of Software Development	6cp
32603 Systems Quality Management	6cp
32555 Fundamentals of Software Development	6cp
49274 Advanced Robotics	6cp
49275 Neural Networks and Fuzzy Logic	6cp
Select 6 credit points of electives	6cp

Computer Control Engineering major - subjects typically offered in Autumn

49048 Wireless Networking Technologies	6cp
32603 Systems Quality Management	6cp
32555 Fundamentals of Software Development	6cp
49275 Neural Networks and Fuzzy Logic	6cp

49262 Web Technologies	6cp
32555 Fundamentals of Software Development	6cp
49274 Advanced Robotics	6cp

Energy Planning and Policy major

Select one of the following:	6cp
49021 Evaluation of Infrastructure Investments	6cp
49024 Energy Modelling	6cp
Select three subjects from the following:	18cp
49024 Energy Modelling	6cp
49025 Methods for Energy Analysis	6cp
49026 Electricity Sector Planning and Restructuring	6cp
49027 Energy Demand Analysis and Forecasting	6cp
49028 Policy and Planning of Energy Conservation	6cp
49029 Environmental Policy for Energy Systems	6cp
49706 Regulatory Economics	6cp
49021 Evaluation of Infrastructure Investments	6cp
49022 Energy Resources and Technology	6cp
49023 Energy and Environmental Economics	6cp

Energy Planning and Policy major - subjects typically offered in Autumn

49025 Methods for Energy Analysis	6cp
49026 Electricity Sector Planning and Restructuring	6cp
49027 Energy Demand Analysis and Forecasting	6cp
49021 Evaluation of Infrastructure Investments	6cp

Energy Planning and Policy major - subjects typically offered in Spring

49024 Energy Modelling	6cp
49028 Policy and Planning of Energy Conservation	6cp
49029 Environmental Policy for Energy Systems	6cp
49706 Regulatory Economics	6cp

Integrated Logistic Support and Engineering Management major

49001 Judgment and Decision Making	6cp
49309 Quality Planning and Analysis	6cp
49655 Integrated Logistic Support	6cp
49678 Reliability Availability and Maintainability	6cp

Integrated Logistic Support Eng Mg - subjects typically offered in Autumn

49001 Judgment and Decision Making	6cp
49309 Quality Planning and Analysis	6cp
49678 Reliability Availability and Maintainability	6cp

Integrated Logistic Support Eng Mg - subjects typically offered in Spring

49001	Judgment and Decision Making	6cp
49309	Quality Planning and Analysis	6cp
49655	Integrated Logistic Support	6cp

Local Government Engineering major

Select three subjects from the following: 18cp

49102	Traffic and Transportation	6cp
49258	Pavement Analysis and Design	6cp
49106	Road Engineering Practice	6cp
49107	Urban Stormwater Design	6cp
49108	Local Government Powers and Practice	6cp
49121	Environmental Assessment and Planning	6cp
49126	Environmental Management of Land	6cp

Select 6 credit points of electives 6cp

Local Government Engineering major - subjects typically offered in Autumn

49102	Traffic and Transportation	6cp
49258	Pavement Analysis and Design	6cp
49107	Urban Stormwater Design	6cp
49108	Local Government Powers and Practice	6cp
49126	Environmental Management of Land	6cp

Local Government Engineering major - subjects typically offered in Spring

49106	Road Engineering Practice	6cp
49121	Environmental Assessment and Planning	6cp

Manufacturing Engineering and Management major

Select three subjects from the following: 18cp

49002	Managing Projects	6cp
49049	Air and Noise Pollution	6cp
49307	Internal Combustion Engines	6cp
49316	Materials Handling	6cp
49321	Energy Conversion	6cp
49322	Airconditioning	6cp
49325	Computer-aided Mechanical Design	6cp
49328	Turbomachines	6cp
49928	Design Optimisation for Manufacturing	6cp
49312	Advanced Flow Modelling	6cp

Select 6 credit points of electives 6cp

Manufacturing Eng and Management - subjects typically offered in Autumn

49002	Managing Projects	6cp
49316	Materials Handling	6cp
49321	Energy Conversion	6cp
49322	Airconditioning	6cp
49928	Design Optimisation for Manufacturing	6cp

Manufacturing Eng and Management - subjects typically offered in Spring

49002	Managing Projects	6cp
49049	Air and Noise Pollution	6cp
49307	Internal Combustion Engines	6cp
49325	Computer-aided Mechanical Design	6cp
49328	Turbomachines	6cp
49312	Advanced Flow Modelling	6cp

Software Engineering major

32555	Fundamentals of Software Development	6cp

Select two subjects from the following: 12cp

49002	Managing Projects	6cp
49262	Web Technologies	6cp
32555	Fundamentals of Software Development	6cp
32603	Systems Quality Management	6cp

Select one subject from the following: 6cp

49001	Judgment and Decision Making	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49306	Quality and Operations Management Systems	6cp

Software Engineering major - subjects typically offered in Autumn

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
32603	Systems Quality Management	6cp
32555	Fundamentals of Software Development	6cp
49306	Quality and Operations Management Systems	6cp

Software Engineering major - subjects typically offered in Spring

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49262	Web Technologies	6cp
32555	Fundamentals of Software Development	6cp
49306	Quality and Operations Management Systems	6cp

Structural Engineering major

Select three subjects from the following: 18cp

49047	Finite Element Analysis	6cp
49131	Bridge Design	6cp
49134	Structural Dynamics and Earthquake Engineering	6cp
49136	Application of Timber in Engineering Structures	6cp
49150	Prestressed Concrete Design	6cp
49002	Managing Projects	6cp
49115	Facade Engineering	6cp
49118	Applied Geotechnics	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49135	Wind Engineering	6cp
49143	Civil Engineering Review 1	6cp
49151	Concrete Technology and Practice	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp

Select 6 credit points of electives 6cp

Structural Engineering major - subjects typically offered in Autumn

49002	Managing Projects	6cp
49047	Finite Element Analysis	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49136	Application of Timber in Engineering Structures	6cp
49135	Wind Engineering	6cp
49151	Concrete Technology and Practice	6cp

Structural Engineering major - subjects typically offered in Spring

49002	Managing Projects	6cp
49118	Applied Geotechnics	6cp
49131	Bridge Design	6cp
49150	Prestressed Concrete Design	6cp
49134	Structural Dynamics and Earthquake Engineering	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp

Telecommunications Engineering major

Select one of the following: 6cp

49205	Transmission Systems	6cp
49215	Telecommunications Industry Management	6cp

Select two subjects from the following: 12cp

49205	Transmission Systems	6cp
49215	Telecommunications Industry Management	6cp
49048	Wireless Networking Technologies	6cp
42890	4G Mobile Technologies	6cp
49201	Integrated Services Networks	6cp
49238	Telecommunication Networks Management	6cp
49249	Telecommunications Engineering Review	6cp
49223	Satellite Communication Systems	6cp

Select 6 credit points of electives 6cp

Telecommunications Engineering - subjects typically offered in Autumn

49048	Wireless Networking Technologies	6cp
42890	4G Mobile Technologies	6cp
49205	Transmission Systems	6cp
49249	Telecommunications Engineering Review	6cp

Telecommunications Engineering - subjects typically offered in Spring

49201	Integrated Services Networks	6cp
49215	Telecommunications Industry Management	6cp
49223	Satellite Communication Systems	6cp
49238	Telecommunication Networks Management	6cp
49249	Telecommunications Engineering Review	6cp

Telecommunication Networks major

Select one of the following:		6cp
49202	Communication Protocols	6cp
49238	Telecommunication Networks Management	6cp

Select one subject from the following:		6cp
49202	Communication Protocols	6cp
49238	Telecommunication Networks Management	6cp
49048	Wireless Networking Technologies	6cp
49201	Integrated Services Networks	6cp
49215	Telecommunications Industry Management	6cp
49249	Telecommunications Engineering Review	6cp
42902	Interior Routing and High Availability	6cp
42903	Multi Protocol Label Switching	6cp

Select one subject from the following:		6cp
49202	Communication Protocols	6cp
49238	Telecommunication Networks Management	6cp
49048	Wireless Networking Technologies	6cp
49201	Integrated Services Networks	6cp
49215	Telecommunications Industry Management	6cp
49249	Telecommunications Engineering Review	6cp
49262	Web Technologies	6cp
32555	Fundamentals of Software Development	6cp
32570	Enterprise Software Architecture and Middleware	6cp
42902	Interior Routing and High Availability	6cp
42903	Multi Protocol Label Switching	6cp

Select 6 credit points of electives 6cp

Telecommunication Networks major - subjects typically offered in Autumn

49048	Wireless Networking Technologies	6cp
49202	Communication Protocols	6cp
32555	Fundamentals of Software Development	6cp

Telecommunication Networks major - subjects typically offered in Spring

49201	Integrated Services Networks	6cp
49215	Telecommunications Industry Management	6cp
49238	Telecommunication Networks Management	6cp
49262	Web Technologies	6cp
32555	Fundamentals of Software Development	6cp
32570	Enterprise Software Architecture and Middleware	6cp

Water Engineering major

Select three subjects from the following:		18cp
49107	Urban Stormwater Design	6cp
49117	Floodplain Risk Management in NSW	6cp
49109	Engineered Natural Water Treatment Systems	6cp
49122	Ecology and Sustainability	6cp
49255	Catchment Modelling	6cp
49256	Flood Estimation	6cp
49116	Contaminated Site and Waste Remediation	6cp
49126	Environmental Management of Land	6cp
49285	Emergency Management	6cp

Select 6 credit points of electives 6cp

Water Engineering major - subjects typically offered in Autumn

49107	Urban Stormwater Design	6cp
49109	Engineered Natural Water Treatment Systems	6cp
49256	Flood Estimation	6cp
49126	Environmental Management of Land	6cp

Water Engineering major - subjects typically offered in Spring

49117	Floodplain Risk Management in NSW	6cp
49122	Ecology and Sustainability	6cp
49255	Catchment Modelling	6cp
49116	Contaminated Site and Waste Remediation	6cp
49285	Emergency Management	6cp

No specified major

Select 24 credit points of options 24cp

Geotechnical Engineering major

Select three subjects from the following:		18cp
49102	Traffic and Transportation	6cp
49116	Contaminated Site and Waste Remediation	6cp
49118	Applied Geotechnics	6cp
49106	Road Engineering Practice	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49126	Environmental Management of Land	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp
49143	Civil Engineering Review 1	6cp
49257	Geographic Information Systems	6cp
49258	Pavement Analysis and Design	6cp

Select 6 credit points of electives 6cp

Geotechnical Engineering - subjects typically offered in Autumn

49102	Traffic and Transportation	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49126	Environmental Management of Land	6cp
49257	Geographic Information Systems	6cp
49258	Pavement Analysis and Design	6cp

Geotechnical Engineering - subjects typically offered in Spring

49106	Road Engineering Practice	6cp
49116	Contaminated Site and Waste Remediation	6cp
49118	Applied Geotechnics	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp

Operations major

49306	Quality and Operations Management Systems	6cp
49309	Quality Planning and Analysis	6cp
49989	Operations Engineering	6cp

Select 6 credit points from the following options: 6cp

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49004	Systems Engineering for Managers	6cp
49006	Risk Management in Engineering	6cp
49016	Technology and Innovation Management	6cp
49069	Leadership and Responsibility	6cp
49655	Integrated Logistic Support	6cp
49678	Reliability Availability and Maintainability	6cp
49680	Value Chain Engineering Systems	6cp

Operations major - subjects typically offered in Autumn

49001	Judgment and Decision Making	6cp
49004	Systems Engineering for Managers	6cp
49006	Risk Management in Engineering	6cp
49016	Technology and Innovation Management	6cp
49069	Leadership and Responsibility	6cp
49306	Quality and Operations Management Systems	6cp
49309	Quality Planning and Analysis	6cp
49678	Reliability Availability and Maintainability	6cp
49680	Value Chain Engineering Systems	6cp
49989	Operations Engineering	6cp

Operations major - subjects typically offered in Spring

49001	Judgment and Decision Making	6cp
49004	Systems Engineering for Managers	6cp
49006	Risk Management in Engineering	6cp
49016	Technology and Innovation Management	6cp
49069	Leadership and Responsibility	6cp
49306	Quality and Operations Management Systems	6cp
49309	Quality Planning and Analysis	6cp
49655	Integrated Logistic Support	6cp
49680	Value Chain Engineering Systems	6cp
49989	Operations Engineering	6cp

Systems Engineering major

49004	Systems Engineering for Managers	6cp
32569	Enterprise Business Requirements	6cp
49655	Integrated Logistic Support	6cp
Select 6 credit points of electives		6cp

Systems Engineering major - subjects typically offered in Autumn

49004	Systems Engineering for Managers	6cp
32569	Enterprise Business Requirements	6cp
49655	Integrated Logistic Support	6cp

Systems Engineering major - subjects typically offered in Spring

49004	Systems Engineering for Managers	6cp

Biomedical Engineering major

49261	Biomedical Instrumentation	6cp

Select one of the following: 6cp

91400	Human Anatomy and Physiology	6cp
91429	Physiological Bases of Human Movement	6cp

Select 12 credit points from the following options: 12cp

49275	Neural Networks and Fuzzy Logic	6cp
49274	Advanced Robotics	6cp
49048	Wireless Networking Technologies	6cp
32555	Fundamentals of Software Development	6cp
91705	Medical Devices and Diagnostics	6cp
91403	Medical Imaging	6cp
91140	BioNanotechnology	6cp
91239	Human Pathophysiology	6cp

91239	Human Pathophysiology	6cp

Articulation with UTS courses

Study undertaken in this course may be credited in full towards a Master of Engineering (C04090) (see page 362) or Master of Engineering Studies (C04097) (see page 367) provided the entry requirements of the master's degrees are met. Completion of the course requirements does not guarantee admission to master's candidature. Eligibility for consideration may be subject to the attainment of a certain level of performance, typically a weighted average mark in completed subjects of at least 65 per cent over 18 credit points.

Location: City campus or distance

Overview

This course deals with the broad aspects of environmental management relevant to practising professionals in engineering science, planning, architecture, law, surveying, health and building. Engineers, scientists, town planners and other professionals working in this field have a compelling duty to ensure that the adverse effects of development on the total environment are minimised.

Environmental engineering and management is high on the political agenda. It also has a high professional priority. Students develop a background and competence in environmental management.

Course aims

The course aims to develop an awareness and understanding of the human impact on the environment with respect to waste minimisation and water quality management, and the professional skills required to work as part of an integrated team responsible for environmental planning and management.

Career options

This course is of relevance to practising professionals in architecture, building, engineering science, health, law, planning and surveying.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in engineering, science, design, architecture, building, surveying or planning. Provisional admission for graduates from other disciplines is available provided the education contained an adequate introduction to mathematics and physical sciences. Applicants without a degree, but who have a TAFE diploma or equivalent and with suitable work experience, may also apply for this course. All applications are assessed individually.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University's policy on credit recognition (www.gsu.uts.edu.au/policies/credit-recognition.html). The maximum amount of credit recognition granted is 6 credit points (without exception). Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The normal attendance pattern, based on two subjects a semester, requires a minimum of one year to complete the course. This degree is also available to full-time, fee-paying international students who complete the degree in one semester.

The block attendance pattern of study currently consists of three sessions a semester, each session involving three full days of attendance. To complete two subjects in a semester, three full days of attendance are required at each session. To complete one subject in a semester, one-and-a-half days of attendance at each session are required. Subjects may also be taken in distance mode.

Students who want to undertake the course in distance mode may have to follow a restricted course structure as not all subjects are offered in distance mode.

Course structure

Students complete three subjects chosen from a core list of subjects (Group A) and one subject from an electives list (Group B), totalling 24 credit points of study.

Course completion requirements

CBK90360 Electives choice (Group B)	6cp
CBK90359 Core subject choice (Group A)	18cp
Total	24cp

Course program

Subject lists are shown below.

Select three subjects from the following:	18cp
49049 Air and Noise Pollution	6cp
49109 Engineered Natural Water Treatment Systems	6cp
49121 Environmental Assessment and Planning	6cp
49122 Ecology and Sustainability	6cp
49123 Waste and Pollution Management	6cp
49116 Contaminated Site and Waste Remediation	6cp
49125 Environmental Risk Assessment	6cp
49126 Environmental Management of Land	6cp
49127 Decentralised Water and Wastewater Treatment	6cp
49257 Geographic Information Systems	6cp
Select one subject from the following:	6cp
49001 Judgment and Decision Making	6cp
49002 Managing Projects	6cp
49003 Economic Evaluation	6cp
49108 Local Government Powers and Practice	6cp

Articulation with UTS courses

Work undertaken in this course may be credited in full towards the Master of Environmental Engineering Management (C04098) (see page 374) provided the requirements of the master's degree are met, in terms of subject coverage and project weighting.

However, completion of the requirements for the graduate certificate does not guarantee admission to master's candidature.

Note(s)

This is an exit-only course. There is no direct admission to it. Current UTS students may be able to transfer into this course. Check with your faculty.

This course is not offered to international students.

Overview

Today's local government manager must have a high level of professional expertise together with a broad range of managerial skills and a sound understanding of the special characteristics of

local government. The Graduate Certificate in Local Government Management is tailored to the local government environment, allowing managers to meet their differing professional needs, while keeping up-to-date with the latest issues.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Course completion requirements

15608 Corporate Management and Organisational Change	6cp
15604 Local Government Management Principles and Practice 1	6cp
Select 12 credit points from the following options:	12cp
15609 Local Environmental Management	6cp
15610 Local Government Leadership: Personal and Professional Skills	6cp
15602 Social Planning and Development	6cp
15603 Integrated Strategic Planning	6cp
15606 Vocational Competencies 1	6cp
15607 Vocational Competencies 2	6cp
Total	24cp

Exit award

With prior approval, students who have completed 24 credit points of study in the Graduate Diploma in Local Government Management (C06033) (see page 440) can exit their studies with a Graduate Certificate in Local Government Management.

C11054v2 Graduate Certificate in Engineering Management

Award(s): Graduate Certificate in Engineering Management (GradCertEM)

UAC code: 940338 (Autumn semester, Spring semester), 940345 (distance) (Autumn semester, Spring semester)

CRICOS code: 024395M

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus and distance

Note(s)

This course is also offered offshore. It is available in Hong Kong. The language of tuition is English.

Overview

Many working engineers and technologists do not have the time to commit to a master's course. However, the demand for management knowledge among engineers is increasing. The Graduate Certificate in Engineering Management is designed to provide management knowledge which can be tailored to fit students' needs.

The course is designed to provide practised engineers with extended knowledge beyond their first degree and to update knowledge and skills in recent advances in engineering, technology and business practice.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants without a degree, but who have a TAFE diploma or equivalent and with suitable work experience, may also apply for this course. All applications are assessed individually.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583

overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University policy on credit recognition. The maximum amount of credit recognition granted is 6 credit points (without exception). Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The course can be completed in one semester of full-time or one year of part-time study. Subjects may be taken in the evening or by distance mode.

Students who want to undertake the course in distance mode may have to follow a restricted course structure as not all subjects are offered in distance mode.

Course structure

Students complete 24 credit points of study. A minimum of 18 credit points comes from the core of the Master of Engineering Management and the remainder from core or elective subjects. Elective subjects are to be chosen from postgraduate subjects offered within the Faculty of Engineering and Information Technology as listed in the elective option.

Course completion requirements

CBK90116	Core subjects	18cp
Select 6 credit points from the following options:		6cp
CBK90230	Elective	6cp
	Total	24cp

Course program

Course EFTSL: 0.5

Location: Hong Kong

Note(s)

This course is only offered offshore. It is available in Hong Kong. The language of tuition is Modern Standard Chinese.

It is the Chinese language version of the Graduate Certificate in Engineering Management (C11054) (see page 487). It is offered through the Hong Kong Management Association.

Overview

Many working engineers and technologists do not have the time to commit to a full master's course. However, the demand for management knowledge among engineers is increasing. The Graduate Certificate in Engineering Management is designed to provide management knowledge that can be tailored to fit students' needs.

The course is designed to provide practised engineers with extended knowledge beyond their first degree and to update knowledge and skills in recent advances in engineering, technology and business practice.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants without formal qualifications should produce evidence of general and professional qualifications sufficient to show the educational preparation and capacity to pursue graduate studies as well as have two years of relevant work experience.

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course can be completed in one year of part-time study. This time can be reduced if additional subjects are studied in the January to March semester. The program is structured for weekend and distance mode attendance.

Course structure

Students complete 24 credit points of study.

Course completion requirements

Select 24 credit points from the following options:	24cp
49001 Judgment and Decision Making	6cp
49002 Managing Projects	6cp
49003 Economic Evaluation	6cp

C11058v4 Graduate Certificate in Journalism

Award(s): Graduate Certificate in Journalism (GradCertJournalism)

UAC code: 940502 (Autumn semester, Spring semester)

CRICOS code: 017901A

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

The Graduate Certificate in Journalism is part of an articulated program of study for people who want to start a journalism career, and for experienced journalists wanting to broaden their skills and professional technological expertise and refresh the intellectual basis of their practice.

This is the only program of its kind in Sydney, where the Australian media is increasingly concentrating. The journalism staff at UTS has a record of excellence in professional practice reflected in media contacts. In addition, the course has close links with the Australian Centre for Independent Journalism, which provides a professional setting for student work.

Course aims

Graduates of the program:

- have strong research and reporting skills
- have a knowledge and critical understanding of the media
- are equipped with the necessary skills to either enter professional practice in the media or continue with additional skills and intellectual depth
- strive to promote the important role of professional and ethical journalism in the service of the public, and
- have an understanding of the role of the media in local, regional, national and global contexts.

Career options

Career options include reporter or editor in local, corporate, national or international print or broadcast media organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Course structure

Students complete a total of 24 credit points, comprising one 8-credit-point core subject, plus two 8-credit-point electives from the specified list of options.

The core subject must be undertaken in the first semester. Students may complete an elective in their first semester of study in addition to the core subject if they meet prerequisite requirements.

Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

STM90817 Core subjects (Journalism)	8cp
CBK90896 Electives (Journalism)	16cp
Total	24cp

Course program

The example part-time program shown below is for Autumn-commencing students. Students commencing in Spring semester undertake the same sequence of subjects.

Autumn commencing, part time

Year 1

Autumn semester

57011 Research and Reporting for Journalism	8cp

Spring semester

Select 16 credit points from the following options: 16cp

57161 Investigative Journalism	8cp
57012 Regulation of the Media	8cp
57013 Journalism Studies	8cp
57014 Feature Writing	8cp
57021 Journalism Internship	8cp
57138 International and Comparative Journalism	8cp
57150 Editing and Design	8cp
57151 Storytelling with Sound and Image	8cp
57152 Investigative Research in the Digital Environment	8cp
57155 Online Journalism	8cp
57156 Radio Journalism	8cp
57158 Television and Video Journalism	8cp
57166 Documentary Production	8cp
57184 Documentary: Expanded, Mobile and Networked	8cp
57187 Specialist Journalism	8cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Journalism, the Graduate Diploma in Journalism (C06037) (see page 441) and the Master of Arts in Journalism (C04106) (see page 376). Students who successfully complete this course and who are admitted to the graduate diploma or master's course are eligible for credit recognition for completed subjects.

C11066v5 Graduate Certificate in Screenwriting

Award(s): Graduate Certificate in Screenwriting (GradCertScrWrt)
UAC code: 940507 (Autumn semester)
Commonwealth-supported place?: No
Load credit points: 24
Course EFTSL: 0.5
Location: City campus

Note(s)

This course is not offered to international students.

Overview

The Graduate Certificate in Screenwriting is part of an articulated program designed to meet a range of needs for people who want to start a career in writing, and for experienced writers wanting to further develop their theoretical knowledge and skills.

Course aims

Students in this course:

- develop general and specific skills in screenwriting
- have the opportunity to develop their screenwriting skills intensively
- develop some critical knowledge of cultural and aesthetic debates
- advance an ability to develop and critically revise their own work, and
- develop an awareness of the place of writing within contemporary cultural formations.

Career options

Career options include scriptwriter for short- and long-form drama.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis. Students must commence in Autumn semester.

Course structure

The course totals 24 credit points of study, consisting of three core subjects. The core subject, 57142 Writing for the Screen, must be undertaken in the first semester of study.

Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

STM90814 Core subjects (Screenwriting)	16cp
CBK90894 Electives (Screenwriting)	8cp
	Total 24cp

Course program

The typical course program is shown below.

Autumn commencing, part time

Year 1

Autumn semester

57142	Writing for the Screen	8cp

C11106v3 Graduate Certificate in Mental Health Nursing

Award(s): Graduate Certificate in Mental Health Nursing (GradCertN)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: Kuring-gai campus

Note(s)

This course is not offered in 2014.

This course is not offered to international students.

Overview

This course is designed to provide registered nurses with the knowledge, expertise and competencies for advanced practice in mental health nursing.

Registered nurses wanting to develop and extend their knowledge of mental health nursing practice find this course an effective means of professional and personal development.

Course aims

The course is designed to prepare mental health nurses who:

- have the knowledge, skills and understandings to practise safely and competently in a variety of mental health care settings
- demonstrate an understanding of the experience of the consumer and the ability to work in collaboration with consumers in their care
- have the capacity to work effectively as members of a multidisciplinary team
- critically examine and appraise their own practice and develop and modify their approaches as necessary
- actively contribute to the professional development of others
- value research processes in their day-to-day practice
- are committed to the development of the discipline of mental health nursing.

Career options

Career options include positions in mental health nursing.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students who successfully complete a university-approved mental health transition program are eligible to apply for exemption from 92869 Specialty Clinical Practice.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study days and online learning. Part-time study is usually undertaken at a rate of two subjects a semester. The normal attendance is four or five days on campus spread over the semester.

Course structure

Students must complete a total of 24 credit points, comprising four specified subjects.

Course completion requirements

92604	Mental Health Assessment	6cp
92869	Specialty Clinical Practice	6cp
92876	Therapeutic Interventions in Mental Health Care	6cp
92605	Therapeutic Interventions in Mental Health Care 2	6cp
		Total 24cp

Articulation with UTS courses

This course articulates with the Graduate Diploma in Nursing (C07044) (see page 461) and the Master of Nursing (C04228) (see page 395).

Other information

Further information is available from the UTS Student Centre on: telephone 1300 ask UTS (1300 275 887)

C11107v8 Graduate Certificate in Health Services Management

Award(s): Graduate Certificate in Health Services Management (GradCerHSM)

UAC code: 940820 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course offers a mid-year intake for local students.

This course is not offered to international students.

Overview

This course is an introduction to health services management and aims to expand students' knowledge and future career opportunities. The program develops students' knowledge and skills, which leads to an enhanced capacity to manage health services.

Graduates of this course are exposed to academic and industry leaders who share their experience and knowledge to facilitate insight into the contemporary health service management environment.

Course aims

This course is designed to prepare new, aspiring and middle health managers for roles in health services management in a variety of settings.

Career options

Career options include positions in health authorities, hospitals, primary and community care, aged care services, and other healthcare facilities in the public, private, not-for-profit, government and non-government health sectors.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who do not have an undergraduate degree but who have extensive relevant work experience in a health or human services field may also be considered eligible.

Applicants must have at least a minimum of one year, full-time (or part-time equivalent) experience in a medium to large organisation. Health or human services experience is preferred. Work experience undertaken in small work settings (e.g. private practice settings with a small number of professionals) or as part of intern requirements are not accepted.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with

TWE of 4.5; internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study. Part-time students usually study two subjects a semester.

Course structure

Students must complete a total of 24 credit points, selecting four of the six subjects offered by UTS: Health.

Course completion requirements

92638	Foundations of the Australian Healthcare System	6cp
92917	Using Health Care Data for Decision Making	6cp

Note(s)

This course offers a mid-year intake for local students.
 This course is not offered to international students.

Overview

This course is designed for health professionals aspiring to management positions which involves the management of clinical services, as well as for those already holding such positions who wish to enhance their professional practice through formal study.

Course aims

The broad aims of the course are for students to develop capabilities in the management of clinical services so that they are able to:

- understand the Australian health care environment
- explore and analyse the effects of changes in health care on their work role and environment
- provide leadership to staff providing quality care
- enhance their interpersonal and organisational skills
- enhance interpersonal and organisational skills
- more effectively manage information and resources
- promote an effective organisational culture.

Career options

Career options include management positions in hospitals, aged care, rehabilitation and primary care. The enhanced interpersonal and organisational skills graduates acquire in this course enable graduates to effectively manage a unit or division providing direct clinical services and lead it to provide quality care.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

This evidence may include extensive relevant work experience in a health care profession.

Applicants must have at least one year's full-time equivalent experience in a medium to large organisation. Work experience undertaken in small work settings (e.g. private practice settings with a small number of professionals) or as part of intern requirements are not accepted.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Applications

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study days and online learning. Part-time students usually study two subjects a semester.

Course structure

Students must complete a total of 24 credit points of study, comprising four specified nursing subjects.

Course completion requirements

STM90757 Clinical Management

24cp
Total 24cp

C11115v4 Graduate Certificate in Diabetes Education and Management

Award(s): Graduate Certificate in Diabetes Education and Management (GradCertDiabEdM)
 UAC code: 940845 (Autumn semester), 940890 (distance) (Autumn semester)
 CRICOS code: 037128A
 Commonwealth-supported place?: No
 Load credit points: 24
 Course EFTSL: 0.5
 Location: City campus (Sydney), Brisbane

Note(s)

This course is not offered to international students.

Overview

This course is offered in conjunction with UTS: Education. It develops appropriately qualified students for work as health professionals in the area of diabetes education and management.

Students have strong involvement with academics and clinicians from major teaching hospitals, diabetes centres and Diabetes Australia-NSW or Diabetes Australia-Queensland.

Career options

Career options include diabetes educators and managers in a variety of settings.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in a health-related field such as nursing, allied health or medicine.

Applicants must also have at least one year's full-time professional employment in their health-related discipline, part of which has been in a diabetes-related clinical area. It is assumed that applicants have a basic knowledge of the practice of diabetes education and management. Applicants must also have access to a relevant clinical setting in order to complete supervised clinical experience (applicants need to organise their own placement).

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Applications

This course is offered in block mode in Sydney and Brisbane. Note, for administrative purposes only, students attending in Brisbane need to enrol in the course as distance rather than block.

Course duration and attendance

The course is offered on a one-year, part-time basis. It is studied through four blended online subjects, which include two residential workshops. The workshops are offered in Sydney and Brisbane.

Course structure

Students must complete a total of 24 credit points of study, comprising three specified UTS: Health subjects and one specified UTS: Education subject.

Course completion requirements

92934	Clinical Management of Diabetes	6cp
92845	Primary Health Care	6cp
015356	Learning in Diabetes Education	6cp
93006	Clinical Practice (Diabetes)	6cp
Total 24cp		

Professional recognition

Upon completion of the course, Registered Nurses Div 1 RNs (Vic), Authorised Practising Dietitians, Registered Medical Practitioners, Registered Pharmacists (AACP), (SHPA), Registered Podiatrists and Registered Exercise Physiologists can gain Credentialed Diabetes Educator status authorised by the Australian Diabetes Educators Association (ADEA).

C11116v5 Graduate Certificate in Perioperative Nursing

Award(s): Graduate Certificate in Perioperative Nursing (GradCertN)

UAC code: 940850 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: Kuring-gai campus

Note(s)

This course offers a mid-year intake for local students.

This course is not offered to international students.

Overview

This course prepares registered nurses to function as perioperative nurses in various health care settings.

Course aims

The course is designed to encourage the development of a perioperative nurse who is able to provide holistic, patient-centred care in a collaborative manner during anaesthesia, surgery and recovery. It promotes a deep understanding of complex perioperative issues as they relate to patient outcomes within a global context.

Career options

Career options include specialty perioperative nursing in day surgery settings, perioperative suites/units and endoscopy suites.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study days and online learning. Part-time study is usually undertaken at a rate of two subjects a semester. The normal attendance per subject is four full days spread over the semester.

Course structure

Students are required to complete a total of 24 credit points of study, comprising three specified nursing subjects and one nursing elective (92713 Health Breakdown elective is recommended as this subject can be used to articulate/progress into Graduate Diploma or Master of Nursing).

There are structured, work-based learning opportunities for employees of Northern Sydney Local Health District (NSLHD), Sydney Local Health District (SLHD) and North Shore Private Hospital. These students may undertake a Clinical Accreditation Program (CAP) with these organisations. This is at no cost to participants. Students who successfully complete a CAP are awarded exemption from Specialty Clinical Practice. If students change their sub-major they may need to redo a CAP related to the new sub-major or complete subject Specialty Practice.

Course completion requirements

Select one of the following:		6cp
92869	Specialty Clinical Practice	6cp
STM90489	Clinical Accreditation Program (SLHD)	6cp
STM90490	Clinical Accreditation Program (NSLHD)	6cp

C11117v5 Graduate Certificate in Anaesthetics and Recovery Room Nursing

Award(s): Graduate Certificate in Anaesthetics and Recovery Room Nursing (GradCertN)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: Kuring-gai campus

Note(s)

This course is available for new admissions every second year. The next intake is in 2015.

This course is not offered to international students.

Overview

This course prepares registered nurses to function in anaesthetic nurse sedationist and recovery room nursing roles in various health care settings.

Course aims

The course promotes a deep understanding of complex anaesthetics and postanaesthesia recovery room unit issues as they relate to patient outcomes. It is designed to encourage the development of an anaesthetics and postanaesthesia recovery room nurse who is able to provide holistic, patient-centred care during anaesthesia and recovery from surgical and procedural interventions, and in a range of traditional and non-traditional settings.

Career options

Career options include specialty anaesthetics and recovery room nursing, and nurse sedationist roles in perioperative settings, endoscopy and day surgery units and other interventional/procedural settings.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

C11118v4 Graduate Certificate in Critical Care Nursing

Award(s): Graduate Certificate in Critical Care Nursing (GradCertN)

UAC code: 940855 (Autumn semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: Kuring-gai campus

Note(s)

This course is not offered to international students.

Overview

This course prepares registered nurses to function as critical care nurses in various health care settings.

Students develop the specialised skills and knowledge to become critical care nurses and to recognise and support the unique characteristics of the critical care patient population.

Course aims

The course is designed to provide the necessary knowledge, skills and understanding to enable registered nurses to:

- practise safely and competently in the specialty of critical care nursing
- synthesise specialty knowledge, skills and expertise in order to enhance the quality of care for patients and their families
- make appropriate clinical judgments in relation to care of critically ill people
- critically evaluate their practice and incorporate research findings and technologies when appropriate
- develop the ability to actively contribute to the professional development of others
- appropriately counsel and support patients and their families as they deal with their health and lifestyle adjustments
- use research in order to make informed decisions about nursing practice.

Career options

Career options include specialty critical care nursing.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study days and supported by online learning. Part-time study is usually undertaken at a rate of two subjects a semester. The normal attendance per subject is four full days on campus spread over the semester.

Course structure

Students must complete a total of 24 credit points of study, comprising four specified nursing subjects.

There are structured, work-based learning opportunities for students who are employees of Northern Sydney Local Health District (NSLHD - Royal North Shore Hospital, Ryde Hospital, Hornsby Kuring-gai Hospital, Manly Hospital, Mona Vale Hospital), Westmead Private Hospital or North Shore Private Hospital. These students may undertake a Clinical Accreditation Program (CAP) with these organisations. This is at no cost to participants. Students who successfully complete a CAP are awarded exemption from subject Specialty Clinical Practice. If students change their sub-major they may need to redo a CAP related to the new sub-major or do the subject Specialty Practice.

C11119v3 Graduate Certificate in Neuroscience Nursing

Award(s): Graduate Certificate in Neuroscience Nursing (GradCertN)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: Kuring-gai campus

Note(s)

This course is not offered in 2014.

This course is not offered to international students.

Overview

This course prepares registered nurses to become neuroscience nurses in various health care settings.

Students develop specialised skills and knowledge needed to become neuroscience nurses and learn to recognise and support the unique characteristics of the neuroscience patient population.

Course aims

The course is designed to impart the necessary knowledge, skills and understanding to enable registered nurses to:

- practise safely and competently in the specialty of neuroscience nursing
- synthesise specialty knowledge, skills and expertise in order to enhance the quality of care for patients and their families
- make appropriate clinical judgments in relation to the care of people with neurological problems
- critically evaluate their practice to enhance professional practice
- develop the ability to actively contribute to the professional development of others
- appropriately counsel and support patients and their families as they deal with their health and lifestyle adjustments
- use research in order to make informed decisions about nursing practice.

Career options

Career options include specialty neuroscience nursing.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

C11125v4 Graduate Certificate in Dispute Resolution

Award(s): Graduate Certificate in Dispute Resolution (GradCertDispRes)

UAC code: 940403 (Autumn semester, Spring semester)

CRICOS code: 032360M

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

The Graduate Certificate in Dispute Resolution, a first in Australia, focuses on the wide range of non-adversarial dispute resolution processes. A comprehensive range of subjects is available accommodating distinct streams such as commerce, family, community and court-annexed programs.

Dispute resolution at UTS focuses on experiential learning involving a fusion of critical and reflective thinking paradigms with the application of theory in practical, work-based contexts.

The mixture of experience-based learning and formal lectures by professional practitioners give students a hands-on understanding of the full range of dispute resolution processes from negotiation, through the consensual processes, to decisional theory.

Career options

Career options include arbitrator, managers, negotiator and professionals in a wide range of areas such as health and education, government and industrial relations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who provide evidence of equivalent work experience are also considered.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course can be completed in a minimum of one semester of full-time or one year of part-time study. The core introductory subject is offered in intensive block mode over several days of attendance at the beginning of semester. The options are taught in intensive block mode over several full days of lectures, workshops and seminars.

Course structure

The course requires completion of a core introductory subject (6 credit points) plus a further three subjects (18 credit points).

Subjects are regularly timetabled but not all subjects listed are offered in any one semester. Timetabled subjects are offered subject to sufficient student interest. The current timetable can be found at:

<http://timetable.uts.edu.au>

Course completion requirements

79771	Dispute Resolution	6cp
Select 18 credit points from the following options:		18cp
77746	Advanced Mediation	6cp

C11130v4 Graduate Certificate in Trade Mark Law and Practice

Award(s): Graduate Certificate in Trade Mark Law and Practice (GradCertTMLP)

UAC code: 940410 (distance) (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: distance

Overview

UTS has established expertise and a reputation for providing courses relevant to the needs of the patent and trade marks professions. This course reflects the range of topics required for registration as a trade marks attorney in Australia under the relevant regulations.

This course provides graduates with an understanding of the principles of the registered trade mark system, the protection of unregistered marks and related forms of protection against misleading or unfair trading conduct in Australia.

The unique feature of this course is that it may be undertaken entirely online, removing the need for students to attend face-to-face classes.

Career options

Graduates can seek registration as a trade marks attorney in Australia.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have not gained the requisite tertiary qualifications may be provisionally admitted into the program if they can provide evidence of equivalent work experience. Such applicants should also contact the Professional Standards Board to clarify the full requirements for registration as a trade marks attorney.

Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

UTS may grant successful applicants advanced standing or exemption from one or more subjects, but the Professional Standards Board for Patent and Trade Marks Attorneys (PSB) has no authority to recognise, for the purpose of registration as a patent attorney or trade marks attorney, such exemptions. Students intending to seek registration need to seek exemption from the PSB. Further information is available from:

The Secretary

Professional Standards Board for Patent and Trade Marks Attorneys

PO Box 200

Woden ACT 2606

telephone +61 2 6283 2345

fax +61 2 6285 1048

email mail.psb@ipaaustralia.gov.au

www.psb.gov.au

Exemptions are generally not granted for subjects not primarily directed to Australian law.

Course duration and attendance

The course can be completed in a minimum of one semester of full-time or one year of part-time study (timetabling restrictions apply).

The subjects within this course are available online by distance learning and require no on-campus attendance. All lectures, tutorials, course materials and assessments are distributed by a combination of web-based technology and electronic media. Students conduct all communication with the lecturer by electronic means.

Course structure

The course requires completion of 24 credit points of core subjects.

Subjects are timetabled annually, but not all subjects are offered every semester. The current timetable can be found at:

<http://timetable.uts.edu.au>

Course completion requirements

STM90743 Stream

24cp

Total 24cp

Articulation with UTS courses

Graduate certificate candidates may apply to internally transfer to the Master of Intellectual Property (C04251) (see page 427). Successful candidates are not awarded the graduate certificate but subjects undertaken within the graduate certificate are applied towards the Master of Industrial Property.

Professional recognition

Subject to final board approval, the educational requirements for registration as a patent attorney and trade marks attorney in Australia with the Australian Government's Professional Standards Board for Patent and Trade Marks Attorneys can be fulfilled by completing this course.

Award(s): Graduate Certificate in Information Technology Management (GradCertInfTechM)

UAC code: 940614 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

This course focuses on the role of technology in the strategic leadership of organisations. It provides a well-balanced selection of subjects, drawn from advanced information technology and business domains, in an integrated program that is relevant to the current and future demands of the IT industry and business organisations.

IT professionals who have aspirations to senior IT roles and/or business leadership positions in organisations benefit from this course. Graduates are able to contribute constructively to the effective utilisation of information technology with respect to the strategic leadership of an organisation. IT managers who already have significant levels of experience are challenged by this course and gain new perspectives on the effective leadership of organisations in the digital era.

Course aims

The course aims to develop:

- the professional skills necessary for successfully undertaking strategic leadership roles in a variety of organisational contexts, and
- a conceptual and analytical understanding of an organisation's needs in a dynamic and challenging global knowledge economy.

Career options

Graduates can be employed in the full range of organisations - private, public and community sector organisations. They can manage the IT function of such organisations and develop a career path that leads to a senior IT management role.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualification that demonstrates potential to pursue graduate studies.

Previous qualifications must be in information technology or commerce and applicants must have a minimum of five years' professional work experience in the IT industry, plus some supervisory experience.

Alternatively, applicants require evidence of general and professional qualifications, such as other post-secondary school qualifications that can establish the applicant's aptitude, knowledge and practical experience, which will satisfy the Faculty Board in Engineering and Information Technology that the applicant possesses the educational preparation and capacity to pursue postgraduate studies, and a minimum of five years' professional work experience in the IT industry, plus some supervisory experience.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Course structure

Students must complete 24 credit points of study, made up of three core subjects and one elective.

Course completion requirements

32553	Leadership and People Management	6cp
CBK90083	Electives	6cp
32005	Strategic Leadership for Innovation	6cp
42990	Organisational Design for the Knowledge Era	6cp
		Total 24cp

Course program

A typical part-time program for students commencing in Autumn semester is shown below.

Year 1

Autumn semester

32553	Leadership and People Management	6cp
42990	Organisational Design for the Knowledge Era	6cp

Spring semester

32005	Strategic Leadership for Innovation	6cp

Overview

This course offers two separate streams: one for those who have little or no knowledge of IT and one for IT professionals.

Stream 1 provides an introduction to information technology for those uncertain of their capabilities in the discipline, or those who wish to gain only a very basic knowledge of the area.

Stream 2 enables those with an IT or related degree to undertake a specialised sequence of subjects in an area not covered in their previous studies.

This course allows IT professionals to update their knowledge and skills in an essential area of IT to assist in career development. This course also provides a basic foundation for those wanting to enter the IT industry and gain basic skills in IT.

Career options

Career options include database developer, junior programmer/analyst or business analyst.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

For this course an equivalent degree can be from any discipline (as applicants for this program may apply as a non-IT graduate or an IT graduate).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

There are no exemptions granted in the Graduate Certificate in Information Technology.

Course duration and attendance

The course is offered on a one-semester, full-time or one-year, part-time basis.

Course structure

This course comprises 24 credit points of study.

- Stream 1: Students normally take four of the core subjects offered in the Graduate Diploma in Information Technology (C06058) (see page 443) but may, with the approval of the Director, Postgraduate Programs: IT, take up to two of the electives offered in the graduate diploma in place of core subjects.
- Stream 2: Subjects are normally taken from the list of elective subjects offered in the Graduate Diploma in Information Technology (C06058) (see page 443).

Course completion requirements

Select one of the following:	24cp
STM90695 Core subjects	24cp
CBK90802 Choice	24cp

Location: City campus

Overview

This course is designed for students from a wide variety of disciplines who may or may not already be working in areas of multimedia. It enables students to gain new areas of knowledge or broaden existing areas.

While this program is managed by the Faculty of Engineering and Information Technology, it is a joint program between the Faculty of Engineering and Information Technology, the Faculty of Arts and Social Sciences, and a number of other teaching faculties.

The program is designed to educate the innovators and future leaders of the various professions working in multimedia. Graduates acquire the fundamentals in multimedia, underpinning an up-to-date, flexible set of production skills in their own specialised area.

Course aims

A defining characteristic of multimedia education at UTS is the integration of theory and practice in all of the relevant disciplines and professions. The course aims to develop students' professional skills for direct application in the workplace, while providing a solid overview and understanding of the social, historical and industrial role of multimedia communication technologies. Graduates are prepared for a career in a rapidly growing and changing industry.

Career options

Career options include positions in digital media, the mobile web, information architecture, interaction design, new media, web design, web development and web project management. Various events are organised throughout the year to showcase student work and give students the opportunity to speak with industry professionals, including recruiters.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants without an undergraduate degree require a diploma and considerable relevant professional experience, or substantial senior professional experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Places in the course are limited and applicants should indicate an informed understanding of how their undergraduate qualifications or work experience fit with their proposed multimedia studies to open up future career directions.

Credit recognition

Given the interdisciplinary focus and teamwork emphasis of this course, credit recognition and subject exemptions are not normally granted for other postgraduate study or work experience.

Course duration and attendance

The course normally takes one semester of full-time or one year of part-time study.

Course structure

The course comprises 24 credit points of study made up of two core subjects and two elective subjects, which may include core subjects for students intending to exit the program at graduate certificate level.

Course completion requirements

CBK90302 Electives (Interactive Multimedia)	12cp
Select 12 credit points from the following options:	12cp
95563 Digital Media Development Process	6cp
95564 Digital Media Technologies	6cp
95565 Digital Graphics and the Still Image	6cp
Total	24cp

Course program

The following example shows a part-time program commencing in Autumn semester. Elective subjects may be chosen from across the University and must be approved by the multimedia program leader and then the relevant faculty.

Year 1

Autumn semester

Select 12 credit points from the following options:	12cp
95563 Digital Media Development Process	6cp
95564 Digital Media Technologies	6cp
95565 Digital Graphics and the Still Image	6cp

Spring semester

Select 12 credit points of electives	12cp

Articulation with UTS courses

This course is part of an articulated program of study comprising the Graduate Certificate in Interactive Multimedia, the Graduate Diploma in Interactive Multimedia (C07078) (see page 466), and the Master of Interactive Multimedia (C04158) (see page 385).

Award(s): Graduate Certificate in Internetworking

(GradCertInternetworking)

UAC code: 940611 (Autumn semester, Spring semester)

CRICOS code: 063424K

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

This course is intended for computing science, information technology or engineering graduates with or without networking experience who wish to learn or extend their knowledge of networking and networking technologies. As students come from a variety of backgrounds, there is a degree of subject choice in the program to meet individual needs.

The Internetworking program provides practical, hands-on learning experience using resources provided by Cisco Systems. The program covers all aspects of the organisational use of networking.

Course aims

The program aims to:

- meet the needs of industry for networking specialists
- retrain IT professionals wishing to move into networking and internetworking

- provide a thorough and practical grounding in networking and in network design, administration and management, and
- provide a solid foundation for the writing of networked applications using Unix, Java and WWW technologies.

Career options

Career options include IT/network support, junior systems programmer or other positions in data communications.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications are preferred in computing science, information technology, computer engineering, telecommunications, or a related discipline.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Two years' experience in networking or in another position in the IT industry is desirable. Applicants without work experience are also considered.

Credit recognition

Applicants may apply for exemptions if they have successfully completed studies of a comparable standard from a recognised university.

There are no exemptions granted for the networking subjects 32524 and 32521 without the successful completion of the challenge test for each of the above. A challenge test is required even for holders of a CCNA or CCNP certification and those who have passed the CCNA curriculum in TAFE Certificate IV and/or Diploma. These challenge tests are always held in the week prior to the commencement of classes.

Course duration and attendance

The course duration is one semester of full-time or one year of part-time study.

Course structure

The course totals 24 credit points of study, made up of four subjects.

Course completion requirements

CBK90747 Internetworking choice	6cp
STM90730 Core subjects	18cp
Total	24cp

Course program

Below is a typical example of a full-time program commencing in Autumn semester.

Students undertaking the graduate certificate full time and who wish to complete 32521 WANs and VLANs are unable to complete the course in one semester as this subject has a prerequisite of 32524 LANS and Routing.

Year 1

Autumn semester

32118	Mobile Communications and Computing	6cp
32524	LANS and Routing	6cp
32547	UNIX Systems Programming	6cp
CBK90747	Internetworking choice	6cp

Articulation with UTS courses

This course forms part of an articulated program comprising the Graduate Certificate in Internetworking, the Graduate Diploma in Internetworking (C07080) (see page 467), the Master of Science in Internetworking (C04160) (see page 386) and the Master of Science in Internetworking (Extended) (C04224) (see page 393).

Professional recognition

Students can prepare for CCNA (Cisco Certified Network Associate) industry certification.

Award(s): Graduate Certificate in Strategic IT Leadership (GradCertSITL)

UAC code: 940625 [Autumn semester, Spring semester]

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

This course is designed for those who want to develop a broader understanding of the strategic value of technology for business organisations.

Students gain a 'big picture' view of the global knowledge economy and the need for a strong understanding of the role of technology in effective business leadership. The course focuses specifically on the strategic value of technology and on the leadership implications thereof for the creative management of intangible assets such as morale, social, knowledge and human capital. On completion of the course, graduates are recognised as having broad technology frames of reference with respect to business leadership in a dynamic global knowledge economy.

Course aims

This course aims to provide graduates with broad strategic leadership frames of reference and knowledge bases. It also alerts business leaders (with or without an IT background) to the increasingly important role that technology plays in business success and its potential for disrupting conventional business models and practices.

Career options

Career options include senior management roles.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in information technology or commerce and applicants must have a minimum of five years' professional work experience, plus some supervisory experience.

Alternatively, applicants require evidence of general and professional qualifications, such as other post-secondary school qualifications that can establish the applicant's aptitude, knowledge and practical experience, which will satisfy the Faculty Board in Engineering and Information Technology that the applicant possesses the educational preparation and capacity to pursue postgraduate studies, and a minimum of five years' professional work experience, plus some supervisory experience.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with

TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Exemption from subjects in the program is not normally given on the basis of previous study or work experience.

Course duration and attendance

The course is completed in one year on a part-time basis only.

Course structure

The course comprises 24 credit points of study, made up of four core subjects that can be taken in any order subject to timetable availability.

Course completion requirements

42990	Organisational Design for the Knowledge Era	6cp
32005	Strategic Leadership for Innovation	6cp
32553	Leadership and People Management	6cp
32703	Information Technology Strategy	6cp
		Total 24cp

Further study at UTS

Graduates can enrol in a range of graduate diploma or master's-level courses after completing the certificate. The most appropriate of these would be the Master of Business in IT Management (C04161) (see page 387) or a Master of Business Administration (C04018) (see page 355).

C11192v1 Graduate Certificate in Information Technology Project Management

Award(s): Graduate Certificate in Information Technology Project Management [GradCertiITPM]

UAC code: 940631 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

This course provides advanced professional studies in IT project management.

Students gain an understanding of the business context and develop conceptual and analytical approaches to IT project management. Graduates of this course are well placed to move into a project management role.

Course aims

The course aims to:

- explain the business context and technical developments shaping contemporary IT project management
- develop knowledge and skills in IT project management processes
- develop conceptual and analytical approaches to IT project management, and
- develop theoretical and practical competencies in technical and people management.

Career options

Career options include positions in project management.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications should normally be in computing / information technology or a related field. If the previous qualification is not in a relevant field, applicants also require a graduate diploma in computing / information technology (or related discipline) from a recognised Australian university and / or relevant work experience.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Course structure

Students complete 24 credit points of study consisting of two core subjects and two elective options from CBK90770.

Course completion requirements

32541	Project Management	6cp
32603	Systems Quality Management	6cp
CBK90770	Options	12cp
		Total 24cp

Course program

A typical part-time program for students commencing in Autumn semester is shown below.

C11194v1 Graduate Certificate in Children's Nursing

Award(s): Graduate Certificate in Children's Nursing [GradCertN]

UAC code: 940870 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: Kuring-gai campus

Note(s)

This course offers a mid-year intake for local students.

This course is not offered to international students.

Overview

The course has been designed to provide registered nurses with the skills and knowledge required for a specialist role in children's nursing. It develops and extends students' knowledge of children's nursing practice and management. It is also an effective means of professional and personal development.

Course aims

The course aims to develop the knowledge, skills and understanding required to practise safely and competently in a variety of children's nursing settings. Students develop this understanding through hospital and community paediatric care settings.

Career options

Graduates are well equipped to work as part of a multidisciplinary team, and are able to appraise and develop their own practice and contribute to the professional development of others.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study days and online learning. Part-time study is usually undertaken at a rate of two subjects a semester. The normal attendance per subject is four full days spread over the semester.

Course structure

Students must complete a total of 24 credit points, comprising four specified nursing subjects.

There are structured, work-based learning opportunities for students who are employees of the Sydney Children's Hospital Network (Randwick and Westmead campuses). These students may undertake a Clinical Accreditation Program (CAP) with these organisations. This is at no cost to participants. Students who successfully complete a CAP are awarded exemption from subject Specialty Clinical Practice. If students change their sub-major they may need to redo a CAP related to the new sub-major or do the subject Specialty Practice.

Course completion requirements

92713	Health Breakdown	6cp
92869	Specialty Clinical Practice	6cp
92878	Care of the Child in Illness and Disability	6cp
92902	Care of the Acutely Ill Child	6cp
		Total 24cp

Articulation with UTS courses

This course articulates with the Graduate Diploma in Nursing (C07044) (see page 461) and the Master of Nursing (C04228) (see page 395).

Note(s)

This course offers a mid-year intake for local students.

This course is not offered to international students.

Overview

This course is designed to provide registered nurses and midwives with the skills to meet the increased demands to deliver quality teaching in clinical settings. Nurses and midwives engage in clinical teaching at many different levels: with students and new graduates, in orientation programs, and with communities through health promotion activities. Notwithstanding this diversity, the principles of adult learning apply to all.

Students have the opportunity to plan, develop, implement and evaluate a program of clinical education within their own practice area. This course provides a portable qualification and highly sought-after skills.

Course aims

This course aims to ensure that graduates are able to plan effective programs in diverse clinical settings for a variety of learners.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse or midwife in Australia. Registered nurses or midwives who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

Applicants must have one year of post-registration clinical experience.

Students' current nursing/midwifery registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Course structure

Students must complete a total of 24 credit points, comprising three specified nursing subjects and one nursing elective.

Course completion requirements

Select one of the following:		6cp
92713	Health Breakdown	6cp
CBK90056	Nursing subjects (PG)	6cp
92869	Specialty Clinical Practice	6cp

C11196v1 Graduate Certificate in Neonatal Nursing

Award(s): Graduate Certificate in Neonatal Nursing (GradCertN)
Commonwealth-supported place?: No
Load credit points: 24
Course EFTSL: 0.5
Location: Kuring-gai campus

Note(s)

This course is available for new admissions every second year. The next intake is in 2015.

This course is not offered to international students.

Overview

The course has been designed to give registered nurses the skills and knowledge for a specialist role in neonatal nursing. It develops and extends knowledge of neonatal nursing practice and management, and is also an effective means of professional and personal development.

Course aims

The course aims to develop the knowledge, skills and understanding needed to practise safely and competently in a variety of neonatal nursing settings, including the care of both sick and healthy infants.

Career options

Graduates are well equipped to work within a multidisciplinary team, and are able to appraise and develop their own practice and contribute to the professional development of others.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study days and online learning. Part-time study is usually undertaken at a rate of two subjects a semester. The normal attendance per subject is four full days spread over the semester.

Course structure

Students must complete a total of 24 credit points, comprising four specified nursing subjects.

Course completion requirements

92713	Health Breakdown	6cp
92869	Specialty Clinical Practice	6cp
92871	Perinatal Development	6cp
92895	Issues in Neonatal Care	6cp
		Total 24cp

Articulation with UTS courses

This course articulates with the Graduate Diploma in Nursing (C07044) (see page 461) and the Master of Nursing (C04228) (see page 395).

C11198v2 Graduate Certificate in Human Resource Management

Award(s): Graduate Certificate in Human Resource Management (GradCertHRM)
CRICOS code: 055278D
Commonwealth-supported place?: No
Load credit points: 24
Course EFTSL: 0.5
Location: City campus

Overview

The Graduate Certificate in Human Resource Management introduces participants to knowledge and experiences in the areas of industrial relations and human resource management.

The course acknowledges that while the personnel and industrial functions are sometimes separately exercised within organisations, each has a pervasive effect on the other.

Course aims

The Graduate Certificate in Human Resource Management provides participants with the opportunity to study at a professional level, to improve the quality of their strategic management skills.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants without a degree require eight years' full-time relevant work experience and evidence of a general capacity to undertake tertiary education.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course duration is one semester of full-time or one year of part-time study.

Course structure

The course comprises 24 credit points of core subjects.

Course completion requirements

STM90733 Core subjects (HRM) 24cp
Total 24cp

Course program

The core subjects are shown below.

Core subjects

21844	Managing Work and People	6cp
21720	Human Resource Management	6cp
21800	Management and Organisations	6cp
21779	Management Skills	6cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Human Resource Management, the Graduate Diploma in Human Resource Management (C07113) (see page 470) and the Master of Business in Human Resource Management (C04227) (see page 395).

C11199v3 Graduate Certificate in Operations and Supply Chain Management

Award(s): Graduate Certificate in Operations and Supply Chain

Management (GradCertOSCM)

CRICOS code: 055277E

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

The Graduate Certificate in Operations and Supply Chain Management provides a solid introduction to business operations management for those wishing to gain some experience in this area.

Course aims

The course introduces participants to the nature and contribution of supply chain and operational management functions in the organisational context.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants without a degree require eight years' full-time relevant work experience and evidence of a general capacity to undertake tertiary education.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is one semester of full-time or one year of part-time study.

C11200v2 Graduate Certificate in Child and Family Health Nursing

Award(s): Graduate Certificate in Child and Family Health Nursing (GradCertN)

UAC code: 940880 (Autumn semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course includes a compulsory clinical practice component (see below) to be undertaken after the block teaching periods.

This course is not offered to international students.

Overview

This course is offered as a joint initiative between UTS: Health and Tresillian Family Care Centres.

Child and family health nurses work in partnership with parents as they learn the skills of parenting and caring for the infant and growing child. The primary health care role of the child and family health nurse includes health teaching with parents, health promotion in the community, group work and counselling for parents and care givers, and health surveillance of infants and children.

Applicants do not need to be employees of Tresillian, nor do they need to be concurrently employed in child and family health services.

The course prepares registered nurses for beginning practice in the clinical nursing specialty of child and family health.

Course aims

The program of study is designed to build on nursing knowledge and skills to develop capacity to work in a primary health care setting with young children and their families. The comprehensive study program focuses on infant care and child health, and the promotion of maternal and family health and wellbeing. The accompanying clinical experience program provides placements in community child and family health services as well as Tresillian Family Care Centres.

Career options

Career options include positions in primary health care services, such as early childhood health or community health centres, secondary level services in family care centres or breastfeeding clinics for mothers and babies, and tertiary services such as those offered by Tresillian or Karitane.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but who have recent relevant work experience may also be eligible to apply. Such applicants must present evidence of the capacity to undertake tertiary study.

Applicants must have one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Course structure

Students must complete a total of 24 credit points, comprising four specified nursing subjects.

The course is offered as a mix of face-to-face teaching sessions and web-based learning through UTSOnline. There are nine days of face-to-face teaching over the duration of the year requiring attendance on campus. These are presented as four workshops of two or three days each.

Dates for 2014 are:

- 17–19 February
- 5–6 May
- 21–22 July
- 27–28 October

The remainder of the learning is in web-supported distance mode.

Industrial training/professional practice

Students are required to undertake a clinical practicum to consolidate their learning and introduce them to child and family health nursing practice. The clinical program offers up to 120 hours of experience:

- 80 hours in a child and family health service clinical facility (compulsory)
- 40 hours as fieldwork undertaken independently (compulsory).

Where possible, students are placed in child and family health services in their own locality.

Dates for 2014 are:

- Autumn semester: 12 May – 6 June
- Spring semester: 1–19 September

Course completion requirements

92613	Principles of Child and Family Health Nursing	6cp
92614	Child and Family Health Nursing 1	6cp
92615	Child and Family Health Nursing 2	6cp
92620	Family and Community Health Practice	6cp
		Total 24cp

Articulation with UTS courses

This course articulates with the Graduate Diploma in Nursing (C07044) (see page 461) and the Master of Nursing (C04228) (see page 395) (for registered nurses only).

C11201v1 Graduate Certificate in Acute Care Nursing

Award(s): Graduate Certificate in Acute Care Nursing (GradCertN)

UAC code: 940885 (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: Kuring-gai campus

Note(s)

This course offers a mid-year intake for local students.

This course is not offered to international students.

Overview

This course provides registered nurses with the knowledge and skills for a specialist role as an advanced acute care nurse. The course helps students to critically evaluate their practice and incorporate research findings and technologies as appropriate. Students study topics that reflect health phenomena that are common across acute care illnesses requiring medical and/or surgical intervention, as well as the principles of managing patients who become acutely ill and unstable.

Students learn to recognise and support the unique characteristics of the acute care patient population and are able to practise safely and competently as acute care nurses. The knowledge, skills and expertise gained enable students to enhance the quality of care for patients and their families. Students also develop skills to actively contribute to the professional development of others and use research in order to make informed decisions about nursing practice.

Career options

Career options include specialty acute care nursing in a wide range of clinical settings.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must hold current registration as a nurse in Australia. Registered nurses who do not have an undergraduate diploma or degree but do have recent relevant work experience and can demonstrate the capacity to undertake tertiary study may also be considered eligible.

Applicants must have concurrent employment in, or access to, the area of study and one year of post-registration clinical experience.

Students' current nursing registration will be confirmed via the National Register of Practitioners at:

www.ahpra.gov.au/Registration/Registers-of-Practitioners.aspx

Students should ensure that details of their registration are up-to-date on this register.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Subjects are offered via on-campus study days, workshops in a high-fidelity simulation laboratory and online learning. Part-time study is usually undertaken at the rate of two subjects a semester. The normal attendance per subject is four full days on campus spread over the semester.

Course structure

Students are required to complete a total of 24 credit points of study, comprising four specified nursing subjects.

There are structured, work-based learning opportunities for students who are employees of Northern Sydney Local Health District (NSLHD) or Concord Hospital. These students may undertake a Clinical Accreditation Program (CAP) with these organisations. This is at no cost to participants. Students who successfully complete a CAP are awarded exemption from subject Specialty Clinical Practice. If students change their sub-major they may need to redo a CAP related to the new sub-major or do the subject Specialty Practice.

Course completion requirements

92713	Health Breakdown	6cp
92869	Specialty Clinical Practice	6cp
92616	Core Concepts in Acute Care Nursing	6cp
92617	Early Interventions in Acute Care Nursing	6cp
		Total 24cp

Articulation with UTS courses

This course articulates with the Graduate Diploma in Nursing (C07044) (see page 461) and the Master of Nursing (C04228) (see page 395).

C11204v1 Graduate Certificate in Development Assessment

Award(s): Graduate Certificate in Development Assessment

(GradCertDevAssmnt)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

Development assessment has become one of local government's most important activities. People from a wide range of professional and technical backgrounds are working in development assessment, but many lack specialist training in the field. To meet differing individual needs, the UTS Centre for Local Government has introduced a unique Graduate Certificate in Development Assessment that incorporates specialised professional development and technical subjects.

The cornerstone of this course is its flexibility. It allows participants to prepare a personal study plan that matches the specific requirements of their work, career and other commitments. Most subjects can be studied through intensive block mode and, in some cases, by distance or workplace learning. Students may apply for credit for relevant professional development courses undertaken at UTS or with another institution.

Course aims

The course aims to provide students with:

- a sound understanding of principles and practice of development assessment
- an appreciation of the wider context of planning and assessment systems in local government
- knowledge and skills in dealing with different types of applications for development and building approvals, including the ability to identify key factors to be taken into account and broader strategic issues
- enhanced knowledge and skills in selected areas of development assessment, and
- the capacity to undertake further study and professional development.

Career options

The course is designed to provide skills and knowledge necessary to enable students to carry out assessment of building and development proposals with a high level of expertise, to facilitate subsequent accreditation as Certifiers and Principal Certifying Authorities under NSW legislation and to enhance learning and study skills for ongoing education and professional development.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in architecture, building or planning. If the previous qualification is not in one of these fields, applicants require a TAFE Certificate IV in Planning or the Statement of Attainment in Building Assessment. In some cases, applicants should have two years' work experience in architecture, building, planning or local government.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students who have completed relevant previous studies may apply to the course coordinator for credit recognition.

Course duration and attendance

The course may be completed on a two-year, part-time basis, with students undertaking one subject a semester, or on a one-year, part-time basis, with students undertaking two subjects a semester.

Course structure

The course totals 24 credit points, made up of four subjects.

Course completion requirements

CBK90560 Development Assessment core choice	12cp
CBK90561 Development Assessment elective choice	12cp
Total	24cp

Further study at UTS

Graduates may apply for admission to the Graduate Diploma in Local Government Management (C06033) (see page 440) and request credit recognition for relevant subjects studied in this course.

C11206v3 Graduate Certificate in Professional Accounting

Award(s): Graduate Certificate in Professional Accounting

(GradCertProfAcc)

CRICOS code: 061284M

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

The Graduate Certificate in Professional Accounting is a four-subject introductory course designed to provide a general understanding of accounting and related areas of business study. It provides foundation knowledge in the areas of accounting, finance, economics and law.

This course is designed for students who:

- do not have an undergraduate background in accounting and who wish to further their business knowledge, or
- have extensive business experience but lack the formal qualifications for direct entry to the master's programs in professional accounting, or
- want to complete an introductory course in accounting and related fields and want to prove their ability to undertake postgraduate study and attain postgraduate qualifications.

As this course articulates into the master's programs in professional accounting, this enables students who do not possess formal undergraduate qualifications, including TAFE diplomas, to acquire the relevant academic qualification for membership of CPA Australia, the Institute of Chartered Accountants in Australia (ICAA) and the Institute of Public Accountants (IPA).

Course aims

The course comprises a mix of accounting, finance and related subjects which collectively provide a range of essential business skills and knowledge that are necessary for managerial level employment in today's dynamic business environment.

Career options

Career options include management-level positions in industry or government, as well as not-for-profit organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants without a degree require eight years' full-time relevant work experience and evidence of a general capacity to undertake tertiary education.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course may be completed in one semester of full-time or one year of part-time study.

Classes are offered over three teaching periods each year (namely Autumn and Spring semesters, and Summer session). Not all subjects are available in Summer session.

In most cases, subjects are offered on the basis of one three-hour lecture per week over a 13-week period, however, certain subjects may be delivered in intensive mode and completed over a shorter time period.

Course structure

The course totals 24 credit points, made up of four core subjects.

Course completion requirements

22747	Accounting for Managerial Decisions	6cp
25742	Financial Management	6cp
79708	Contemporary Business Law	6cp
23706	Economics for Management	6cp
Total		24cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Professional Accounting, the Master of Professional Accounting (C04238) (see page 407) and the Master of Professional Accounting Extended (C04237) (see page 406).

C11208v1 Graduate Certificate in Executive Business Administration

Award(s): Graduate Certificate in Executive Business Administration

[GradCertExecBusAdmin]

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is under review. The next intake is for a revised program in Spring semester 2014.

This course is not offered to international students.

Overview

The Graduate Certificate in Executive Business Administration provides foundation skills used in the general management of a business unit or enterprise for non-graduates who have at least eight years of relevant business experience.

Course aims

General management skills are developed to provide a knowledge base in the areas of leadership, strategic thinking, business planning, decision-making tools, organisational and group dynamics, effective communication and accounting.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants also require five years' relevant work experience. Applicants without a degree require eight years' full-time relevant work experience and an ability to be able to successfully undertake postgraduate business studies as determined by the MBA director. Applicants may be required to attend an interview as part of the admission process.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course can be completed in one semester, on a full-time basis.

Course structure

The course comprises 24 credit points of study made up of three subjects chosen from a group of four.

Course completion requirements

Select 24 credit points from the following options:	24cp
27800 Applied Leadership and Strategy	8cp
25841 Decision Making Tools	8cp
21875 Organisational Behaviour in Practice	8cp

C11210v1 Graduate Certificate in Mathematics

Award(s): Graduate Certificate in Mathematics [GradCertMath]

UAC code: 940743 [Autumn semester, Spring semester]

CRICOS code: 065345D

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

The Graduate Certificate in Mathematics is a four-subject course comprising undergraduate and/or honours-level subjects. The flexible course structure allows study programs designed to suit different university graduates; from mathematicians who need to refresh or deepen their knowledge in a certain mathematical discipline, to holders of business, engineering or science bachelor's degrees who need a mathematical foundation for further studies.

The course is recommended for those with insufficient mathematics in their bachelor's degree who wish to meet the admission requirements of the Graduate Diploma in Mathematics and Statistics for Business and Finance (C06097) (see page 446).

Course aims

The course aims to provide university graduates with access to training and retraining in mathematics and statistics with the aim to allow students to focus on particular mathematical topics rather than on broader areas of mathematics.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

No exemptions are granted as credit recognition.

Course duration and attendance

An applicant may enrol in this course either on a full-time or part-time basis. As a guide, minimum full-time attendance is one semester of study and part-time attendance is one year of study. The possibility of full-time study and the duration of the course depend on the subjects chosen and their availability. Applicants should be aware that subjects may require attendance at daytime classes. The current timetable is available at:

<http://timetable.uts.edu.au>

Course structure

Students are required to complete 24 credit points, comprising four subjects offered by the Department of Mathematical Sciences. The subjects are to be chosen from the list of subjects (options) below offered by the department.

The availability of the subjects in this program is shown with the subject descriptions in this handbook. Many subjects offered by the Department of Mathematical Sciences have prerequisites. It is the student's responsibility to check that they have the required knowledge specified by these prerequisites. Students are strongly advised not to enrol in any subject if they do not have knowledge equivalent to the subject's prerequisites.

Course completion requirements

Select 24 credit points from the following options:			24cp
35100	Introduction to Sample Surveys	6cp	
35101	Introduction to Linear Dynamical Systems	6cp	
35102	Introduction to Analysis and Multivariable Calculus	6cp

Transfer between UTS courses

Students enrolled in this program are eligible to apply to transfer to the Graduate Diploma in Mathematics and Statistics for Business and Finance (C06097) (see page 446) provided they satisfy the admission criteria of the graduate diploma program. This allows students who do not have the mathematical knowledge required for admission to the graduate diploma to complete the necessary subjects as a part of the graduate certificate program and then to transfer to the Graduate Diploma in Mathematics and Statistics for Business and Finance (C06097) (see page 446).

Further study at UTS

Student who complete this course can enrol in the Graduate Diploma in Mathematics and Statistics for Business and Finance (C06097) (see page 446) with exemption from up to two core subjects of the graduate diploma program provided these subjects were completed as a part of the graduate certificate.

Other information

Further information is available from the UTS Student Centre on: telephone 1300 ask UTS (1300 275 887)

C11211v2 Graduate Certificate in Australian Law

Award(s): Graduate Certificate in Australian Law (GradCertaustLaw)

UAC code: 940425 [Autumn semester, Spring semester]

CRICOS code: 064381G

Commonwealth-supported place?: No

Load credit points: 30

Course EFTSL: 0.625

Location: City campus

Note(s)

This course is not appropriate for applicants who are already admitted to practise as a lawyer in NSW.

Overview

The Graduate Certificate in Australian Law is designed to permit appropriately qualified lawyers from common law jurisdictions outside Australia to satisfy the academic requirements for admission as a lawyer of the Supreme Court of NSW.

The course allows lawyers from common law jurisdictions to meet the academic requirements to practise in Australia.

Career options

Career options include lawyer in NSW within a government or corporate department, private law firm or community law centre, providing students also undertake a course in practical legal training such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 519).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants' bachelor's degree in law must be from outside Australia or they must be admitted to practise as a legal practitioner in a common law jurisdiction outside Australia.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Before lodging an application, applicants must contact the Legal Profession Admission Board of the NSW Supreme Court (LPAB) to determine the subjects they are required to complete to be eligible for admission to practise in NSW. Further details about admission is available at:

www.lawlink.nsw.gov.au/lpab

Notification from the LPAB, listing the subjects required, must accompany the application for admission into the course.

Assumed knowledge

Appropriately qualified knowledge of the common law legal system.

Course duration and attendance

Full-time students can complete the course in a minimum of one semester. Part-time students can complete the course in a minimum of one year. International students are unable to undertake part-time study.

Course structure

The course requires completion of 30 credit points of specified subjects. However, in some cases and subject to approval, students may substitute one subject.

Industrial training/professional practice

Applicants should note that in order to gain admission as a lawyer of the Supreme Court of NSW they may also be required to undertake a course in practical legal training, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 519).

Course completion requirements

STM90841 Core subjects

30cp
Total 30cp

Professional recognition

This course may satisfy the requirements for admission to the Supreme Court of NSW. The Legal Profession Admission Board may recognise subjects attempted within this course. Applicants are advised to obtain written confirmation of the LPAB in recognition of subjects attempted within this course prior to enrolling.

C11212v1 Graduate Certificate in Architecture

Award(s): Graduate Certificate in Architecture [GradCertArch]

UAC code: 940116 (Autumn semester, Spring semester)

CRICOS code: 065843G

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

This course is a tailored bridging course that provides a pathway into the Master of Advanced Architecture (C04240) (see page 410). It provides new skills and knowledge for students who have obtained professional qualifications prior to the introduction of digital software for design and documentation in architectural education (prior to 2000).

This is a highly flexible course that enables specialisation in either urban design or design technologies. Each student has a tailored program of architectural design and architectural practice subjects, based on their needs and experience. The course equips graduates with skills of entrepreneurship, marketing, business and management necessary for leadership in the profession.

Course aims

Through the core architectural design studio subjects, graduates are equipped with strategic thinking, spatial organisation and visual design skills, and develop further their verbal and written communication abilities. Project-based studio subjects explore research, design concepts, implementation strategies and presentation techniques. Through the core professional practice subjects, students develop their knowledge of all aspects of industry and practice management, furthering their capacity for leadership in the profession, locally and internationally.

Career options

Career options are focused on leading design and technical innovation roles in architectural and urban design practice.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants require a professional entry degree of five-years, full-time or equivalent from an accredited program in architecture or a four-year, full-time or equivalent degree from an accredited program in landscape architecture.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Applicants must submit a portfolio of work demonstrating their design skills for examination in addition to a statement of interest in the course.

Course duration and attendance

The course is offered on a one-semester, full-time or part-time equivalent basis.

Course structure

The course totals 24 credit points of selected Master of Architecture subjects comprising one 12-credit-point architectural design subject, one 6-credit-point architectural practice subject and one 6-credit-point elective.

Course completion requirements

C11215v2 Graduate Certificate in Local Government Leadership

Award(s): Graduate Certificate in Local Government Leadership

[GradCertLGLead]

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

Aspiring local government leaders must have a high level of professional expertise together with a broad range of leadership skills and a sound understanding of the special characteristics of local government.

The course is tailored to the local government environment and allows aspiring leaders to develop understanding and capabilities necessary for leadership in the public sector. There is a particular focus on the need for local government leaders to understand and demonstrate commitment to the production of 'public value' (Moore 1995); outcomes that are truly valued in the community.

The course offers the opportunity to undertake an education program that responds to individual needs as well those in the workplace and the broader community. Subjects involve intensive block mode workshops, workplace action learning, self-directed study, scenario-based challenges and a real-life community leadership project.

Course aims

The course aims to provide students with knowledge, skills and capabilities and practices of local government leadership, with particular reference to their own organisation and community. Students also develop the learning skills that allow them to continue their own professional development through short courses or further academic study.

Career options

Career options include local government manager in councils.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students who have completed relevant previous studies may apply to the course coordinator for credit recognition.

Course duration and attendance

The course may be completed on a two-year, part-time basis, with students undertaking one subject a semester, or on a one-year, part-time basis, with students undertaking two subjects a semester.

Course structure

The course totals 24 credit points, made up of four subjects.

Course completion requirements

Overview

The Graduate Certificate in Science is designed to provide an opportunity for working scientists to gain generic professional knowledge and skills as well as to extend and update their knowledge in line with recent advances in science.

The course enhances career prospects by providing opportunities to extend knowledge beyond a first degree.

Career options

The course provides a backbone of skills important to a professional scientist; be they engaged in research, science business, industries or government organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Course EFTSL: 0.5

Location: City campus

Overview

Emerging as a critical media and legal specialisation, communications law at UTS offers an opportunity for non-law as well as law graduates to develop an understanding and demonstrate their expertise as media professionals and commentators, policy makers and lawyers, managers and researchers in this important area.

Students are exposed to key issues within the field such as: the roll-out of the national broadband network; cyber-security; legal perspectives on the internet; the role of law and regulation in communications, media and entertainment; and the relationship of intellectual property and technology.

Career options

Career options exist for non-law professionals to enhance prospects as communications policy advisors, editorial and management positions, online/social media consultants, lobbyists, researchers for public interest groups and industry commentators. Practising lawyers can expand their legal specialisations in areas including communications law, intellectual property, media and entertainment law, telecommunications law, technology law and corporate law.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course can be completed in a minimum of one semester of full-time or one year of part-time study.

Course structure

Two streams are available within the course.

- Students who hold an undergraduate legal qualification must complete three option subjects (24 credit points).
- Students who hold an undergraduate degree in a discipline other than law must complete one core introductory subject (8 credit points) followed by an additional two subjects (16 credit points).

Students who have completed an undergraduate legal qualification should contact the UTS Student Centre during enrolment if their study plan includes the Non-law graduate entrant stream (STM90545).

Course completion requirements

Select one of the following:	24cp
STM90545 Non-law graduate entrant stream	24cp

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

UTS is a leading provider of postgraduate language and literacy courses with the longest tradition of adult basic education (ABE) teacher training of any university in NSW. This course is for people who wish to gain an initial specialist qualification in teaching numeracy to adults. It provides graduates with a specialist teaching qualification that enables them to work in the field of adult numeracy education in both the public and private sectors and registered training organisations.

The course includes two practicums that integrate relevant theoretical perspectives on adult basic education with practical teaching and learning applications.

Course aims

Graduates of this course are expected to be able to:

- demonstrate a critically reflective approach to planning and facilitating learning of adult numeracy learners
- show confidence and exercise effective strategies for developing the numeracy knowledge and skills needed as teachers of adult numeracy, and
- engage professionally in the education of adults.

Career options

Career options include adult basic education practitioner in community colleges, corrective services, AMES, TAFE and public and private adult education institutions that design and deliver programs for adults to learn and build on basic numeracy skills, or provide integrated learner support in VET programs, or design and deliver workplace numeracy programs.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course is offered on a one-year, part-time basis.

Course structure

The course comprises 24 credit points, made up of four compulsory core subjects.

Note(s)

This course is not offered to international students.

Overview

UTS is a leading provider of postgraduate programs in adult education in Australia and enjoys a reputation as being one of the leading providers in the world. This course introduces new practitioners, or practitioners without prior formal study in the field, to adult education and learning literature, theories and practices of program development.

Many adult education staff at UTS are recognised leaders in the field and their expertise and close connection with professional and community networks provides students with up-to-date learning opportunities and access to guest lecturers and diverse organisations. It also provides a practice-based subject to further develop teaching and training skills.

Course aims

The course aims to:

- develop students' expertise in adult teaching
- provide foundation knowledge in adult learning
- provide teaching experience.

Career options

Graduates of this course are positioned to work in a diverse range of adult learning and training settings, ranging from private and public sector organisations to community organisations, non-government organisations, as well as in formal and non-formal education institutions.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

C11223v1 Graduate Certificate in Teaching English to Speakers of Other Languages

Award(s): Graduate Certificate in Teaching English to Speakers of Other Languages (GradCertTESOL)

UAC code: 940238 (CSP) [Autumn semester], 940239 (PDFP) [Autumn semester, Spring semester]

CRICOS code: 071628J

Commonwealth-supported place?: Yes

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

UTS is a leading provider of postgraduate language and literacy courses, with academics who are published authors and internationally recognised experts in the field. This course is an initial teaching qualification in teaching English to speakers of other languages (TESOL). It specifically focuses on the teaching of adult students. Students study subjects that equip them with skills and knowledge to teach English in a range of contexts, both local and international.

This course is suitable for people who wish to obtain an initial adult teaching qualification in TESOL. The course includes professional practice placements in TESOL and offers flexible study options with classes held at times suitable for full-time workers.

Course aims

The course aims to produce TESOL teachers who are knowledgeable, reflective and engaging in their practice, have well developed interpersonal skills, are keen to put current developments in learning and teaching into practice and have a commitment to lifelong learning.

Career options

Career options include a teacher of English as a second language (ESL) in Australia or a teacher of English as a foreign language (EFL) in overseas contexts (applicants are advised to check with potential employing bodies regarding employment requirements).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications**Local students**

Local applicants apply through the Universities Admissions Centre.

International students

International students apply through UTS International.

Course duration and attendance

The course is offered on a one-semester, full-time or two-semester, part-time basis.

The subjects in STM90529 are run in standard weekly mode for TESOL students, except for 010071 Professional Practice 2 Language Literacy and Numeracy, which is run in block mode.

Course structure

Students must complete 24 credit points, comprising four core subjects.

Industrial training/professional practice

There is a practicum placement for subjects 010070 Professional Practice 1 Language Literacy and Numeracy and 010071 Professional Practice 2 Language Literacy and Numeracy.

Overview

Unique in Australia, this course is intellectually vibrant, socially engaging, visionary, practice focused and actively linked to industry. The course is centred around building a design community network.

The course has two main components: specialised master classes led by a studio leader and industry partners and theory and technology subjects taught across the program.

The program focuses on and integrates research, industry collaboration, internationalisation and a design culture through the delivery of specialist, core and trans-disciplinary subjects. It provides a postgraduate education that is flexible in both its practice orientation and research integration.

With a focus on design evolution, innovative integration of new technologies, practice and student experimentation, the course is delivered by experienced studio leaders who are acknowledged leaders in the specific industries and professions.

Course aims

Designed to produce a balance between high levels of specialisation and lateral thinking, the program enables students to examine design from a trans-disciplinary perspective.

It enables students to explore design issues under the supervision of a practice leader, to learn new strategies and the application of research and theory. It supports best practices in postgraduate design education through learning and research strategies that critically examine design practice.

Graduates of this course are leaders in design and related industries through their expertise in product and service development. They are able to utilise strategic processes, creative tools and research skills for innovation in design.

The program provides a suite of subjects for postgraduate designers in the areas of interaction, strategy and enterprise, lighting design, technotextiles, and text and image. Common subjects explore related conceptual challenges and questions of visual expression in the quest to develop useful, usable and resonant designs. These include understanding and articulating the importance of 'user experience', the role of design in humanising information, the aesthetic and conceptual dynamics of effective communication, strategic thinking, and aspects of design management, branding and communication.

Career options

Graduates' careers are enhanced by high-level professional knowledge and skills for the workplace, with possession of specialised knowledge in advanced textiles, space and materials, interaction, sustainable design and innovation.

Course duration and attendance

The course is offered on a one-semester, full-time or one-year, part-time basis.

Course structure

Students must complete 24 credit points of subjects.

Course completion requirements

CRICOS code: 071749M

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Overview

The Graduate Certificate in Media Arts and Production is part of an articulated program in media arts and production that includes moving image, sound, digital media and interaction, and the interplay among these medias. It offers an entry-level introduction to the media arts.

Course aims

Students completing this course develop core skills and knowledge in moving image, digital media and sound production. The subjects allow students to develop key media production skills and knowledge that can be continued into the graduate diploma or master's degree.

Career options

The course prepares students for advanced study and orientates them to the media industries, particularly those involving moving image, sound, digital media and interaction.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants who have completed a bachelor's, graduate diploma or master's in any field of study or a graduate certificate in a related field of study can apply. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is completed on a one-semester, full-time or one-year, part-time basis.

Course structure

The course totals 24 credit points of study, consisting of three 8-credit-point core subjects.

Full-time students undertake 24 credit points a semester. Part-time students should undertake 8 or 16 credit points a semester.

Course completion requirements

STM90555 Core subjects (Media Arts and Production)

C11228v1 Graduate Certificate in Higher Education Teaching and Learning

Award(s): Graduate Certificate in Higher Education Teaching and Learning (GradCERHEd)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Note(s)

This course is not offered to international students.

Overview

This course is offered by the Institute for Interactive Media and Learning (IML) through UTS: Education. The course helps students to reflect critically on their teaching in ways which are underpinned by their own experiences and those of their students and colleagues, and by the research on learning and teaching in higher education.

The course is designed for current university academics or part-time university teachers interested in an academic career.

Course aims

The course aims to encourage students to develop:

- an understanding of different ways of thinking about university teaching, and the consequences for student learning, to enable them to make informed decisions about their approaches to teaching, subject design and assessment in a variety of contexts and with a diversity of students (relates to professional and intellectual attributes)
- an ability to reflect critically on and evaluate their own teaching and subjects and make changes aimed at improving their students' learning (relates to professional and intellectual attributes)
- a commitment to scholarship in teaching and to self-directed continuing teaching development (relates to professional and personal attributes), and
- a broader awareness of the higher education, university and academic career contexts in which they work, to assist them to develop their academic potential more effectively (relates to professional and personal attributes).

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants must be full-time or fractional higher education academics, or casual higher education teachers who can provide evidence of ongoing teaching during course enrolment. UTS full-time or fractional-time staff are exempt from paying course fees through sponsorship by the University.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course can be completed over one year, but students may also choose to complete it over a longer period of time.

The course is a part-time program, equivalent to eight weeks of full-time study. Subjects vary in their modes of offering, but typically involve face-to-face interactive workshops and online interaction.

Course structure

The course consists of 24 credit points of study, comprising four subjects which must be completed to be eligible for the award.

Course completion requirements

010042	Student Learning and Teaching Approaches	6cp
010043	Course Design and Assessment	6cp

C11229v1 Graduate Certificate in Intellectual Property

Award(s): Graduate Certificate in Intellectual Property (GradCERIP)

UAC code: 940435 (distance) (Autumn semester, Spring semester)

Commonwealth-supported place?: No

Load credit points: 24

Course EFTSL: 0.5

Location: City campus

Note(s)

This course is not offered to international students.

Overview

UTS has established expertise and a reputation for providing courses relevant to the needs of the patent and trade mark professions. The UTS Intellectual Property program is the first at an Australian university that fulfils the entire educational requirements for registration as a trade marks attorney and patent attorney in Australia under the relevant regulations.

The unique feature of this course is that it may be undertaken entirely online, removing the need for students to attend face-to-face classes.

Course aims

This course provides graduates with an understanding of the principles of the registered trade marks system, the protection of unregistered marks and related forms of protection against misleading or unfair trading conduct in Australia. In addition, graduates understand the content and implication of a patent specification, enabling them to advise upon possible questions of infringement, validity and compliance.

Career options

Depending on the subjects taken, graduates may seek registration as a trade marks attorney and/or patent attorney in Australia. Arts administrators or media professionals may enhance career options through building expertise in the commercialisation or management of intellectual property assets. Other career options include: patent and trade marks attorney, IP lawyer, IP portfolio manager, policy maker and government regulator.

This course enables overseas registered attorneys to undertake the necessary subjects that the Professional Standards Board requires for Australian registration.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications can be in any discipline. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

UTS may grant successful applicants advanced standing or exemption from one or more subjects but the Professional Standards Board for Patent and Trade Marks Attorneys (PSB) has no authority to recognise, for the purpose of registration as a patent attorney or trade marks attorney, such exemptions. Students intending to seek registration need to seek exemption from the PSB. Further information is available from:

The Secretary

Professional Standards Board for Patent and Trade Marks Attorneys
PO Box 200

Woden ACT 2606

telephone +61 2 6283 2345

fax +61 2 6285 1048

email mail.psb@ipaustralia.gov.au

www.psb.gov.au

Exemptions are generally not granted for subjects not primarily directed to Australian law.

Course duration and attendance

The course can be completed in a minimum of one semester of full-time or one year of part-time study (timetabling restrictions apply). Most subjects within this course can be studied by distance online and require no on-campus attendance. All lectures, tutorials, course materials and assessments are distributed by a combination of web-based technology and electronic media. Students conduct all communication with the lecturer by electronic means. A number of subjects are concurrently offered in traditional face-to-face, on-campus format.

Course structure

The course requires completion of 24 credit points of subjects. Subjects are timetabled annually, but not all subjects are offered every semester. The current timetable can be found at:

<http://timetable.uts.edu.au>

Course completion requirements

Transfer between UTS courses

Subjects undertaken within the Graduate Certificate in Trade Mark Law and Practice (C11130) (see page 497) are recognised within the Graduate Certificate in Intellectual Property (C11229) (see page 518). Students enrolled in C11130 may apply to internally transfer to this course. Candidates are not awarded the Graduate Certificate in Trade Mark Law and Practice but subjects undertaken are applied towards this graduate certificate.

Professional recognition

Subject to final board approval, where applicants have a requisite tertiary qualification as stipulated by the Professional Standards Board for Patent and Trade Marks Attorneys, this course satisfies the educational requirements necessary for registration as a trade marks attorney in Australia.

Overview

The Graduate Certificate in Professional Legal Practice allows students to complete the practical legal training (PLT) requirements necessary for admission by the Supreme Court of NSW to practise as a lawyer. The UTS PLT program is accredited by the Legal Profession Admission Board (LPAB) of the Supreme Court of NSW and offers students a university-standard level of teaching, involving interactive exercises such as practice courts, simulated practice transactions and skills training.

Career options

Career options include lawyer, provided graduates have fulfilled all other academic requirements.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

For this course the equivalent qualification required is a bachelor's degree in law, the Juris Doctor, LPAB Diploma in Law, or a law qualification from an overseas jurisdiction. Lawyers with overseas law qualifications should consult with the LPAB for admission purposes in order to practise law in NSW. Admission is at the discretion of the associate dean (teaching and learning).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students studying this course are given credit recognition for CBK90399 Law Options. This means students need to complete STM90792 Core subjects (18cps), including 75411 Practical Experience subject (0cp), in order to fulfil the course requirements.

Credit is not given where students enter the course on completion of the LPAB Diploma in Law.

Course duration and attendance

The course can be completed in one semester of full-time or one year of part-time study, plus 16 weeks of full-time (or equivalent part-time) approved practical experience.

Further information regarding completion requirements is available from the practical experience guidelines and rules at:

www.law.uts.edu.au/practical/experience/rules

Students who elect to study by distance should refer to the individual subjects with regard to any requirement to attend on-campus intensive block classes.

Course structure

Students complete 24 credit points of subjects, plus 16 weeks of full-time (or equivalent part-time) practical experience.

Industrial training/professional practice

A practical experience work placement is a compulsory and integral component of the course. Practical experience requires students to complete 16 weeks of full-time (or equivalent part-time) practical experience work placement. Students must complete their practical experience work placement within two-and-a-half years of enrolling in 75411 Practical Experience. Further information about the practical experience component of the course can be found at:

www.law.uts.edu.au/practical

 Course EFTSL: 3
 Location: Kuring-gai campus

Note(s)

This is a graduate-entry degree only.

Overview

This graduate-entry teacher education preparation course provides students with a qualification to teach in secondary schools. Students who have both the required undergraduate degree and specialisation subjects can complete the course in one year of full-time intensive study. The course is offered in a range of specialist areas.

The course consists of three components of study. The professional studies component is available in each of the specialisation areas and aims to develop the professional knowledge, skills and values needed by an effective educator in students' key learning areas. The education studies component provides research-based studies of educational theory and practice as a basis for professional decision-making in the school context. These subjects draw upon the foundation education disciplines of psychology, sociology and philosophy, as well as addressing the education of students with special needs. The professional experience component includes both campus-based and field-based experiences.

This course is a secondary school teaching preparation course. It is suitable for students about to graduate with a bachelor's degree and for mature-aged graduates who are changing careers and want a teaching qualification. It includes an intensive professional experience program where students spend up to 10 weeks in practical experience teaching and offers extensive, structured and closely supported experiences of secondary school teaching in different settings. The course has the flexibility to enable students who have most but not all the required undergraduate specialisation subjects to undertake the additional required subjects as part of the degree.

Course aims

The course aims to produce students who:

- are able to teach in a secondary school setting
- are reflective in their practice
- are able to adapt to the changing nature of teaching
- have well-developed interpersonal skills
- are keen to put current developments in learning and teaching into practice, and
- have a commitment to lifelong learning.

Career options

Career options include secondary school teaching in the chosen specialisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree in a relevant discipline at an appropriate level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.5 overall, with a minimum of 8.0 in both the speaking and listening modules, and a reading and writing score of 7.0; or TOEFL: paper based: 610-633 overall with TWE of 5.0, internet based: 102-109 overall with a writing score of 24; or PTE: 73-78; or CAE: 74-79. The English language requirements for the LOTE major are: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Local students apply through the Universities Admissions Centre.

International students

International students apply through UTS International.

Credit recognition

Previous study is assessed at the time of application to determine whether completed study satisfies the subject specialisation requirement. Students who have both the required undergraduate degree and specialisation subjects receive 72 credit points in credit recognition. Students who receive less than the maximum 72 credit points in credit recognition are required to complete additional subjects in the specialisation areas. UTS assesses this after an application has been submitted.

Applicants can view the subject requirements for teacher accreditation set by the NSW Institute of Teachers (NSWIT) for each teaching area at: www.nswteachers.nsw.edu.au/Teaching-in-NSW.html

Course duration and attendance

The course can be completed in one year of full-time intensive or part-time equivalent study. Students attend in weekly and/or block mode. Some subjects begin in the week before the start of semester.

Course structure

The total course requirement is 144 credit points comprising a maximum 72 credit points in credit recognition and 72 credit points made up of 14 core subjects, including two practicum-based subjects.

Course completion requirements

STM90640 Core subjects (SecEd)	36cp

POSTGRADUATE RESEARCH COURSES

C02001v2 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 032316D

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact a UTS Student Centre or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study. Students can complete the course in less than the maximum time.

Course structure

Candidates are required to complete a thesis, under the supervision of appropriate members of academic staff. A formal course of study or other work may also be prescribed.

Candidates are required to submit, in consultation with their supervisor(s), a progress report at the end of each semester, and to complete a doctoral assessment and seminar.

Candidates are also invited to participate in other research activities.

Course completion requirements

Select one of the following:

13907	PhD Thesis: Architecture
17900	PhD Thesis: Built Environment
81000	PhD Thesis: Design

Other information

Further information is available from the Building 6 Student Centre on: telephone 1300 ask UTS (1300 275 887)

or +61 2 9514 1222

C02018v3 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 036570B

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Engineering or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation.

The faculty's policy is one of close interaction with industry and the profession, and of seeking to contribute directly to the advancement of Australian engineering practice. Applied research programs and studies involving a direct relationship with industry are strongly encouraged. The majority of research conducted by faculty staff is supported by industry sources.

Career options

Career options include positions in universities and other institutions undertaking research or other academic work including teaching. Opportunities involving research and development also exist with national and international firms.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or AE5: Pass; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study. Students can complete the course in less than the maximum time.

The work may be carried out either on University premises or at a site external to the University, or some combination of both. Candidates may commence their studies from January or July in any given year.

Course structure

Candidates are required to complete a thesis, under the supervision of appropriate members of academic staff. A formal course of study or other work may also be prescribed.

There are three specific stages to the doctoral program to frame and support the progress of the candidate and their study.

The doctoral program includes the formalisation and / or introduction of a number of introductory and advanced modules, including subjects covering research preparation and research methods, to support the research and professional development of the student.

Research student progress is supported and reviewed through a doctoral study plan (DSP). Students design their own DSP in consultation with their supervisor(s). In the first stage, the DSP is based on the student's academic and professional background and his or her goals. The second and third stages are based on the progress

of his or her study. Candidates are assessed prior to advancing to the next stage of their candidature and submit, in consultation with their supervisor(s), a review of progress at the end of each semester.

Course completion requirements

49986 PhD Thesis: Engineering

Transfer between UTS courses

Transfer from a research master's degree program may be offered on application.

Other information

Further information is available from the Faculty of Engineering and Information Technology Research and Development Office on:

telephone +61 2 9514 2686

www.eng.uts.edu.au

C02019v3 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 014627E

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Communication or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation.

Career options

The research degrees offered by UTS: Communication are especially valuable for those wishing to pursue an academic career, a career in research or an advanced level of professional practice.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Selection criteria also include the quality of the research proposal, the faculty's ability to offer appropriate supervision in the applicant's chosen field, and, where necessary, demonstration of generic technical skills.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

Course structure

This research degree is undertaken wholly by thesis. A PhD thesis is normally a work of 80,000-100,000 words. Coursework subjects may be prescribed according to individual student requirements. While the doctoral thesis is normally written in dissertation style, candidates may, if they wish, illustrate their argument by also submitting film,

video, sound/audio, photography or other formats. Applicants should contact the research degrees administrator for further information about non-traditional formats for thesis presentation.

The Doctor of Philosophy is structured in three phases. Phase 1 involves the development of a number of advanced research skills and capabilities. At the beginning of the program, each student negotiates a doctoral study plan with their supervisor. This plan makes explicit the kinds of support each student requires. A formal doctoral assessment is undertaken at the end of Phase 1 in which the candidates present a full proposal for assessment, which is a prerequisite for entering Phase 2.

In Phase 2, students develop their individual program of research, culminating in Phase 3 in the preparation and submission of a major thesis which makes a sustained contribution to knowledge in their field of inquiry.

Research and development activities are provided throughout the three phases to assist students to develop the capabilities of a successful doctoral graduate.

Course completion requirements

51991 PhD Thesis: Humanities and Social Sciences

Other information

Further information is available from the research degrees administrator:

email Juleigh.Slater@uts.edu.au

C02020v2 Doctor of Creative Arts

Award(s): Doctor of Creative Arts (DCA)

CRICOS code: 014625G

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Communication or the UTS: Graduate Research School for further details.

While UTS: Communication may be in a position to provide access to media production facilities for DCA candidates, it provides neither training in the use of those facilities nor the cost of materials.

Overview

The Doctor of Creative Arts (DCA) is for graduates who have a significant record of achievement in the media and the creative arts and who want to undertake substantial research in the areas of media and creative production.

Career options

The research degrees offered by UTS: Communication are especially valuable for those wishing to pursue an academic career, a career in research or an advanced level of professional practice.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Selection criteria also include the quality of the applicant's portfolio of published, screened, exhibited or broadcast creative work, the quality of the research proposal, the faculty's ability to offer appropriate supervision in the applicant's chosen field, and, where necessary, demonstration of generic technical skills.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

Course structure

The work produced for this degree is of equivalent intellectual scope and level to a PhD, but is presented in non-traditional formats. Coursework subjects may be prescribed according to individual student requirements. The substantial creative work should be the equivalent of a 50,000-70,000-word written work, accompanied by a 30,000-word dissertation.

The doctoral program is structured in three phases. Phase 1 involves the development of a number of advanced research skills and capabilities. At the beginning of the program, each student negotiates a doctoral study plan with their supervisor. This plan makes explicit the kinds of support each student requires. A formal doctoral assessment is undertaken at the end of Phase 1 in which the candidates present a full proposal for assessment, which is a prerequisite for entering Phase 2.

In Phase 2, students develop their individual program of research, culminating in Phase 3 in the preparation and submission of a dissertation which makes a sustained contribution to knowledge in their field of inquiry.

Research and development activities are provided throughout the three phases to assist students to develop the capabilities of a successful doctoral graduate.

Course completion requirements

51992 Doctoral Project

C02024v3 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 032320G

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a research training scheme, scholarship or full-fee-paying basis (international). Contact UTS: Health or the UTS Graduate Research School for further details.

Overview

The Doctor of Philosophy is a research degree requiring an original and significant contribution to knowledge in a defined field of study. It is the traditional path for those wishing to assume leadership positions in research.

This course assists students to complete original research that contributes to knowledge in their field within an international context. A student may construct their thesis by way of a series of related prospective publications during the course of their candidacy. Research at UTS takes place in a dynamic and outcomes-oriented environment. The University attracts students who want to develop their knowledge and expertise within a professional and stimulating framework. When students enrol, they become part of a lively and vigorous research culture, working closely with academic staff and health industry partners.

Career options

This degree prepares nurses, midwives and health service professionals for leadership positions in teaching, management and research. Opportunities are not limited to Australia and there is the possibility of developing a career on an international level.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Applicants are also required to submit a research proposal and have the agreement of a suitable supervisor at the time of application.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

All research students are expected to attend the twice-yearly Research Student Symposia and are required to present a seminar during these weeks, twice a year for full-time students and once a year for part-time students.

Course structure

Students undertake a research project that may be in a professional or clinical area of the student's choice, or may be of a theoretical nature, addressing gaps in knowledge related to policy or practice. Students choose from a variety of research methodologies with the research approach being determined by the nature of the research undertaken. The research culminates in the production of a thesis for examination. Students are required to undertake a candidature assessment at the end of the first two semesters for full-time students, and at the end of the first three semesters for part-time students. Students work closely with a principal supervisor and a supervisory panel and are required to report on their progress each semester.

Course completion requirements

Select one of the following:

92984	PhD Thesis: Nursing
93000	PhD Thesis: Midwifery
93001	PhD Thesis: Health
93007	PhD Thesis: Sport and Exercise

C02028v6 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 008681E

Course EFTSL: 4

Location: City campus

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The PhD is awarded to candidates who make an original and distinct contribution to knowledge in their field of specialisation.

This degree is particularly valuable for students wishing to pursue a career in research or academia.

Career options

Career options include positions in universities, undertaking research, contributions to public policy, or other academic work including teaching, interest groups and legal publishing.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Support for the project, availability of supervision, availability of places, evidence of research capacity in a relevant discipline and the applicant's overall abilities and experience are all taken into account. The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

The faculty operates a pre-assessment process prior to the formal application process. This enables the faculty to give advice about whether:

- a student is likely to meet the academic eligibility requirements
- the faculty is able to offer supervision in a chosen research area
- a student appears to have a viable research topic.

The informal pre-assessment process provides students with an indication about whether they are likely to be recommended for admission if a formal application is submitted. Successful completion of the pre-assessment does not guarantee acceptance into the program. The faculty may request one or more drafts of a research proposal during pre-assessment. Prospective candidates are advised that research proposals may be reviewed by anti-plagiarism software. Contact the faculty research officer for further information about the pre-assessment process.

Formal applicants must submit a research proposal at the point of application. Once final approval is obtained for a research proposal, the topic cannot be changed except with the approval of the University.

Detailed information about the application process can be found at: www.research.uts.edu.au/future-students

International students

International students must apply through UTS: International.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study. Students can complete the course in less than the maximum time.

The work may be carried out either on University premises or at a site external to the University, or some combination of both. Candidates are required to make contact with their supervisor(s) at least once a month to discuss the progress of their research.

Course structure

Candidates are required to submit a dissertation of approximately 100,000 words. As part of this course, students must also complete the subject 77697 Higher Degree Research Seminar.

The candidate is required to undertake all assessments as part of the Faculty's Doctoral Framework three-stage program. In the first stage candidates must complete a formal candidature assessment, and in the second stage a progress confirmation assessment, to ensure their progress is consistent with completion of the research program in the prescribed time and demonstrates potential to complete the work to standard. Doctoral candidates are required to make an oral presentation of their dissertation six months prior to submission of their dissertation for examination.

Information regarding UTS: Law's key research areas and strengths, and the research interests of staff members, is available at postgraduate research degrees (see page 103).

Course completion requirements

77696	PhD Thesis: Law	
77697	Higher Degree Research Seminar	8cp

www.gradschool.uts.edu.au

C02029v4 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 009469A

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Information Technology or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation.

The course enables students to advance themselves in their career in computing and information technology. It offers flexibility in the choice of topic of research so it may be closely aligned with students' professional careers.

Career options

Career options include positions in universities and other institutions undertaking research or other academic work including teaching. Opportunities involving research and development also exist with national and international firms.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Applicants' previous qualifications must have a major computing component. Before submitting a formal application for admission to this course, applicants should first seek the approval of a potential supervisor for their proposed research work.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or AE5: Pass; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

UTS: Information Technology has a strong preference for research work that proceeds at a full-time pace. However, this preference should not be seen as a deterrent to those students who wish to remain in employment. Students who are working full time are encouraged to select a topic for their research which is closely aligned with their professional work.

Course structure

There are three specific stages to the doctoral program to frame and support the progress of the candidate and their study.

The doctoral program includes the formalisation and/or introduction of a number of introductory and advanced modules, including subjects covering research preparation and research methods, to support the research and professional development of the student.

Research student progress is supported and reviewed through a doctoral study plan (DSP). Students design their own DSP in consultation with their supervisor(s). In the first stage the DSP is based on the student's academic and professional background and his or her goals. The second and third stages are based on the progress of his or her study. Candidates are assessed prior to advancing to the next stage of their candidature and submit, in consultation with their supervisor(s), a review of progress at the end of each semester.

Candidates are required to submit a thesis for examination under the supervision of their supervisor(s).

Course completion requirements

Select one of the following:

32986	PhD Thesis: Information Systems	
33874	PhD Thesis: Software Engineering	
32903	PhD Thesis: Analytics	
32144	Technology Research Preparation	6cp
32931	Technology Research Methods	6cp

C02030v3 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 009463G

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Science or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree that involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation.

The PhD provides an opportunity for graduates to acquire high-level research skills and substantially deepen their knowledge in an area of science.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Selection criteria for admission also include the quality of the research project proposal, the faculty's ability to offer appropriate supervision in the applicant's chosen field and, where necessary, demonstration of necessary technical skills.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

Course structure

Candidates are required to complete a thesis, under the supervision of appropriate members of academic staff. A formal course of study or other work may also be prescribed.

Candidates are required to submit, in consultation with their supervisor(s), a progress report at the end of each semester, and to complete a doctoral assessment and seminar.

Course completion requirements

C02037v4 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 032334B

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship or full-fee-paying basis. Contact the Institute for Sustainable Futures or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation. It is offered to both local and international students.

Graduates from the PhD have consistently achieved excellent examiners' reports from international leaders in their fields. Many have been eligible for the UTS Chancellor's Award, and several have been placed on the Chancellor's List.

Course aims

The institute aims to support students taking a trans-disciplinary or interdisciplinary approach to research while building on their existing expertise.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Applications to the Institute for Sustainable Futures are assessed based on the following four criteria:

- professional experience – strength and relevance to the candidate's opportunities (impact)
- research output (quality and impact)
- research proposal (quality)
- academic merit (quality).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying

on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

Course structure

This research degree is undertaken wholly by thesis.

C02039v3 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 043350M

Course EFTSL: 4

Location: City campus and China

Note(s)

Research degrees are offered on a sponsored, scholarship or full-fee-paying basis. Contact UTS: International Studies or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation.

The Faculty of Arts and Social Sciences has strong expertise in China studies. University rules allow for the submission of a thesis in a language other than English providing that specific conditions have been met.

Career options

The research degrees offered by UTS: International Studies are especially valuable for those wishing to pursue an academic career or a career in research.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Each applicant should, prior to application, discuss their proposed thesis topic with the UTS: International Studies research coordinator to determine whether supervision is possible.

In addition to completing the University's application form, PhD applicants must provide the following:

- evidence of their ability to undertake advanced original research, appropriate to the proposed doctoral program. This may include previous research at honours and/or master's level, experience as a research team member, or professional practice involving systematic inquiry or advanced scholarship. Applicants should include a list of their published work, if appropriate
- project proposal: the proposal should be about 2000 words in length and include a statement of the problem, research question or area of investigation; a discussion of the relevant literature; an outline of the methodological approach; and a justification of the importance of the research. It should also indicate how the research aligns with one of the Faculty's research strengths.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Students are required to enrol in person and meet doctoral assessment requirements.

Contact your potential supervisor to discuss your application.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study. Students can complete the course in less than the maximum time.

This course is available in onshore and offshore mode. Activities are run by the faculty to support students in their research degrees. All onshore students are expected to attend these activities and students based offshore are expected to access these activities through our online forum. As well, students who study offshore must ensure they have regular communication with their supervisor.

Course structure

The research degree is undertaken wholly by thesis. A doctoral thesis is normally a work of 80,000–100,000 words and is examined by three appropriate examiners, external to UTS.

UTS: International Studies has the capacity to supervise theses in the fields of cultural diversity, social change, contemporary culture, politics, and modern history in China, Japan, Europe and the Americas.

The degree is structured in three phases. Phase 1 involves the development of a number of advanced research skills and capabilities. At the beginning of the program, each student negotiates a doctoral study plan with their supervisor. This plan makes explicit the kinds of support each student requires. A formal doctoral assessment is undertaken at the end of Phase 1 in which the candidates present a full proposal for assessment, which is a prerequisite for entering Phase 2.

In Phase 2, students develop their individual program of research, culminating in Phase 3 in the preparation and submission of a major thesis which makes a sustained contribution to knowledge in their field of inquiry.

Research and development activities are provided throughout the three phases to assist students to develop the capabilities of a successful doctoral graduate.

C02041v4 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 015943G

Course EFTSL: 4

Location: City or Kuring-gai campuses

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Education or the UTS: Graduate Research School for further details.

Overview

The Doctor of Philosophy is designed to meet the needs of those who wish to pursue a career in research or academic life. In this program, candidates embark on high-level research in one of the areas of research strength within UTS: Education.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must be in education or a related discipline. Applicants are required to provide UTS: Education with a copy of a previously completed thesis, piece of substantial academic writing or research report as part of their evidence of academic record. The research topic must be aligned with a research area of the faculty. The applicant must also provide an outline and background to the intended area of research, making a case for its significance and importance, and explaining its connection to a research area of the Faculty of Arts and Social Sciences.

Selection criteria includes the quality of the research proposal and the faculty's ability to offer appropriate supervision in the applicant's chosen field.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study. Students can complete in less than the maximum time.

For all courses involving a major thesis there is provision for early submission of the thesis on application. A candidate who wishes to extend candidature must seek permission from the UTS: Graduate Research School Board.

Course structure

The course is structured in three phases. Phase 1 involves the development of a number of advanced research skills and capabilities. At the beginning of the program, each student negotiates a doctoral study plan with their supervisor. This plan makes explicit the kinds of support each student requires. A formal doctoral assessment is undertaken at the end of Phase 1 in which the candidate presents a full proposal for assessment, which is a prerequisite for entering Phase 2.

In Phase 2, students develop their individual program of research, culminating in Phase 3 in the preparation and submission of a major thesis which makes a sustained contribution to knowledge in their field of inquiry.

Research and development activities are provided throughout the three phases to assist students to develop the capabilities of a successful doctoral graduate in education.

C02047v1 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 058666A

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Information Technology or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree which involves an intense period of supervised study and research, culminating in the submission of a thesis. The degree is awarded to candidates who, through original investigation, make a distinct and significant contribution to knowledge in their field of specialisation.

The course enables students to advance themselves in their career in computing and information technology. It offers flexibility in the choice of topic of research so it may be closely aligned with students' professional careers.

Career options

Career options include positions in universities and other institutions undertaking research or other academic work including teaching. Opportunities involving research and development also exist with national and international firms.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must have a major computing component. Applicants should first seek the approval of a potential supervisor for their proposed research work.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or AE5: Pass; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

UTS: Information Technology has a strong preference for research work that proceeds at a full-time pace. However, this preference should not be seen as a deterrent to those students who wish to remain in employment. Students who are working full time are encouraged to select a topic for their research which is closely aligned with their professional work.

Course structure

There are three specific stages to the doctoral program to frame and support the progress of the candidate and their study.

The doctoral program includes the formalisation and/or introduction of a number of introductory and advanced modules, including subjects covering research preparation and research methods, to support the research and professional development of the student.

Research student progress is supported and reviewed through a doctoral study plan (DSP). Students design their own DSP in consultation with their supervisor(s). In the first stage the DSP is based on the student's academic and professional background and his or her goals. The second and third stages are based on the progress of his or her study. Candidates are assessed prior to advancing to the next stage of their candidature and submit, in consultation with their supervisor(s), a review of progress at the end of each semester.

Candidates are required to submit a thesis for examination under the supervision of their supervisor(s).

C02048v3 Doctor of Philosophy

Award(s): Doctor of Philosophy (PhD)

CRICOS code: 058221G

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship or full-fee-paying basis. Contact UTS: Business or the UTS: Graduate Research School for further details.

Overview

The PhD is a University-wide degree that involves an intense period of supervised study and research. The degree of Doctor of Philosophy is awarded to successful candidates who have made a distinct contribution to knowledge, whether by original investigation, review or criticism.

With accreditation from the Association to Advance Collegiate Schools of Business (AACSB) International, UTS Business School is one of a select few elite business schools worldwide. Many UTS Business School staff are leaders in their fields both academically and in industry, working as senior staff or consultants, or with strong links to major corporations.

The UTS Business School PhD program recognises that certain core skills are critical to the successful completion of world-class research. The PhD program provides the opportunity for candidates to receive training in advanced disciplinary and cross-disciplinary methods which provide the basis on which candidates are able to build research capability. PhD students are supervised by a committee of three, with a chairperson normally located in the discipline most fundamental to the candidate's doctoral research. Interdisciplinary research is encouraged, and PhD committees can include researchers from cognate or other disciplines beyond where the candidate is located.

Career options

Career options include management-level positions in industry or government, and academic positions.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must be in business or a related discipline. Each applicant is required, prior to application, to discuss a potential thesis area with the relevant school research coordinator who then advises whether appropriate supervisors and resources are available. Applicants are also required to submit a brief thesis proposal or statement of research interest with their application.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

Course structure

Candidates are required to complete a thesis of approximately 50,000-70,000 words. Candidates may also be required to undertake some coursework in research methods and/or theoretical knowledge in the core fields of study. During their candidature, students' progress is monitored via assessments and regular progress reports.

Course completion requirements

Select one of the following:

21982	PhD Thesis: Management
22982	PhD Thesis: Accounting
24982	PhD Thesis: Marketing
23926	PhD Thesis: Economics
25927	PhD Thesis: Finance

C02050v1 Doctor of Education

Award(s): Doctor of Education (EdD)

CRICOS code: 066824C

Course EFTSL: 4

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact the faculty or the UTS: Graduate Research School for further details.

Overview

The Doctor of Education is designed to meet the needs of practitioners who wish to research some aspect of their field of practice. Candidates embark on high-level, practice-based research into one of the areas of research strength in UTS: Education.

The course caters not only for students committed to an academic path, but for senior practitioners from public and private sectors who wish to study and undertake research at the highest level.

Course aims

The purpose of the course is to enhance the practitioner's capacity to question, analyse, critique and develop their profession and its practices. It is a research degree whose purpose is to assist professionals to develop a relationship between research and their professional activities, in areas such as policy development and appraisal, innovation and administration.

Career options

Career options include leadership roles in the education field as a principal, manager, planner, policy adviser, teacher or trainer, in a government, industrial, commercial or community setting.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must be in education or a related discipline. Applicants are required to provide UTS: Education with a copy of a previously completed thesis, piece of substantial academic writing or research report as part of their evidence of academic record. Applicants must also develop a brief research proposal that indicates a scope and standard appropriate to an educational doctoral degree.

Selection criteria also includes the faculty's ability to offer appropriate supervision in the applicant's chosen field.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study. Students can complete the course in less than the maximum time.

This course is normally completed on a part-time basis, taking between three and four-and-a-half years. Students continue their professional work while they study. There is provision for early submission of the thesis on application.

Course structure

The course is structured into three phases. Phase 1 (the first two semesters) involves a structured foundation of research development workshops, in which participants work collaboratively with their supervisors, other academics and fellow students to develop their research proposals. Students can enter the course having professional experience as well as having demonstrated potential to do research. There are specific skills and capabilities required of doctoral level research and study, which are systematically developed through these workshops, with a particular focus on researching practice and on the development of a portfolio. A formal doctoral assessment is undertaken at the end of Phase 1 in which candidates present a full proposal for assessment, which is a prerequisite for entering Phase 2.

In Phase 2, candidates develop their individual program of research which culminates in Phase 3 in a sustained contribution to some aspect of professional practice and which is presented in a portfolio of outcomes. Each portfolio is developed according to a negotiated process with supervisors, and is accompanied by a statement establishing the scale and standard of work. Candidates participate in a range of research and development activities throughout this phase to assist them in developing the capabilities of a successful doctoral graduate in education.

C02051v1 Doctor of Project Management

Award(s): Doctor of Project Management (DPM)

CRICOS code: 045835G

Course EFTSL: 3

Location: City campus

Overview

This course combines coursework subjects and original research culminating in a doctoral dissertation. Candidates develop their doctoral topic through the coursework component. The dissertation must have a project, program or portfolio management focus and analysis representing an original investigation, criticism or review of a project, program and portfolio management of a standard suitable for publication.

The research can be undertaken in a variety of industries and applications such as product development, information and communication systems, innovation and technology, defense, construction, health, planning, property development, architecture

and design and organisational change. Research related to finding solutions for problems at a workplace informed by rigorous research is encouraged.

This program is one of the few professional doctorates in project management in Australia. It counters the isolation experienced by many PhD doctoral candidates by providing a combination of postgraduate coursework subjects and a dissertation, and allows candidates to benefit from contact with coursework students and UTS: Design Architecture and Building.

Career options

Career options include project management consultancy, senior management positions in project management and consultancy organisations, positions in universities, undertaking research, or other academic work, including teaching and research supervision.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

At least five years of industry experience in project management or senior management positions is expected, as the research requires a good understanding of organisational issues. Support for the project, availability of supervision, availability of places, availability of facilities at UTS, the applicant's overall abilities and experience and report of the academic referees submitted with the application are all taken into account.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Applicants must submit a research proposal at the point of application. Once final approval is obtained for a research proposal, the topic cannot be changed except with the approval of the University. A research proposal should be submitted along with the application as detailed at:

www.uts.edu.au/research-and-teaching/future-researchers

Local students

Information about the application process can be found at:

www.uts.edu.au/research-and-teaching/future-researchers/research-degrees-uts/applying-research-degree-and-scholarship

International students

International students can find details on how to apply for study at UTS at:

www.uts.edu.au/future-students/international

The international postgraduate student application form is available to download at:

www.uts.edu.au/future-students/international/essential-information/applying-study-us

Credit recognition

Suitably qualified applicants may be given up to 36 credit points of exemptions for coursework subjects.

Further details are available at:

www.uts.edu.au/future-students/design-architecture-and-building/essential-information/credit-recognition

Course duration and attendance

The standard course duration is three years of full-time (six semesters) or six years of part-time (12 semesters) study (the maximum course duration is four years of full-time or eight years of part-time study).

Each coursework subject involves block attendance on campus of nominally five days duration. Prior to this period, there are preparatory tasks supported by online resources and participation, and following this period students are required to complete individual assessment tasks, again using online support from teaching staff. The research methodology subjects are taught online.

The research component comprises regular meetings with the allocated supervisor, face-to-face for local students on campus, and using communication and collaboration technologies for students doing this research from an approved overseas location. Students located overseas are required to come to UTS for their first assessment and will have a local supervisor allocated to them accessible for face-to-face meetings where they are located.

Course structure

The course comprises one-third coursework subjects and two-thirds research thesis.

From Autumn 2010, this course requires completion of two compulsory 6-credit-point research methodology subjects, six 6-credit-point Master of Project Management (C04006) (see page 352) postgraduate coursework subjects chosen from CBK90605, and a dissertation of approximately 50,000 to 75,000 words.

With prior approval from the allocated supervisor and the course director, up to a maximum of two of the postgraduate coursework subjects can be substituted with subjects from other UTS faculties, provided these subjects help the candidate formulate and conduct their research.

While the DPM thesis may be shorter than a PhD thesis, taking account of the coursework component, it is expected to exhibit the same level of originality, criticism and intellectual rigour normally associated with a PhD thesis. Being a professional doctorate, the research is also expected to contribute to professional practice.

Both the candidate and the candidate's principal supervisor are required to submit progress reports at the end of each semester following commencement of the dissertation. Within the first year of commencement for full-time students, or one-and-a-half years for part-time students, candidates must complete a formal doctoral assessment to ensure they are gaining the prerequisite knowledge and skills to allow successful and timely completion of the proposed research program; that their progress is consistent with completion of the research program in the prescribed time; and that they demonstrate the potential to complete the work to standard.

C02052v1 Doctor of Nursing

Award(s): Doctor of Nursing (DN)

CRICOS code: 032319A

Course EFTSL: 4

Location: City campus

Note(s)

This course is not available for new admissions in 2014. For further information contact the research administrator in UTS: Health.

Overview

UTS: Health's research degrees are highly regarded, both nationally and internationally. Candidates for the Doctor of Nursing have the opportunity to integrate a research focus within a framework of policy development, leadership and international practice. Graduates from a Doctor of Nursing can lead in the development of practice and take their place in disciplinary research projects.

This course assists students to complete original research that contributes to knowledge in their field within an international context. Research at UTS takes place in a dynamic and outcomes-oriented environment. The University attracts students who want to develop their knowledge and expertise within a professional and stimulating framework. When students enrol, they become part of a lively and vigorous research culture, working closely with academic staff and health industry partners.

Career options

The Doctor of Nursing prepares nurses for leadership positions within the profession. Opportunities are not limited to Australia and there is the possibility of developing a career on an international level.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Applicants are required to have authorisation to practise as a registered nurse and substantial professional/administrative experience as evidenced by their professional portfolio. Applicants are also required to submit a research proposal and have the agreement of a suitable supervisor at the time of application.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study.

Subjects are run in intensive mode, with an additional online component. All research students are expected to attend the twice-yearly Research Student Symposia and are required to present a seminar during these weeks, twice a year for full-time students and once a year for part-time students.

Course structure

This degree is a structured program of study and research related to the development and extension of professional practice, culminating in the presentation of a research portfolio for examination. It includes an emphasis on the extension and leadership development of both practice and practitioners in local, national and international contexts. Students are required to undertake a candidature assessment at the end of the first two semesters for full-time students, and at the end of the first three semesters for part-time students. During candidature students complete research preparation subjects and subjects examining the program themes, as well as their selected

research projects. Students work closely with a principal supervisor and a supervisory panel and are required to report on their progress each semester.

C02055v1 Doctor of Education

Award(s): Doctor of Education (EdD)

Course EFTSL: 4

Location: Hong Kong

Note(s)

This course is only offered offshore. It is available in Hong Kong. The language of tuition is English.

This is the offshore version of the Doctor of Education (C02050) (see page 532).

Overview

The Doctor of Education is designed to meet the needs of practitioners who wish to research some aspect of their field of practice. Candidates embark on high-level, practice-based research into one of the areas of research strength in UTS: Education.

The course caters not only for students committed to an academic path, but for senior practitioners from public and private sectors who wish to study and undertake research at the highest level.

Course aims

The purpose of the course is to enhance the practitioner's capacity to question, analyse, critique and develop their profession and its practices. It is a research degree whose purpose is to assist professionals to develop a relationship between research and their professional activities, in areas such as policy development and appraisal, innovation and administration.

Career options

Career options include leadership roles in the education field as a principal, manager, planner, policy adviser, teacher or trainer, in a government, industrial, commercial or community setting.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must be in education or a related discipline. Applicants are required to provide UTS: Education with a copy of a previously completed thesis, piece of substantial academic writing or research report as part of their evidence of academic record. Applicant must also develop of a brief research proposal that indicates a scope and standard appropriate to an educational doctoral degree.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The maximum course duration is four years of full-time or eight years of part-time study. Students can complete the course in less than the maximum time.

This course is normally completed on a part-time basis, taking between three and four-and-a-half years. Students continue their professional work while they study. There is provision for early submission of the thesis on application.

Course structure

The course is structured into three phases. Phase 1 involves a structured foundation of research development workshops, in which participants work collaboratively with their supervisors, other academics and fellow students to develop their research proposals. Students can enter the course having professional experience as well as having demonstrated potential to do research. There are specific skills and capabilities required of doctoral level research and study, which are systematically developed through these workshops, with a particular focus on researching practice and on the development of a portfolio. A formal doctoral presentation is undertaken at the end of Phase 1 in which candidates present a full proposal for evaluation, which is a prerequisite for entering Phase 2.

In Phase 2, candidates develop their individual program of research which culminates in Phase 3 in a sustained contribution to some aspect of professional practice and which is presented in a portfolio of outcomes. Each portfolio is developed according to a negotiated process with supervisors, and is accompanied by a statement establishing the scale and standard of work. Candidates participate in a range of research and development activities throughout this phase to assist them in developing the capabilities of a successful doctoral graduate in education.

Course completion requirements

019950 EdD Thesis: Education

Professional recognition

This course is accredited by the Hong Kong Education Board.

Note(s)

If you are considering this degree, submit an expression of interest in the first instance. The school provides you with further information and assists you with the application process.

Overview

This is a research degree requiring an original and significant contribution to knowledge. It is the traditional path for those wishing to assume leadership positions in research. It requires students to undertake a large research project under academic supervision.

This course assists students to complete original research that contributes to knowledge in their field within an international context. Research at UTS takes place in a dynamic and outcome-oriented environment. The University attracts students who want to develop their knowledge and expertise within a professional and stimulating framework. When students enrol, they become part of a lively and vigorous research culture, working closely with academic staff and professionals from the pharmacy and healthcare industries.

Career options

This degree prepares candidates for leadership positions in teaching, management and research. Opportunities are not limited to Australia and there is the possibility of developing a career on an international level.

Admission requirements

Applicants must have completed a UTS recognised master's by research or bachelor's degree with first or second class honours (division 1), or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

C03001v3 Master of Architecture (Research)

Award(s): Master of Architecture (MArch)
CRICOS code: 008672F
Course EFTSL: 2
Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact a UTS Student Centre or the UTS: Graduate Research School for further details.

Overview

A limited number of places are offered each year to suitably qualified students to follow a program of study leading to this award. This degree is for graduates seeking to extend and deepen their knowledge by undertaking an appropriate research investigation under professional supervision by UTS: Design, Architecture and Building academic staff.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

The requirement of this degree is the preparation of a thesis which is judged by its examiners to be a distinct contribution to the knowledge of the subject. The format of the body of work and the length of the written dissertation are determined after discussion with UTS: Design, Architecture and Building staff and must be approved by the Graduate Studies Committee. Candidates may be required to first undertake coursework subjects in research methodology to gain experience with research methods and skills. Candidates are required to present papers, which form part of the preparation of their thesis, at UTS: Design, Architecture and Building postgraduate seminars.

C03012v3 Master of Design (Research)

Award(s): Master of Design (MDesign)

CRICOS code: 030867M

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored basis for permanent residents or on a full-fee-paying basis for international students. Contact a UTS Student Centre or the UTS: Graduate Research School for further details.

Overview

This degree is for graduates who want to deepen their understanding and hands-on skills in both research-for-design and research-by-design as a way to define the future of the design profession.

Design challenges are becoming more and more complex: digitisation, globalisation, the growing importance of services and the shift towards culturally and socially intelligent design means that the profile and role of the designer are changing. Research for design and researching through design experiments are becoming part of new design practice. In this course, students are challenged to develop a deep understanding of what this means for them as practising designers. They are trained in the insights and hands-on skills to do the various types of research that are becoming all-important in modern design practice.

Career options

Graduates are the new guard of academically trained designers who have deepened their insight into where design is going, and can offer employers the combination of design and research skills that they need for their long-term prosperity. There is also a clear path from this degree towards a more research-focused career, either in industry or in academia.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

The requirement of this degree is the preparation of a thesis which is judged by its examiners to be a distinct contribution to the knowledge of the subject. The format of the body of work and the length of the written dissertation are determined after discussion with UTS: Design, Architecture and Building staff and must be approved by the Graduate Studies Committee.

Candidates may be required first to undertake coursework subjects in research methodology to gain experience with research methods and skills. Candidates are also required to present papers, which form part of the preparation of their thesis, at the UTS: Design, Architecture and Building postgraduate seminars.

Specialisations are generally available within the areas of fashion and textile, industrial, interior and visual communication design, subject to supervisor availability.

Course completion requirements

C03017v2 Master of Engineering (Research)

Award(s): Master of Engineering (ME)

CRICOS code: 009468B

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Engineering or the UTS: Graduate Research School for further details.

Overview

This degree may be awarded to candidates who have completed an individual program of supervised work and submitted a thesis embodying the results. Topics which involve close cooperation with industry are strongly encouraged, and a majority of current candidates are engaged in topics which are actively supported by their employers.

This degree provides practising engineers with an opportunity to pursue, in depth, the solution of an engineering problem which requires individual effort beyond the scope of a bachelor's degree. In keeping with the faculty's overall policies, the accent is on applied research and development work, although basic research proposals are also welcomed and supported.

Career options

Career options include positions in universities and other institutions undertaking research or other academic work including teaching. Opportunities involving research and development also exist with national and international firms.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or AE5: Pass; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Candidates may commence their studies from January or July in any given year and the work may be carried out either using faculty facilities or in an industrial location. Candidates who are specially qualified in the relevant discipline may be allowed to complete the program in less than the maximum time.

Course structure

The Master of Engineering is undertaken by candidates who complete a thesis on a topic of their choice, which has been approved by the University. The thesis must make a distinct contribution to knowledge in the area covered. Its contents may report the results of an original investigation or review, or criticise some aspect of engineering knowledge, or present an engineering design or solution involving the application of new or known techniques to an engineering problem of significance. There are no coursework subjects in this course. There is a formal assessment of progress at the end of the first two semesters for both full-time and part-time candidates, in accordance with University Rule 11.13.

Course completion requirements

49776 Master of Engineering Thesis

C03018v2 Master of Arts in Humanities and Social Sciences (Research)

Award(s): Master of Arts (MA)

CRICOS code: 014624G

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Communication or the UTS: Graduate Research School for further details.

Overview

The Master of Arts in Humanities and Social Sciences (Research) provides an opportunity for graduates to develop their research skills, to deepen their knowledge in an area of the social sciences or humanities, and to undertake some original research.

Career options

The research degrees offered by UTS: Communication are especially valuable for those wishing to pursue an academic career, a career in research or an advanced level of professional practice.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Selection criteria include the quality of the research proposal, UTS: Communication's ability to offer appropriate supervision in the applicant's chosen field of study, and, where necessary, possession of generic technical skills.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

This research degree is undertaken wholly or mainly by thesis. A master's thesis is normally a work of 30,000-40,000 words. Coursework subjects may be prescribed, according to individual student requirements.

While the usual master's thesis is written in dissertation style, candidates may, if they wish, illustrate their argument by submitting film, video, sound/audio, photography or other formats together with a written dissertation of shorter length. Applicants should contact the research degrees administrator for further information on non-traditional formats for thesis presentation.

Course completion requirements

51984 Master of Arts Thesis

C03024v6 Master of Laws (Research)

Award(s): Master of Laws (LLM)

CRICOS code: 006407F

Course EFTSL: 2

Location: City campus

Overview

The Master of Laws (Research) provides an opportunity for graduates to develop their research skills, deepen their knowledge in some area of the law and undertake original research. The degree is awarded to candidates who demonstrate competence in research, an understanding of research methods and an ability to make an original contribution to knowledge.

This course is suitable for students who have completed a coursework degree and wish to deepen their knowledge in a particular legal area by means of research. Students develop critical and analytical skills and advanced research skills to enable in-depth exploration of their chosen area. This degree is valuable for those wishing to pursue a career in research.

Career options

Career options include positions in universities, undertaking research, contributions to public policy, or other academic work including teaching, interest groups and legal publishing.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must be in a relevant discipline, usually with honours or a distinction average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

The faculty operates a pre-assessment process prior to the formal application process. This enables the faculty to give advice about whether:

- a student is likely to meet the academic eligibility requirements
- the faculty is able to offer supervision in a chosen research area
- a student appears to have a viable research topic.

The informal pre-assessment process provides students with an indication about whether they are likely to be recommended for admission if a formal application is submitted. Successful completion of the informal assessment does not guarantee acceptance into the program. The faculty may request one or more drafts of a research proposal during pre-assessment. Prospective candidates are advised that research proposals may be reviewed by anti-plagiarism software. Contact the research officer for further information about the pre-assessment process.

Formal applicants must submit a research proposal at the point of application. Once final approval is obtained for a research proposal, the topic cannot be changed except with the approval of the University.

Detailed information about the application process can be found at: www.research.uts.edu.au/future-students

International students

International students must apply through UTS: International.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study. Students can complete the course in less than the maximum time.

The work may be carried out either on University premises or at a site external to the University, or some combination of both. Candidates are required to make contact with their supervisor(s) at least once a month to discuss the progress of the research being undertaken.

Course structure

Students are required to submit a thesis of approximately 40,000-60,000 words. As part of this course, students must also complete the subject 77697 Higher Degree Research Seminar.

The candidate is required to undertake all assessments as part of the Faculty's Doctoral Framework three-stage program. In the first stage candidates must complete a formal candidature assessment, and in the second candidates must complete a progress confirmation, to ensure their progress is consistent with completion of the research program in the prescribed time and that they demonstrate potential to complete the work to standard.

Information regarding UTS: Law's key research areas and strengths, and the research interests of staff members, is available at postgraduate research degrees (see page 103).

Course completion requirements

77698 Thesis (Law)

77697 Higher Degree Research Seminar

Transfer between UTS courses

Candidates in the Master of Laws (Research) who wish to transfer to the PhD but do not meet the PhD admission requirements can apply to transfer. Transfer applicants must have completed a minimum of one year's study and have reached a standard equivalent to that of a bachelor's degree with first or second class honours (division 1). Candidates applying to transfer must also demonstrate, with the support of their supervisor(s), that their topic has doctoral scope.

Applicants are encouraged to visit the UTS: Graduate Research School website at:

www.gradschool.uts.edu.au

C03025v3 Master of Science in Computing Sciences (Research)

Award(s): Master of Science (MSc)

CRICOS code: 001121E

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Information Technology or the UTS: Graduate Research School for further details.

Overview

This course enables graduates to extend and deepen their knowledge in a specialised area of computing by undertaking research under the supervision of a member of academic staff.

The course enables students to advance themselves in their career in computing and information technology, and offers flexibility in the choice of research topic so it may be closely aligned with students' professional careers.

Career options

This course enables graduates to extend and deepen their knowledge of a specialised area of computing by undertaking research. The course enables students to advance themselves in their career in computing and information technology, and offers flexibility in the choice of research topic so it may be closely aligned with students' professional careers. Career options include positions in universities and other institutions undertaking research or other academic work including teaching. Opportunities involving research and development also exist with national and international firms.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must have a major computing component. Before submitting a formal application for admission to this degree course, applicants should first seek the approval of a potential supervisor for their proposed research work.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or AE5: Pass; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

UTS: Information Technology has a strong preference for research work that proceeds at a full-time pace. However, this preference should not be seen as a deterrent to those students who wish to remain in employment. Students who are working full time are encouraged to select a topic for their research which is closely aligned with their professional work.

Course structure

Candidates are required to complete two subjects covering technology research preparation and technology research methods respectively (some candidates may be exempt from completing these subjects).

The degree is examined through presentation of a thesis.

All thesis students are required to submit, in consultation with their supervisor(s), a progress report at the end of each semester. The UTS: Graduate Research School contacts each student and their supervisor(s) to initiate this process.

Course completion requirements

C03026v5 Master of Science in Mathematical Sciences (Research)

Award(s): Master of Science (MSc)

CRICOS code: 032335A

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Science or the UTS: Graduate Research School for further details.

Overview

This course provides an opportunity to acquire research skills and to deepen knowledge in one of the areas of mathematics. The aim of the program is the professional development of candidates through mastery of a substantial body of mathematical literature together with original research work under the guidance of a supervisor.

Career options

Skills in research and the ability to think mathematically are in growing demand in industry, finance and various government organisations. As a consequence, graduates of this course significantly broaden their career choices, and the research topic may be chosen to further facilitate their career paths, for example, in senior levels of market research, quantitative management and quantitative finance.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

Students work under the guidance of a supervisor who is a member of the full-time academic staff of the University. The degree is examined through the presentation of a thesis. Students are also required to present seminars during the time of their enrolment and at the completion of their program. Students may be required to take one or several subjects deemed necessary by their principal supervisor or the Faculty Research Committee.

Course completion requirements

34776 Thesis (Mathematics)

C03029v3 Master of Science (Research)

Award(s): Master of Science (MSc)

CRICOS code: 030869J

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS: Science or the UTS: Graduate Research School for further details.

Overview

This course provides an opportunity for graduates to acquire research skills and deepen their knowledge in an area of science.

Course aims

The aim of the program is the professional development of the candidate, providing experience in problem definition, hypothesis formulation and testing, data acquisition, analysis and interpretation, and project presentation.

Career options

Career options include environmental consultant, medical scientist, researcher, resource manager, scientist or technologist.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

Students work under the guidance of a supervisor who is a member of the full-time academic staff of the University. The degree is examined through presentation of a thesis. Students may be required to take a prescribed subject in research methodology or any other subject deemed necessary by their principal supervisor or the Faculty Research Committee.

C03032v4 Master of Sustainable Futures (Research)

Award(s): Master of Sustainable Futures (Research) (MSF(Res))

CRICOS code: 028886D

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship or full-fee-paying basis. Contact the Institute for Sustainable Futures or the UTS: Graduate Research School for further details.

Overview

This degree involves a period of supervised study and research, culminating in the submission of a thesis. It is offered to both local and international students.

Graduates from the master's have consistently achieved excellent examiners' reports from international leaders in their fields. Many have been eligible for the UTS Chancellor's Award, and several have been placed on the Chancellor's List.

Course aims

The institute aims to support students taking a trans-disciplinary or interdisciplinary approach to research while building on their existing expertise.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must be in a relevant field.

Applications to the Institute for Sustainable Futures are assessed based on the following four criteria:

- professional experience – strength and relevance to the candidate's opportunities (impact)
- research output (quality and impact)
- research proposal (quality)
- academic merit (quality).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

This research degree is undertaken wholly by thesis.

C03034v2 Master of Arts in International Studies (Research)

Award(s): Master of Arts in International Studies (MA)

CRICOS code: 043338G

Course EFTSL: 2

Location: City campus and China

Note(s)

Research degrees are offered on a sponsored, scholarship or full-fee-paying basis. Contact UTS: International Studies or the UTS: Graduate Research School for further details.

Overview

This degree provides an opportunity for graduates to develop their research skills, to deepen their knowledge in some area of international study and to undertake some original, independent research.

The Faculty of Arts and Social Sciences has strong expertise in China studies. University rules allow for the submission of a thesis in a language other than English providing that specific conditions have been met.

Career options

The research degrees offered by UTS: International Studies are especially valuable for those wishing to pursue an academic career or a career in research.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Each applicant should, prior to application, discuss their proposed thesis topic with UTS: International Studies' research coordinator to determine whether supervision is possible.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Students are required to enrol in person and meet candidature assessment requirements. Students should also contact a potential supervisor and seek consent.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study. Students can complete the course in less than the maximum time.

This course is available in onshore and offshore mode. Students are, in general, not required to attend classes, however, regular contact is maintained with the candidate's supervisor(s) throughout enrolment.

Course structure

This degree is undertaken wholly by thesis. A Master of Arts thesis is normally a work of around 40,000 words and is examined by two appropriate examiners.

Theses can be supervised in the fields of cultural diversity, social change, contemporary culture, politics and modern history in China, Japan, Europe and the Americas.

Course completion requirements

979110 Thesis (International Studies)

C03044v2 Master of Creative Arts (Research)

Award(s): Master of Creative Arts (Research) (MCA (Res))

CRICOS code: 066173M

Course EFTSL: 2

Location: City campus

Note(s)

The Master of Creative Arts (Research) is offered primarily on a full-fee-paying basis, however some scholarship places may be available. Contact UTS: Communication or the UTS: Graduate Research School for further details.

Overview

The Master of Creative Arts (Research) is generally intended for people with industry experience in the media and creative arts who want to undertake creative research involving the preparation and presentation of a major creative work and a thesis of about 10,000-15,000 words. Candidates may also participate in classroom or online seminars on thesis preparation in the first semester of enrolment.

The course provides an opportunity for those seeking to develop specific knowledge, research and creative skills relevant to the creative industries that are emerging locally and internationally.

Career options

Career options include positions in the creative industries.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Selection criteria for admission include professional and creative experience in a creative arts field, the quality of the research proposal, the quality of the applicant's portfolio of creative work, UTS: Communication's ability to offer appropriate supervision in the applicant's chosen field of study, and, where necessary, demonstration of generic technical skills.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

This research degree is undertaken through the production of a major creative work and a supporting 10,000-15,000-word thesis. Coursework subjects may be prescribed according to individual student requirements. Examples of the creative research component include an exhibition in a traditional gallery venue or relevant digital format, such as CD-ROM, a website, video, DVD or piece of journalism.

Course completion requirements

51985 Master of Creative Arts Thesis

C03046v2 Master of Business (Research)

Award(s): Master of Business (MBus)

CRICOS code: 069858B

Course EFTSL: 2

Location: City and/or Kuring-gai campuses

Note(s)

This is an exit-only course. There is no direct admission to it. Current UTS students may be able to transfer into this course. Check with your faculty.

Overview

The Master of Business (Research) is for students who may be required to transfer from a Doctor of Philosophy. Students extend and deepen their knowledge through an appropriate research investigation under supervision by UTS Business academic staff.

This program is suitable for students who may be required to transfer from a Doctor of Philosophy. Students develop critical and analytical skills and advanced research skills to enable in-depth exploration of their chosen area.

Career options

Career options include management-level positions in industry or government, and academic positions.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

The main requirement of the degree is the preparation of a thesis of 40,000-50,000 words, which presents the results of original research of a theoretical or applied nature.

Students may also be required to undertake some coursework in research methods and/or theoretical knowledge in the core fields of study. During their candidature, students' progress is monitored by assessments and regular progress reports. For further details, refer to UTS Business's postgraduate course information (see page 53).

Course completion requirements

Select one of the following:

21990	Master of Business Thesis (Management)
22990	Master of Business Thesis (Accounting)
24990	Master of Business Thesis (Marketing)
25990	Master of Business Thesis (Finance)
23990	Master of Business Thesis (Economics)

Other information

www.gradschool.uts.edu.au

C03047v1 Master of Education (Research)

Award(s): Master of Education (Research) (MED(Res))

CRICOS code: 040690D

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship, faculty part-sponsored or full-fee-paying basis. Contact UTS Education or the UTS Graduate Research School for further details.

Overview

The Master of Education (Research) is intended for those who wish to pursue advanced research in one of the areas of faculty expertise.

Career options

Career options include management-level positions in industry or government, and academic positions.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Entry is by direct admission or through a research pathway from the Master of Education (by coursework) (C04232) (see page 400).

Direct admission requires evidence of potential to conduct research. Entry from the Master of Education (by coursework) is based on demonstrated research potential and academic prowess.

The research topic needs to be aligned with one of the faculty research areas, and a potential supervisor must be available.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study. Students can complete the course in less than the maximum time.

Course structure

The program comprises research coursework, participation in faculty research seminars and a thesis of 50,000 words.

The coursework component consists of the two 6-credit-point research subjects currently offered in the Master of Education.

The thesis work of candidates is generally closely related to the research interests of supervising members of staff in UTS Education's areas of research strength.

Course completion requirements

016102	Thesis (Education)	
013952	Research Perspectives	6cp
013112	Research Design	6cp

Further study at UTS

This course can also serve as a pathway into higher research degrees (PhD, EdD) if the student's research project and progress are considered acceptable at the master's assessment.

C03048v2 Master of Nursing (Research)

Award(s): Master of Nursing (Research) [MN(Res)]

CRICOS code: 052679M

Course EFTSL: 2

Location: City campus

Note(s)

Research degrees are offered on a sponsored, scholarship or full-fee-paying basis. Contact UTS: Health or the UTS Graduate Research School for further details.

Overview

This degree is designed for registered nurses wanting to develop research skills that have practical application for innovations in the health care industry and scholarly understanding of nursing practice. It enables informed participation in research endeavours and clinical practice innovation and improvement. In this degree, students extend and deepen their knowledge of a specialised area in nursing through a program of supervised research.

This course assists students to complete original research that contributes to knowledge in their field within an international context. Research at UTS takes place in a dynamic and outcomes-oriented environment. The University attracts students who want to develop their knowledge and expertise within a professional and stimulating framework. Students are part of a lively and vigorous research culture, working closely with academic staff and health industry partners.

Career options

This degree offers solid research training to registered nurses who are required to undertake research in their current employment or who aspire to such positions.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Applicants are required to have authorisation to practise as a registered nurse. Applicants are also required to submit a research proposal and have the agreement of a suitable supervisor at the time of application.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Subjects are run in intensive mode, with an additional online component. All research students are expected to attend the twice-yearly Research Student Symposia and are required to present a seminar during these weeks, twice a year for full-time students and once a year for part-time students.

Course structure

This course is a structured program of study incorporating research preparation subjects undertaken in the first year and the production of a research thesis for examination.

Students are required to undertake a candidature assessment at the end of the first two semesters for full-time students, and at the end of the first three semesters for part-time students. Students work closely with a principal supervisor and a supervisory panel, and are required to report on their progress each semester.

Course completion requirements

92975	Master of Nursing (Honours) Thesis	
92972	Health Care Research Methodology	6cp
92973	Developing Health Care Theory	6cp
92974	Investigating Health Care Change	6cp

Course program

The program for the coursework component appears below.

Year 1

Autumn semester

92972	Health Care Research Methodology	6cp

Spring semester

92973	Developing Health Care Theory	6cp
92974	Investigating Health Care Change	6cp

C03051v1 Master of Analytics (Research)

Award(s): Master of Analytics (Research) [MAAnalytics(Res)]

CRICOS code: 075277F

Course EFTSL: 2

Location: City campus

Overview

UTS is at the forefront of analytics education in Australia with its focus on practice-based, interdisciplinary analytics and decision-making research. Big data in the internet age is very complex and growing exponentially, posing greater challenges for organisations.

In this course, students can focus on real-world business problems in their own organisations and develop solutions as part of their research. This course enables graduates to extend and deepen their knowledge in a specialised area of analytics by undertaking research under the supervision of a member of academic staff.

The core program is supplemented by short courses, seminars and projects. These courses provide academic rigour while using cutting-edge technologies.

The course offers flexibility in the choice of research topics so that the research is closely aligned with the student's professional requirements. Students can undertake research in analytics to solve the problems that directly impact their organisations: research with a purpose.

Advanced analytics techniques and solutions are increasingly being used by industry to drive productivity, transform business and increase competitiveness. The demand for skilled analytics professionals with the ability to work in both traditional and emerging industries continues to grow. With high-level analytics skills graduates are able to make a significant contribution to their organisation. Students also benefit from being able to work with world-leading researchers in this area.

Career options

There is a skills shortage of professionals with work-ready skills in analytics. The demand for skilled professionals in analytics crosses a range of industries from banking, e-commerce, education, finance, government, health, insurance, marketing, taxation, telecommunications and transport. In a knowledge economy there is significant demand for graduates in this area.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Previous qualifications must have a major in analytics, computing, applied statistics or applied mathematics. Before submitting a formal application for admission to this degree, applicants should first seek the approval of a potential supervisor for their proposed research work.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or AE5: Pass; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Course structure

Candidates are required to complete two subjects covering technology research preparation and technology research methods respectively (some candidates may be exempt from completing these subjects), and selected learning modules, seminars, projects and practice.

The degree is examined through presentation of a thesis.

All thesis students are required to submit, in consultation with their supervisor(s), a progress report at the end of each semester. The UTS: Graduate Research School contacts each student and their supervisor(s) to initiate this process.

Course completion requirements

31676	Thesis (Analytics)	
32144	Technology Research Preparation	6cp
32931	Technology Research Methods	6cp

C03052v1 Master of Sport and Exercise (Research)

Award(s): Master of Sport and Exercise (Research) [MSportEx(Res)]

CRICOS code: 032336M

Course EFTSL: 2

Note(s)

Research degrees are offered on a sponsored, scholarship or full-fee-paying basis. Contact the UTS: Health or the UTS Graduate Research School for further details.

Overview

The Master of Sport and Exercise (Research) program is for graduates who wish to enhance their knowledge of an area, address policy or management issues, or pursue a research/academic career.

This program is suitable for students who have completed a coursework degree and wish to develop in a more focused way by means of research. Students develop critical and analytical skills and advanced research skills to enable in-depth exploration of their chosen area.

Career options

Career options include management-level positions in industry or government, and academic positions.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

The bachelor's degree must be in a related field of study.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or AE5: Pass; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The maximum course duration is two years of full-time, or four years of part-time study.

Course structure

The main requirement of the degree is the preparation of a thesis of 40,000-50,000 words, which presents the results of original research of a theoretical or applied nature.

Students are also required to complete the two-subject sequence relevant to their thesis topic. The first is an advanced research methods subject that also covers statistical analysis. The second involves reading and formal seminar presentations on current topics in the chosen area of study. In addition to these subjects, candidates may be required to enrol in subjects specified by their supervisors. During their candidature, students' progress is monitored by a master's assessment and regular progress reports.

Course completion requirements

92052	Master of Sport and Exercise Thesis	6cp
92054	Research and Statistics for Sport and Exercise

C03053v1 Master of Pharmacy (Research)

Award(s): Master of Pharmacy (Research) [MPharm(Res)]

CRICOS code: 076138J

Course EFTSL: 2

Location: City campus

Note(s)

If you are considering this degree, submit an expression of interest in the first instance. The school provides you with further information and assists you with the application process.

Overview

This course is intended for registered pharmacists, or students who have completed a registrable pharmacy degree, who wish to pursue a career in pharmacy research or gain a competitive advantage in their career by completing an additional postgraduate qualification. Students gain research skills and expertise in their area of research interest, and demonstrate their outstanding academic ability and commitment to pharmacy through the completion of the degree.

The Master of Pharmacy (Research) gives students the opportunity to work with leading national and international researchers in their area of interest to develop and complete an original research project, which contributes to knowledge. Students gain research training and skills, as well as developing extensive knowledge and expertise in an area of research. Students are supported by a strong and vibrant research culture, both within the School and the University and have access to other researchers, a wide variety of workshops, the University library and research facilities.

Career options

The Master of Pharmacy (Research) is excellent preparation for those students who wish to pursue doctoral research study, a career in research or higher level pharmacy positions. Career options include academic appointments, expanded practice roles, advisory positions and industry roles.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate research studies.

Applicants need to have completed a prior degree that would make them eligible for registration as a pharmacist.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

All applicants are required to contact UTS: Pharmacy prior to applying to establish eligibility and supervisory arrangements.

Course duration and attendance

The maximum course duration is two years of full-time or four years of part-time study.

Students are also required to attend on-campus meetings with supervisors, research training sessions and other forums as required.

Course structure

This course consists of one thesis subject which is undertaken for the duration of the degree.

Students are required to undertake a candidature assessment at the end of the first two semesters for full-time students, and at the end of the first three semesters for part-time students. Students work closely with a principal supervisor and a supervisory panel, and are required to report on their progress each semester.

Course completion requirements

95590	Master of Pharmacy Thesis

C03054v1 Master of Pharmaceutical Sciences (Research)

Award(s): Master of Pharmaceutical Sciences (Research)

[MPharmSc(Res)]

CRICOS code: 076139G

Course EFTSL: 2

Note(s)

If you are considering this degree, submit an expression of interest in the first instance. The school provides you with further information and assists you with the application process.

Overview

The Master of Pharmaceutical Sciences (Research) is intended for students who have completed a relevant degree in science, who wish to pursue a career in pharmaceutical sciences research or gain a competitive advantage in their career by completing an additional postgraduate qualification. Students in this course gain research skills, technical skills and expertise in their area of research interest and demonstrate their outstanding academic ability and commitment to pharmaceutical science through the completion of the degree.

The course gives students the opportunity to work with leading national and international researchers in their area of interest to develop and complete an original research project, which contributes to knowledge. Students gain research training and skills, as well as developing extensive knowledge and expertise in an area of research. Students are supported by a strong and vibrant research culture, both within the School and the University and have access to other researchers, a wide variety of workshops, the University library and research facilities.

CBK90038 No specified major

This study package allows candidates to tailor their own program of study in various ways such as:

- combining technical subjects from two or more major areas
- completing more or fewer than the required number of management subjects for individual major areas
- combining any postgraduate engineering subjects in a coherent and logical form based around some type of theme.

A program of subjects is normally identified prior to enrolment, in consultation with one or more academic members of staff, and approved by the Director of PG coursework programs.

Completion requirements

Select 48 credit points from the following options:		48cp
32005	Strategic Leadership for Innovation	6cp
32009	Advanced Routing Principles	6cp
32011	Multilayer Switched Networks	6cp
32109	Troubleshooting Converged Networks	6cp
32118	Mobile Communications and Computing	6cp
32144	Technology Research Preparation	6cp

32310	Network Security Appliances	6cp
32520	UNIX Systems Administration	6cp
32521	WANS and VLANs	6cp
32524	LANs and Routing	6cp
32541	Project Management	6cp
32547	UNIX Systems Programming	6cp
32548	Network Security	6cp

Select 12 credit points from the following options:			12cp
77746	Advanced Mediation	6cp	
77945	Current Issues in Taxation	6cp	
77752	Commercial Arbitration (Domestic)	6cp	
79771	Dispute Resolution	6cp	
77761	Dispute Resolution in Commerce	6cp	
77704	European Union Law	6cp	
77900	Goods and Services Tax	6cp	
Select one of the following:			6cp
77751	International Commercial Arbitration	6cp	
77783	International Commercial Dispute Resolution	6cp	
77953	International Taxation Law	6cp	
77716	International Trade Law	6cp	
77976	World Trade Organisation Law and Practice	6cp	
77745	Negotiation	6cp	
77850	Psychology and Dispute Resolution	6cp	
77767	Taxation Administration	6cp	
77796	Taxation of Business Entities	6cp	
77924	Superannuation and Retirement Planning	6cp	
77867	Workplace Dispute Resolution	6cp	
78008	Law of the Sea	6cp	
77938	Introduction to Taxation Law	6cp	
Total 12cp			

CBK90329 Major choice

Select 24 credit points from the following options:			24cp
MAJ03420	Computer Control Engineering	24cp	
MAJ03421	Energy Planning and Policy	24cp	
MAJ03422	Local Government Engineering	24cp	
MAJ03424	Manufacturing Engineering and Management	24cp	
MAJ03425	Software Engineering	24cp	
MAJ03426	Structural Engineering	24cp	
MAJ03427	Telecommunication Networks	24cp	
MAJ03428	Telecommunications Engineering	24cp	
MAJ03429	Water Engineering	24cp	
CBK90472	No specified major	24cp	
MAJ03451	Integrated Logistic Support and Engineering Management	24cp	
MAJ03453	Civil Engineering	24cp	
MAJ03457	Value Chain Management	24cp	
MAJ03458	Geotechnical Engineering	24cp	
MAJ03462	Operations	24cp	
MAJ03468	Systems Engineering	24cp	
MAJ03465	Biomedical Engineering	24cp	
Total 24cp			

CBK90330 Major choice

Select 48 credit points from the following options:			48cp
MAJ03430	Computer Control Engineering	48cp	
MAJ03380	Energy Planning and Policy	48cp	
MAJ03375	Local Government Engineering	48cp	
MAJ03415	Manufacturing Engineering and Management	48cp	
MAJ03379	Software Engineering	48cp	
MAJ03378	Structural Engineering	48cp	
MAJ03382	Telecommunications Engineering	48cp	
MAJ03385	Telecommunication Networks	48cp	
MAJ03372	Water Engineering	48cp	
MAJ03431	Telecommunications Engineering and Telecommunication Networks	48cp	
CBK90038	No specified major	48cp	
MAJ03443	Local Government Engineering and Environmental Engineering	48cp	
MAJ03452	Integrated Logistic Support and Engineering Management	48cp	
MAJ03454	Civil Engineering	48cp	
MAJ03456	Civil Engineering and Structural Engineering	48cp	
MAJ03459	Civil and Geotechnical Engineering	48cp	
MAJ03460	Geotechnical Engineering	48cp	
MAJ03464	Operations	48cp	
MAJ03467	Systems Engineering	48cp	
MAJ03466	Biomedical Engineering	48cp	
Total 48cp			

CBK90331 Subject choice (Group A)

Select 18 credit points from the following options:			18cp
49001	Judgment and Decision Making	6cp	
49013	Managing Information Technology in Engineering	6cp	
49016	Technology and Innovation Management	6cp	
49306	Quality and Operations Management Systems	6cp	
Total 18cp			

CBK90332 Major choice

Select 30 credit points from the following options:			30cp
CBK90323	No specified major	30cp	
MAJ09383	Commercial Law	30cp	
MAJ09386	Dispute Resolution Law	30cp	
MAJ09387	Information Technology Law	30cp	
MAJ09384	Industrial and Intellectual Property Law	30cp	
MAJ09385	Family Law	30cp	
MAJ09382	International Law	30cp	
MAJ09381	International Trade Law	30cp	
Total 30cp			

CBK90333 Electives

Select 12 credit points from the following options:			12cp
32106	Agile Method Engineering	6cp	
32120	Introduction to e-Business Technology	6cp	
32131	Data Mining and Visualisation	6cp	
32133	e-Market Trading Technology	6cp	
32501	Computer Graphics	6cp	
32513	Advanced Data Analytics Algorithms	6cp	
32520	UNIX Systems Administration	6cp	
32530	Building Intelligent Agents	6cp	
32543	3D Animation	6cp	
32544	Advanced Image Synthesis Techniques	6cp	
32547	UNIX Systems Programming	6cp	
32550	Advances in Requirements Engineering	6cp	
32208	Information Systems Strategy	6cp

79006	Intellectual Property Commercialisation	6cp
		Total 12cp

CBK90472 No specified major

This study package allows candidates to tailor their own program of study in various ways such as:

- combining technical subjects from two or more major areas
- combining fewer than the required minimum number of technical major subjects and a number of engineering management subjects
- combining any postgraduate engineering subjects in a coherent and logical form based around some type of theme.

A program of subjects is normally identified prior to enrolment, in consultation with one or more academic members of staff, and approved by the Director of PG coursework programs.

Completion requirements

Select 24 credit points from the following options:		24cp
32005	Strategic Leadership for Innovation	6cp
32009	Advanced Routing Principles	6cp
32011	Multilayer Switched Networks	6cp
32109	Troubleshooting Converged Networks	6cp
32118	Mobile Communications and Computing	6cp
32144	Technology Research Preparation	6cp
32310	Network Security Appliances	6cp
32520	UNIX Systems Administration	6cp
32521	WANS and VLANs	6cp
32524	LANS and Routing	6cp
32541	Project Management	6cp
32547	UNIX Systems Programming	6cp
32548	Network Security	6cp
32552	IP Telephony and Voice over IP	6cp
32553	Leadership and People Management	6cp
32555	Fundamentals of Software Development	6cp
32557	Enabling Enterprise Information Systems	6cp

CBK90638 Research/Practice choice

In this choice block, students have the option of focusing their studies towards research or towards professional practice. Students who are intending to pursue a professional career in industry should choose 32572 Reflective Practice in Information Technology. Students intending to pursue a research or academic career should choose 32931 Information Technology Research Methods, followed by a research project (32933 or 32934) in a later semester.

Students pursuing the research option must identify a suitable project topic and an academic staff member who will be their supervisor for both 32931 and their subsequent research project, and need to

provide this information in order to be granted permission to enrol in 32931. Students should contact the UTS Building 10 Student Centre for more details.

Completion requirements

Select 6 credit points from the following options:		6cp
32931	Technology Research Methods	6cp
32572	Reflective Practice in Information Technology	6cp
		Total 6cp

CBK90639 Electives

Free choice of electives.

CBK90640 Elective

Free choice of electives.

CBK90641 Electives

Students are encouraged to select from the recommended electives below. Students who would like to study an elective from outside of this list are required to seek approval from the School.

Places in electives may be limited and/or subject to availability.

Completion requirements

Select 12 credit points from the following options:		12cp
92606	Issues in Australian Health Services	6cp
92917	Using Health Care Data for Decision Making	6cp
22747	Accounting for Managerial Decisions	6cp
91345	Biochemistry, Genes and Disease	6cp
65643	Chemistry and Pharmacology of Recreational Drugs	6cp
21779	Management Skills	6cp
21844	Managing Work and People	6cp
21743	Business Excellence	6cp
96020	Pharmacy Research Project A	6cp
92845	Primary Health Care	6cp
92934	Clinical Management of Diabetes	6cp
96021	Pharmacy Research Project B	6cp
		Total 12cp

CBK90642 Elective

Select 12 credit points from the following options:		12cp
60909	Professional Science Project	12cp
91535	Microscopy and Cytometry	6cp
91536	Proteomics	6cp
91345	Biochemistry, Genes and Disease	6cp
91352	Parasitology	6cp
91705	Medical Devices and Diagnostics	6cp
91368	Bioreactors and Bioprocessing	6cp
91707	Pharmacology 1	6cp
91335	Molecular Biology 2	6cp
91359	Advanced Immunology	6cp
91344	Medical and Diagnostic Biochemistry	6cp
91369	Biobusiness and Environmental Biotechnology	6cp
91540	Climate Change and Ecological Modelling	6cp
91541	Monitoring Ecological Variability	6cp

CBK90643 Elective

Select 12 credit points from the following options:		12cp
21856	Career and Portfolio Development	6cp
21797	Strategic Supply Chain Management	6cp
21751	Management Research Methods	6cp
21800	Management and Organisations	6cp
21717	International Management	6cp
21720	Human Resource Management	6cp
21742	Quantitative Management	6cp
21844	Managing Work and People	6cp
		Total 12cp

CBK90644 Major choice

Select 48 credit points from the following options:		48cp
MAJ01121	Medical Biotechnology	48cp
MAJ05003	Environmental Change Management	48cp
MAJ01123	Forensic Science	48cp
MAJ01124	Mathematical and Statistical Modelling	48cp
MAJ01125	Science Management	48cp
CBK90649	No specified major	48cp
MAJ01130	Marine Science and Management	48cp
MAJ03470	Biomedical Engineering	48cp
		Total 48cp

CBK90645 Extended major choice

Select 72 credit points from the following options:		72cp
MAJ08063	Extended Marketing	72cp
MAJ08046	Extended Management	72cp
MAJ08060	Extended Finance	72cp
MAJ09402	Extended Economics	72cp
		Total 72cp

CBK90646 Sub-major/Four electives

Select 24 credit points from the following options:		24cp
SMJ08116	Financial Reporting	24cp
SMJ08117	International Accounting	24cp
SMJ08120	Small Business Accounting	24cp
SMJ09028	Economics	24cp
SMJ08123	Finance	24cp
SMJ08126	Sport Management	24cp
SMJ08127	Tourism Management	24cp
SMJ08128	Human Resource Management	24cp
SMJ08129	International Management	24cp
SMJ08130	Management	24cp
SMJ08131	Advanced Advertising	24cp
SMJ08132	Marketing Research	24cp
SMJ08137	Advertising	24cp
SMJ08138	Marketing	24cp

89120	Sustainability, Design and Creative Futures: Being Human	12cp	
89121	Sustainability, Design and Creative Futures: Spatio-Temporal Shifts	12cp	
89122	Sustainability, Design and Creative Futures: Critical Economies	12cp	
89114	Lighting Studio: Light, Time and Change	12cp	
89115	Lighting Studio: Light, Materials and Space	12cp	
89116	Lighting Studio: Final Project	12cp	
89123	Experimental Visual Communications: Research Through Design	12cp	
89124	Experimental Visual Communications: Visualising the Invisible	12cp	
89125	Experimental Visual Communications: Final Project	12cp	
Total 24cp			

CBK90671 Design Expertise choice

Select 36 credit points from the following options:			36cp
CBK90665	Design major choice	36cp	
CBK90672	Design Studio choice	36cp	
Total 36cp			

CBK90672 Design Studio choice

As part of the Master of Design (Interactivation specialisation), students can enrol in either 89111 or 89112 depending on which semester they start the course. 89111 is not a prerequisite to 89112 and they can be taken in any order.

Completion requirements

Select 36 credit points from the following options:			36cp
89015	Textile and Fashion Innovation	12cp	
89016	Reframing Fashion and Textile Practice	12cp	
89017	Fashion and Textiles Entrepreneur	12cp	
89120	Sustainability, Design and Creative Futures: Being Human	12cp	
89121	Sustainability, Design and Creative Futures: Spatio-Temporal Shifts	12cp	
89122	Sustainability, Design and Creative Futures: Critical Economies	12cp	
89114	Lighting Studio: Light, Time and Change	12cp	
89115	Lighting Studio: Light, Materials and Space	12cp	
89116	Lighting Studio: Final Project	12cp	
89123	Experimental Visual Communications: Research Through Design	12cp	
89124	Experimental Visual Communications: Visualising the Invisible	12cp	

89125	Experimental Visual Communications: Final Project	12cp	
89111	Interactivation Studio: Autumn	12cp	
89112	Interactivation Studio: Spring	12cp	
89113	Interactivation Studio: Final Project	12cp	
89126	Design Studio 1: Human-centred Design	12cp	
89127	Design Studio 2: Social Design Practice/ Critical Reflection	12cp	
89128	Design Studio 3: Resilience and Creative Practice	12cp	
89151	Design for Change: Specific Retail Environments	12cp	
89152	Design for Change: Reinvigorating Retail Precincts	12cp	
89153	Design for Change: Retail Futures	12cp	
Total 36cp			

CBK90673 Design option

Select 24 credit points from the following options:			24cp
SMJ04023	Performative Spaces	24cp	
Total 24cp			

CBK90674 Design options

Select 24 credit points from the following options:			24cp
86112	Design Studio: Experimentations	12cp	
86531	Design Studio: Explorations	12cp	
86530	Design Studio: Performative Spaces 1	12cp	
86533	Design Studio: Performative Spaces 2	12cp	
Total 24cp			

CBK90675 Geotechnical Engineering choice

Select 18 credit points from the following options:			18cp
49118	Applied Geotechnics	6cp	
49119	Problematic Soils and Ground Improvement Techniques	6cp	
49254	Advanced Soil Mechanics and Foundation Design	6cp	
49102	Traffic and Transportation	6cp	
49106	Road Engineering Practice	6cp	
49116	Contaminated Site and Waste Remediation	6cp	
49257	Geographic Information Systems	6cp	
49126	Environmental Management of Land	6cp	
49143	Civil Engineering Review 1	6cp	
49258	Pavement Analysis and Design	6cp	
Total 18cp			

CBK90676 Civil and Geotechnical Engineering choice A

Select 24 credit points from the following options:			24cp
49118	Applied Geotechnics	6cp	
49119	Problematic Soils and Ground Improvement Techniques	6cp	
49254	Advanced Soil Mechanics and Foundation Design	6cp	
49102	Traffic and Transportation	6cp	
49106	Road Engineering Practice	6cp	
49116	Contaminated Site and Waste Remediation	6cp	
49257	Geographic Information Systems	6cp	
49126	Environmental Management of Land	6cp	
49258	Pavement Analysis and Design	6cp	
Total 24cp			

CBK90677 Civil and Geotechnical Engineering choice B

Select 24 credit points from the following options:			24cp
49047	Finite Element Analysis	6cp	
49131	Bridge Design	6cp	
49134	Structural Dynamics and Earthquake Engineering	6cp	
49136	Application of Timber in Engineering Structures	6cp	
49150	Prestressed Concrete Design	6cp	
49115	Facade Engineering	6cp	
49135	Wind Engineering	6cp	
49151	Concrete Technology and Practice	6cp	
49255	Catchment Modelling	6cp	
49256	Flood Estimation	6cp	
49107	Urban Stormwater Design	6cp	
49109	Engineered Natural Water Treatment Systems	6cp	
49002	Managing Projects	6cp	
49143	Civil Engineering Review 1	6cp	
42991	Advanced Water and Wastewater Treatment	6cp	
Total 24cp			

CBK90678 Elective

Select 12 credit points from the following options: 12cp

60909	Professional Science Project	12cp
91535	Microscopy and Cytometry	6cp
91536	Proteomics	6cp
91345	Biochemistry, Genes and Disease	6cp
91352	Parasitology	6cp
91705	Medical Devices and Diagnostics	6cp
91368	Bioreactors and Bioprocessing	6cp
91707	Pharmacology 1	6cp
91335	Molecular Biology 2	6cp
91359	Advanced Immunology	6cp
91344	Medical and Diagnostic Biochemistry	6cp
91369	Biobusiness and Environmental Biotechnology	6cp
91540	Climate Change and Ecological Modelling	6cp
91541	Monitoring Ecological Variability	6cp
91145	Environmental Protection and Management	6cp
91120	GIS and Remote Sensing	6cp
91155	Stream and Lake Assessment	6cp
91551	Ecohydrology and Climate Change	6cp
91157	Marine Communities	6cp
91116	Wildlife Ecology	6cp
91118	Fisheries Resources	6cp
66513	Marine Geosciences	6cp
91309	Biodiversity Conservation	6cp
91542	Principles of Contaminated Site Assessment	6cp
91543	Evaluation of Contaminant Effects	6cp
91544	Environment Risk Assessment and Remediation	6cp
68044	Characterisation of Energy Efficient Materials	6cp
68002	Advanced Nanomaterials	6cp
68001	Advanced Physics	6cp
68513	Optics and Nanophotonics	6cp
68320	Scanning Probe and Electron Microscopy	6cp
68415	Measurement and Analysis of Physical Processes	6cp
68416	Computational Physics	6cp
68606	Solid-state Science and Nanodevices	6cp
68316	Applied Electronics and Interfacing	6cp
67509	Molecular Nanotechnology	6cp
68413	Quantum Physics	6cp
68315	Imaging Science	6cp
65034	Introduction to Forensic Science	6cp
65342	Crime Scene Investigation	6cp
65544	Chemical Criminalistics	6cp
65545	Forensic Toxicology	6cp
35255	Forensic Statistics	6cp
91137	DNA Profiling	6cp
91138	Investigation of Human Remains	6cp
65412	Physical Evidence	6cp
65643	Chemistry and Pharmacology of Recreational Drugs	6cp
65644	Fire and Explosion Investigation	6cp
91402	Anatomical Pathology	6cp
65863	Expert Evidence Presentation	6cp
65743	Complex Forensic Cases (Chemistry)	6cp
91139	Complex Forensic Cases (Biology)	6cp
79028	Complex Forensic Cases (Law for Biology)	6cp
35212	Computational Linear Algebra	6cp
35231	Differential Equations	6cp
35252	Mathematical Statistics	6cp
35322	Advanced Analysis	6cp
35340	Quantitative Management Practice	6cp
35342	Nonlinear Methods in Quantitative Management	6cp
35344	Network and Combinatorial Optimisation	6cp
35353	Regression Analysis	6cp
35355	Quality Control	6cp
35365	Stochastic Calculus in Finance	6cp
35393	Seminar (Statistics)	6cp
35361	Stochastic Processes	6cp
35366	Numerical Methods of Finance	6cp
35457	Multivariate Statistics	6cp
35502	Seminar A	6cp
35503	Seminar B	6cp
35504	Seminar C	6cp

35505	Seminar D	6cp
35364	Statistics for Quantitative Finance	6cp
35356	Design and Analysis of Experiments	6cp
		Total 12cp

CBK90679 Stream choice

Select 96 credit points from the following options:		96cp
STM90523	Standard stream	96cp
STM90524	Extended major	96cp
		Total 96cp

CBK90682 Options

Select 6 credit points from the following options:		6cp
60905	Leadership and Teamwork in Science	6cp
60906	Science in Practice	6cp
60907	Managing Science-based Enterprises	6cp
60908	Science and Industrialisation	6cp
		Total 6cp

CBK90701 Sub-major choice

Select 24 credit points from the following options:		24cp
SMJ09048	Transnational Studies	24cp
SMJ09049	Reading Australia	24cp
SMJ09050	Environmental Studies	24cp
SMJ09051	Bodies, Genders, Rights	24cp
SMJ10032	Media Studies	24cp
SMJ10033	Screen Studies	24cp
SMJ09052	Aboriginal Studies	24cp
SMJ09060	Australian Language and Culture Studies	24cp
		Total 24cp

CBK90702 Electives

Select 24 credit points from the following options:		24cp
58110	Introduction to Journalism	8cp
58111	Reporting with Sound and Image	8cp
58112	Reporting and Editing for Print and Online Journalism	8cp
58116	The Ecology of Public Communication	8cp
58117	Principles of Public Relations	8cp
58118	Principles of Advertising	8cp
58120	Creativity and Culture	8cp
58121	Fictional Forms	8cp
58122	Introduction to Social Inquiry	8cp
58123	Society, Economy and Globalisation	8cp
58124	Local Transformations	8cp
58126	Information Discovery and Analysis	8cp
58125	User Experience Design	8cp
58127	Information Cultures	8cp
58128	Strategic Public Relations	8cp
58129	Advertising Campaign Practice	8cp
58222	Global Politics from Above and Below	8cp
58223	Social Bodies	8cp
58224	Australian Pasts and Places	8cp
58225	Introduction to Film Studies	8cp
58226	Media, Mediation, Power	8cp
58227	Balancing World Views: Introduction to Aboriginal Cultures	8cp
58228	Climate Change: Politics and Ecology	8cp
58316	Sex, Race and Empire	8cp
58317	Transnational Media	8cp
58318	Gender, Culture, Power	8cp
58319	Rights and Territories	8cp
58320	Australian Fiction	8cp
58321	Australian Film	8cp
58322	Screening the Past	8cp
58323	Contemporary World Cinema	8cp
58324	Investigating Media, Reflective Practices	8cp
58325	Audiences, Users, Publics, Communities	8cp
58326	Australian Aboriginal Politics and History	8cp
58327	Indigenous Futures	8cp
58328	The New Economy of Post-Nature	8cp
58329	Culture, Science and Nature	8cp
58999	Professional Internship	8cp
97101	Chinese Language and Culture 1	8cp
97102	Chinese Language and Culture 2	8cp
97401	French Language and Culture 1	8cp
97402	French Language and Culture 2	8cp
97601	German Language and Culture 1	8cp
97602	German Language and Culture 2	8cp
97801	Italian Language and Culture 1	8cp

97802	Italian Language and Culture 2	8cp	49023	Energy and Environmental Economics	6cp
97201	Japanese Language and Culture 1	8cp	49024	Energy Modelling	6cp
97202	Japanese Language and Culture 2	8cp	49025	Methods for Energy Analysis	6cp
97501	Spanish Language and Culture 1	8cp	49026	Electricity Sector Planning and Restructuring	6cp
97502	Spanish Language and Culture 2	8cp	49027	Energy Demand Analysis and Forecasting	6cp
50251	Genocide Studies	8cp	49028	Policy and Planning of Energy Conservation	6cp
50001	Online Documentary	8cp	49029	Environmental Policy for Energy Systems	6cp
976111	Contemporary China	8cp	49047	Finite Element Analysis	6cp
976211	Contemporary Japan	8cp	49048	Wireless Networking Technologies	6cp
976404	Contemporary Switzerland	8cp	49049	Air and Noise Pollution	6cp
976411	Contemporary France	8cp	49069	Leadership and Responsibility	6cp
976421	Contemporary Germany	8cp	49098	Engineering Financial Control	6cp
976431	Contemporary Italy	8cp	49102	Traffic and Transportation	6cp
976451	Contemporary Spain	8cp	49105	Water Supply and Wastewater Management	6cp
976502	Contemporary Latin(o) Americas	8cp	49106	Road Engineering Practice	6cp
976602	Contemporary Canada (Quebec)	8cp	49107	Urban Stormwater Design	6cp
976001	Foundations in International Studies	8cp	49108	Local Government Powers and Practice	6cp
50190	Information Research Project	8cp	49109	Engineered Natural Water Treatment Systems	6cp
58900	Poetry	8cp	49110	3G Mobile Communication Systems	6cp
58901	Screenwriting	8cp	49115	Facade Engineering	6cp
58902	Writing Through Genre	8cp	49116	Contaminated Site and Waste Remediation	6cp
59715	Australian Workplace Cultures	8cp	49117	Floodplain Risk Management in NSW	6cp
59716	Australian Environment	8cp	49118	Applied Geotechnics	6cp
59717	Indigenous and Migrant Cultures	8cp	49119	Problematic Soils and Ground Improvement Techniques	6cp
58332	Defining Cultures	8cp	49121	Environmental Assessment and Planning	6cp
58333	Introduction to Cultural Research	8cp	49122	Ecology and Sustainability	6cp
58335	Digital Communities	8cp	49123	Waste and Pollution Management	6cp
58216	Imagining the Real	8cp	49124	Water Quality Management	6cp
58330	Narrative and Theory	8cp	49125	Environmental Risk Assessment	6cp
58337	Engagement, Participation, Gamification	8cp	49126	Environmental Management of Land	6cp
	Total 24cp		49127	Decentralised Water and Wastewater Treatment	6cp
CBK90703 Electives			49131	Bridge Design	6cp
Select 12 credit points from the following options:			49133	Steel and Composite Design	6cp
32005	Strategic Leadership for Innovation	6cp	49134	Structural Dynamics and Earthquake Engineering	6cp
32009	Advanced Routing Principles	6cp	49135	Wind Engineering	6cp
32011	Multilayer Switched Networks	6cp	49136	Application of Timber in Engineering Structures	6cp
32109	Troubleshooting Converged Networks	6cp	49150	Prestressed Concrete Design	6cp
32118	Mobile Communications and Computing	6cp	49151	Concrete Technology and Practice	6cp
32144	Technology Research Preparation	6cp	49201	Integrated Services Networks	6cp
32310	Network Security Appliances	6cp	49202	Communication Protocols	6cp
32520	UNIX Systems Administration	6cp	49203	Telecommunications Signal Processing	6cp
32521	WANS and VLANs	6cp	49205	Transmission Systems	6cp
32524	LANs and Routing	6cp	49215	Telecommunications Industry Management	6cp
32541	Project Management	6cp	49223	Satellite Communication Systems	6cp
32547	UNIX Systems Programming	6cp	49225	Software Project Management	6cp
32548	Network Security	6cp	49227	Wireless Sensor Networks	6cp
32552	IP Telephony and Voice over IP	6cp	49238	Telecommunication Networks Management	6cp
32553	Leadership and People Management	6cp	49247	Object-oriented Technology	6cp
32557	Enabling Enterprise Information Systems	6cp	49249	Telecommunications Engineering Review	6cp
32555	Fundamentals of Software Development	6cp	49254	Advanced Soil Mechanics and Foundation Design	6cp
32562	Strategic Business Management	6cp	49255	Catchment Modelling	6cp
32563	IT Professional and Society	6cp	49256	Flood Estimation	6cp
32570	Enterprise Software Architecture and Middleware	6cp	49257	Geographic Information Systems	6cp
32603	Systems Quality Management	6cp	49258	Pavement Analysis and Design	6cp
32606	Database	6cp	49261	Biomedical Instrumentation	6cp
32702	Contemporary Telecommunications	6cp	49262	Web Technologies	6cp
32931	Technology Research Methods	6cp	49274	Advanced Robotics	6cp
42001	Bioinformatics	6cp	49275	Neural Networks and Fuzzy Logic	6cp
42002	Enterprise Application Development Using Cloud Platforms	6cp	49285	Emergency Management	6cp
42890	4G Mobile Technologies	6cp	49286	Vehicle Design	6cp
42891	Infrastructure for Cloud Computing	6cp	49306	Quality and Operations Management Systems	6cp
42900	Sustainability and Information Systems	6cp	49307	Internal Combustion Engines	6cp
42901	Object-Relational Databases	6cp	49309	Quality Planning and Analysis	6cp
42902	Interior Routing and High Availability	6cp	49312	Advanced Flow Modelling	6cp
42903	Multi Protocol Label Switching	6cp	49316	Materials Handling	6cp
42904	Cloud Computing and Software as a Service	6cp	49321	Energy Conversion	6cp
42905	Marketing Technology	6cp	49322	Airconditioning	6cp
49001	Judgment and Decision Making	6cp	49323	Vibration Analysis	6cp
49002	Managing Projects	6cp	49325	Computer-aided Mechanical Design	6cp
49003	Economic Evaluation	6cp	49328	Turbomachines	6cp
49004	Systems Engineering for Managers	6cp	49329	Control of Mechatronic Systems	6cp
49006	Risk Management in Engineering	6cp	49330	Sensors and Signal Processing	6cp
49013	Managing Information Technology in Engineering	6cp	49655	Integrated Logistic Support	6cp
49016	Technology and Innovation Management	6cp			
49021	Evaluation of Infrastructure Investments	6cp			
49022	Energy Resources and Technology	6cp			

49678	Reliability Availability and Maintainability	6cp
49680	Value Chain Engineering Systems	6cp
49701	Gas Sector Planning	6cp
49702	Gas Distribution Technology and Management	6cp
49703	Selected Topics (Energy Pricing)	6cp
49706	Regulatory Economics	6cp
49928	Design Optimisation for Manufacturing	6cp
49989	Operations Engineering	6cp
42991	Advanced Water and Wastewater Treatment	6cp
		Total 12cp

CBK90704 Journalism elective

Select 24 credit points from the following options:		24cp
57166	Documentary Production	8cp
57184	Documentary: Expanded, Mobile and Networked	8cp
57187	Specialist Journalism	8cp
57012	Regulation of the Media	8cp
57014	Feature Writing	8cp
57021	Journalism Internship	8cp
57138	International and Comparative Journalism	8cp
57150	Editing and Design	8cp
57151	Storytelling with Sound and Image	8cp
57152	Investigative Research in the Digital Environment	8cp
57155	Online Journalism	8cp
57156	Radio Journalism	8cp
57158	Television and Video Journalism	8cp
57161	Investigative Journalism	8cp
		Total 24cp

CBK90706 Generalist Marketing choice

Select 24 credit points from the following options:		24cp
24706	Strategic Services Marketing	6cp
24707	Strategic Business Marketing	6cp
24713	Marketing Channel Management	6cp
24736	Marketing Communications	6cp
24738	Strategic International Marketing	6cp
24742	New Product Management	6cp
24750	Marketing Analytics	6cp
24757	Research Methodology and Data Analysis Tools	6cp
24759	Research Design and Data Collection Tools	6cp
24760	Pricing and Revenue Management	6cp
		Total 24cp

CBK90707 Electives major (PopEdSocChange)

Select 12 credit points from the following options:		12cp
010040	Program Development and Evaluation in Indigenous Education and Development	6cp
010041	Research, Ethics and Indigenous Cultural Heritage	6cp
013087	Discourse Analysis	6cp
013090	e-Learning Design	6cp
013091	e-Learning Experiences 1	6cp
013093	e-Learning Technologies	6cp
013095	Global Englishes	6cp
013104	Language and Power	6cp
013112	Research Design	6cp
013120	The Psychology of Adult Development	6cp
013127	Communication Management	6cp
013136	Developing People and Teams	6cp
013137	Educational Leadership	6cp
013146	Using Film for Critical Pedagogy	6cp
013160	Professional Learning and Practice	6cp
013162	Organisational Learning	6cp
013165	Leading Learning in the Workplace	6cp
013166	Education in Policy Contexts	6cp
013167	Contemporary Work and Learning	6cp
013168	Adult Education: Past, Present, Future	6cp
013150	Literacy and Numeracy in and for Work	6cp
		Total 12cp

CBK90708 Electives major (OrgWrkpLrn)

Select 12 credit points from the following options:		12cp
010040	Program Development and Evaluation in Indigenous Education and Development	6cp
010041	Research, Ethics and Indigenous Cultural Heritage	6cp
013087	Discourse Analysis	6cp
013090	e-Learning Design	6cp

013091	e-Learning Experiences 1	6cp
013093	e-Learning Technologies	6cp
013095	Global Englishes	6cp
013104	Language and Power	6cp
013112	Research Design	6cp
013120	The Psychology of Adult Development	6cp
013127	Communication Management	6cp
013136	Developing People and Teams	6cp
013137	Educational Leadership	6cp
013146	Using Film for Critical Pedagogy	6cp
013161	Popular Education and Social Movements	6cp
013163	New Media and Social Change	6cp
013164	Narrative and Storymaking in Education and Change	6cp
013165	Leading Learning in the Workplace	6cp
013166	Education in Policy Contexts	6cp
013168	Adult Education: Past, Present, Future	6cp
013150	Literacy and Numeracy in and for Work	6cp
		Total 12cp

CBK90709 Electives major (AdEd)

Select 12 credit points from the following options:		12cp
010040	Program Development and Evaluation in Indigenous Education and Development	6cp
010041	Research, Ethics and Indigenous Cultural Heritage	6cp
013087	Discourse Analysis	6cp
013090	e-Learning Design	6cp
013091	e-Learning Experiences 1	6cp
013093	e-Learning Technologies	6cp
013095	Global Englishes	6cp
013104	Language and Power	6cp
013112	Research Design	6cp
013127	Communication Management	6cp
013136	Developing People and Teams	6cp
013137	Educational Leadership	6cp
013146	Using Film for Critical Pedagogy	6cp
013160	Professional Learning and Practice	6cp
013161	Popular Education and Social Movements	6cp
013162	Organisational Learning	6cp
013163	New Media and Social Change	6cp
013164	Narrative and Storymaking in Education and Change	6cp
013165	Leading Learning in the Workplace	6cp
013167	Contemporary Work and Learning	6cp
013150	Literacy and Numeracy in and for Work	6cp
		Total 12cp

CBK90710 Electives (Midwifery)

Free choice of electives.

CBK90711 Choice

Select 48 credit points from the following options:		48cp
77898	Patent Law	6cp
77889	Trade Marks Law	6cp
77894	Drafting of Patent Specifications	6cp
77890	Trade Marks Practice	6cp
77891	Patent Systems	6cp
77895	Interpretation and Validity of Patent Specifications	6cp
77893	Designs Law and Practice	6cp
78015	Global Aspects of Intellectual Property Law	6cp
77903	Copyright Law	6cp
77740	Research Paper	6cp
78188	Intellectual Property Commercialisation	6cp
77905	Preparing for Intellectual Property Practice	6cp
78186	Intellectual Property and Traditional Knowledge	6cp
78238	History and Theory of Intellectual Property	6cp
		Total 48cp

CBK90712 Choice

Select 24 credit points from the following options:		24cp
77898	Patent Law	6cp
77889	Trade Marks Law	6cp
77894	Drafting of Patent Specifications	6cp
77890	Trade Marks Practice	6cp
77891	Patent Systems	6cp
77895	Interpretation and Validity of Patent Specifications	6cp
77893	Designs Law and Practice	6cp
78015	Global Aspects of Intellectual Property Law	6cp

77903	Copyright Law	6cp
77740	Research Paper	6cp
78188	Intellectual Property Commercialisation	6cp
77905	Preparing for Intellectual Property Practice	6cp
78186	Intellectual Property and Traditional Knowledge	6cp
78238	History and Theory of Intellectual Property	6cp
		Total 24cp

CBK90713 Choice

Select 36 credit points from the following options: 36cp

77898	Patent Law	6cp
77889	Trade Marks Law	6cp
77894	Drafting of Patent Specifications	6cp
77890	Trade Marks Practice	6cp
77891	Patent Systems	6cp
77893	Designs Law and Practice	6cp
78015	Global Aspects of Intellectual Property Law	6cp
77903	Copyright Law	6cp
77740	Research Paper	6cp
78188	Intellectual Property Commercialisation	6cp
77905	Preparing for Intellectual Property Practice	6cp
77895	Interpretation and Validity of Patent Specifications	6cp
78186	Intellectual Property and Traditional Knowledge	6cp
78238	History and Theory of Intellectual Property	6cp
		Total 36cp

CBK90743 Electives

Select 12 credit points from the following options: 12cp

42900	Sustainability and Information Systems	6cp
42901	Object-Relational Databases	6cp
42902	Interior Routing and High Availability	6cp
42903	Multi Protocol Label Switching	6cp
42904	Cloud Computing and Software as a Service	6cp
49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49003	Economic Evaluation	6cp
49004	Systems Engineering for Managers	6cp
49006	Risk Management in Engineering	6cp
49013	Managing Information Technology in Engineering	6cp
49016	Technology and Innovation Management	6cp
49021	Evaluation of Infrastructure Investments	6cp
49022	Energy Resources and Technology	6cp
49023	Energy and Environmental Economics	6cp
49024	Energy Modelling	6cp
49025	Methods for Energy Analysis	6cp
49026	Electricity Sector Planning and Restructuring	6cp
49027	Energy Demand Analysis and Forecasting	6cp
49028	Policy and Planning of Energy Conservation	6cp
49029	Environmental Policy for Energy Systems	6cp
49047	Finite Element Analysis	6cp
49048	Wireless Networking Technologies	6cp
49049	Air and Noise Pollution	6cp
49069	Leadership and Responsibility	6cp
49098	Engineering Financial Control	6cp
49102	Traffic and Transportation	6cp
49105	Water Supply and Wastewater Management	6cp
49106	Road Engineering Practice	6cp
49107	Urban Stormwater Design	6cp
49108	Local Government Powers and Practice	6cp
49109	Engineered Natural Water Treatment Systems	6cp
49110	3G Mobile Communication Systems	6cp
49115	Facade Engineering	6cp
49116	Contaminated Site and Waste Remediation	6cp
49117	Floodplain Risk Management in NSW	6cp
49118	Applied Geotechnics	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49121	Environmental Assessment and Planning	6cp
49122	Ecology and Sustainability	6cp
49123	Waste and Pollution Management	6cp
49124	Water Quality Management	6cp
49125	Environmental Risk Assessment	6cp
49126	Environmental Management of Land	6cp
49127	Decentralised Water and Wastewater Treatment	6cp

49131	Bridge Design	6cp
49133	Steel and Composite Design	6cp
49134	Structural Dynamics and Earthquake Engineering	6cp
49135	Wind Engineering	6cp
49136	Application of Timber in Engineering Structures	6cp
49150	Prestressed Concrete Design	6cp
49151	Concrete Technology and Practice	6cp
49201	Integrated Services Networks	6cp
49202	Communication Protocols	6cp
49203	Telecommunications Signal Processing	6cp
49205	Transmission Systems	6cp
49215	Telecommunications Industry Management	6cp
49223	Satellite Communication Systems	6cp
49225	Software Project Management	6cp
49227	Wireless Sensor Networks	6cp
49238	Telecommunication Networks Management	6cp
49247	Object-oriented Technology	6cp
49249	Telecommunications Engineering Review	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp

CBK90744 Electives

Select 16 credit points from the following options:		16cp
57028	Research for Communication Professionals	8cp
57026	Strategic Communication and Negotiation	8cp
57035	Organisational Change and Communication	8cp
57131	Inventive Media Advertising	8cp
57132	Media Relations	8cp
57995	Learning in Organisations	8cp
Total 16cp		

CBK90745 200/300-level disciplinary choice

Select 8 credit points from the following options:		8cp
58225	Introduction to Film Studies	8cp
58323	Contemporary World Cinema	8cp
58120	Creativity and Culture	8cp
58320	Australian Fiction	8cp
58322	Screening the Past	8cp
58321	Australian Film	8cp
58217	Experiments in Culture	8cp
Total 8cp		

CBK90746 Mobile Computing Network choice

Free choice of electives.

CBK90747 Internetworking choice

Select 6 credit points from the following options:		6cp
32702	Contemporary Telecommunications	6cp
32521	WANS and VLANS	6cp
32001	Mobile Commerce Technologies	6cp
32144	Technology Research Preparation	6cp
Total 6cp		

CBK90750 Elective choice

Select 6 credit points from the following options:		6cp
89202	3D Digital Animation 1	6cp
89203	3D Digital Animation 2	6cp
89204	2D Digital Animation	6cp
Total 6cp		

CBK90766 Electives (Tourism)

Select 12 credit points from the following options:		12cp
27346	Tour Operator and Wholesaling Management	6cp
27347	Hotel Management	6cp
27647	Airlines and Transportation Management	6cp
27703	Event Management	6cp
Total 12cp		

CBK90767 Electives

Free choice of electives.

CBK90768 Options (MCSEM)

Select 42 credit points from the following options:		42cp
32039	Recent Advances in Software Engineering	6cp
32106	Agile Method Engineering	6cp
32133	e-Market Trading Technology	6cp
32145	Commercial Environment of IT	6cp
32148	Enterprise Computing	6cp
32510	Principles of Object-oriented Programming in C++	6cp
32530	Building Intelligent Agents	6cp
32531	Global Information Systems	6cp
32535	Database in Distributed Environments	6cp
32536	Advanced Software Modelling	6cp
32550	Advances in Requirements Engineering	6cp
32601	Advanced Project Management	6cp
32931	Technology Research Methods	6cp
32933	Research Project	6cp
32934	Research Project	12cp
32990	IT Contracts and Outsourcing	6cp
42990	Organisational Design for the Knowledge Era	6cp
Total 42cp		

CBK90769 Options

Select 18 credit points from the following options:		18cp
32039	Recent Advances in Software Engineering	6cp
32106	Agile Method Engineering	6cp
32133	e-Market Trading Technology	6cp
32145	Commercial Environment of IT	6cp

11363	Special Project (Communications)	6cp
11364	Special Project (Design)	6cp
11365	Special Project (Offshore)	6cp
11308	Reading and Writing Architectural Criticism	6cp
11312	Modern Western Aesthetics	6cp
11311	Drawing to Diagrams: Topics in Architectural Theory	6cp
11316	Architectural Communications: Building Information Modelling	6cp
15143	Group Project A: Urban Renewal	6cp
15144	Group Project B: Greenfields Development	6cp
15145	Development Negotiation	6cp
11313	Exploring Space 1: from Simple Beginnings to Baudrillard	6cp
89205	Design for Three-Dimensional Computer Animation	6cp
		Total 24cp

CBK90796 Foundation subject choice A

Select 6 credit points from the following options: 6cp

65111	Chemistry 1	6cp
68101	Foundations of Physics	6cp
91161	Cell Biology and Genetics	6cp
91107	The Biosphere	6cp
21129	Managing People and Organisations	6cp
22107	Accounting for Business Decisions A	6cp
24108	Marketing Foundations	6cp
25300	Fundamentals of Business Finance	6cp
31266	Introduction to Information Systems	6cp
31268	Web Systems	6cp
31269	Business Requirements Modelling	6cp
31271	Database Fundamentals	6cp
48023	Programming Fundamentals	6cp
70110	Introduction to Law	6cp
		Total 6cp

CBK90797 Foundation subject choice B

Select 6 credit points from the following options: 6cp

65212	Chemistry 2	6cp
68041	Physical Aspects of Nature	6cp
91400	Human Anatomy and Physiology	6cp
91123	Biocomplexity	6cp
68070	Introduction to Materials	6cp
68201	Physics in Action	6cp
65242	Principles of Forensic Science	6cp
21129	Managing People and Organisations	6cp
22107	Accounting for Business Decisions A	6cp
24108	Marketing Foundations	6cp
25300	Fundamentals of Business Finance	6cp
31266	Introduction to Information Systems	6cp
31268	Web Systems	6cp
31269	Business Requirements Modelling	6cp

31271	Database Fundamentals	6cp
48023	Programming Fundamentals	6cp
48024	Applications Programming	6cp
70110	Introduction to Law	6cp
		Total 6cp

CBK90798 Sub-major/Electives

Select 24 credit points from the following options:		24cp
CBK90232	Electives (Science UG)	24cp
SMJ10031	Physics	24cp
SMJ01031	Statistics (Physical Sciences)	24cp
SMJ02054	Scientific Computing	24cp
SMJ09060	Australian Language and Culture Studies	24cp
		Total 24cp

CBK90799 Choice

Select 12 credit points from the following options:		12cp
49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49013	Managing Information Technology in Engineering	6cp
		Total 12cp

CBK90800 Electives/Sub-major (MAP)

Select 48 credit points from the following options:		48cp
57011	Research and Reporting for Journalism	8cp
57109	Film Animation	8cp
57008	Digital Libraries and Collections	8cp
57142	Writing for the Screen	8cp
57166	Documentary Production	8cp
57172	Advanced Moving Image	8cp
57173	Advanced Post Production	8cp
57175	Creative Producing	8cp
57176	Directing	8cp
57177	Media Arts and Production Minor Project	8cp
57178	Digital and Multiplatform Storytelling	8cp
57179	Project Development and Creative Practice	8cp
57180	Media Arts and Production Major Project	16cp
SMJ10043	Journalism	24cp
SMJ10044	Screenwriting	24cp
57061	Issues in Documentary	8cp
57183	Soundtrack	8cp
59715	Australian Workplace Cultures	8cp
59716	Australian Environment	8cp
59717	Indigenous and Migrant Cultures	8cp
		Total 48cp

CBK90801 Sub-major/Electives

Select 24 credit points from the following options:		24cp
CBK90232	Electives (Science UG)	24cp
SMJ01048	Environmental Sciences	24cp
		Total 24cp

CBK90802 Choice

Select 24 credit points from the following options:		24cp
32516	Internet Programming	6cp
32509	Interaction Design	6cp
32525	Web Services Technologies and Applications	6cp
32549	Advanced Internet Programming	6cp
32209	Advanced Topics in Computer Networks	6cp
32548	Network Security	6cp
32558	Business Intelligence	6cp
32559	Business Systems Design	6cp
32560	Information Systems Architecture Design	6cp
32528	Network Management	6cp
32547	UNIX Systems Programming	6cp

MAJ01100 Applied Chemistry

This major gives students the insight into how chemical substances work and the reasons for their behaviour with a dynamic combination of practice and theory. Students gain strong practical skills and lots of laboratory experience, which is why this major is an 'applied chemistry' major.

Core study areas include analytical, environmental and toxicological chemistry, physical, organic and inorganic chemistry, chemical safety and legislation.

Students have access to sophisticated, cutting-edge technology and instruments in a modern science facility. They also learn from practising scientists and researchers.

Completion requirements

STM90682	Core subjects (Chemistry)	48cp
65509	Inorganic Chemistry 2	6cp
67305	Polymer Science	6cp
65606	Analytical Chemistry 3	6cp
67510	Surface Processes	6cp
CBK90576	Sub-major / Electives (Chemistry)	24cp
		Total 96cp

MAJ01101 Applied Physics

This major enables students to learn about the interactions of energy and matter, precision measurement techniques, measuring and understanding the laws of nature and how new developments in physics are helping to expand the frontiers of technology. This major is a combination of theory and practice with lots of opportunities for practical skills and laboratory experience.

Core study areas include computational physics, electromagnetics, electronics and interfacing, energy science, optics, measurement techniques, quantum and solid-state physics.

Students have access to modern, high technology micro-structural analysis instruments, and are taught how to apply them. Students gain critical thinking skills and how to apply practical problem solving skills in a hands-on environment. They also learn how applied research progresses and the creation of new technology.

Professional recognition: Australian Institute of Physics.

Completion requirements

STM90683	Core subjects (Physics and Nanotechnology)	48cp
68416	Computational Physics	6cp
68412	Energy Science and Technology	6cp
68414	Advanced Mechanics	6cp
68415	Measurement and Analysis of Physical Processes	6cp
CBK90575	Sub-major / Electives	24cp
		Total 96cp

MAJ01102 Nanotechnology

Nanotechnology is understanding how the world works at the level of atoms, molecules and applying that knowledge to make or improve more user-friendly and sustainable products, such as self-cleaning surfaces, energy-efficient window coatings or light bulbs, clear-gel sunscreens, smart materials, and targeted drug delivery systems.

This is a multidisciplinary major that teaches students the valuable knowledge and skills to understand biological, physical and chemical processes at the nanoscale, through a dynamic combination of theory and practical skills.

Core study areas include materials science, nanomaterials, nanotubes, bionanotechnology, molecular nanotechnology, nanoscale sensors, nanodevices, optics, scanned probe, electron microscopy and imaging science.

Hands-on training in nanotechnology tools are a core component of this major.

Professional recognition: Australian Institute of Physics.

Completion requirements

STM90683	Core subjects (Physics and Nanotechnology)	48cp
65307	Physical Chemistry 1	6cp
67509	Molecular Nanotechnology	6cp
91140	BioNanotechnology	6cp
67510	Surface Processes	6cp
CBK90798	Sub-major / Electives	24cp
		Total 96cp

MAJ01103 Biotechnology

This major teaches students the valuable skills to take advantage of and improve the biological processes of living organisms. Biotechnology scientists use these techniques and methods to create new medicine, food and organic substances through applying gene technology and other natural processes.

Core study areas include biotechnology, gene therapy, vaccine development, biobusiness and bioethics, environmental biotechnology, genetic engineering, protein and antibody engineering, and immunology.

Students learn to develop practical laboratory skills and techniques for managing hazards, intellectual property and ethical issues. They also gain professional skills and qualification in biological science and a firm basis in the industrial aspects of biotechnology. This is a comprehensive biotechnology major with a wide range of options for advanced specialisation.

Professional recognition: Australian Biotechnology Association.

Completion requirements

STM90684	Core subjects (Medical and Molecular Biology)	48cp
91335	Molecular Biology 2	6cp
91142	Biotechnology	6cp
91369	Biobusiness and Environmental Biotechnology	6cp
91144	Plant Biotechnology	6cp
91368	Bioreactors and Bioprocessing	6cp
CBK90582	Elective 4	6cp
Select 12 credit points from the following options:		12cp
91129	Transfusion Science	6cp
91345	Biochemistry, Genes and Disease	6cp
91352	Parasitology	6cp
91402	Anatomical Pathology	6cp
91359	Advanced Immunology	6cp
		Total 96cp

MAJ01104 Biomedical Science

This major provides students with in-depth understanding of how the body works at the cellular level, what causes disease and the techniques of laboratory diagnosis of disease, which include expanding areas of molecular-based diagnostic techniques.

Students gain the underpinning knowledge and laboratory skills required to participate in research aimed at disease prevention and treatment.

Core study areas include biochemistry, clinical microbiology, haematology, histology, human anatomy and physiology, immunology, molecular biology, parasitology and pathology.

Students obtain a solid background in the biological and medical sciences, and practical experimentation. A biomedical science major provides excellent underpinning knowledge for entry into a postgraduate medicine program.

Professional recognition: Australian Institute of Medical Scientists (AIMS); this major is one of two degrees that is accredited by AIMS in Sydney.

Completion requirements

STM90684	Core subjects (Medical and Molecular Biology)	48cp
91500	Histology	6cp
CBK90582	Elective 4	6cp
Select 36 credit points from the following options:		36cp
91338	Clinical Bacteriology	6cp
91358	Advanced Haematology	6cp
91335	Molecular Biology 2	6cp
91344	Medical and Diagnostic Biochemistry	6cp
91129	Transfusion Science	6cp
91359	Advanced Immunology	6cp
91352	Parasitology	6cp
91345	Biochemistry, Genes and Disease	6cp
91402	Anatomical Pathology	6cp
		Total 96cp

MAJ01105 Medical Science

This major focuses on human anatomy and physiology, and provides students with knowledge of the structure, function and control of the body system as well as the aetiology and pathophysiology of disease. It combines a solid grounding in key medical sciences with flexible options for specialisation.

Core study areas include anatomy and physiology, human cell biology, human pathophysiology, medical devices and diagnostics, metabolic biochemistry, microbiology, molecular biology, neuroscience and pharmacology.

Students obtain a solid background in the medical sciences and practical experimentation. The major also provides the foundation knowledge and skills for students who wish to go on to postgraduate programs such as medicine, biomedical engineering, nutrition and dietetics, complementary medicine, public health and health administration.

Completion requirements

STM90684	Core subjects (Medical and Molecular Biology)	48cp
91707	Pharmacology 1	6cp
91706	Neuroscience	6cp
91703	Physiological Systems	6cp
91705	Medical Devices and Diagnostics	6cp
91709	Pharmacology 2	6cp
91708	Medical and Applied Physiology	6cp
91239	Human Pathophysiology	6cp
CBK90582	Elective 4	6cp
Total		96cp

MAJ01106 Environmental Biology

This major focuses on the foundation components of the natural systems, how these systems work, and how detrimental impacts on them can be assessed and recovered.

Core study areas include population ecology of terrestrial, marine coastal and freshwater systems, interaction of plants, animals and micro-organisms in land and aquatic environments.

Students gain a thorough understanding of the way living organisms function in terrestrial and aquatic environments. They acquire skills to detect and assess detrimental effects on their function and the environment through a dynamic combination of theory, laboratory experience and field trips.

This major places strong emphasis on field trips to places such as the Snowy Mountains, the NSW outback, Heron Island and the Great Barrier Reef.

Professional recognition: Australian Institute for Biology, Australian Ecological Society, Australian Society for Plant Physiology, Australasian Society for Ecotoxicology, Australasian Marine Science Association.

Completion requirements

STM90739	Core disciplinary subjects (Environmental Biology)	36cp
91155	Stream and Lake Assessment	6cp
91116	Wildlife Ecology	6cp
91309	Biodiversity Conservation	6cp
Select one of the following:		6cp
91370	Semi-arid Ecology	6cp
91371	Forest and Mountain Ecology	6cp
91163	Alpine and Lowland Ecology	6cp
CBK90577	Sub-major/Electives (Environmental Science)	24cp
91363	Animal Behaviour and Physiology	6cp
91270	Plant Physiology and Ecophysiology	6cp
Total		96cp

MAJ01107 Marine Biology

This major focuses on how the marine environment works and how it can be better managed. Students gain a thorough understanding of the way plants, animals and micro-organisms function in marine ecosystems, including estuarine, shelf and open ocean ranging from tropical, temperate and polar environments.

Core study areas include coral reef ecosystems, environmental protection and management, fisheries resources, marine geoscience, plant physiology and ecophysiology, marine communities and animal behaviour and physiology.

Students learn these concepts and skills through a dynamic combination of theory, laboratory experiences and field trips.

Students also gain skills to detect and assess detrimental impacts on these marine environments resulting from anthropogenic sources and climate changes covered.

Professional recognition: Australasian Marine Science Association.

Completion requirements

STM90739	Core disciplinary subjects (Environmental Biology)	36cp
Select one of the following:		6cp
66513	Marine Geosciences	6cp
91118	Fisheries Resources	6cp
91126	Coral Reef Ecosystems	6cp
91156	Marine Productivity and Climate Change	6cp
91157	Marine Communities	6cp
CBK90577	Sub-major/Electives (Environmental Science)	24cp
91363	Animal Behaviour and Physiology	6cp
91270	Plant Physiology and Ecophysiology	6cp
Total		96cp

MAJ01108 Environmental Forensics

This major is the first of its kind in Australia. It combines the new study area of environmental forensics with law.

Students learn forensic methodology to identify environmental impacts of chemicals on ecosystems, policy and regulation processes, aquatic and terrestrial ecology, environmental management and protection, field and laboratory skills to assess environmental impacts and forensic skills to obtain scientific evidence that can withstand legal inquiry and proceedings.

Core study areas include law and science subjects. The flexibility of this major allows students to develop a science specialty.

Completion requirements

STM90739	Core disciplinary subjects (Environmental Biology)	36cp
79004	Environmental Law and Science	6cp
79023	Environmental Forensic Law	6cp
91309	Biodiversity Conservation	6cp
91155	Stream and Lake Assessment	6cp
CBK90577	Sub-major/Electives (Environmental Science)	24cp
91159	Environmental Forensics	6cp
65621	Environmental Chemistry	6cp
Total		96cp

MAJ01110 Mathematics

Students gain a good understanding of the mathematical foundations of quantitative methods and modelling technologies used in such areas as finance, logistics, health and market research. Students acquire analytic skills and develop the creative, logical approach to problem solving that enables them to apply their knowledge in real-world situations. The extensive choice of specialty mathematics subjects allows students to customise their degree according to their interests.

Students can also choose additional studies in other areas within science or from other faculties such as business, law or information technology.

Completion requirements

STM90686	Core subjects (Mathematics)	48cp
CBK90578	Sub-major/Electives (Mathematics)	24cp
Select 24 credit points from the following options:		24cp
35252	Mathematical Statistics	6cp
35356	Design and Analysis of Experiments	6cp
35383	High Performance Computing	6cp
35322	Advanced Analysis	6cp
35340	Quantitative Management Practice	6cp
35342	Nonlinear Methods in Quantitative Management	6cp
35344	Network and Combinatorial Optimisation	6cp
35361	Stochastic Processes	6cp
35391	Seminar (Mathematics)	6cp
35335	Mathematical Methods	6cp
35355	Quality Control	6cp
35393	Seminar (Statistics)	6cp
Total		96cp

MAJ01111 Statistics

Students gain a good understanding of mathematical statistics and its applications. The study of statistics prepares students to interpret data and to design data collection for maximum information at a given cost.

Students learn the theoretical underpinnings of the discipline as well as the practical skills that enable them to apply their knowledge in such diverse areas as market research, health or the environment.

Students can also choose additional studies in other areas within science or from other faculties such as business, law or information technology.

Completion requirements

STM90686	Core subjects (Mathematics)	48cp
CBK90578	Sub-major / Electives (Mathematics)	24cp
Select 24 credit points from the following options:		24cp
35252	Mathematical Statistics	6cp
35355	Quality Control	6cp
35356	Design and Analysis of Experiments	6cp
35361	Stochastic Processes	6cp
35393	Seminar (Statistics)	6cp
Total		96cp

MAJ01123 Forensic Science

This major contains subjects in both the physical forensic sciences and the biological forensic sciences. The ability to successfully undertake these subjects is influenced by a student's prior studies. Students should contact their program adviser to plan a program of study that is best suited to their background and interests.

Completion requirements

65034	Introduction to Forensic Science	6cp	
Select 42 credit points from the following options:			42cp
CBK90640	Elective	6cp	
65342	Crime Scene Investigation	6cp	
65544	Chemical Criminalistics	6cp	
65545	Forensic Toxicology	6cp	
35255	Forensic Statistics	6cp	
91137	DNA Profiling	6cp	
91138	Investigation of Human Remains	6cp	
65412	Physical Evidence	6cp	
65643	Chemistry and Pharmacology of Recreational Drugs	6cp	
65644	Fire and Explosion Investigation	6cp	
91402	Anatomical Pathology	6cp	
65863	Expert Evidence Presentation	6cp	
65743	Complex Forensic Cases (Chemistry)	6cp	
91139	Complex Forensic Cases (Biology)	6cp

91547	Environment Research Project	24cp
		Total 48cp

MAJ02041 Information Technology

This major provides the foundations of business systems analysis plus the opportunity to explore in more detail either the technical or management aspects of IT. Students completing this major are able to take an active part in the design or quite complex business information systems.

This major is accredited by the Australian Computer Society at the Associate level.

Completion requirements

31061	Database Principles	6cp
31266	Introduction to Information Systems	6cp
48023	Programming Fundamentals	6cp
31269	Business Requirements Modelling	6cp
31270	Networking Essentials	6cp
Select 18 credit points from the following options:		18cp
31268	Web Systems	6cp
31257	Information System Development Methodologies	6cp
31247	Collaborative Business Processes	6cp
31245	Business Process and IT Strategy	6cp
31258	Innovations for Global Relationship Management	6cp
31276	Networked Enterprise Architecture	6cp
31282	Systems Testing and Quality Management	6cp
48024	Applications Programming	6cp
31251	Data Structures and Algorithms	6cp
48440	Software Engineering Practice	6cp
31260	Interface Design	6cp
31284	Web Services Development	6cp
48433	Software Architecture	6cp
31253	Database Programming	6cp
31277	Routing and Internetworks	6cp
48730	Network Security	6cp
41900	Fundamentals of Security	6cp
		Total 48cp

MAJ02044 Information Technology

This major is designed for students who have an information technology background or a keen interest in information technology. The major helps professionals develop specialised IT skills, equips people considering entry to the IT industry from other fields, or challenges the IT professional. The major offers the participant either a platform entry for those with a non-IT background or a more specialised entry for those with an IT background. The innovative programs cover growth areas such as computer graphics and gaming, data mining, e-business technology, human-centred design, interactive multimedia, internetworking and strategic IT management. Participants have the opportunity to acquire knowledge, strategies and skills that cover the applications and management of technology.

Completion requirements

Select one of the following:		24cp
STM90695	Core subjects	24cp
CBK90802	Choice	24cp
CBK90816	Choice	24cp
		Total 48cp

MAJ02080 Business Information Systems Management

In the Business Information Systems Management major students learn how to use appropriate design approaches to design ICTs for all types of business activities, including customer-focused operations, maintaining relationships for knowledge sharing, business collaboration and strategic management. Students also learn about organisation theory, accounting and project management.

Ways to simplify the use of technology in complex business activities are not well understood. With this major, students are equipped to manage the integration of ICTs into business and society, and take leadership roles in their implementation.

Completion requirements

31257	Information System Development Methodologies	6cp
31247	Collaborative Business Processes	6cp
31245	Business Process and IT Strategy	6cp
31258	Innovations for Global Relationship Management	6cp
31276	Networked Enterprise Architecture	6cp
31280	Strategic IT Project	6cp
31255	Finance and IT	6cp
Select 6 credit points from the following options:		6cp
31282	Systems Testing and Quality Management	6cp
31097	IT Operations Management	6cp
48270	Entrepreneurship and Commercialisation	6cp
		Total 48cp

MAJ02081 Data Analytics

This major integrates the mathematical and information technology foundations for developing and applying business analytics systems and is concerned with technology services. Computer and data analytics is an emerging and rapidly expanding area where mathematics and statistical methods interact with powerful information technologies to improve the flow of massive amounts of data for a business. Students learn mathematical analytics methods, contemporary statistical data mining and computational methods.

Completion requirements

35101	Introduction to Linear Dynamical Systems	6cp
35151	Introduction to Statistics	6cp
31250	Introduction to Data Analytics	6cp
41004	Analytics Capstone Project	6cp
Select 24 credit points from the following options:		24cp
31253	Database Programming	6cp
31259	Intelligent Agents	6cp
31256	Image Processing and Pattern Recognition	6cp
31000	e-Business Trading	6cp
31005	Advanced Data Analytics	6cp
31050	Programming with Patterns	6cp
31075	Object-relational Databases	6cp
32146	Data Visualisation and Visual Analytics	6cp
31243	Analytics Capstone Project B	6cp
		Total 48cp

MAJ03001 Civil Engineering

48310	Introduction to Civil and Environmental Engineering	6cp
48321	Engineering Mechanics	6cp
60101	Chemistry and Materials Science	6cp
48331	Mechanics of Solids	6cp
48330	Soil Behaviour	6cp
48641	Fluid Mechanics	6cp
48340	Construction	6cp
48352	Construction Materials	6cp
48221	Engineering Computations	6cp
48320	Surveying	6cp
48362	Hydraulics and Hydrology	6cp
48360	Geotechnical Engineering	6cp
48016	Capstone Project Part A	6cp
48026	Capstone Project Part B	6cp
Select 36 credit points from the following options:		36cp
STM90496	Civil stream	36cp
STM90493	Structures stream	36cp
STM90494	Construction stream	36cp
		Total 120cp

MAJ03002 Civil and Environmental Engineering

48310	Introduction to Civil and Environmental Engineering	6cp
48321	Engineering Mechanics	6cp
65111	Chemistry 1	6cp
48331	Mechanics of Solids	6cp
48330	Soil Behaviour	6cp
48641	Fluid Mechanics	6cp
48352	Construction Materials	6cp
48221	Engineering Computations	6cp
48320	Surveying	6cp
48362	Hydraulics and Hydrology	6cp
48821	Ecological Engineering	6cp
48840	Water Supply and Wastewater Engineering	6cp
48860	Pollution Control and Waste Management	6cp
48016	Capstone Project Part A	6cp

48881	Water and Environmental Design	6cp
48026	Capstone Project Part B	6cp
41011	Environmental Chemical Processes	6cp
48349	Structural Analysis	6cp

MAJ03372 Water Engineering

One of today's most prominent challenges, both on a global and a local scale, is the scarcity of water. The dwindling supply of water is being caused by factors such as population growth, climate change, poor investment in infrastructure, and management problems. Water engineers are looking for solutions to this water crisis as well as working on other important issues such as protecting ecosystems, and improving rural and urban environments.

Water engineers and managers now require a much broader understanding of water issues. The purpose of the Water Engineering major is to provide engineers and scientists with expert up-to-date knowledge in the fields of water resources management, hydraulics, and hydrology in both urban and rural environments. The program is intended to enable students to update their expertise, to appreciate the environmental implications of water schemes, and to develop management skills.

There has been a major shortage of water engineers both in Australia and abroad over the last decade so employment opportunities are vast. There are jobs available in local councils, state and federal government, non-government organisations, small and large consultancies as well as large multinational firms.

This major is mostly suited to applicants who have an undergraduate degree in civil engineering, however applicants with a background in other fields of engineering and / or applied science may also apply.

Note: the listing of this major on your academic transcript requires completion of three engineering management subjects in addition to the technical subjects.

Completion requirements

CBK90331 Subject choice (Group A)	18cp
CBK90230 Elective	6cp
Select 24 credit points from the following options:	24cp
49107 Urban Stormwater Design	6cp
49126 Environmental Management of Land	6cp
49285 Emergency Management	6cp
49109 Engineered Natural Water Treatment Systems	6cp
49116 Contaminated Site and Waste Remediation	6cp
49255 Catchment Modelling	6cp
49117 Floodplain Risk Management in NSW	6cp
49122 Ecology and Sustainability	6cp
49256 Flood Estimation	6cp
49127 Decentralised Water and Wastewater Treatment	6cp
42991 Advanced Water and Wastewater Treatment	6cp
Total	48cp

MAJ03375 Local Government Engineering

The Local Government Engineering major has been designed, for the most part, for engineers, technical staff and managers who work for water boards, roads authorities, in local government or for consultancies providing services to local government.

Depending on options chosen, the course contents may include elements of NSW local government legislation, local road design, asset maintenance management and planning for the environment.

This major is only suitable for domestic students, as it contains content that is heavily focused on specific elements of NSW legislation and planning guidelines.

Note: the listing of this major on your academic transcript requires completion of three engineering management subjects in addition to the technical subjects. Students not wishing to complete any management subjects should consider the combined major in Local Government Engineering and Environmental Engineering.

Completion requirements

CBK90331 Subject choice (Group A)	18cp
CBK90230 Elective	6cp
Select 24 credit points from the following options:	24cp
49102 Traffic and Transportation	6cp
49258 Pavement Analysis and Design	6cp
49106 Road Engineering Practice	6cp
49107 Urban Stormwater Design	6cp
49108 Local Government Powers and Practice	6cp
49121 Environmental Assessment and Planning	6cp
49126 Environmental Management of Land	6cp
Total	48cp

MAJ03378 Structural Engineering

The Structural Engineering major offers a unique balance of analysis and design subjects focusing on large structures such as high rise buildings, large bridges, major industrial developments and tunnels.

It is most suitable for those with a civil engineering background who would like to work on large structures. Completing this major makes you employable by structural consulting firms and other large developers.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

CBK90331 Subject choice (Group A)	18cp
CBK90230 Elective	6cp
Select 24 credit points from the following options:	24cp
49047 Finite Element Analysis	6cp
49131 Bridge Design	6cp
49134 Structural Dynamics and Earthquake Engineering	6cp
49136 Application of Timber in Engineering Structures	6cp
49150 Prestressed Concrete Design	6cp
49002 Managing Projects	6cp
49115 Facade Engineering	6cp
49254 Advanced Soil Mechanics and Foundation Design	6cp
49135 Wind Engineering	6cp
49151 Concrete Technology and Practice	6cp
Total	48cp

MAJ03379 Software Engineering

In the modern world, software engineers play important roles in many facets of society, from the medical arena to the gaming world. Software engineering skills are very portable, so your qualifications can take you around the world. Currently there is a global shortage of software engineers with system design capabilities.

The Software Engineering major teaches you about software analysis and design, software architecture and web technologies. It is suitable for engineers with a background in ICT, however those from other fields of engineering can use this major as a stepping stone into ICT.

Note: the listing of this major on your academic transcript requires completion of three engineering management subjects in addition to the technical subjects.

Completion requirements

49002 Managing Projects	6cp
CBK90331 Subject choice (Group A)	18cp
Select 24 credit points from the following options:	24cp
49262 Web Technologies	6cp
32603 Systems Quality Management	6cp
32555 Fundamentals of Software Development	6cp
49227 Wireless Sensor Networks	6cp
Total	48cp

MAJ03380 Energy Planning and Policy

Most countries in the world, both developed and developing, view energy issues as a high priority. Concerns about global warming, sustainability issues, etc., reinforce the significance and immediacy of energy issues.

Effective planning and policy initiatives are required to identify energy systems that are technically, economically, environmentally and socially feasible and responsible in their approach to the energy needs of society.

The Energy Planning and Policy major contributes to the training and professional development of people working or preparing to work in energy utilities, energy companies, environmental organisations, government departments, consulting groups and other national and international organisations dealing in energy and environmental matters, both in developed and developing countries.

Completion requirements

49021 Evaluation of Infrastructure Investments	6cp
49024 Energy Modelling	6cp
49706 Regulatory Economics	6cp
49026 Electricity Sector Planning and Restructuring	6cp
Select 24 credit points from the following options:	24cp
49025 Methods for Energy Analysis	6cp
49027 Energy Demand Analysis and Forecasting	6cp
49028 Policy and Planning of Energy Conservation	6cp
49029 Environmental Policy for Energy Systems	6cp
49022 Energy Resources and Technology	6cp
49023 Energy and Environmental Economics	6cp
49701 Gas Sector Planning	6cp
49702 Gas Distribution Technology and Management	6cp
49703 Selected Topics (Energy Pricing)	6cp
Total	48cp

MAJ03382 Telecommunications Engineering

Telecommunications is an integral part of modern society. This major allows recent graduates and people already in the workforce to deepen and/or broaden skills and knowledge in various areas with telecommunication engineering. In particular, there is a strong emphasis on wireless forms of communication engineering, including satellite and cellular mobiles. Candidates must have completed previous undergraduate studies in telecommunications to gain entry to this major, as it requires a solid understanding of signal theory, signals and systems, modulation and coding, as well as propagation. For candidates who want to move into the telecommunications area and do not meet the above criteria, there is another major called telecommunication networks that may be suitable for your needs.

Note: the listing of this major on your academic transcript requires completion of three engineering management subjects in addition to the technical subjects.

Completion requirements

49205	Transmission Systems	6cp
49215	Telecommunications Industry Management	6cp
CBK90331	Subject choice (Group A)	18cp
CBK90230	Elective	6cp
Select 12 credit points from the following options:		12cp
49201	Integrated Services Networks	6cp
49048	Wireless Networking Technologies	6cp
49203	Telecommunications Signal Processing	6cp
49223	Satellite Communication Systems	6cp
49249	Telecommunications Engineering Review	6cp
49110	3G Mobile Communication Systems	6cp
42890	4G Mobile Technologies	6cp
		Total 48cp

MAJ03385 Telecommunication Networks

Telecommunications is an integral part of modern society. This major allows recent graduates and people already in the workforce to deepen and/or broaden skills and knowledge in various areas with telecommunication engineering. It also allows candidates who do not have a telecommunication background to move into this growing area. There is an emphasis on the network, transport and application layers and the ability to analyse, design and manage massive scale and non-homogeneous complex inter-networks which simultaneously service the diverse needs of multiple classes of traffic.

Note: the listing of this major on your academic transcript requires completion of three engineering management subjects in addition to the technical subjects.

Completion requirements

49202	Communication Protocols	6cp
49238	Telecommunication Networks Management	6cp
CBK90331	Subject choice (Group A)	18cp
CBK90230	Elective	6cp
Select 12 credit points from the following options:		12cp
49201	Integrated Services Networks	6cp
49215	Telecommunications Industry Management	6cp
49249	Telecommunications Engineering Review	6cp
49048	Wireless Networking Technologies	6cp
49262	Web Technologies	6cp
49203	Telecommunications Signal Processing	6cp
49110	3G Mobile Communication Systems	6cp
32001	Mobile Commerce Technologies	6cp
32118	Mobile Communications and Computing	6cp
42902	Interior Routing and High Availability	6cp
42903	Multi Protocol Label Switching	6cp
32555	Fundamentals of Software Development	6cp
32570	Enterprise Software Architecture and Middleware	6cp
		Total 48cp

MAJ03412 Civil and Environmental Engineering

48310	Introduction to Civil and Environmental Engineering	6cp
48320	Surveying	6cp
48321	Engineering Mechanics	6cp
48340	Construction	6cp
48331	Mechanics of Solids	6cp
48840	Water Supply and Wastewater Engineering	6cp
48641	Fluid Mechanics	6cp
48330	Soil Behaviour	6cp
48352	Construction Materials	6cp

48850	Environmental Planning and Law	6cp
48821	Ecological Engineering	6cp
65111	Chemistry 1	6cp
48221	Engineering Computations	6cp
48210	Interrogating Technology: Sustainability, Environment and Social Change	6cp
		Total 84cp

MAJ03413 Electrical Engineering

48510	Introduction to Electrical Engineering	6cp
48441	Introductory Digital Systems	6cp
48521	Fundamentals of Electrical Engineering	6cp
48520	Electronics and Circuits	6cp
48430	Embedded C	6cp
48531	Electromechanical Automation	6cp
48530	Circuit Analysis	6cp
68038	Advanced Mathematics and Physics	6cp
48540	Signals and Systems	6cp
48572	Power Circuit Theory	6cp
48451	Advanced Digital Systems	6cp
48570	Data Acquisition and Distribution	6cp
48571	Electrical Machines	6cp
48560	Introductory Control	6cp
		Total 84cp

MAJ03414 Aerospace Engineering

48610	Introduction to Mechanical and Mechatronic Engineering	6cp
48271	Aerospace Operations: Overview of the Aviation Industry	6cp
48620	Fundamentals of Mechanical Engineering	6cp
60101	Chemistry and Materials Science	6cp
48272	Airline Operations	6cp
48273	Managing Aerospace Processes	6cp
48641	Fluid Mechanics	6cp
48640	Machine Dynamics	6cp
48510	Introduction to Electrical Engineering	6cp
48651	Thermodynamics	6cp
48260	Engineering Project Management	6cp
48274	Aerospace Design Processes	6cp
48221	Engineering Computations	6cp
		Total 78cp

MAJ03415 Manufacturing Engineering and Management

The Manufacturing Engineering and Management major allows students to upgrade skills and knowledge gained from an undergraduate mechanical/manufacturing engineering degree to advanced areas of mechanical engineering as well as manufacturing engineering and management.

Students can choose from a diverse range of subjects covering a number of different aspects, including:

- operation of factories including material handling, air-conditioning, project management, air and noise pollution
- advanced design and analysis of manufacturing processes including CAD/CAM, optimal design and decision-making, flow modelling, vibration analysis, internal combustion engines, turbine machines, and
- quality and operations management systems, IT and innovation management in manufacturing.

This major is widely recognised and aims to educate technical specialists and managers of tomorrow in manufacturing technologies and management, and prepare them for the challenging demands of leadership roles in manufacturing and management in a global economy.

Note: the listing of this major on your academic transcript requires completion of three engineering management subjects in addition to the technical subjects.

Completion requirements

CBK90331	Subject choice (Group A)	18cp
CBK90230	Elective	6cp
Select 24 credit points from the following options:		24cp
49002	Managing Projects	6cp
49307	Internal Combustion Engines	6cp
49312	Advanced Flow Modelling	6cp
49316	Materials Handling	6cp
49321	Energy Conversion	6cp
49322	Airconditioning	6cp
49325	Computer-aided Mechanical Design	6cp
49328	Turbomachines	6cp

49049	Air and Noise Pollution	6cp
49928	Design Optimisation for Manufacturing	6cp
49330	Sensors and Signal Processing	6cp
49329	Control of Mechatronic Systems	6cp
		Total 48cp

MAJ03416 Environmental Engineering

Environmental Engineering at postgraduate level is offered at UTS either as a specialist course or as a major in the Master of Engineering. The content is designed to enable engineers, scientists and technical specialists to provide solutions and to develop management skills to deal with environmental problems. This includes, but is not limited to, environmental issues dealing with land, air and water.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

Select 24 credit points from the following options:		24cp
49121	Environmental Assessment and Planning	6cp
49122	Ecology and Sustainability	6cp
49123	Waste and Pollution Management	6cp
49125	Environmental Risk Assessment	6cp
49126	Environmental Management of Land	6cp
49127	Decentralised Water and Wastewater Treatment	6cp
49049	Air and Noise Pollution	6cp
49109	Engineered Natural Water Treatment Systems	6cp
49257	Geographic Information Systems	6cp
49116	Contaminated Site and Waste Remediation	6cp
49117	Floodplain Risk Management in NSW	6cp
42991	Advanced Water and Wastewater Treatment	6cp
		Total 24cp

MAJ03420 Computer Control Engineering

Computer control engineering involves the use of computers to control real-time applications in areas such as instrumentation automation for manufacturing, biomedical and power applications. Computer control engineers combine control, electronics, software and computer systems to design innovative solutions for industry.

The Computer Control Engineering major offers subjects which teach you about the brains behind machines, how to design systems for computer or biomedical applications, the design of artificial intelligence and more.

The knowledge you gain prepares you for work in many industries involving instrumentation and control, electronics, biomedical engineering and power systems. Background knowledge in electrical engineering and computer systems will prepare you for this course, however it is not a requisite.

Completion requirements

CBK90230	Elective	6cp
CBK90354	Major core subject choice	6cp
Select 12 credit points from the following options:		12cp
49048	Wireless Networking Technologies	6cp
49261	Biomedical Instrumentation	6cp
49262	Web Technologies	6cp
49274	Advanced Robotics	6cp
49275	Neural Networks and Fuzzy Logic	6cp
32603	Systems Quality Management	6cp
32555	Fundamentals of Software Development	6cp
49329	Control of Mechatronic Systems	6cp

In particular, there is a strong emphasis on wireless forms of communication engineering, including satellite and cellular mobiles. Candidates must have completed previous undergraduate studies in telecommunications to gain entry to this major, as it requires a solid understanding of signal theory, signals and systems, modulation and coding, as well as propagation. For candidates who want to move into the telecommunications area and do not meet the above criteria, there is another major called Telecommunication Networks that may be suitable for your needs.

Completion requirements

Select one of the following:	6cp
49215 Telecommunications Industry Management	6cp
49205 Transmission Systems	6cp
CBK90230 Elective	6cp
CBK90358 Major subject choice	12cp
	Total 24cp

MAJ03429 Water Engineering

One of today's most prominent challenges, both on a global and a local scale, is the scarcity of water. The dwindling supply of water is being caused by factors such as population growth, climate change, poor investment in infrastructure, and management problems. Water engineers are looking for solutions to this water crisis as well as working on other important issues such as protecting ecosystems, and improving rural and urban environments.

Water engineers and managers now require a much broader understanding of water issues. The purpose of this major is to provide engineers and scientists with expert, up-to-date knowledge in the fields of water resources management, hydraulics, and hydrology in both urban and rural environments. It is intended to enable students to update their expertise, to appreciate the environmental implications of water schemes, and to develop management skills.

There has been a major shortage of water engineers both in Australia and abroad over the last decade so employment opportunities are vast. There are jobs available in local councils, state and federal government, non-government organisations, small and large consultancies as well as large multinational firms.

This major is mostly suited to applicants who have an undergraduate degree in civil engineering, however applicants with a background in other fields of engineering and/or applied science may also apply.

This major may not be offered on a full-time basis every semester.

Completion requirements

CBK90230 Elective	6cp
Select 18 credit points from the following options:	18cp
49107 Urban Stormwater Design	6cp
49126 Environmental Management of Land	6cp
49285 Emergency Management	6cp
49109 Engineered Natural Water Treatment Systems	6cp
49116 Contaminated Site and Waste Remediation	6cp
49122 Ecology and Sustainability	6cp
49255 Catchment Modelling	6cp
49256 Flood Estimation	6cp
49117 Floodplain Risk Management in NSW	6cp
49127 Decentralised Water and Wastewater Treatment	6cp
42991 Advanced Water and Wastewater Treatment	6cp
	Total 24cp

MAJ03430 Computer Control Engineering

Computer control engineering involves the use of computers to control real-time applications in areas such as instrumentation automation for manufacturing, biomedical and power applications. Computer control engineers combine control, electronics, software and computer systems to design innovative solutions for industry.

The Computer Control Engineering major offers subjects which teach you about the brains behind machines, how to design systems for computer or biomedical applications, the design of artificial intelligence, and more.

The knowledge you gain prepares you for work in many industries involving instrumentation and control, electronics, biomedical engineering and power systems. Background knowledge in Electrical Engineering and Computer Systems will prepare you for this course, however it is not a requisite.

Note: the listing of this major on your academic transcript requires completion of three engineering management subjects in addition to the technical subjects.

Completion requirements

CBK90331 Subject choice (Group A)	18cp
CBK90230 Elective	6cp
CBK90478 Computer Control choice	12cp
CBK90531 Computer Systems choice	12cp
Total	48cp

MAJ03431 Telecommunications Engineering and Telecommunication Networks

This major allows students who have a solid background in telecommunications to deepen technical skills and knowledge. It is effectively a superset of the Telecommunication Engineering major and the Telecommunication Networks major, without the requirement to complete any broadening or engineering management subjects. This major is suitable for students who want to go on to highly technical careers in the telecommunication industry, or in research and development.

Completion requirements

49202 Communication Protocols	6cp
49238 Telecommunication Networks Management	6cp
49215 Telecommunications Industry Management	6cp
49205 Transmission Systems	6cp
Select 24 credit points from the following options:	24cp
49201 Integrated Services Networks	6cp
49203 Telecommunications Signal Processing	6cp
49048 Wireless Networking Technologies	6cp
49223 Satellite Communication Systems	6cp
49262 Web Technologies	6cp
49110 3G Mobile Communication Systems	6cp
42902 Interior Routing and High Availability	6cp
42903 Multi Protocol Label Switching	6cp
32555 Fundamentals of Software Development	6cp
32570 Enterprise Software Architecture and Middleware	6cp
42890 4G Mobile Technologies	6cp
Total	48cp

MAJ03432 Software Engineering

In the modern world, software engineers play important roles in many facets of society, from the medical arena to the gaming world. Software engineering skills are very portable, so your qualifications can take you around the world. Currently there is a global shortage of software engineers with system design capabilities.

The Software Engineering major teaches you about software analysis and design, software architecture and web technologies. It is suitable for engineers with a background in ICT, however those from other fields of engineering can use this major as a stepping stone into ICT.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

Select 24 credit points from the following options:	24cp
49262 Web Technologies	6cp
32603 Systems Quality Management	6cp
32555 Fundamentals of Software Development	6cp
49227 Wireless Sensor Networks	6cp
Total	24cp

MAJ03433 Structural Engineering

The Structural Engineering major offers a unique balance of analysis and design subjects focusing on large structures such as high rise buildings, large bridges, major industrial developments and tunnels.

It is most suitable for those with a civil engineering background who would like to work on large structures. Completing this major makes you employable by structural consulting firms and other large developers.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

Select 24 credit points from the following options:	24cp
49047 Finite Element Analysis	6cp
49131 Bridge Design	6cp
49134 Structural Dynamics and Earthquake Engineering	6cp
49136 Application of Timber in Engineering Structures	6cp
49150 Prestressed Concrete Design	6cp
49002 Managing Projects	6cp
49115 Facade Engineering	6cp
49254 Advanced Soil Mechanics and Foundation Design	6cp
49135 Wind Engineering	6cp
49151 Concrete Technology and Practice	6cp
Total	24cp

MAJ03434 Telecommunication Networks

Telecommunications is an integral part of modern society. This major allows recent graduates and people already in the workforce to deepen and/or broaden skills and knowledge in various areas with telecommunication engineering. It also allows candidates who do not have a telecommunication background to move into this growing area. There is an emphasis on the network, transport and application layers and the ability to analyse, design and manage massive scale and non-homogeneous complex inter-networks which simultaneously service the diverse needs of multiple classes of traffic.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

49202 Communication Protocols	6cp
49238 Telecommunication Networks Management	6cp
Select 12 credit points from the following options:	12cp
49201 Integrated Services Networks	6cp
49215 Telecommunications Industry Management	6cp
49249 Telecommunications Engineering Review	6cp
49048 Wireless Networking Technologies	6cp
49262 Web Technologies	6cp
49203 Telecommunications Signal Processing	6cp
49110 3G Mobile Communication Systems	6cp
32001 Mobile Commerce Technologies	6cp
32118 Mobile Communications and Computing	6cp
42902 Interior Routing and High Availability	6cp
42903 Multi Protocol Label Switching	6cp
32555 Fundamentals of Software Development	6cp
32570 Enterprise Software Architecture and Middleware	6cp
Total	24cp

MAJ03435 Telecommunications Engineering

Telecommunications is an integral part of modern society. This major allows recent graduates and people already in the workforce to deepen and/or broaden skills and knowledge in various areas with telecommunication engineering. In particular, there is a strong emphasis on wireless forms of communication engineering, including satellite and cellular mobiles. Candidates must have completed previous undergraduate studies in telecommunications to gain entry to this major, as it requires a solid understanding of signal theory, signals and systems, modulation and coding, as well as propagation. For candidates who want to move into the telecommunications area and do not meet the above criteria, there is another major called Telecommunication Networks that may be suitable for your needs.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

CBK90531	Computer Systems choice	12cp
		Total 24cp

MAJ03439 Energy Planning and Policy

Most countries in the world, both developed and developing, view energy issues as a high priority. Concerns about global warming, sustainability issues and the like reinforce the significance and immediacy of energy issues.

Effective planning and policy initiatives are required to identify energy systems that are technically, economically, environmentally and socially feasible and responsible in their approach to the energy needs of society.

The Energy Planning and Policy major contributes to the training and professional development of people working or preparing to work in energy utilities, energy companies, environmental organisations, government departments, consulting groups and other national and international organisations dealing in energy and environmental matters, both in developed and developing countries.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

49021	Evaluation of Infrastructure Investments	6cp
49024	Energy Modelling	6cp
49706	Regulatory Economics	6cp
49026	Electricity Sector Planning and Restructuring	6cp
		Total 24cp

MAJ03440 Local Government Engineering

The Local Government Engineering major has been designed, for the most part, for engineers, technical staff and managers who work for water boards, roads authorities, in Local Government or for consultancies providing services to Local Government.

Depending on options chosen, the contents may include elements of NSW Local Government legislation, local road design, asset maintenance management and planning for the environment.

This major is only suitable for domestic students, as it contains content that is heavily focused on specific elements of NSW legislation and planning guidelines.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

Completion requirements

Select 24 credit points from the following options:		24cp
49102	Traffic and Transportation	6cp
49105	Water Supply and Wastewater Management	6cp
49106	Road Engineering Practice	6cp
49107	Urban Stormwater Design	6cp
49108	Local Government Powers and Practice	6cp
49121	Environmental Assessment and Planning	6cp
49126	Environmental Management of Land	6cp
		Total 24cp

MAJ03442 Manufacturing Engineering and Management

The Manufacturing Engineering and Management major allows students to upgrade skills and knowledge gained from an undergraduate mechanical / manufacturing engineering degree to advanced areas of mechanical engineering as well as manufacturing engineering and management.

Students can choose from a diverse range of subjects covering a number of different aspects, including:

- operation of factories including material handling, air-conditioning, project management, air and noise pollution
- advanced design and analysis of manufacturing processes including CAD/CAM, optimal design and decision-making, flow modelling, vibration analysis, internal combustion engines, turbine machines, and
- quality and operations management systems, IT and innovation management in manufacturing.

This major is widely recognised and aims to educate technical specialists and managers of tomorrow in manufacturing technologies and management, and prepare them for the challenging demands of leadership roles in manufacturing and management in a global economy.

Completion requirements

Select 24 credit points from the following options:			24cp
49002	Managing Projects	6cp	
49307	Internal Combustion Engines	6cp	
49312	Advanced Flow Modelling	6cp	
49316	Materials Handling	6cp	
49321	Energy Conversion	6cp	
49322	Airconditioning	6cp	
49325	Computer-aided Mechanical Design	6cp	
49328	Turbomachines	6cp	
49049	Air and Noise Pollution	6cp	
49928	Design Optimisation for Manufacturing	6cp	
49330	Sensors and Signal Processing	6cp	
49329	Control of Mechatronic Systems	6cp	
Total 24cp			

MAJ03443 Local Government Engineering and Environmental Engineering

This combination major allows candidates to learn technical skills and knowledge from both the Local Government engineering and Environmental Engineering areas in the Master of Engineering Studies, without the requirement of needing to complete management subjects as is the case with the single majors.

Completion requirements

49108	Local Government Powers and Practice	6cp	
49121	Environmental Assessment and Planning	6cp	
49126	Environmental Management of Land	6cp	
49123	Waste and Pollution Management	6cp	
Select 24 credit points from the following options:			24cp
49049	Air and Noise Pollution	6cp	
49102	Traffic and Transportation	6cp	
49106	Road Engineering Practice	6cp	
49107	Urban Stormwater Design	6cp	
49122	Ecology and Sustainability	6cp	
49125	Environmental Risk Assessment	6cp	
49127	Decentralised Water and Wastewater Treatment	6cp	
49109	Engineered Natural Water Treatment Systems	6cp	
42991	Advanced Water and Wastewater Treatment	6cp	
Total 48cp			

MAJ03444 Enterprise Systems Development

This major introduces the practice of creating software applications and is concerned with technology building. Students learn how to build software by applying technologies and practice from computer science, project management and other fields to produce business solutions with known characteristics.

Students also learn how to direct their programming skills to develop programs and systems that deliver the functionality and meet the quality requirements needed to deliver business solutions.

Completion requirements

48024	Applications Programming	6cp	
31251	Data Structures and Algorithms	6cp	
48440	Software Engineering Practice	6cp	
31260	Interface Design	6cp	
31281	Systems Development Project	12cp	
Select 12 credit points from the following options:			12cp
31284	Web Services Development	6cp	
31253	Database Programming	6cp	
48433	Software Architecture	6cp	
31100	Enterprise Development with .NET	6cp	
31335	Extreme Programming	6cp	
31777	Human-Computer Interaction	6cp	
31927	Application Development with .NET	6cp	
31075	Object-relational Databases	6cp	
41001	Cloud Computing and Software as a Service	6cp	
31242	Advanced Internet Programming	6cp	
41005	Cloud-based Enterprise Application Development	6cp	
41889	Application Development in the iOS Environment	6cp	
31285	Mobile Applications Development	6cp	
Total 48cp			

MAJ03445 Internetworking and Applications

This major provides the necessary knowledge and skills in network design and application development and is concerned with technology services.

Students learn the hows and whys of Internet design - its architecture, protocols and components as well as the enabling software tools and programming methods to achieve a well-designed, secure network.

Businesses and users now require services on demand, network information security, user/service mobility and quality of service. This major addresses these issues along with network and protocol design principles through two major thrusts, designing future networks and developing practical applications and services.

Completion requirements

31261	Internetworking Project	6cp	
31277	Routing and Internetworks	6cp	
31275	Mobile Networking	6cp	
31284	Web Services Development	6cp	
31246	Network Design	6cp	
41900	Fundamentals of Security	6cp	
Select 12 credit points from the following options:			12cp
31242	Advanced Internet Programming	6cp	
31283	WANs and Virtual LANs	6cp	
31285	Mobile Applications Development	6cp	
31254	e-Commerce	6cp	
31274	Network Management	6cp	
31748	Programming on the Internet	6cp	
31338	Network Servers	6cp	
48024	Applications Programming	6cp	
31091	Mobile Computing Project	6cp	
41890	Applying Network Security	6cp	
41891	Cloud Computing Infrastructure	6cp	
48436	Digital Forensics	6cp	
48730	Network Security	6cp	
41889	Application Development in the iOS Environment	6cp	
Total 48cp

MAJ03451 Integrated Logistic Support and Engineering Management

Logistics engineering involves ensuring that the systems created to meet various needs can be effectively and adequately supported during their lifetime. Without such support, systems do not remain fit for purpose for the required lengths of time.

This major prepares students to manage acquisition and management of complex systems with a view to ensuring that such systems can be supported in an effective manner. The subjects studied for this major prepare students to not only identify the key drivers and requirements for system support, but also to ensure that these considerations are treated with due importance throughout the system's life cycle. The major focuses on both the technical and managerial aspects that typically confront people working in such fields. The program emphasises a systems approach to logistics engineering and enable the student to appreciate the importance of a life-cycle view to system acquisition and management. The individual components of the program familiarise students with the skills relevant to logistics engineering and management.

The knowledge gained prepares students to work in many industries, such as aircraft, defence industries, and other industries, creating systems which require well thought out support systems successful operations and sustainment.

Completion requirements

49001 Judgment and Decision Making	6cp
49309 Quality Planning and Analysis	6cp
49655 Integrated Logistic Support	6cp
49678 Reliability Availability and Maintainability	6cp
	Total 24cp

MAJ03452 Integrated Logistic Support and Engineering Management

Logistics engineering involves ensuring that the systems created to meet various needs can be effectively and adequately supported during their lifetime. Without such support, systems do not remain fit for purpose for the required lengths of time.

This major prepares students to manage acquisition and management of complex systems with a view to ensuring that such systems can be supported in an effective manner. The subjects studied for this major prepare students to not only identify the key drivers and requirements for system support, but also to ensure that these considerations are treated with due importance throughout the system's life cycle. The major focuses on both the technical and managerial aspects that typically confront people working in such fields. The program emphasises a systems approach to logistics engineering and enable the student to appreciate the importance of a life-cycle view to system acquisition and management. The individual components of the program familiarise students with the skills relevant to logistics engineering and management.

	Total 48cp

MAJ03453 Civil Engineering

The Civil Engineering major allows students to further broaden and/or deepen their previous studies in civil engineering while also addresses some aspects of professional practice. This is a broad major that covers water engineering, some structural engineering, local government engineering and also environmental engineering. Specialist majors are also available in these areas.

Completion requirements

CBK90230	Elective	6cp
Select 18 credit points from the following options:		18cp
49002	Managing Projects	6cp
49102	Traffic and Transportation	6cp

MAJ03454 Civil Engineering

The Civil Engineering major allows students to further broaden and/or deepen their previous studies in civil engineering while also addresses some aspects of professional practice. This is a broad major that covers water engineering, some structural engineering, local government engineering and also environmental engineering. Specialist majors are also available in these areas.

Completion requirements

CBK90331	Subject choice (Group A)	18cp
CBK90230	Elective	6cp
Select 24 credit points from the following options:		24cp
49002	Managing Projects	6cp
49102	Traffic and Transportation	6cp
49105	Water Supply and Wastewater Management	6cp
49106	Road Engineering Practice	6cp
49107	Urban Stormwater Design	6cp
49109	Engineered Natural Water Treatment Systems	6cp
49115	Facade Engineering	6cp
49121	Environmental Assessment and Planning	6cp
49126	Environmental Management of Land	6cp
49131	Bridge Design	6cp
49136	Application of Timber in Engineering Structures	6cp
49150	Prestressed Concrete Design	6cp
49143	Civil Engineering Review 1	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp
49258	Pavement Analysis and Design	6cp
49119	Problematic Soils and Ground Improvement Techniques	6cp
49118	Applied Geotechnics	6cp
49151	Concrete Technology and Practice	6cp
49144	Civil Engineering Review 2	6cp
49135	Wind Engineering	6cp
49257	Geographic Information Systems	6cp
49108	Local Government Powers and Practice	6cp
49134	Structural Dynamics and Earthquake Engineering	6cp
49256	Flood Estimation	6cp
49255	Catchment Modelling	6cp
49116	Contaminated Site and Waste Remediation	6cp
42991	Advanced Water and Wastewater Treatment	6cp
		Total 48cp

MAJ03455 Civil Engineering

The Civil Engineering major allows students to further broaden and/or deepen their previous studies in civil engineering while also addresses some aspects of professional practice. This is a broad major that covers water engineering, some structural engineering, local government engineering and also environmental engineering. Specialist majors are also available in these areas.

Completion requirements

Select 24 credit points from the following options:		24cp
49002	Managing Projects	6cp
49102	Traffic and Transportation	6cp
49105	Water Supply and Wastewater Management	6cp
49106	Road Engineering Practice	6cp
49107	Urban Stormwater Design	6cp

		Total 24cp

MAJ03456 Civil Engineering and Structural Engineering

The Civil Engineering and Structural Engineering major allows students to focus on technical content in structural engineering as well as some aspects of civil engineering. Students can elect to tailor the balance of structural engineering subjects versus general civil engineering subjects.

Completion requirements

CBK90609	Civil and Structural Engineering	24cp
Select 24 credit points from the following options:		24cp
49047	Finite Element Analysis	6cp
49131	Bridge Design	6cp
49134	Structural Dynamics and Earthquake Engineering	6cp
49136	Application of Timber in Engineering Structures	6cp
49150	Prestressed Concrete Design	6cp
49115	Facade Engineering	6cp
49254	Advanced Soil Mechanics and Foundation Design	6cp
49151	Concrete Technology and Practice	6cp
49135	Wind Engineering	6cp
		Total 48cp

MAJ03457 Value Chain Management

This major is only available to approved employees of the Defence Materiel Organisation (DMO) who have been sponsored for admission into this program.

Completion requirements

49001	Judgment and Decision Making	6cp
49002	Managing Projects	6cp
49309	Quality Planning and Analysis	6cp
49680	Value Chain Engineering Systems	6cp
		Total 24cp

MAJ03458 Geotechnical Engineering

Geotechnical engineering is a professional engineering discipline dealing with the design, construction and maintenance of the earth infrastructures, such as foundations of buildings, towers, bridges, dams, road and rail embankments, tunnels, retaining walls and natural slopes. Currently there is a global need for geotechnical engineers for design and construction of challenging large infrastructure projects. The Geotechnical Engineering major trains students in a variety of skills such as planning and undertaking geotechnical site investigations and laboratory testing, designing major structures in ground, and designing appropriate ground improvement techniques for problematic soils and contaminated sites. The knowledge and skills that students gain prepare them to work in many industries and organisations including local councils, state and federal government, non-government organisations, geotechnical consultancies, construction companies and large multinational firms.

This major is mostly suited to applicants who have an undergraduate degree in civil engineering. However, applicants with a background in other fields of engineering or applied science may also apply.

Completion requirements

CBK90675 Geotechnical Engineering choice	18cp
CBK90230 Elective	6cp
Total	24cp

MAJ03459 Civil and Geotechnical Engineering

Geotechnical engineering is a professional engineering discipline dealing with the design, construction and maintenance of the earth infrastructures, such as foundations of buildings, towers, bridges, dams, road and rail embankments, tunnels, retaining walls and natural slopes. Currently there is a global need for geotechnical engineers for design and construction of challenging large infrastructure projects. The Geotechnical Engineering major trains students in a variety of skills such as planning and undertaking geotechnical site investigations and laboratory testing, designing major structures in ground, and designing appropriate ground improvement techniques for problematic soils and contaminated sites. The knowledge and skills that students gain prepare them to work in many industries and organisations including local councils, state and federal government, non-government organisations, geotechnical consultancies, construction companies and large multinational firms.

This major is mostly suited to applicants who have an undergraduate degree in civil engineering. However, applicants with a background in other fields of engineering or applied science may also apply.

Completion requirements

MAJ03465 Biomedical Engineering

This major applies engineering principles and design concepts to medicine and biology. It offers subjects which teach the design and problem-solving skills for problems from both engineering and biology perspectives. It also teaches how to design devices and systems for biomedical or health applications. The knowledge gained prepares students for work in industry, hospitals, research facilities, teaching and government regulatory agencies. Background knowledge in electrical engineering, mechanical engineering, computer systems and biomedical science prepares students for this major, however it is not a requisite.

Completion requirements

CBK90851	Biomedical Engineering	12cp
CBK90854	Biomedical Engineering	12cp
		Total 24cp

MAJ03466 Biomedical Engineering

This major applies engineering principles and design concepts to medicine and biology. It offers subjects which teach the design and problem-solving skills for problems from both engineering and biology perspectives. It also teaches how to design devices and systems for biomedical or health applications. The knowledge gained prepares students for work in industry, hospitals, research facilities, teaching and government regulatory agencies. Background knowledge in electrical engineering, mechanical engineering, computer systems and biomedical science prepares students for this major, however it is not a requisite.

CBK90852	Biomedical Engineering	18cp
CBK90853	Engineering Management	18cp
		Total 48cp

MAJ03467 Systems Engineering

This major prepares students to manage acquisition, development and management of complex systems with a view to ensuring that such systems are 'fit for purpose' and can be supported in an effective manner. The subjects studied prepare students not only to identify the key drivers and requirements for engineered systems, but also to ensure that these considerations, including the increasingly important economic considerations, are treated with due importance throughout a system's life cycle. The major focuses on both the technical and managerial aspects that typically confront people working in such fields.

Completion requirements

49004	Systems Engineering for Managers	6cp
32569	Enterprise Business Requirements	6cp
49655	Integrated Logistic Support	6cp
49002	Managing Projects	6cp
49001	Judgment and Decision Making	6cp
49003	Economic Evaluation	6cp
Select 12 credit points from the following options:		12cp

49002	Managing Projects	6cp
49001	Judgment and Decision Making	6cp
49003	Economic Evaluation	6cp
		Total 24cp

MAJ03470 Biomedical Engineering

Option (elective) choice differs depending on the stream students are enrolled in. The following electives are recommended by the faculty:

- **Physical Science stream:** choose four subjects from the following: 91403, 68075, 67509 (Autumn semester); 91705, 91140, 27174 (Spring semester)
- **Biomedical Sciences stream:** choose five subjects from the following: 91703, 91403, 68075, 67509 (Autumn semester); 27174, 91705, 91708, 91140 (Spring semester).

Completion requirements

49261	Biomedical Instrumentation	6cp
CBK90867	Biomedical Engineering stream choice	12cp
Select 30 credit points from the following options:		30cp
91239	Human Pathophysiology	6cp
91703	Physiological Systems	6cp
91708	Medical and Applied Physiology	6cp
27174	Analysis of Human Motion	6cp
91403	Medical Imaging	6cp
68075	Nanomaterials	6cp
67509	Molecular Nanotechnology	6cp
91705	Medical Devices and Diagnostics	6cp
91140	BioNanotechnology	6cp
49275	Neural Networks and Fuzzy Logic	6cp
48023	Programming Fundamentals	6cp
91171	Biomedical Engineering Project A	12cp
91172	Biomedical Engineering Project B	12cp

MAJ07067 Adult Education

The Adult Education major introduces students to an in-depth study of adult learning practice and traditions, approaches to program planning, adult development psychology, and education policy contexts.

In addition to the core areas of the program, students complete two electives chosen from the variety of subjects on offer across the MEd including educational policy, e-learning, educational psychology, popular education, research design and social change, and many others, to form a program of study to suit their professional development needs.

Students bring with them experiences gained from working in diverse settings ranging from public sector organisations, private enterprise, non-government and charity organisations, educational institutions and the broad health field and more. This breadth of practice and experience adds a richness to the program.

Upon completion, graduates are well positioned to be at the cutting edge of learning and change in educational, vocational, community and organisational settings.

MAJ07077 Popular Education and Social Change

This major provides a foundation in core areas concerned with adult learning as well as specific subjects related to popular education approaches in community action and social change. A set of subjects on popular education and social movements; narrative and storymaking in education and change; and new media and social change offer a unique opportunity to focus on contemporary approaches to popular education and social change.

The major is aimed at people who aspire to, or are currently working in organisations that focus on social change. These range from trade unions, to community and social movement organisations, charities and advocacy bodies, and more. It is ideally suited for people who are working with others in campaigning, organising, advocacy and activism. Major participants are most likely working as educators, organisers, campaigners, researchers, or advocates and are interested in developing strategies to assist their members, constituents and potential allies learn. Utilising a popular education approach the major draws from and build upon the experiences and expertise of the participants.

In addition to the core subjects, students complete two electives chosen from the variety of subjects on offer across the MEd program including e-learning, critical pedagogy and film, educational policy, research design, and many others, to form a program of study that suits their personal and professional development needs.

Upon completion graduates are well positioned to use their skills and knowledge to be more effective and reflective educational practitioners and leaders.

MAJ08020 Human Resource Management

This major provides students with the skills, knowledge, and abilities to effectively contribute to an organisation's human resource management (HRM) functions, either as a practitioner or as part of a broader management role. It introduces students to the frameworks governing and influencing HRM and aims to develop an understanding and competency in the practice of HRM as applied in Australian and international contexts. Students' critical analysis skills, understanding of the role of communication and information technology and appreciation of ethical issues in HRM are developed through the study of HRM structures, systems and processes as well as strategic approaches to the field of HRM.

Total 48cp		

MAJ08445 Sport Management

This major provides a comprehensive understanding of management and marketing theories and practices in the increasingly dynamic and specialist contexts in which sport is played, organised and managed. Graduates possess knowledge and skills in the management of sport experiences and resources, marketing and promotion of events, and current issues affecting sport globally.

Students are advised to enrol in the Professional Internship (Capstone) subject in the Autumn semester of their final year.

Completion requirements

27252	The Sport Industry	6cp
27161	Sport Marketing	6cp
27307	Sport Management	6cp
27253	Sport in the Global Marketplace	6cp
27350	Professional Internship (Capstone)	6cp
27100	Current Issues in Sport Business	6cp

27103	Olympic Games and Mega Events	6cp
27703	Event Management	6cp
27628	Law for Leisure, Sport and Tourism	6cp
27160	Sport and Exercise Psychology	6cp
27324	Strategic Management in Leisure, Sport and Tourism Organisations	6cp
27216	Venue Management	6cp
		Total 48cp

MAJ08446 Human Resource Management

The Human Resource Management (HRM) major is designed to build on the foundations established in the core units of the Bachelor of Business and as such continues to emphasise the four contemporary themes that integrate the degree. It enables students to acquire a knowledge of the theoretical bases of HRM and employment relations, as well as developing understandings and competencies associated with the practice of management. The major also provides students with a foundation knowledge of HRM frameworks, both in Australia and internationally, as well as an understanding of the broader context in which organisations operate.

Anti-requisite: MAJ08046 Extended Management, MAJ08438 Management, SMJ08128 Human Resource Management, SMJ08130 Management.

Completion requirements

21555	Human Resource Management	6cp
21036	Managing Strategic Performance	6cp
21407	Strategic Human Resource Management	6cp
21037	Managing Employee Relations	6cp
21440	Management Skills	6cp
21510	The Global Context of Management	6cp
21512	Understanding Organisations: Theory and Practice	6cp
21505	Human Resource Management (Capstone)	6cp
		Total 48cp

MAJ08476 Management

The Management major aims to develop integrated knowledge and skills for effective leadership and management within a global, decentralised competitive business environment with its increasing emphasis on technology, quality, diversity and sustainability.

Participants acquire knowledge and apply skills in diverse managerial areas such as strategic decision-making, coaching and mentoring others, managing complex change within organisations, intervening within organisations to ensure better health and effectiveness, managing the value chain for greater effectiveness and efficiency and managing for sustainability. Choice of subjects within the major allows students to tailor their requirements for specific application within various sectors, for example, international management, public sector management and third sector management.

Completion requirements

21012	Governance and Sustainability	6cp
21717	International Management	6cp
21720	Human Resource Management	6cp
21722	Leadership, Coaching and Mentoring	6cp

21854	Innovation and Entrepreneurship	6cp
		Total 48cp

MAJ08480 Marketing

The Marketing major develops an understanding so that managers can drive organisational growth through a profitable implementation of marketing thinking and strategies. It develops practical marketing competencies and essential skills to implement marketing oriented strategies that allow companies to improve their performance.

Completion requirements

24710	Buyer Behaviour	6cp
24713	Marketing Channel Management	6cp
24720	Marketing Research	6cp
24736	Marketing Communications	6cp
24742	New Product Management	6cp
24760	Pricing and Revenue Management	6cp
24790	Business Project: Marketing	6cp
24730	Marketing Strategy	6cp
		Total 48cp

MAJ08483 Professional Accounting

The Professional Accounting major offers graduates in disciplines other than accounting and non-university qualified accountants, such as TAFE Diplomates with extensive accounting experience, the opportunity to meet the academic qualifications necessary for professional membership of CPA Australia and the Institute of Chartered Accountants in Australia.

Industry demand for work readiness expertise in the accounting profession has never been higher. As well as expecting superior professionals, employers now require accountants to be good team players with excellent interpersonal skills, and a mature understanding of the business environment in which they operate.

Students are provided the opportunity to acquire knowledge necessary for the development of information products to assess an organisation's performance using leading-edge accounting methods and practices. This includes measuring environmental risk, examining the adequacy of governance and control mechanisms, addressing the effectiveness of quality management processes, assessing control over treasury operations, and benchmarking corporate strategy development.

Completion requirements

22705	Management Planning and Control	6cp
22730	Auditing and Assurance Services	6cp
22743	Business Valuation and Financial Analysis	6cp

MAJ08860 Engineering Management

In a world where innovation is a key to success, leaders are called to the fore to manage people and projects. The Engineering Management major is designed for students who have a technical background or a keen interest in technology and therefore a strong alignment with analytical approaches. From this platform the objectives are underpinned by the desire to expose students to a broader body of knowledge and range of approaches than experienced in a purely technical framework.

A key issue is the benefit that accrues from supplementing analytical and mathematical modelling approaches with business and social science skills. Much of the value and strength of the Engineering Management major relate to consideration of approaches and perceptions that are extensions of, or build upon, an engineering/scientific view point. The differences between technocratic approaches and human and societal constructs are brought into sharp focus broadening the perspectives of students.

The major is specifically designed to enhance understanding of the need for technology, people and society to be viewed as closely interrelated aspects of all engineering and business activity.

Awarding of this major on an academic transcript also requires the completion of a graduate project in this broad discipline area.

MAJ08918 Chile

Chile runs for some 5000km down the west coast mountain spine of Latin America, with the country never wider than 180km. The landscape is extremely varied, with hot deserts in the north, a fertile 'Mediterranean' heartland, and forests, lakes and fjords in the south. Because of its relatively stable pace of export-led growth, Chile is often called Latin America's 'tiger' economy, though much of the population still lives in poverty. Australia is developing strong links with Chile, and Chile is also strengthening ties with Asia through its membership of the Asia-Pacific Economic Cooperation. Despite extreme political experiments during the 1970s, Chile has now recovered its earlier reputation as one of Latin America's most solid and moderate democracies. The country's traditional *mestizo*, creole and indigenous cultures survive alongside the rapid spread of more cosmopolitan influences.

Students spend two consecutive semesters studying social science or language, culture and humanities subjects at one or more institutions of higher education in Chile through arrangements made by UTS: International Studies. The focus of study varies each semester depending on individual student preferences and the availability of subjects at host institutions. Students are assessed on each semester separately and assessment is based on the subjects undertaken at the host institutions, as well as assessments administered by UTS: International Studies.

Students may expect that no greater costs are incurred through undertaking a period of in-country study in Chile than are involved in living away from home in Sydney.

Locations

Santiago

Santiago is the capital of Chile, situated in what is sometimes called the 'Mediterranean heartland' of Chile. It was founded in 1541 on the Mapocho River, and currently has a population of about five million. Santiago is regarded as one of the more pleasant capital cities in Latin America. It has great charm, with old and beautiful buildings, quiet neighbourhoods, parks, markets, galleries and bookshops, and many cultural events of all types. It is also a busy modern city with shopping centres, skyscrapers and an efficient underground railway. On days when the air is clear the snow-capped Andes mountains are in full view. Less than two hours drive away are ski slopes to the east and beaches to the west.

Pontificia Universidad Católica (PUC) de Chile is a private university which ranks as one of the top two universities in Chile. It has a student population of nearly 20,000 and boasts a number of well-known research institutes in fields such as the arts, economics, science and medicine. The university was founded in 1888. As well as a full range of academic faculties with excellent facilities, the university also has a large and well-organised program catering for foreign students. The main faculties are in central Santiago.

www.puc.cl

Valparaíso

Viña del Mar is best known as one of Latin America's oldest beach resorts, and for its annual music festival which attracts artists from all over Latin America. Popular with weekenders from Santiago, Viña is a small well-heeled city with some grand old buildings and parks. Its long sea-front promenade is lined with tall apartment blocks. Twenty minutes south on the coastal road is the historic commercial city of Valparaíso, Chile's principal port and naval base (population 280,000). Though poorer and less smart than Viña, Valparaíso is in many ways more interesting historically and culturally. The city is crescent shaped, following the curve of the bay, and rises up steeply into chaotic old neighbourhoods perched on hillsides and accessed by antique funiculars.

Universidad Adolfo Ibáñez is a modern and prestigious private university. It began life in 1953 as a business school, acquiring an international reputation for advanced business and management studies in collaboration with universities such as Harvard and Stanford. Its MBA program is considered one of the best in Latin America. In 1989 it became a university with faculties of Humanities, and Science and Technology; schools of Psychology, Government and Journalism; Business School and Law School; and an Institute for Political Economy. Foreign students are based in the original campus located in the comfortable Recreo neighbourhood overlooking Viña del Mar and Valparaíso.

MAJ08919 China

China is one of the world's oldest and most influential civilisations. Since the 1980s, when the Chinese Government embraced a program of economic development and greater international openness, it has also had one of the world's fastest growing economies. As host for the 2008 Olympics, China focused the world's attention on its remarkable rise as a major economic and political power of the 21st century. These characteristics, and its expanding influence in the Asia-Pacific region, make the study of China and Chinese culture important for Australia.

After completing a set program of study at UTS and through arrangements made by UTS: International Studies, students spend two consecutive semesters studying at one of the following universities:

- Shanghai University, Shanghai
- Shanxi University, Taiyuan
- Tianjin Normal University, Tianjin
- Yunnan Normal University, Kunming
- Zhejiang University, Hangzhou.

In both semesters the focus is on the study of language and culture. Students are assessed separately on each semester and assessment is based on the subjects undertaken at the host institutions, as well as assessments administered by UTS: International Studies.

Students may expect that no greater costs are incurred through undertaking a period of In-country Study in China than are involved in living away from home in Sydney.

In exceptional circumstances, students with advanced skills in Chinese are excluded from the Chinese Language and Culture program and are required to substitute other appropriate subjects from the list of approved alternative subjects. These subjects may be other subjects on offer in the international studies program, including those relating to the study of contemporary society, or those focusing on another language and culture. Students need to obtain the approval of the head of UTS: International Studies before they can vary any of their subjects of study in the program.

Locations

Hangzhou

Hangzhou is the capital of Zhejiang Province on China's eastern seaboard, 180km south-west of Shanghai. As a former national capital, famous for its rich culture and the beautiful West Lake, Hangzhou's mild climate makes it one of China's most pleasant cities to live in. It is the home of the Chinese silk industry (there is a vast silk market in the centre of town) and a major tea centre, producing the famous Dragon Well Tea.

Hangzhou's Zhejiang University, founded in 1897, is one of the oldest and largest universities in China, and particularly well known for its studies of engineering, ophthalmics and economics. It has more than 33,000 full-time students and over 10,000 staff members, with 20 faculties (schools) and 97 majors for undergraduate students, 194 master's degree programs and 106 doctoral programs. The university has a purpose-built overseas student dormitory on campus and has proven to be one of the most popular in-country study destinations for students in UTS: International Studies' China program.

Kunming

Kunming is the capital city of Yunnan Province in south-western China, bordering Burma, Laos and Vietnam. Known in China as 'spring city' for its year-round pleasant weather, Kunming's location offers access to Yunnan's scenic beauty and diverse ethnic minority cultures.

Founded in 1946, Yunnan Normal University developed during World War II from the Teachers' College of the Southwest Associated University, established through a merger of Beijing University, Qinghua University and Nankai University - the three best universities in China at that time. Yunnan Normal University is known for its strength in the areas of education and studies on the cultures of minority nationalities in south-western China. With the UNESCO-sponsored Southwest China In-service English Training Centre on its campus, it has established strong international links and has more than 5000 full-time students and 6000 adult students, with 14 faculties/departments. The university has a purpose-built overseas student dormitory on campus.

Shanghai

Shanghai, situated on the Yangtze River Delta in east China, is the largest city of the People's Republic of China and the eighth largest in the world. It is one of China's most important cultural, commercial, financial, industrial and communication centres. Shanghai is also one of the world's busiest ports. Considered by many as China's most cosmopolitan and sophisticated city, its skyscrapers and modern lifestyle highlight China's recent economic development.

Shanghai University is a public, comprehensive university. One of China's leading research universities, it ranks among the top 50 in most national rankings. In-country study students study Mandarin at the Yanchang campus.

Taiyuan

Shanxi Province in northern China is the cradle of Chinese culture. Approximately 75 per cent of the surface architecture from ancient China is found in the province. These sites have become important research and tourist attractions for those seeking to understand Chinese culture and history. Surrounded by mountains on three sides and situated on a tributary of the Yellow River, Taiyuan is one of China's most important industrial bases, and also famous for its noodles and vinegar.

Shanxi University, located in the provincial capital, Taiyuan, was founded in 1902 and is one of the three earliest established national universities in China. It offers a wide range of degree, diploma and

certificate courses in the fields of liberal arts, sciences, engineering, management, arts and physical education. The university has established intercollegiate relationships with 38 colleges and universities and research institutions around the world.

Tianjin

Lying 120km south-east of Beijing, Tianjin is one of the four municipalities in China directly under the administration of the central government. It is the largest open seaport and one of the most important industrial, commercial and cultural centres in north China. It was once a treaty port with large areas claimed by Western powers as concessions, and many European-style structures have survived intact. Since the 1980s, Tianjin has been in the forefront of China's opening to the outside world and currently more than 8000 foreign-funded firms operate in the city.

Founded in 1958, Tianjin Normal University is the key comprehensive teachers' training institution in Tianjin. It is well known for studies in the areas of development psychology, as well as languages and culture. It has more than 5000 full-time students and 2000 adult students, with 14 faculties/departments. The university has a purpose-built overseas student dormitory on campus.

Semester dates for Chinese universities are Spring (late February to late June) and Autumn (early September to mid January).

MAJ08920 France

France is known for its key role in the history and development of European culture and its rich traditions from literature and the arts through to cuisine, sport and style. Modern France, while preserving a strong link to the land, is at the forefront of many technological advances. A leading international player, its recent Republican history has enabled it to remain fiercely independent and at the same time central to the European Union. Geographically diverse, it is said France offers all the landscapes of Europe in microcosm. From the Mediterranean to the English Channel, each region has a strong identity, often retaining ties with older cultures and its many neighbours.

Students spend two consecutive semesters studying at one of the following universities or institutes:

- Université Michel de Montaigne Bordeaux 3, Bordeaux
- Université de Caen Basse-Normandie, Caen
- Télécom and Management SudParis, Évry
- Université Lumière Lyon 2, Lyon
- Université de Poitiers, Poitiers
- Université de Reims Champagne-Ardenne, Reims
- Université Rennes 2 - Haute Bretagne, Rennes
- Université de Strasbourg, Strasbourg
- Université de Toulon et du Var, Toulon.
- Université de la Nouvelle Calédonie, Nouméa.

The location and content of each student's period of in-country study in France is determined by the level of their language competence in French. Generally speaking, students who have a sound working knowledge of French before their entrance to UTS (usually defined as HSC 3-unit or a good pass in 2-unit French) can study at any of the abovementioned universities. Such students study an appropriate two-semester program of host university subjects broadly relating to French and Francophone language, society and culture.

All other students spend a first semester engaged in the study of language and culture at the universities offering special language programs, going on to a second semester of subjects chosen more broadly from the university's curriculum. Special language provision is currently available at Bordeaux's Département d'Etudes de Français Langue Étrangère (DEFLE), Caen's Centre d'Enseignement du Français pour Étrangers (CEFE), Lyon's Centre International d'Etudes Françaises (CIEF), Poitiers's Centre de Français Langue Étrangère (CFLE), Rennes's Centre International Rennais d'Etudes de Français pour Étrangers (CIREFE) and the Centre International d'Etudes Françaises (CIEF) in Reims.

Students are assessed on each semester separately. Assessment is based on the subjects studied at the host university, as well as project work and other tests administered by UTS: International Studies.

Students in France are charged a non-refundable state medical insurance fee (*sécurité sociale*) for each semester of study. Details may change, but students should set aside a total of around A\$800 for this cost, which UTS: International Studies is unable to meet on students' behalf.

Students should be aware that costs of living in France are generally slightly higher than in Australia, though the cost of student accommodation is very reasonable.

Locations

Bordeaux

Capital of Aquitaine, Bordeaux is a city known largely for its wine production and its port. Situated on the river Garonne, it is close to the Pyrenees in the south-west of France, and also within range of the Atlantic beaches. Its heritage is reflected in the 18th century architecture and impressive literary and artistic tradition.

The Université Michel de Montaigne has a strong emphasis on French art and culture, with teaching covering literature, philosophy, history, art history and archaeology, geography, and languages. The campus, nestled among vineyards, is a bus ride from the city centre. There is an excellent modern language centre, and accommodation options include privately rented flats in the city.

Caen

Caen is located in Normandy, near the north coast of France. The city is built of golden stone and is rich in historical associations, which range from abbeys and a chateau commenced by William the Conqueror, through to the D-Day beach landings of World War II.

The university is over five centuries old, but the original buildings, like much of the city, were destroyed during World War II. It is now housed in impressive structures built with international funding around 1950, and the university's emblem is the phoenix as a symbol of rebirth. It has 26,000 students, and faculties of Political Science, Law, Economics and Management, Psychology, History, Physical Science and Sport, as well as a number of teaching institutions. It has highly respected, well-developed language and cultural programs conducted through its associated language centre. Accommodation is available in studios or residences.

Evry

Situated just south of Paris, Evry is a new town which combines a number of existing villages with more modern buildings. It is home to the Cathédrale de la Résurrection, constructed in 1995, and is close to the much debated Disneyland-Paris.

Télécom and Management SudParis, strictly speaking part of the prestigious grande école system rather than a university, offers a range of teaching, research and consultancy activities in the fields of management and engineering. Particular strengths include mobile communications, information systems, multimedia and marketing. Students from UTS typically follow a combination of language classes, human sciences options with relevance to French culture and society, and intercultural communications programs, with additional options in the professional subjects where appropriate. Accommodation is available in modern studios with internet access.

Lyon

The Lyon region is a fast-growing area of the French economy. It is well integrated with European markets as well as being well-placed for physical contacts with Germany, Italy and Switzerland, all of which are relatively easy to access by road. Lyon itself is a large provincial city, with late medieval and 19th century precincts, including the picturesque silk manufacturing area of La Croix Rousse, as well as extensive modern development.

The original Université de Lyon was established last century, with the arts and humanities elements becoming the national Université Lumière, Lyon 2 in the early 1980s. The university has a campus in the centre of the city, situated on the banks of the Rhone, and another much larger at Bron, about 30 minutes from the city centre. Subjects cover a range of disciplines from communication and sociology to education, tourism and economics. Private accommodation is readily available.

Nouméa, New Caledonia

New Caledonia offers a very different version of 'Frenchness'. Designated by the French government as a 'Pays d'Outre Mer' (overseas country), the group of Pacific islands retains administrative and cultural links with France, reflecting its 150-year colonial history. The current population of 200,000 comprises Kanaks, descendants of European settlers, other Pacific islanders, and people who trace their heritage back to other former French colonies. Many of the

Kanak population maintain aspects of traditional cultures side-by-side with contemporary Western social and cultural infrastructures. As the capital, Nouméa serves as a relay point between the various communities on the islands, and between New Caledonia and the wider world.

Université de la Nouvelle Calédonie, founded in 1999, offers courses in law, economics, management, humanities, languages, social science and science. It has a campus on the peninsula of Nouville, and another at Magenta in the eastern suburbs of Nouméa. The Nouville campus is adjacent to a French language school, CREIPAC, with which the university has an agreement.

www.univ-nc.nc

Poitiers

Situated not far from the Atlantic coast, Poitiers retains an old city centre boasting many of the finest Romanesque churches in France. At the other end of the spectrum, it is also home to the futuristic theme park Futuroscope. Nearby attractions include the holiday resort of La Rochelle, the island of Oléron, and Angoulême, home of France's national comic books museum.

The university, founded as long ago as 1431, has made a full contribution to European thought, with writers such as Descartes and Francis Bacon having studied there. Today it offers an up-to-date multidisciplinary education with strengths in human sciences and the arts, language and literature, sciences and law and new technologies. There is a strong interest in new technologies and language learning, and accommodation possibilities include city centre apartments.

Reims

Reims is in the heart of the world-famous Champagne region. It is not a large city, but has a key role in French history, and consequently it attracts substantial numbers of tourists because of its cathedral and its associations with Joan of Arc, the King of France and the Holy Roman Emperor. Reims is about one-and-a-half hours from Paris by train and is close to Belgium.

The Université de Reims, Champagne-Ardenne is a comprehensive national university and has faculties of Science, Applied Science, Health Sciences and Engineering, Arts and Humanities, with special research interests in local and regional politics, literature and identity, and, of course, wine-making. The current university dates from the post-war era and at present has about 30,000 students who attend a number of different campuses spread throughout the city. Accommodation possibilities include private rentals.

Rennes

Rennes is the capital of Brittany and the centre of Celtic culture and traditions in France. It has a population of about 330,000, of whom 60,000 are students. Rennes is a mixture of late medieval, timbered buildings and elegant 18th and 19th century urban planning. The Atlantic coast is less than an hour away, and Paris is a two-hour trip by TGV (high-speed train).

The present university was established in 1969 and is one of two universities in Rennes. It has 21,000 students enrolled in five faculties: Languages, Social Sciences, Arts/Letters/Communications, Human Sciences (including linguistics, psychology, education and sociology), as well as classes in Breton language and culture, physical education and sports. Students at Rennes often take classes in the French Language and Culture Centre. Accommodation is available in residences or privately.

Strasbourg

Strasbourg calls itself 'the capital of Europe'. It is the location of the European Parliament and the Council of Europe, and is a centre for economic development, which is rapidly expanding and progressing. Strasbourg has great pride in its local identity, but is also very cosmopolitan. The city has extensive late medieval sections, an imposing Gothic cathedral and impressive modern buildings created for the European institutions located in Strasbourg. With the recent merger of its three universities, Strasbourg has a student population of around 50,000.

The university has a Faculty of Law, plus institutes for Political Science (IEP), Business and Management Studies (EMS); UTS: International Studies has exchange agreements with each of them. As expected, fields of study offered include options with a focus on Europe and the European Union. The university does not have a single campus, but most of its buildings are close to the centre of the city, in an area of strong German architectural influence, built in the late 19th and 20th centuries. Accommodation options include private studios or shared apartments.

Toulon

Toulon is a port city on the Mediterranean coast, with an impressive naval history. Toulon is part of the French Riviera, with Nice and Marseilles within easy train trips, and the Provençal hinterlands a short drive away. Université de Toulon et du Var is located at La Garde, a modern suburb that has grown from an old town approximately 10km from the port area of Toulon and 5-15km from some of the best beaches in Europe.

The university was established in 1968 and has approximately 10,000 students enrolled in five faculties: Law, Arts, Economics and Management, Science and Technology, and Engineering. The Université de Toulon also has an associated Technological Institute. The programs at Toulon are ideally suited to business and law students. Accommodation options include residences, and privately operated studios very close to the campus and the 'Grand Var' shopping complex.

MAJ08921 Germany

Germany is the largest country in the European Union. Historically, it has linked Slavic Eastern Europe with Western Europe. This function of Germany as the bridge between West and East still plays a very important role in European political and economic developments. Germany is well known as a major economic power in the world and also has a rich and varied culture and artistic heritage: from some of the world's most influential modern philosophers, such as Nietzsche and Adorno; to the cream of classical composers like Bach and Beethoven. German is the native language of about 100 million people, the official language of Germany, Austria, Luxembourg and Liechtenstein and one of the official languages of Switzerland. It is also the most common *lingua franca* in Eastern Europe.

There are no restrictions on entry to the Germany major of the International Studies program. Students who already have a sound working knowledge of German on entry to UTS have more options for the development of their study program when they undertake in-country study in Germany, however, it is also possible to enter the Germany major with no previous knowledge of the German language.

Through arrangements made by UTS: International Studies, students spend two consecutive semesters studying at one of the following universities:

- Georg-Augustus Universität Göttingen, Göttingen
- Technische Universität Berlin, Berlin
- Universität Karlsruhe, Karlsruhe
- Universität Konstanz, Konstanz
- Universität Potsdam, Potsdam
- Universität Regensburg, Regensburg
- Universität des Saarlandes, Saarbrücken
- Universität Tübingen, Tübingen

The location and content of each student's period of in-country study in Germany is determined by the level of their language competence in German. Generally speaking, students who have a sound working knowledge of German before their entrance to UTS (usually defined as HSC 3-unit or a good pass in 2-unit German) can study at any of the abovementioned universities. Such students study an appropriate two-semester program of host university subjects broadly relating to German language, society and culture. All other students spend a first semester engaged in the study of language and culture at the universities offering special language programs, going on to a second semester of subjects chosen more broadly from the university's curriculum. Students are assessed on each semester separately and assessment is based on the subjects undertaken at the host institutions, as well as project work administered by UTS: International Studies.

The costs of living in Germany are generally slightly higher than in Australia. On the whole, accommodation is cheaper than in Sydney but eating in restaurants is considerably more expensive. It is, however, possible to spend a year there on an amount roughly comparable to living away from home in Sydney.

Locations

Göttingen

Göttingen, a city of around 130,000 inhabitants, lies in the geographical heart of Germany. The city is over one thousand years old, and was an important Hanseatic commercial centre in the Middle Ages. It suffered from the effects of the Thirty Years' War in the 17th century, but in 1737 George II, King of England and Elector of Hanover, founded a university there, and today Göttingen is one of Germany's best renowned university towns. The brothers Grimm, world-known for their collection of fairy tales, worked in the impressive Göttingen library. More than 40 Nobel Prize winners lived and worked in Göttingen in the 20th century, and the city's lively, cosmopolitan feel is, in large part, the product of the prominent role played by science and education in the past and present, and to the large proportion of students.

Approximately 24,000 students are currently enrolled at the Georg-Augustus University Göttingen. This includes almost 3000 international students. There are 13 faculties and around 170 departments, with over 2000 academic staff. The university is particularly eminent in the natural sciences, but also has a strong tradition in the humanities and social sciences. The faculties encompass Agriculture, Biology, Chemistry, Forestry and Forest Ecology, Geosciences and Geography, Mathematics, Physics, Law, Social Sciences, Economics and Business Administration, Theology and Arts. The Medical Faculty is one of the largest in Germany.

Berlin

Berlin is Germany's historical and present-day capital city and is the country's largest and ethnically and culturally most diverse city. It is a major centre of culture, politics, media and science and is a very popular tourist destination within Europe. The city of Berlin is home to world-renowned museums, universities and research institutes as well as numerous sporting and cultural events. Famous for its festivals, contemporary architecture, nightlife and avant-garde arts Berlin is an exciting, cosmopolitan and increasingly global city to live and study in.

The Technische Universität Berlin is located in the central west of the city in the Charlottenburg district on Strasse des 17 Juni.

Internationally renowned, TU Berlin has a history which spans back to 1770 and has the distinction of being Germany's first technical university. TU Berlin is home to almost 30,000 students and possesses the highest percentage of international students of any German university. Research and teaching at the TU Berlin covers a range of academic disciplines, including engineering and natural sciences, economics, the humanities and social sciences. Semester dates are early April to mid July (Summer semester) and early October to mid February (Winter semester).

www.tu-berlin.de

Karlsruhe

Karlsruhe was established in 1715. Its urban planning, unique in the early 18th century with its streets and avenues radiating like sunbeams in all directions from the palace, is still visible and facilitates orientation. The city is located in the Rhine Basin. It borders on the Black Forest and is in easy reach of France. It is mainly a city of trade and administration. Several significant research and development institutions have contributed to giving Karlsruhe a leading position in international high-tech development. This region, between the Black Forest and the River Rhine, has the highest per capita number of researchers in Germany. Karlsruhe is also well known for being the home of the two highest federal courts of Germany: the Supreme Constitutional Court and the Court of Appeals. However, this is not to say that cultural events are a rarity. The 'Badisches Staatstheater', the concert hall, several museums, art galleries, the 'Barockschloß', libraries and the internationally significant 'Zentrum für Kunst und Medien' (a centre for art and media) offer a great variety of events for those who love art, music and theatre. Tennis courts, soccer fields, public swimming pools, ice skating rinks, golf courses, riding stables, biking and hiking trails, and airports for recreational pilots are also available for sports fanatics.

The École Polytechnique in Paris was the forerunner of and model for this university, which was founded as a polytechnic on 7 October 1825. Taking its first students in 1832, the polytechnic was expanded and reorganised, in 1967 renamed University Karlsruhe, but retaining its 'Technical School' title as well. Today the University Karlsruhe is a large and modern institution for teaching and research. Engineering and natural sciences, business administration and engineering courses are definitely the strongest university programs here. About 17,000 students currently study at Karlsruhe, 15 per cent from foreign countries. Research innovations are in information

and communication technologies, energy techniques, automation and assembly techniques, and environmental research. Faculties include Business Administration, Humanities, Bio- and Geo-Sciences, Mathematics, Physics, Chemistry, Architecture, Engineering, Chemical Engineering, Computer Science and Information Technology. There are plenty of extracurricular activities on campus: the students' cultural centre, the Collegium Musicum, the university choir, the symphony orchestra, the university big band, the academic flyers, the academic sailing club, and the solar vehicle.

Konstanz

Konstanz is a small city in the south-west of Germany. It has a very picturesque medieval centre and the city is adjacent to the Swiss border, Lake Constance and the Rhine. It is an exceptionally prosperous part of Germany with a very long history. The climate of the Alpine foothills is mild, and the region belongs to those German areas with the most amount of sunshine. The Black Forest can be reached in about one hour, and Konstanz prides itself on being an ideal starting point for mountain trips into the Swiss, Austrian and German Alps.

University Konstanz was established in 1966. A central concept has been the principle of developing 'teaching on the basis of research' and making the courses very student-oriented. This has led to University Konstanz being heralded a model university. A significant expression of this spirit of reform was the establishment of a university library accessible on a 24-hour basis. From its inception, University Konstanz focused on new courses of studies and study-models designed to encourage interdisciplinary cooperation. It is most famous for its departments of Economics, Public Policy and Cultural Studies. Currently there are about 10,000 students enrolled in over 40 degree programs. The campus is located on a hill about 10 minutes by bus from the city, on the shores of Lake Constance. Faculties include Humanities, Social Sciences, Education, Economics, Law, Mathematics, Physics, Chemistry, Biology, Psychology, and Computer Information.

Potsdam

Potsdam became the capital of the state of Brandenburg after German unification in 1990. It is located on the Havel River, and borders on the south-west suburbs of Berlin. In the 17th and 18th centuries Potsdam was the residence of the royal family of Prussia. The Sans Souci Palace and the New Palace, both built by Friedrich II in the middle of the 18th century, are among the architectural wonders of the city. It is Germany's main centre of film production, with a famous studio in Babelsberg and an equally prominent College of Film and Television.

University Potsdam was established in 1991 and is one of the youngest universities in Germany. It aims at being a 'small but excellent' institution of higher education with a traditional, generalist profile for 12,000-15,000 students. About 250 professors and 600 other full-time academic staff are engaged in teaching and research. Special emphasis is put on the four 'flagship' areas: general linguistics, including computer linguistics; history, with a focus on modern history and European Judaism; science and mathematics; and the Potsdam teacher training model. This last area offers an integrated and overlapping education as well as comprehensive, advanced training for the teaching profession. The university is located in the parklands surrounding the elegant palaces. Despite its historical ambience, Potsdam is becoming one of the most modern venues in Germany for research in science and technology. Faculties include Law, Mathematics and Science, Arts, Human Sciences, Economics and Social Science.

Regensburg

The city of Regensburg spreads along the banks of the Danube. Once the Bavarian capital, Regensburg offers the remnants of 2000 years of cultural history. It was founded by the Romans in the second century AD and became a very wealthy merchant city in the Middle Ages. It served as the seat of the Imperial Diet of the Holy Roman Empire of the German Nation for almost three centuries until the empire was dissolved in the defeat of the Napoleonic war in 1806. It is one of the most captivating cities in Germany. The richness of history and the artistic wealth of the city have had a conspicuous influence on daily life. Fortunately escaping destruction in World War II, it remains today a magical blend of the old and the new. The first stone bridge to span the Danube, the 'Steinerne Brücke', as well as the cathedral still retain their original character in perfect intactness. Today Regensburg is said to be the most beautiful medieval city in Germany and has one of the highest productivity rates in all of Germany. Munich is easily reachable by train in about one hour.

Founded in 1962 as the fourth fully-fledged Bavarian university, University Regensburg comprises 12 faculties, providing a full range of academic subjects. In 1989 the university established a new course of studies: biochemistry. In 1994, business informatics (Wirtschaftsinformatik) was added together with an attached non-profit Institute of Banking Informatics. Training in electronic data processing, foreign languages, rhetoric and presentational skills is offered to students of all faculties to further prepare them for the modern working world. At present, about 16,000 students are enrolled at University Regensburg. The campus atmosphere and the short distances between buildings are conducive to a more efficient way of studying. The university library holds more than three million volumes. The university's attractiveness is also due in part to the charms of the historical city and the beautiful surrounding landscape. Leisure activities include a multitude of cultural activities on campus. There are, for instance, 11 student theatre groups performing regularly, thus benefiting from the fact that University Regensburg is one of only two within Germany to have its own theatre. Faculties include Catholic Theology, Law, Business, Economics and Management Information Systems, Medicine, Humanities I (Philosophy, Fine Arts, Physical Education), Humanities II (Psychology and Education), Humanities III (History, Social Sciences and Geography), Humanities IV (Languages, Literature and Linguistics), Mathematics, Physics, Biology and Pre-Clinical Medicine, Chemistry and Pharmacy.

Saarbrücken

Saarbrücken is the capital of the Saarland, a state located on Germany's border with France and Luxembourg. Indeed, on two recent occasions, in the 1930s and the 1950s, the Saarland held plebiscites on its preferred location in France or Germany. Many of the inhabitants are bilingual, and Saarbrücken prides itself on being one of Europe's 'crossroads'. It is possible to reach most of Europe easily from here. Trier and Luxembourg are to the north, Metz to the west and Frankfurt to the east. Once a coal-mining area, today Saarbrücken is among the leading centres for the study of artificial intelligence, and it hosts a considerable number of enterprises in the field of advanced technology. It is the base of the glass and ceramics giant Villeroy Bosch.

The university was founded in 1948 with French assistance. The special situation of the Saarland at that time (its partial political autonomy and its close association with France as a result of economic and monetary union) strongly influenced the early years of the university's development. The special relationship with France remains a special feature of Universität des Saarlands' character. A comprehensive system of reciprocal recognition creates the opportunity to study simultaneously for degrees in both countries. In the departments of German and Romance Languages and Literature, besides gaining German degrees, students can study for the French Licence and Maîtrise d'Allemand or Licence de Lettres Modernes. Similar objectives are found in the program of Cross-Border Franco-German Studies, which is conducted in collaboration with the Université de Metz. The field of information and computer science in Saarbrücken enjoys a worldwide reputation. Currently Universität des Saarlands has some 17,000 students, with 290 professors and 800 other full-time academic staff. The university's faculties include Law, Economics, Information Technology (legal and business IT), Medicine and Humanities.

Tübingen

This tranquil, picturesque university town, just 35km south of Stuttgart, is a place to wander winding laneways, past half-timbered houses and old stone walls. The university is more than 500 years old and has always played as much of a role in characterising the city's outward appearance as it has in weaving its inner social fabric and its economic structure. Today's students are the proud custodians of a rigorous liberal intellectual tradition, and can be seen in every café plotting earnestly to save the world. With an overall population of 85,000 and a presence of some 26,000 students, Tübingen has the largest 'student density' of all German university towns. It is not only an intellectual city where major contributions to European intellectual history were written, but also a very romantic town.

In 1477, Eberhard im Bart, Count and later Duke of Württemberg, established the founding tenets of University Tübingen, which the institution has followed to this day. Today, the university's character is marked by an awareness of tradition and a cosmopolitan atmosphere. The university's academic reputation is determined by the research achievements of more than 700 professors and about 2000 other full-time academic staff. The tradition of the old universitas scientiarum, encompassing a wide variety of fields from theology, jurisprudence and philosophy to economics, the social sciences, languages and cultural studies and to medicine, mathematics and the natural sciences, is conducive to an effective interdisciplinary cooperation between these

fields. The University's faculties include Protestant Theology, Catholic Theology, Law, Economics and Business Administration, Medicine, Philosophy, Social and Behavioural Sciences, Modern Languages, History, Cultural Sciences, Mathematics, Physics, Chemistry and Pharmacy, Biology, Geosciences and Informatics.

MAJ08923 Italy

Italy (population 60 million) is a country of south-central Europe, occupying a peninsula that cuts deep into the Mediterranean Sea. The mountainous landscape had a profound impact on the country's political and economic development, fostering throughout history the creation of many independent states. Italy's history as an independent, democratic state is relatively recent, dating back to 1946. Since World War II, increasing numbers of Italians have moved from the countryside to the rapidly industrialising cities, thus generating significant and often abrupt transformations of traditional ways of life. Italy is often dubbed the world's 'living art gallery', where history and culture surround you on every step. At the same time the countryside preserves most of its poetic beauty and agriculture still plays a substantial role in the overall economy.

Students spend two consecutive semesters studying language and culture at a university in Italy through arrangements made by the Institute for International Studies. Students are assessed on each semester separately and assessment is based on the subjects undertaken at the host institutions, as well as project and essay work administered by UTS: International Studies.

Students may expect that slightly greater costs will be incurred through undertaking a period of In-country Study in Italy than are involved in living away from home in Sydney and that these costs vary from location to location and fluctuate with exchange rates.

Locations

The Italy major has provision for both beginners and those who have previously studied Italian. The choice of location depends primarily on the level of Italian language proficiency attained by each student prior to their period of In-country Study.

Bergamo

Bergamo (population 140,000) is situated in central Lombardy, 50 km east of Milan, at the foot of the Alps. *Città alta*, the old part of the town, built inside the 16th-century Venetian walls, is rich in historical and artistic sites, while *città bassa*, the lower part of the town, is built on the edge of the Po Valley. The province of Bergamo is one of the richest in Italy. Relatively modern, Bergamo *bassa* is connected by a funicular railway to spectacular and historic Bergamo *alta*, 400 m above the plain. Bergamo *alta* is the main attraction for tourists and a weekend destination for the Milanese. Local particularities include a complex dialect, now spoken mainly by older natives of the town.

Università degli studi di Bergamo has been a state university since November 1992. Before then it was the Istituto Universitario di Bergamo, set up in 1968. It is a relatively small university with about 7,000 students and 147 teaching staff. It has three faculties: Foreign Languages and Literatures, Economics and Business Administration, and Engineering. Two courses of particular interest for International Studies' students are History of the Italian Language and Italian Literature.

www.unibg.it

Bologna

Bologna (population 380,000) is one of the most vibrant Italian cities. Nestled at the centre of the rich and lively Emilia-Romagna region, Bologna boasts splendid monuments, a lifestyle well above the Italian average and a huge offering in terms of culture, sport and entertainment. The students in the city provide a dynamic atmosphere that is missing in smaller Emilia cities. Originating as an Etruscan town in the 6th century BC, Bologna became a European intellectual centre with the founding of its University in 1088. The historical centre is one of the best preserved in Italy, with churches and palaces dating back to the Renaissance, the Baroque and the 18th and 19th centuries. Bologna is also a very important industrial centre. The climate can be very cold in the winter. Bologna is also close to the Riviera Adriatica, with seaside resorts attracting numerous tourists in the summer months.

Università degli studi di Bologna, founded in 1088, is one of the oldest universities in the world. With around 80,000 students, it is also one of the biggest in the country. Among its teaching staff are world-famous public figures such as Romano Prodi and Umberto Eco. The faculties are Agriculture, Cultural and Conservation Studies, Economics, Education, Engineering, Foreign Languages and Literature, Industrial Chemistry, Law, Literature and Philosophy, Mathematical, Physical and Natural Sciences, Medicine and Surgery, Pharmacy, Political Science, Psychology, Statistics and Veterinary Science. Of particular interest are the courses offered by Discipline delle Arti, della Musica e dello Spettacolo (DAMS) (Performing Arts, Music and Mass Communications), as well as the Faculty of Law, the oldest in the world.

www.unibo.it

Catania

Catania (population 376,000) is the second largest city in Sicily, situated between the slopes of Mount Etna and the Ionian Sea. The history of the city has been conditioned by a succession of foreign dominations and the unpredictability of Etna. Catania was repeatedly destroyed over the centuries by eruptions and earthquakes, the most devastating taking place in 1693. In recent years Catania has seen a growth of tourism, due to its elegant architecture and a magnificent coastline. Locals are always proud to describe their city as a 'city in black and white', due to the prevalent building technique of combining local lava stone with the white stone from Siracusa.

The University has about 55,000 students, 1,500 academic staff and 1,500 administrative staff. It is the oldest University in Sicily, founded in 1434. The old University building, in which are the administrative offices, is located in the centre of the town. The faculties at Università degli studi di Catania are Law, Political Science, Economics, Medicine, Arts and Philosophy, Mathematical, Physical and Natural Sciences, Pharmacy, Engineering, Agriculture and Education. Of particular interest is the Faculty of Arts, with its long tradition of excellence in teaching and research.

www.unict.it

Genoa

Genoa (population 706,000) is a major Mediterranean seaport in north-western Italy. It is the capital of the Liguria region and the centre of the Italian Riviera. Once a powerful maritime republic and the birthplace of Christopher Columbus, the city is known as *La Superba* ('proud', 'vain'). Despite the more recent economic decline, Genoa has a grand cultural heritage. Its streets are filled with medieval cathedrals, glorious palaces and Renaissance fountains. It is a wonderfully eclectic city, dominated by an always busy port and the narrow alleyways of the medieval centre. In addition to being a city rich with art treasures, Genoa is attractive for the nearby beach resorts of the Ligurian coastline.

Università degli studi di Genova is a large university with 40,000 students, 1,800 teaching and research staff and about 1,580 administrative staff. It has 12 faculties (including Architecture, Business, Education, Law, Modern Languages, Political Science and Arts) and a number of regional campuses (Imperia, Savona, Santa Margherita Ligure, Ventimiglia, La Spezia and Acqui Terme). The Faculty of Business has a very high standing in the Italian academia, reinforcing Genoa's long-standing tradition in the field of international commerce. Special emphasis is placed on international and maritime subjects, in line with Genoa's tradition as a maritime republic.

www.unige.it

Lecce

Lecce (population 100,000) lies in the southern tip of the heel of Italy in the Puglia region. It has a population of around 100,000 and is home to some beautiful examples of baroque architecture. Many of its buildings are built of the characteristic *pietra leccese*, a light yellow, easily worked limestone. The region is well known for its clear waters, unspoilt beaches and landscapes and its abundant olive groves. The city's classical remains include an underground burial chamber from the 4th century BC and a Roman amphitheatre. Lecce is also a lively city with elegant shops and a busy nightlife.

Università degli studi di Lecce was founded in 1960. It has more than 25,000 students and eight faculties (Mathematical, Physical and Natural Sciences, Economics, Engineering, Education, Foreign Languages and Literatures, Arts, Conservation of Cultural Heritage and Law). Of special note is the Language Centre and the program of Australian studies. Also, for the artistically minded, there are interesting courses offered by the Faculty of Conservation of Cultural Heritage.

www.unisalento.it

Milan

Milan (population 1.6 million) is the capital of Lombardy, the richest, most industrialised and populous northern region of Italy and arguably the most important commercial and design centre in Europe. Milan carries both the advantages and the disadvantages associated with living in a big city, but the advantages outweigh the potential drawbacks by far. The rich cultural life in Milan offers valuable experiences to students interested in art, film and theatre. As a major European rail hub and a city serviced by two international airports (Linate and Malpensa), Milan provides for easy travelling both within Italy and internationally. Public transport is also excellent.

The Catholic University of the Sacred Heart is the largest private university in Italy, with approximately 35,000 students and 11 faculties (including Business, Law, Arts, Languages, Education and Political Sciences), some of which are located in the nearby cities of Brescia and Piacenza.

www.unicatt.it

The Politecnico, founded in 1863, is a state university with about 39,000 students and only two faculties (Engineering and Architecture). In addition to Milano itself, the Politecnico has campuses in Mantova, Cremona, Piacenza, Lecco, Bovisio and Como. Of special interest to International Studies students are the courses in Industrial Design (product design, communication design, interior design and fashion design) offered at the Bovisio and Como campuses.

www.polimi.it

Libera Università di Lingue e Comunicazione IULM is a relatively small university (7127 students in 2000-2001), founded in 1968 as an Institute for Modern Languages, with the main campus in Milano itself and a regional branch in Feltre (Veneto region). It assumed the status of an autonomous university and its present name in 1998. IULM has two faculties (Foreign Languages and Literatures, and Communication and Entertainment) offering degree courses in translation and interpreting, public relations, sciences and technologies of communication and tourism. It has a modern campus on the city railway line, with facilities which include a Language Centre and a multimedia lecture theatre.

www.iulm.it

Modena

Dating back to the Roman times, Modena (population 180,000) became a free city in the 12th century. Modena was home to Italy's favourite tenor, the late Luciano Pavarotti and car manufacturers such as Ferrari, who test the Formula 1 cars on the racetrack at nearby Fiorano. Although only 40 km away from Bologna, Modena has a character of its own. The old city's fortified walls, now converted to promenades, give it a pentagonal shape. Notable buildings include the cathedral (begun in 1099), the bell tower (completed in 1319) and the imposing ducal palace (begun in 1634), now a military academy. The Palazzo dei Musei houses the municipal collections, including the Este Gallery and Museum, rich in Renaissance paintings, and the Este Library, noted for its collection of illuminated manuscripts.

Università degli studi di Modena e Reggio Emilia was founded in the first half of the 12th century, after the death of Countess Matilde of Canossa in 1115. Nowadays it has 15,000 students, nine faculties (Law, Arts, Conservation of Cultural Heritage, Medicine and Surgery, Mathematical, Physical and Natural Sciences, Agriculture, Pharmacy, Economics, Business and Administration, and Engineering) and two campuses (Modena and Reggio Emilia). Of particular interest is the area of cultural studies, offered through the Faculty of Arts, which includes courses in cultural anthropology, comparative social systems, history of philosophy, etc.

www.unimo.it

Trieste

Università degli studi di Trieste (population 238,000) is an important port in the Adriatic, capital of the province of the same name. It preserves interesting Roman, Medieval and neo-classic monuments and it is an important centre for artistic, historical and scientific collections. Once the chief port of the Habsburg empire, Trieste is nowadays an important 'gateway to the East', a truly multicultural, vibrant city with a commitment to developing its tertiary and scientific sectors.

Università degli studi di Trieste is a medium-sized university with 25,000 students and 12 faculties spread over three campuses in Trieste, Gorizia and Pordenone. The University is very highly regarded in the scientific and diplomatic studies areas. It also hosts the foremost translation and interpreting school in Europe.

MAJ08924 Japan

Japan is Australia's single most important trade partner and a major economic power in the Asia-Pacific region. The study of Japan's economy, culture, history and international relations offers an advantage to students pursuing careers in the international business arena. Students interested in modern Japanese culture may also find much to attract and stimulate them creatively.

Through arrangements made by UTS: International Studies, students spend two consecutive semesters studying at one of the following universities:

- Gifu University, Gifu
- Hokkaido University of Education, Hakodate Campus
- Kagoshima University, Kagoshima
- Kyoto University of Foreign Studies, Kyoto
- Kyushu Institute of Technology, Kitakyushu
- Nishogakusha University, Kashiwa, Chiba
- Obirin University, Machida, Tokyo
- Okinawa University, Naha
- Osaka Prefecture University, Osaka
- Sapporo University, Sapporo
- Tokyo Institute of Technology, O-okayama, Tokyo
- Yamanashi University, Kofu
- Yokohama National University, Yokohama.

The location and content of each student's period of In-country Study are determined by the student's level of language competence in Japanese. Students who have near native competency in Japanese prior to undertaking their period of In-country Study are able to attend classes alongside local students in a broad range of subjects. All other students study mostly language and culture subjects, at least in their first semester. Many students take one or two local subjects taught in Japanese as non credit-earning (audit) students.

Students should be aware that the cost of living in Japan is high, but it is possible to do part-time work on a student visa in Japan and some of the Japan In-country Study sites are cheaper than others due to subsidised dormitory accommodation.

Locations

Gifu

The city of Gifu (pop. 410,000) is located north of Nagoya. The cormorant fishing on the Nagara River that flows through Gifu has a history of 1,200 years and attracts many tourists. The major attractions of the mountainous Gifu prefecture lie to the north in the Hida district, which is part of the Japanese Alps famous for their beauty and skiing in winter. The inhabitants of Takayama, the administrative centre of Hida, have long been known for their woodworking skills, and Hida carpenters were in demand to construct imperial palaces and temples in the Kyoto and Nara regions. The tradition continues to this day with the production of furniture and woodcarvings.

Gifu University is a national university founded in 1949. It has five faculties: Agriculture, Education, Engineering, Medicine and Regional Studies. Gifu University has about 6,000 undergraduate and 1,200 postgraduate students. Most UTS students take the Japanese language and culture subjects which are run by the International Students Centre. The Centre offers an intensive Japanese language course that UTS students are encouraged to join, at least for their first semester. The University is on the outskirts of the small city of Gifu so has a relaxed atmosphere, but is only about an hour's travelling time away from the bustling metropolis of Nagoya. There is a handful of other students from English language backgrounds at Gifu University, but it is still a good environment for learning to live in the Japanese language.

Hakodate

Hokkaido is the northern-most and second largest of Japan's four main islands. Hakodate is a port city with a small population and a relaxed atmosphere.

Hokkaido University of Education, Hakodate, is a national university founded in 1876. Its academic strength lies in the area of education. The University has about 6,000 undergraduate students spread over five campuses, each located in a principal city of Hokkaido:

Sapporo, Hakodate, Asahikawa, Kushiro and Iwamizawa. It has five undergraduate programs: Elementary School Teachers, Junior High School Teachers, Kindergarten Teachers, Children with Intellectual Disabilities, and Integrated Arts and Sciences at Hakodate College. The University hosts only a small number of overseas students each year, the majority of whom are from non-English-speaking countries. Japanese language classes are organised to suit the level of students. In-country Study students live in the university dormitory located a short bike ride from the campus. The University is best suited to students in the Faculties of Education, Humanities and Social Sciences, and Business.

Kagoshima

Known to the Japanese as the Naples of Japan, Kagoshima (pop. 536,000) is the southern-most major city in Kyushu. It is a sunny and relaxed place with a long hot, humid summer and a short winter. Overlooking the city across Kinko Bay is the famous volcano, Mt Sakurajima. The Kagoshima region, known as Satsuma, was always receptive to outside contact and for many years was an important centre for trade with China. St Francis Xavier first arrived here in 1549, making Kagoshima one of Japan's earliest contact points with the West. The city's University serves as a focus for cultural life in southern Kyushu, famous for its hot springs.

Kagoshima University is a national university founded in 1949. It has nine faculties: Agriculture, Dentistry, Education, Engineering, Fisheries, Law and Letters, Medicine, Science, and Allied Medical Sciences. Student numbers are about 10,000 for undergraduate programs and 1,200 for postgraduate programs. The campus is located in the centre of Kagoshima City. Most UTS students study language and culture in the International Students Centre. UTS students are also part of professors' research groups in either the Faculty of Engineering or the Faculty of Education. There is an intensive language course available for students at Kagoshima, but UTS students are not obliged to take it and they may take a lighter class load if they choose. Most of the international students at Kagoshima University are from China, Korea, South America and South East Asia, with small numbers of students from every other region in the world as well, including a couple of other English language background students from the USA and Australia.

Kashiwa, Chiba

Nishogakusha University is in Kashiwa City in Chiba prefecture.

Kashiwa is located one hour by train from central Tokyo. Kashiwa City has drawn attention as one of the ideal residential suburbs of Tokyo, and has seen rapid growth. The professional soccer team, Kashiwa Reysol, is based locally and residents enjoy cheering the team on.

Nishogakusha University had its beginnings in Kangaku Juku, a private school for the study of Chinese classics founded in 1877. The famous author Natsume Soseki studied there in preparation for university. The University continues to teach Chinese classics as well as other East Asian literature through its Faculty of Literature. The University has a second faculty, the Faculty of International Politics and Economics. In 2004, a second campus at Kudan was opened in Chiyoda-ku, Tokyo. It is quite a small university of about 3,000 students. There are many international students from China and Korea, but UTS students are the only students from an English-speaking background at the University. In-country Study students at Nishogakusha University join an intensive Japanese language program with very small classes, so it is an ideal environment for students really wanting to concentrate on improving their Japanese language skills.

Kitakyushu

Kyushu Institute of Technology (KIT) is located at Kitakyushu-city in the northern part of the island of Kyushu (pop. 1 million). Historically, this area has played a major role as a gateway to the Asian continent. Kitakyushu-city has developed into an important industrial area for southern Japan. Kyushu Institute of Technology is a prestigious technology university, so many of the Japanese students are very studious and interested in science. There is a reasonable-sized international student population, mostly made up of Chinese and Korean full degree students. There are not many short-term exchange students, and UTS students are the only students from an English-speaking background. This means there is not a large program of Japanese language classes, but the environment is ideal for learning to live in the Japanese language. UTS students are allocated to research groups attached to a professor. Because UTS students are not expected to spend as much time in class as at other In-country Study sites, KIT is an ideal location for students who are self-motivated in their studies and are keen to learn about Japanese society outside the classroom.

Kyoto

Kyoto (pop. 1.4 million) was historically the cultural and political centre of Japan and its capital from 794-1868. Kyoto is rich in historical sites and for that reason it attracts many foreigners. Kyoto is renowned for its fine textiles and traditional products and is also a thriving centre of high-tech industry. Possessing a wealth of historic sites and cultural treasures, and bounded on three sides by mountains, Kyoto is a living museum.

Kyoto University of Foreign Studies (KUFS) is one of the oldest private universities for foreign studies in Japan and is located in the western part of Kyoto. It is small, with about 3,500 undergraduate and 50 postgraduate students learning various languages and cultures. To facilitate their foreign language studies, KUFS has exchange relationships with universities around the world, so there is a large diverse international student population and an active social life in which In-country Study students can participate. Instead of joining a professor's research group, there is a set program of language and culture study for exchange students. UTS students are obliged to join this course, even though they also have to do In-country Study assignments, so the workload at this university is higher than for other In-country Study sites.

Machida, Tokyo

Obirin University is located in Machida, a city of 400,000 in the south-western suburbs of Tokyo. It is one of Tokyo's residential cities. Machida is approximately 35 minutes from central Tokyo by train, so it is a convenient base from which to explore Tokyo's museums and other recreational facilities.

Obirin is a private university founded in 1946. A Christian Congregation University, it is very internationalised, with over 5,000 undergraduate and about 150 postgraduate students. Obirin hosts non-matriculating international students from English-speaking countries on 10-month 'Reconnaissance Japan' programs. It has four faculties: Economics, International Studies, Literature, and Business and Public Administration. Obirin specialises in English language education and has exchange students from the USA and the UK as well as Australia. Respected historian Professor Bruce Batten is the academic advisor for international students, and Obirin also has a strong record in fine arts and performing arts. The University sometimes hosts artists-in-residence for short periods, which is a great resource for students interested in the arts.

Naha

Naha is the capital of Okinawa prefecture, at the southern end of Japan. The only region which has a sub-tropical climate in Japan, it offers a warmer climate with the average temperature of approximately 23 degrees. Okinawa's distinct culture and island environment means it is a popular tourist destination.

Okinawa University's basic concept is 'an open university that is community oriented, learns from the community, and keeps close a relationship with the community'. Okinawa University is a small private university with two faculties: the Faculty of Law and Economics and the Faculty of Humanities. UTS students usually take the intensive Japanese language program for international students. UTS students are the only students at Okinawa University from an English language background, although there are many students from China and Korea as well as the local students.

O-okayama, Tokyo

The Tokyo-Yokohama district is the key region in Japan's leading commercial and industrial area. Tokyo prefecture comprises 23 wards of urban Tokyo, 27 cities and four islands with over 11 million people. Tokyo is such a huge, sprawling city that one could spend a lifetime exploring it and still make new discoveries every day. O-okayama is in central Tokyo, so UTS students at this site can experience the full Tokyo lifestyle, crowded trains and all.

Tokyo Institute of Technology (Tokyo Tech) is perhaps the most prestigious technology-oriented university in Japan. The Japanese student population tends to be very studious, and there is a large and varied international student population. Tokyo Tech receives UTS In-country Study students as fourth-year students, who in Japan have to write a small thesis, therefore placing them into research groups under professors. Most In-country Study students will study only language and culture subjects, but in order to join a research group of people with similar interests, it is important for students to choose their professor carefully. There are many research groups working in engineering, science and information technology. There is also a well known sociologist, Professor Daisaburo Hashizume, who can take In-country Study students from Humanities and Social Sciences or Business. Design students may find a professor in the Architecture Department.

Osaka

Sakai City (pop. 800,000) is in Osaka prefecture. The University is in the south of Osaka. Osaka is Japan's third biggest city, the business centre of southern Japan. Sakai's history is traced well back to the 4th century and there are many historical and cultural sites, such as Emperor Nintoku's Mausoleum.

Osaka Prefecture University is a public prefectural university founded in 1949. It has five faculties: Engineering, Agriculture, Economics, Integrated Arts and Sciences, and Social Welfare. UTS currently has exchange agreements with the Faculty of Engineering. The University has about 5,000 undergraduate and 1,200 postgraduate students. There is not a large program for international students, so this site is only suitable for UTS students with a very high level of Japanese language competency.

Sapporo

Sapporo boasts of dynamic cultural institutions and annually hosts a unique range of events, among them the Pacific Music Festival (PMF). The PMF adds to Sapporo's legacy of prominent activities that includes the 1972 Winter Olympic Games, Asian Games, Winter Universiade and Sapporo Snow Festival.

Sapporo University is a private university founded in 1967 with a humanities and business focus. It has about 6,000 undergraduate and 60 international students. There is a great variety of extracurricular activities, with over 60 cultural and sporting clubs. The University is located in Nishioka, the southern part of Sapporo. It is situated in a quiet residential area about 30 minutes from the centre of Sapporo and is not far from Hitsujigaoka observation spot, one of Sapporo's main attractions. The Japanese language classes are organised to suit the level of the UTS students. Sapporo University is suitable for students in the humanities, education and business.

Yamanashi

Yamanashi prefecture, located in the Chubu region of Japan, is an inland prefecture rimmed by steep mountains on all sides. Surrounded by scenic beauty to the south, Mt Fuji rises 3,776 metres above sea level. Being only 120 km from the Tokyo area, the prefecture has been able to prosper culturally for many years. Yamanashi has much allure, with abundant greenery, crystal clear air and water, some of the freshest fruit and best national parks, including the Fuji Hakone Izu National Park. Kofu City, with about 200,000 inhabitants, can be reached within an hour-and-a-half from Tokyo by express train.

Yamanashi University is a national university founded in 1949. It is a small public university with just three faculties: Medicine, Education and Human Sciences and Engineering, and about 3,500 undergraduate and 500 postgraduate students. The University has around 150 international students, the majority of whom are from China or Korea. The University is located within walking distance of Kofu Railway Station. There is a small dormitory specifically for overseas students close to the University. UTS students attend language and culture classes run by the International Students Centre. Yamanashi University is a suitable site for students from nursing, engineering, education and business.

Yokohama

The Tokyo-Yokohama district is the key region in Japan's leading commercial and industrial area. Yokohama (pop. 3 million) was little more than mudflats 150 years ago, but with the end of Japan's long isolation from much of the rest of the world, the city was the closest port to Tokyo open to foreign traders. Yokohama's attractions can be summed up in the harbour and a lively Chinatown. Yokohama Bay Bridge has a walkway on the bridge, Sky Walk, that leads to a viewing area out over the bay. The high-tech industries and research laboratories that back up the Tokyo area are gathered in Yokohama district.

Yokohama National University (YNU), established in 1949 as a national university, has four faculties and two graduate schools with a combined student population of about 10,000. YNU has a large, diverse international student population and a well established system for managing them. In-country Study students do not go into professors' research groups but into the JOY Program, with language classes, humanities and social science classes, and business classes specifically tailored for short-term exchange students. Students with a high level of Japanese may also take classes with Japanese students outside the JOY Program, for example, in YNU's excellent Architecture Department.

MAJ08926 Mexico

Mexico is a large, rapidly developing country with a fascinating history and tremendous regional variety of geography and culture. Pre-colonial civilisations, conquest, Spanish settlement and popular revolution have all left a big mark on contemporary society. Indian and mestizo populations retain strong native traditions. Mexico has outstanding architecture, art and design, cuisine and popular music. Being located between the United States and Latin America also gives the country special characteristics and helps to shape national consciousness. The migration of Mexican workers, the establishment of border industries, and the NAFTA trade agreement testify to Mexico's close and often difficult relationship with the United States and with the processes of globalisation. The country has recently made an historic transition to genuine multi-party democracy.

Students spend two consecutive semesters studying social science or culture and humanities subjects at an institution of higher education in Mexico through arrangements made by UTS: International Studies. The focus of study varies in each semester depending on individual student preferences and the availability of subjects at host institutions. Students are assessed on each semester separately and assessment is based on the subjects undertaken at the host institutions, as well as project work administered by UTS: International Studies.

Students may expect that no greater costs will be incurred through undertaking a period of in-country study in Mexico than are involved in living away from home in Sydney.

Locations

Mexico City, Mexico

The Universidad Nacional Autónoma de México (UNAM) was founded in 1910 and has approximately 275,000 students. It is public, secular and pluralist. It is Mexico's premiere university and is ranked the No. 1 university in the Spanish-speaking world. It was created in the wake of the Mexican Revolution as the jewel in its crown and was intended to extend higher education to a greater proportion of Mexicans. It currently houses 70 per cent of all research academics in the country. Its main campus is located in the south of the city in Ciudad Universitaria (University City), which was declared a UNESCO World Heritage Site in 2007. It boasts murals by some of Mexico's most famous artists. There are undergraduate and postgraduate degree courses in the faculties of Architecture, Economics, Law, Engineering, Philosophy and Letters, Accounting and Administration, Science, Political and Social Sciences, Medicine, Odontology, Psychology, Chemistry, Veterinary Science, Zoology, as well as schools of art, music, nursing and obstetrics, music, and social work. The university has a lively cultural and sporting life including its own national football team. The Centro de Estudios para Extranjeros (CEPE — Centre for Foreign Students) provides professional Spanish language and culture support classes for visiting students.

www.unam.mx

Xalapa, Veracruz

Xalapa (population 400,000) is a small city which has conserved much of the charm and character of provincial Mexico. It is nestled in green misty hills and has many squares and gardens. The city and surrounding pueblos remain unspoiled by tourism yet are fascinating places to visit for anyone interested in archaeology, Mexican history, the arts and indigenous cultures. Xalapa is also within easy reach of Mexico City by a good road. Xalapa is the administrative capital of the state of Veracruz, and most industry and commerce is located 130km east around the historic port of Veracruz. Between Veracruz and Xalapa lie sub-tropical lowlands where fruits, herbs, chillies and flowers are grown. Coffee is the main crop in the hills. All these local products are sold in Xalapa's traditional marketplaces. Xalapa is known for its exceptionally active and varied cultural life.

The Universidad Veracruzana was founded in 1944 and has approximately 60,000 students. There are over 30 undergraduate degree courses in the faculties of Medicine, Business and Economics, Art, Humanities, Veterinary and Agricultural Science, and Engineering. The anthropology and history faculties specialise in the study of provincial history and indigenous languages. Several faculties are

dispersed around the city. The main campus is located below the city centre in pleasant parkland with lakes and an historic sports stadium built in the Grecian style in the 1920s. The university's school for foreign students (EEE) provides educational programs exclusively for foreign students.

This site is available to exchange students providing they have university-level Spanish.

www.uv.mx/eee

Guadalajara, Jalisco

Guadalajara, Mexico's pearl of the west, is incredibly diverse and stately with amazing qualities, both modern and historic, that embrace all who visit. It is considered the most Mexican of Mexico's big cities. As the second largest city in Mexico, Guadalajara is a busy metropolis and a major Mexican business centre. Although this city moves at a busy pace, things here have a way of seeming to always remain serene. Guadalajara is a city of monuments, parks and flowers, fountains and tree-lined avenues, whose history dates to the 16th century. The Guadalajara area is known as the birthplace of the world famous Mariachi bands, the home of the Mexican hat dance and tequila. Guadalajara's month-long October festival attracts visitors from all over the world and performers from all over Mexico for a wide variety of music, cultural and artistic events and crafts exhibits.

Presently, students can choose to study at the Universidad de Guadalajara (UdeG) (providing they have a minimum of Level 6 Spanish) or the Guadalajara campus of the Tec de Monterrey. Subjects offered to UTS students at the Universidad de Guadalajara are within the Centre for Humanities and Social Sciences (Centro Universitario de Ciencias Sociales y Humanidades (CUCSH):

www.cucsh.udg.mx

CUCSH is sub-divided into Cultural Studies, Studies in State and Society, Political and Social Studies, History and Humanities, and Juridical Studies. Students can take classes in law, literature, philosophy, psychology, sociology, geography, journalism, etc. Students who wish to do in-country study at the Universidad de Guadalajara must have Level 6 Spanish competence. This site is available to UTS exchange students in general providing they have university-level Spanish.

www.udg.mx

At the Tec de Monterrey campus in Guadalajara, students have access to the same range of subjects as other Tec students, including engineering, architecture and design, communication studies, literature and culture.

This site is also available to UTS exchange students in general who have university-level Spanish. There are, however, a limited number of subjects available in English (culture and business).

www.gda.itesm.mx

Monterrey, Nuevo León

Called the City of the Mountains, Monterrey is the capital of the state of Nuevo León, which is situated in the north-east corner of the country and borders on Texas. Monterrey rests in a valley surrounded by the jagged Sierra Madre mountain range. The downtown area features magnificent plazas and gardens. Even with its large population of five million, Monterrey is one of the safest cities in Mexico. Monterrey's population is considered the most educated in Mexico and the city on a per capita basis has more colleges, universities and institutes of technology than any other Mexican city. Quality restaurants, modern shopping malls, numerous museums and cultural attractions abound here. Some of Mexico's best hiking, mountain biking, cave exploring and nature areas are located within close proximity to the city.

Founded in 1947, El Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM), commonly known as 'El Tec', is regarded as Mexico's most modern and technologically advanced university. Regular classes may be attended in the following study areas: agriculture, behavioral science, engineering, communications, computer science, economics, humanities, law, international business, and natural resources.

This site is available to UTS exchange students in general and has a wide range of subjects in English.

www.mty.itesm.mx

Cholula, Puebla

The university is located in the municipality of San Andrés Cholula, five minutes from the city of Puebla and 120 kilometers from Mexico City. Puebla is 2100 meters above sea level and is the state capital. It was founded in 1531 by Don Juan Salmeron and Fray Toribio de Benavente, better known as Motolinía. Puebla is renowned for its distinctive colonial architecture, savoury cuisine, Talavera ceramics,

onyx crafts and textile industry. The indigenous language of the region, Náhuatl, is still spoken in some rural areas of the Puebla Valley. Mexican troops defeated French invaders here on 5 May 1862 giving birth to the modern-day 'Cinco de Mayo' celebrations. Puebla is one of Mexico's richest cities in terms of colonial art and has been recognised by UNESCO as a World Heritage Site. Cholula, the oldest city on the continent, has an excellent archaeological site that was an important religious center of diverse cultures during pre-Hispanic times. The most common landmark is the massive Pyramid of Teapanapa, on top of which the Spaniards built a Catholic Church.

The Universidad de las Américas (UDLA) is one of Mexico's finest with a campus laid out like a small town and a student population of 8500, making it a favourite of foreign students. The UDLA was originally founded in Mexico City in 1940 under the name of Mexico City College before moving to Puebla in 1968 and taking the name of Universidad de las Américas. Students who go to UDLA go under a UDLA-UTS exchange program and can take a range of subjects, from engineering and business administration to humanities and social sciences, including archeology, literature, communication, film and dance. Through the Centro de Lengua y Cultura, students can also apply to do summer internships (fees apply) or community service in local non-profit organisations. Spanish language and culture classes are also provided by UDLA for foreign students.

This site is available to UTS exchange students in general and has a wide range of subjects in English.

MAJ08927 Spain

Spain occupies the south-western tip of Europe, along with Portugal. This location has made Spain an important historical, religious, cultural and linguistic contact zone where Europe and Africa have met and coexisted, often uneasily. The centre of a vast international empire from 1492 to 1898, in the 20th century Spain, was ruled by General Franco in one of Europe's longest-running fascist dictatorships (1937-1975). Since 1975 and the restitution of a parliament-based constitutional monarchy, one that also permits significant regional autonomies, the Spanish people have enjoyed high standards of living and a climate of cultural liberalisation. Since the 1970s Spain has also been a key player in drives towards European union, and since the early 1990s has become an important receiver country of immigrants from Africa, Asia and Latin America, with Ecuadorians and Moroccans forming the two largest minorities. With a population of 45 million, Spain is one of the world's top tourist destinations, attracting more than 45 million visitors annually. While Castellano (Spanish; Castilian) is the official state language, other resilient regional languages (Basque, Catalan, Galician) reflect contemporary Spain's profound cultural heterogeneity.

Students in the Spain major have the opportunity to learn Castilian, to learn about Spain and Spain's place in European and international affairs, and to spend an academic year of study at universities in Barcelona, Granada, Logroño, Madrid, Málaga, Pamplona, Salamanca and Santander. The UTS Language and Culture program accepts students with varying degrees of language ability, ranging from complete beginners to native speakers.

Students spend two consecutive semesters studying language and culture at one of the following universities through arrangements made by UTS: International Studies:

- Universitat Autònoma de Barcelona, Barcelona
- Universitat Abat Oliba, Barcelona
- Universidad de La Rioja, Logroño
- Universidad Antonio de Nebrija, Madrid
- University Alfonso X El Sabio, Villanueva de la Cañada (Madrid area)
- Universidad de Granada, Granada
- Universidad de Málaga, Málaga
- Universidad de Sevilla, Sevilla
- Universidad de Navarra, Pamplona
- Universidad Pública de Navarra, Pamplona
- Universidad de Salamanca, Salamanca
- Universidad de Cantabria, Santander.

Students are assessed separately each semester, based on subjects undertaken at the host institutions, as well as project work administered by UTS: International Studies.

Students may expect that slightly greater costs will be incurred through undertaking a period of in-country study in Spain than are involved in living away from home in Sydney and that these costs vary from location to location and fluctuate with exchange rates.

Locations

Barcelona

Barcelona, the second largest city in Spain, and the capital of the Autonomous Community of Catalonia, has long been a centre for artistic and architectural developments, as well as social progressiveness. It is also one of the most industrialised of Spanish cities.

Students who select Barcelona for their period of in-country study spend two consecutive semesters studying language and culture at one of two universities in the city with which UTS has exchange agreements: the Universitat Autònoma de Barcelona (UAB) or Universitat Abat Oliba.

In their first semester, UTS students at the Universitat Autònoma de Barcelona (UAB) study Spanish language as well as enrol in one elective subject. During the second semester, students select three electives from a list of options on contemporary Catalan and Spanish history, culture, politics, economics and society. The UAB campus consists of teaching and research centres, libraries and laboratories. Located 40 minutes from central Barcelona by commuter train, the UAB is, in effect, a separate university town. The university community is made up of 37,000 undergraduate students, 6500 postgraduate students, 2700 teachers and researchers, and 1200 administrative staff. The UAB's 11 faculties offer a wide range of study and research, including the humanities and social sciences, law, business studies, health sciences, experimental sciences, art and design, technology, and engineering. Catalan is the primary language of instruction at UAB, although a limited number of subjects are offered in Castilian.

This site is available to exchange students provided they have university-level Spanish and are prepared to undertake classes and subjects taught in Catalan, and depending on student demand in a given year.

www.uab.es

Universitat Abat Oliba is available only to in-country study students or exchange students with level 8 or higher Spanish proficiency who enrol in regular university subjects from Semester 1. In both semesters, students select three electives from a list of options on contemporary Catalan and Spanish history, culture, politics, economics and society. The Universitat Abat Oliba is a small private university located in the suburb of Bellesguard and is easily accessible by public transport. Abat Oliba's degree programs are professionally based in ways that match many of UTS's professional degrees, and the university prides itself on being technologically and pedagogically innovative, with small class sizes and a commitment to high teaching standards. Castilian (Spanish) is the primary language of instruction, with some subjects offered in Catalan. Abat Oliba offers students a range of subjects in the areas of business administration, political science, law, economics, journalism, psychology, advertising and PR, and information technology.

This site is available to exchange students provided they have university-level Spanish and are prepared to undertake classes and subjects taught in Catalan; such students may enrol in an advanced Spanish language class as an elective, subject to their faculty's approval.

www.uao.es

Granada

Granada is a medium-sized city in Andalucía, home of La Alhambra and Sacromonte, and one of the most picturesque and visited tourist locations in Spain. Although it has a constant and significant influx of tourists from all over the world, the city does not have a large foreign community living there long-term.

In their first semester, UTS students at the Universidad de Granada study Spanish language as well as enrol in one elective subject. During the second semester, students select three electives from a list of options on contemporary Spanish history, culture, politics, economics and society.

The University of Granada is the third largest university in Spain, and, having been founded in 1531, it is also one of the oldest. It enrolls over 80,000 students annually and is an important and prominent institution in this city of only 270,000 inhabitants. The university

teaches in all the main areas of study. Its faculties include Fine Arts, Architecture, Information Studies, Science, Physical Education and Sport, Education, Human Resources, Economics and Management, Psychology, Sociology and Political Sciences, Humanities, Translation and Interpretation, Law, Pharmacy, Medicine, Engineering and Information Technology, and various associated centres offering nursing, dentistry and others. The campus has modern facilities including IT access, a large library system and sport facilities. It is centrally located and the city has a good public transport system. Granada has a thriving cultural life. There is a mountain range half an hour away with excellent skiing in the winter, and the beach is only one hour away. Granada is also well connected to other major cities and tourist areas in Andalucía and has direct flights to Madrid and Barcelona.

This site is available to exchange students provided they have university-level Spanish, and depending on student demand in a given year.

www.ugr.es

Logroño

Logroño is the capital of the Autonomous Community of La Rioja, the most important wine-producing region of Spain. La Rioja is the smallest autonomous community in Spain, bordered by Navarra, Castilla y León, and Aragón. The city has a population of about 150,000, and is surrounded by picturesque valleys and mountains. It was founded by the Romans and forms part of the famous Camino de Santiago, alongside many monasteries and castles that can be found in the area.

The University of La Rioja attained university status in 1992, having been part of the University of Zaragoza previously. The student population currently numbers some 7500. The university offers 26 undergraduate and postgraduate degrees in a number of disciplines. Most foreign students who attend this university come from non-English-speaking backgrounds.

Students who select Logroño for their period of in-country study spend two consecutive semesters studying language and culture at the Universidad de La Rioja through arrangements made by UTS: International Studies. In the first semester, students further their Spanish language skills, and, if their Spanish levels permit, have access to other subjects as determined by the university. During the second semester, students select a number of electives from a list of options on contemporary Spanish history, culture, politics, economics and society.

This site is available to exchange students provided they have university-level Spanish; such students may enrol in an advanced Spanish language class as an elective, subject to their faculty's approval.

www.unirioja.es

Madrid

Madrid is the capital of Spain and the country's largest city, with a population of some five million, including the city's outlying districts. Madrid is situated in the geographical centre of the country and is regarded by the Spanish state as an autonomous community in its own right. It also wins the prize for being the highest European capital in terms of altitude, being some 700 metres above sea level. Home to some of Europe's most important art galleries and museums, including the Prado, Madrid is a dynamic metropolis, with a cultural life on par with the other great European capitals. It also boasts a vibrant night-life and an excellent public transport system. Two universities are available for students wishing to study in Madrid.

Universidad Antonio de Nebrija is a private university with a high academic reputation in Spain and abroad. It has two campuses: one in the city (Dehesa) and one on the outskirts (Berzosa). The Dehesa campus is readily accessible by metro. The Centro de Estudios Hispánicos, where intense Spanish languages classes are held, is located on this campus. The facilities at both campuses are impressive, as befits this modern, well-run university. Students enrol in intensive Spanish language and culture classes at Dehesa campus in first semester, and in second semester choose from a variety of subjects on contemporary Spanish history, culture, politics, economics and society taught at Berzosa campus.

This site is not available to UTS exchange students.

www.nebrija.com

University Alfonso X El Sabio (UAX), Villanueva de la Cañada (Madrid area), is a private university on the outskirts of Madrid. UAX was founded in 1993 and has a student population of 10,000. It is located in Villanueva de la Cañada, 25km out of Madrid. The campus can be reached in 45 minutes by a bus departing every 15 minutes from a bus and metro interchange in central Madrid.

Student accommodation is available in the small town/suburb next to campus, which provides an alternative to commuting from Madrid. The university can arrange for shared accommodation with Spanish and other foreign students in Villanueva de la Cañada. Most foreign students studying at this university are from non-English-speaking countries, and many are from Latin America. The university offers modern facilities and an optional Spanish language class for foreign students to be taken each semester concurrently with regular university subjects on contemporary Spanish history, culture, politics, economics and society.

This site is available to exchange students provided they have university-level Spanish; such students may enrol in an advanced Spanish language class as an elective, subject to their faculty's approval.

www.uax.es

Málaga

Málaga is a thriving city on Spain's south Mediterranean coast and a popular international tourist destination. The city is close to some of the most historically and architecturally significant cities in the Autonomous Community of Andalusia, such as Granada and Córdoba, and the Moroccan African coast is only a short ferry ride away.

In their first semester UTS students at the Universidad de Málaga undertake Spanish language classes, and in second semester three elective subjects from the regular curriculum of the university.

Founded in 1972, the Universidad de Málaga has become one of Spain's most dynamic tertiary institutions, especially in the fields of technology, tourism and Andalusian Studies. The university has eight faculties and 11 schools, and caters for a wide range of studies and research in the humanities and social sciences, health sciences, experimental sciences, technology, business, law, engineering and tourism. The university is split into two campuses and has modern resources, including excellent libraries, an Olympic-quality sports centre and a range of student services. Spanish language classes are offered at a language centre in the city while Teatinos campus, where students study in second semester, is 15 minutes from central Málaga by bus.

This site is available to exchange students provided they have university-level Spanish; such students may enrol in an advanced Spanish language class as an elective, subject to their faculty's approval.

www.uma.es

Sevilla

The University of Sevilla was founded in 1502 and is still housed in the iconic Tobacco Factory building dating from the 18th century made famous by Bizet's opera Carmen. The current campus is spread all over the city, with some faculties located in the post-Expo area of Cartuja Island, still a short walk from the city's centre.

It is a large public university catering to about 60,000 students with over 4000 teaching staff, making it one of the largest universities in Spain.

Its faculties include Biology, Physics, Chemistry, Pharmacy, Medicine, Dentistry, Psychology, Mathematics, Economics and Business, Social Work, Education, Communications, Geography and History, Philology, Philosophy, Law, Fine Arts. There are also technical sciences, schools of Architecture, Engineering, Software Engineering and university schools of Technical Architecture, Agricultural Sciences, Management Studies, Health Sciences, Engineering.

The university offers modern facilities and an optional Spanish language class for foreign students to be taken each semester concurrently with regular university subjects on contemporary Spanish history, culture, politics, economics and society.

This site is available to exchange students provided they have university-level Spanish; such students may enrol in an advanced Spanish language class as an elective, subject to their faculty's approval.

www.us.es

Pamplona

Pamplona, or Iruña as it is known in Basque, is the capital of the Autonomous Community of Navarra, in the north of Spain. Navarra is one of the wealthiest regions in Spain, and while Castilian is the dominant language, Basque is also spoken by a significant proportion of the population. Pamplona is famous for its Fiesta de San Fermín and the associated running of the bulls.

In their first semester, UTS students at the Universidad de Navarra undertake intensive Spanish language and culture classes. In their second semester, students enrol in classes from the general undergraduate program in a range of faculties, depending on

university admission requirements. The Universidad de Navarra is located on the outskirts of Pamplona in a leafy and spacious parkland setting along the banks of the Sadar River, some 20 minutes from the city centre by bus. One of the best technologically equipped tertiary institutions in Spain, the university prides itself on its commitment to fostering an active student community through various social, cultural and sporting activities. Of the 13,500 students in its undergraduate programs, between 600 and 700 come from overseas, half of those from Latin America. The university was founded in 1952 and currently offers 27 degree courses in a range of faculties and schools, some of its strengths being business studies, journalism, nursing, law and education.

This site is available to exchange students provided they have university-level Spanish and depending on student demand in a given year.

www.unav.es

UTS students at the Universidad Pública de Navarra enrol in two elective subjects as well as undertake Spanish language classes in their first semester. These classes are taught using the innovative method of the renowned Instituto Cervantes, which combines formal classroom teaching with computer-based learning. In second semester, students undertake three elective subjects from the regular curriculum of the university. The Arrosadía campus of the Universidad Pública de Navarra is located in the south of Pamplona in spacious parkland. An excellent public transport system of buses links the campus to the city proper. Established in 1987, the university is now ranked as one of the most dynamic and outward looking of Spanish universities, with a student body of some 11,000. Unlike most older Spanish universities, Pública is divided into 20 departments, rather than faculties, including Physics, Chemistry, Agrarian Production, Geography and History, Philology and Linguistics, Economics, Statistics, Engineering, Automation and Computer Science, Health Sciences, Environmental Sciences, Private and Public Law, and Psychology. Teaching and student facilities are excellent.

This site is available to exchange students provided they have university-level Spanish, and depending on student demand in a given year.

www.unavarra.es

Salamanca

Salamanca is a small university town some two-and-a-half hours by road from Madrid, in the Autonomous Community of Castilla y León. The old city centre, where the university itself is located, contains some of the finest examples of medieval, renaissance and baroque architecture in Spain.

In their first semester, students undertake Spanish language and culture classes from the Cursos Internacionales program. In their second semester they enrol in classes from the general undergraduate program in a range of faculties, depending on university admission requirements.

Established in 1218, the Universidad de Salamanca is one of the oldest universities in Europe, and currently attracts thousands of foreign students each year. Undergraduate students number close to 40,000. Located in the historical centre of Salamanca, the university has an illustrious academic history. Among its graduates and teachers are many of Spain's most important jurists, scientists, doctors, philosophers and writers. Classes are held in buildings built centuries ago. In 1987 construction of a new campus, Miguel de Unamuno, on the edge of the city centre was undertaken to satisfy the growing needs of students and staff. The university has 16 faculties and seven university schools, and offers study and research in many areas, notably humanities, environmental science, social sciences, law, economics and pharmacology. Its humanities faculty is well regarded internationally for its courses in linguistics, languages and translation.

This site is not available to UTS exchange students.

www.usal.es

Santander

Santander, the largest city in the Autonomous Community of Cantabria, is a medium-sized city of 200,000 inhabitants, located on the northern coast of Spain and home to the best surfing beaches in the country. The campus is centrally located, surrounded by modern residential areas popular with students, and easily accessible by public transport from other parts of the city.

Students who select Santander for their period of in-country study spend two consecutive semesters studying language and culture at la Universidad de Cantabria (UC) through arrangements made by UTS: International Studies. In the first semester students further their Spanish language skills and, if their Spanish levels permit, they have access to other subjects as determined by the university. During the

second semester students select a number of electives from a list of options on contemporary Spanish history, culture, politics, economics and society. UC is a modern university currently enrolling around 13,000 students. It has a modern campus with all necessary facilities. Student flats are close to the campus and there is good public transport to other areas of the city.

This site is available to exchange students provided they have university-level Spanish, and depending on student demand in a given year.

MAJ08932 Switzerland

Located in the centre of Europe, Switzerland shares borders with France, Germany, Italy and Austria. The nation has four official languages (French, German, Italian and Romansh) with each one spoken in a different region.

Switzerland is known for spectacular natural landscapes, great skiing, festivals, fine chocolates, wine and cheese. Beyond these stereotypes, the country is also a major player in banking, politics, diplomacy and other areas of global cooperation, hosting the United Nations and the International Red Cross, among other organisations. Culturally diverse, the country is organised on a federal system (cantons) with a unique form of participatory democracy.

Language strands in the Switzerland major

There are no restrictions on entry to the Switzerland major and there are three individual language strands to choose from:

- Switzerland (German)
- Switzerland (French)
- Switzerland (Italian)

No previous knowledge of the German, French or Italian language is required. However, students who have already studied one of these languages can enter the degree and continue with their language study at a higher level at UTS before going to study in Switzerland.

The major also has a fourth option known as the Switzerland (bilingual) strand. If a student is already proficient in one of Switzerland's languages (French, German or Italian) before commencing their International Studies degree at UTS, this strand allows them to study an additional language. This is a popular option for students who have grown up speaking French, German or Italian and/or have studied one of these languages in high school (or equivalent), and who wish to pick up an additional language at university. Students can choose any bilingual combination, for example: French and German; Italian and German; or Italian and French.

Note: the bilingual option is not available to students who are starting their degree as beginners or with only limited proficiency in French, German or Italian. Those students should choose one of the three individual language strands listed above.

In-country study locations

Depending on the language(s) chosen, students in the Switzerland major spend two consecutive semesters studying at one of the following UTS partner universities during their in-country study year:

- Université de Lausanne
- Universität Bern
- Universität Zürich
- Université de Fribourg
- Université de Neuchâtel

Università della Svizzera italiana (Lugano)

Students in the Switzerland (bilingual) strand may study at two different universities during their in-country study year.

Students are assessed on each semester separately. Assessment is based on the subjects studied at the host university, as well as project work administered by UTS: International Studies.

The costs of living in Switzerland are generally slightly higher than in Australia. On the whole, accommodation is cheaper than in Sydney but eating in restaurants is considerably more expensive. It is, however, possible to spend a year there on an amount roughly comparable to living away from home in Sydney.

Neuchâtel

Neuchâtel is located in the French-speaking part of Switzerland on the north-western shore of the Lake of Neuchâtel. The city is located between the Jura mountains and the Alps and is surrounded by countryside and vineyards. It is also in the heart of the Swiss watchmaking region.

The Academy of Neuchâtel was founded in 1838 and the full university was established in 1909. Approximately 4000 students attend the university. Eighty per cent are Swiss nationals and 20 per cent are international students. The university is a public university and is also part of the 'BeNeFri' Network (linking the Universities of Bern, Neuchâtel and Fribourg, allowing students to study at all three campuses in the nearby cities). The university has five faculties: Humanities; Science; Law; Economics; and Theology.

Semester dates are mid-February to early June for the summer semester and mid-September to end December for the winter semester.

www.unine.ch

Lausanne

Lausanne, in French-speaking Switzerland, is built on a series of steep hills with views of Lake Geneva and the snow-capped mountains of the Alps in the distance. The Université de Lausanne (UNIL) has around 10,000 students and seven schools (Law; Arts; Social and Political Sciences; Business; Science; Medicine; and Religious Studies) mainly located at Dorigny, a 10-minute metro ride from the city centre.

Semester dates are mid-February to early June for the summer semester and mid-September to end December for the winter semester.

www.unil.ch

Bern

The capital of Switzerland, Bern was founded in the 11th century and its old city ('Altstadt') has UN World Heritage listing. The city lies in the centre of Switzerland about 20km north of the Alps.

The University of Bern was founded in 1834 and has seven faculties comprising: Humanities; Social Sciences; Law; Theology; Economics; Medicine (including Veterinary Medicine); and Natural Sciences. The university is located in the city's traditional student quarter, 'Länggasse', and is very close to the main railway station. The university is also part of the 'BeNeFri' Network (linking the Universities of Bern, Neuchâtel and Fribourg, allowing students to study at all three campuses in the nearby cities).

Semester dates are mid-February to early June for the summer semester and mid-September to end December for the winter semester.

www.unibe.ch

Zürich

Zürich is the largest city in Switzerland, with an international atmosphere and a vibrant cultural life. It is located on the shores of Lake Zürich about 30km north of the Alps.

The University of Zürich was founded in 1833 and is one of the highest ranked universities in Europe. Its seven faculties are: Theology; Arts (including Social Sciences); Mathematics and Sciences; Law; Economics; Medicine; and Veterinary Medicine. With around 2000 academic staff and over 20,000 students, the University of Zürich is the largest institution of higher education in Switzerland, offering the widest range of courses.

Semester dates are mid-February to early June for the summer semester and mid-September to end December for the winter semester.

www.unizh.ch

Fribourg

Fribourg was founded in 1157 and its old part of town, with a Gothic cathedral, narrow streets, wooden and stone bridges, museums and cafes, constitutes one of the most beautiful and well-preserved medieval cities in Europe. While the majority of the population is French-speaking, the city is on the border with the German-speaking part of Switzerland and the university offers classes in German as well as French. The healthy population of students that live in the town contribute to the vibrant rhythm of life in Fribourg and are an integral part of its unique atmosphere.

The university developed from the initial Academy of Law established in 1763. The current buildings are located around the city (thus a 'city' university rather than a 'campus' one). The university is also part of the 'BeNeFri' Network (linking the Universities of Bern, Neuchâtel and Fribourg, allowing students to study at all three campuses in the nearby cities).

The university currently teaches approximately 10,000 students: 82 per cent are Swiss nationals and 18 per cent international students.

Semester dates are mid-February to early June for the summer semester and mid-September to end December for the winter semester.
www.unifr.ch

Lugano

Lugano is located in the Italian-speaking province of Ticino in the south of Switzerland. The city lies on the shores of Lake Lugano and is approximately 10km from the border with Italy. The surrounding mountains and lakes, and the fact that Lugano lies south of the Alps, gives it a milder climate than most of Switzerland.

The Università della Svizzera italiana (the 'University of Italian Switzerland') in Lugano is the only Italian-speaking university outside Italy. It therefore serves as a bridge between the northern Italian region Lombardy and the rest of Switzerland, with the goal of preserving the language and culture of Italian-speaking Switzerland. The university comprises four faculties and has a student population of around 3000. Semester dates are mid-February to early June for the summer semester and mid-September to end December for the winter semester.

MAJ08933 Canada

The French language, traditionally the language of diplomacy, is shared by many other countries throughout the world, and the Francophone element of this major reflects this by including partner universities in Québec. A participant in the G8 group, Canada claims a place on the world stage in terms of economics, business, politics and culture. Geographically huge, the country extends from the Atlantic to the Pacific, and combines the extremes of snowy winters and hot summers. The history of Canada can be traced back to its indigenous peoples through colonisation by France and the United Kingdom, to independence. More recently, calls for autonomy have been made from Québec, culturally distinct, and with a reputation for artistic, cinematic and literary production second only to France in the Francophone world.

Students spend two consecutive semesters studying at Université Laval, Québec City.

The location and content of each student's period of In-country Study in Canada (Québec) is determined by the level of their language competence in French. Generally speaking, students who have a sound working knowledge of French before their entrance to UTS (usually defined as HSC 3-unit or a good pass in 2-unit French) can study an appropriate two-semester program of host university subjects broadly relating to Francophone language, society and culture.

All other students spend a first semester engaged in the study of language and culture, going on to a second semester of subjects chosen more broadly from the university's curriculum.

Students are assessed on each semester separately. Assessment is based on the subjects studied at the host university, as well as assessments administered by UTS: International Studies.

Students should be aware that costs of living in Canada are generally slightly higher than in Australia, though the cost of student accommodation is reasonable and it is possible to spend a year on an amount roughly comparable to living away from home in Sydney.

Location

Québec City

Described as the cradle of French civilisation in North America, Québec City is the capital of the province. Dating back to 1608, when the city began as a fur-trading post, Québec's architecture reflects its position as a crossroads between Europe and America, earning it a place among UNESCO's world heritage sites. With a culture combining French, British, North American and indigenous traditions, the city has a population of over half a million. The natural environment is equally magnificent: with the St Lawrence river at its heart, the province is characterised by forests, lakes and mountains and enjoys contrasting climates of hot summers, snowy winters (ideal for skiing, snowboarding, skating and other activities, as well as providing a Christmas card cityscape) and spectacular Autumns. Université Laval, founded in 1852, is the oldest French language university in America. Its student population of almost 35,000 enjoys

a rich calendar of extra-curricular activities. Faculties include Science and Engineering, Health Sciences, Arts, and Social Sciences and Management, and students can choose from a wide range of options relating to French and Québécois culture and society.

MAJ08938 Technology Management

In a world where innovation is a key to success, leaders are called to the fore to manage people and projects. The Technology Management major is designed for students who have a technical background or a keen interest in technology and therefore a strong alignment with analytical approaches. From this platform the objectives are underpinned by the desire to expose students to a broader body of knowledge and range of approaches than experienced in a purely technical framework.

A key issue is the benefit that accrues from supplementing analytical and mathematical modelling approaches with business and social science skills. Much of the value and strength of the Technology Management major relate to consideration of approaches and perceptions that are extensions of, or build upon, an engineering/scientific view point. The differences between technocratic approaches and human and societal constructs are brought into sharp focus broadening the perspectives of students.

The major is specifically designed to enhance understanding of the need for technology, people and society to be viewed as closely interrelated aspects of all engineering and business activity.

MAJ08940 Finance

Virtually all individuals and organisations earn or raise money and spend or invest money. Financial Management is concerned with the process, markets and instruments used in the transfer of money between individuals, firms and government.

The Financial Management major provides participants with the opportunity to acquire knowledge of finance theory and techniques in the areas of investment and financing decisions, forecasting and planning, risk management and interactions with capital markets. Learning strategies that cover both contemporary financial theory and leading-edge techniques in the practice of financial decision-making are used in the presentation of the major.

MAJ08954 Argentina

Argentina is the second largest country in Latin America and the eighth largest country in the world, with a population of some 41 million. Argentina is also a country formed by immigration, the majority of the population having Spanish and Italian ancestry. There are also significant mestizo and indigenous populations. Argentina is officially a federation comprising 23 provinces and one autonomous city, Buenos Aires, the capital. The geography of the country is diverse, and includes the vast grasslands of the pampas, the region of Patagonia, and the eastern side of the Andes mountain range; this diversity in turn is responsible for equally diverse climates, from Amazonian tropical conditions to the subpolar conditions of the extreme south. Australia is developing strong links with Argentina, and the local Argentine community is one of Australia's largest Spanish-speaking communities. Argentina emerged from military dictatorship in 1983 and, despite periods of economic collapse and hyperinflation in the 1990s and early 2000s, is now economically and politically stable. Argentina's rich cultural traditions range from the tango and the mythologised figure of the gaucho (Argentina's cowboy) to a literary tradition that has been extraordinarily influential throughout the continent.

Students spend two consecutive semesters studying social science or culture and humanities subjects at one or more institutions of higher education in Argentina through arrangements made by UTS: International Studies. The focus of study varies each semester depending on individual student preferences and the availability of subjects at host institutions. Students are assessed on each semester separately and assessment is based on the subjects undertaken at the host institutions, as well as assessments administered by UTS: International Studies.

Students may expect that no greater costs are incurred through undertaking a period of in-country study in Argentina than are involved in living away from home in Sydney.

Locations

Buenos Aires

Buenos Aires is the capital and largest city in Argentina. It is situated on the southern shore of the Río de la Plata, on the southeastern coast of the South American continent. It was first established in 1536 by a Spanish expedition led by Pedro de Mendoza. Buenos Aires is today an autonomous federal district with a population of around 13 million. It is also the financial, industrial, commercial and cultural

hub of Argentina. Its port is one of the busiest in South America. People in Buenos Aires are called porteños: people of the port. Deeply influenced and self-consciously modelled after its European heritage, Buenos Aires - sometimes called the 'Paris of South America' - is the site of Teatro Colón, one of the world's great opera houses. The city has several symphony orchestras and choral societies, and numerous museums related to history, fine arts and modern arts. It harbours many public libraries and cultural associations, as well as the largest concentration of active theatres in Latin America. The city has a humid subtropical climate. The average year temperature is 17.6 degrees centigrade, and average high temperatures range from 30.4 in January, to 14.9 degrees centigrade in winter.

La Universidad Católica Argentina (UCA) is among the largest and most prestigious private universities in Argentina. It is located in Puerto Madero, one of the oldest suburbs of Buenos Aires. Since its establishment in 1958, UCA has pioneered important educational reforms and attracted prominent academics from diverse fields. Identified closely with its Christian tradition and ethos, UCA promotes academic excellence, personal growth, social justice, and a humanist education.

UCA's faculties include: Ciencias Agrarias, Ciencias Fisicomatemáticas e Ingeniería, Ciencias Médicas, Ciencias Sociales y Económicas, Derecho, Derecho Canónico. Filosofía y Letras, Psicología y Educación, y Teología. Its offerings include: economía, comercio, administración, marketing, ciencias políticas, relaciones internacionales, derecho, ingenierías, informática, filosofía, literatura, historia, música, musicología, educación, periodismo, publicidad, comunicación institucional, agricultura, tecnología de los alimentos, teología y estudios latinoamericanos.

MAJ09209 Economics

The study of economics provides students with a greater understanding of how people, businesses and governments make decisions based on their economic environment. Many current issues discussed in public forums and of concern to business are economic in nature. Economics seeks to understand these issues by developing a systematic approach to analysing resource allocation, price determination, income distribution, economic growth and the welfare consequences of economic policies.

A major in economics provides students with powerful tools to systematically evaluate economic behaviour and policy for a wide range of economic problems: firm and consumer behaviour, labour markets, government tax and expenditure policy, education, environmental and resource management, regulating financial systems and managing the aggregate economy. Key analytical tools include microeconomic and macroeconomic theory, empirical analysis using econometric modelling, and game theory.

Economists have a wide range of career options. Employers recognise the ability of those trained in economics to think analytically and clearly about a wide range of issues. Economics majors are also well prepared for employment in diverse areas including business, government, consulting, public policy, industrial relations, international relations, media and environmental studies. Economics is a foundation for postgraduate study in many fields.

Students intending to apply for the honours program in economics should take two of the following optional subjects: 23592 Game Theory, 23565 Mathematics for Economics and Business, 23572 Applied Microeconometrics.

Anti-requisites: MAJ09402 Extended Economics, SMJ09028 Economics

MAJ09362 Business Law

The business person of today cannot operate successfully without an understanding of the legal and regulatory environment within which they operate. This major includes wide ranging options which provide an attractive choice to students to select from to meet their interests and professional needs in the global context. This major develops skills to enable students to strategically assess, critically interpret and judiciously apply information for decision-making in the contemporary dynamic business environment. The major provides students with an understanding of the impact of regulation and the law to progress a career in the global business environment. Students develop an awareness and understanding of social, legal and ethical responsibilities in business for a sustainable future.

MAJ09380 Latino USA

With a population of some 307 million and composed of 50 states, the United States of America is the third-largest nation in terms of size and population in the world. It is the only 20th century superpower to enter the 21st century with its power intact and still boasts the world's largest national economy, the strongest military and extraordinary cultural influence on a global level. The capital is Washington DC and its two biggest and most cosmopolitan cities are New York on the east coast, and Los Angeles on the west coast. Absorbing wave after wave of migrants from all over the world since the original 13 American colonies broke with Great Britain in 1776, the USA is one of the most culturally and racially diverse of nations. This fact, however, has not translated into multicultural harmony, with many members of the nation's African-American, Native American and Latino (Hispanic) populations continuing to experience racism, discrimination and socioeconomic marginalisation, despite the profound impact these groups have had on US culture, politics and society.

The Latino USA major is based on the premises that the USA is one of the world's largest Spanish-speaking countries, and that latinisation is inexorably transforming the USA, and hence Australia's understanding of that country. Already in many cities, Spanish has joined English as a de facto second language and, in some parts of the USA, Spanish has or is approaching majority status. The Latino population of the USA currently stands at some 50 million, a figure that does not include so-called illegal residents, estimated at between 12 and 15 million people, or the four million residents of Puerto Rico. It is estimated that by 2050, Latinos will comprise more than 25 per cent of the US population. Most observers posit that Latinos will be a majority in their own right by the end of the 21st century.

The Latino USA major is designed for students to learn about and experience first hand the demographic, cultural, linguistic, socioeconomic and political processes of latinisation in the USA. The major prepares students for understanding how those latinising processes will transform the USA, and how other parts of the world regard and relate to that country. Students who select this major take advantage of the current demographic, political, socioeconomic, cultural and linguistic transformation of the USA, giving them important skills for any professional area conducted in the Pacific region. The Latino USA major allows students to learn Spanish, to learn about the history and cultures of the USA's heterogeneous Latino sectors, and to spend an academic year of study at universities in parts of the USA with large Latino populations. This major focuses on the 'core' and longest-established Latino sectors: Chicanos and Mexican-Americans, the largest Latino population and the one swelled by continuing mass migration from Mexico; US-resident Puerto Ricans; and Cuban-Americans. But the major also provides space for deeper understanding of other significant Latino communities.

Students spend two consecutive semesters studying Spanish language and Latino cultures at one of the sites below through arrangements made by UTS: International Studies. The sites are located in areas of the USA with substantial Latino populations, thus enabling international studies students to speak Spanish on a daily basis and to undertake research projects based on and in Latino communities.

- San Diego State University
- University of Arizona, Tucson

- University of Texas at El Paso
- University of Miami, Florida.

Students are assessed separately each semester, based on subjects undertaken at the host institutions, as well as assessments administered by UTS: International Studies.

Due to current exchange rates students may expect that greater costs are incurred through undertaking a period of in-country study in the USA than are involved in living away from home in Sydney.

Semester dates

- Semester 1: early January to mid-May (US Spring semester)
- Semester 2: early August to mid-December (US Fall semester)

Locations

San Diego, California

Located in the southwest corner of California on the US-Mexico border and faced by the Mexican city of Tijuana, San Diego is the seventh largest city in the USA with a population of 1.3 million, and a greater metropolitan population of three million. Its Latino population is around 30 per cent of the total. Some 195 kilometres south of Los Angeles, San Diego has long served as a point of cultural transition between California and Mexico. The city's coastal location means that residents have ready access to a string of fine beaches and some of the best surfing on the US west coast. The climate is mild, daytime temperatures rarely straying over 30 degrees in summer or dropping below 20 in the winter.

San Diego State University (SDSU) is the largest university in San Diego and the third largest in California. SDSU is home to nearly 33,000 students and approximately 6400 academic faculty and administrative staff. The main SDSU campus is located in a Mexican-American stronghold, and is connected by regular buses to downtown San Diego, the trip taking approximately half an hour. The campus is compact, most of its streets have Aztec/Náhuatl names, and the buildings are in a fetching neo-Spanish colonial style, surrounded by impressive cactus gardens and lush landscaping. Another campus is located 160 kilometres to the east at El Centro, a migrant feeder town on the California-Mexico border whose population is predominantly Spanish-speaking. SDSU offers undergraduate programs at both campuses in Arts and Letters (Humanities), Business Administration, Education, Engineering, Health and Human Services, Professional Studies and Fine Arts (this faculty includes journalism, tourism, TV / media production, communication, art, design and art history) and the Sciences.

In-country study students and students on exchange have the option of studying at either campus. If based at the main campus, students undertake subjects in Spanish language and culture and Latino and border studies, and may take classes at one of two Mexican universities located across the border in Tijuana in consultation with SDSU teaching staff and the in-country study major coordinator approval. Students based at El Centro undertake the same academic program, but also have a social awareness program built into their academic studies.

In-country study students (Latino USA major) and general exchange students must have a credit average or above to apply. This program is not open to MBA students. Note that there are different requirements for in-country study and exchange students in terms of their study programs at SDSU.

www.sdsu.edu

Tucson, Arizona

Arizona, Tucson, is a thriving desert city of some 525,000 people, and a greater county population of one million, in the south of Arizona, some 100km from the US-Mexico border and the twin cities of Nogales. Bounded by four groups of mountains, Tucson is located in one of the most spectacular desert environments in the USA, home to a huge range of cacti. Given its border and desert location, Tucson has also been one of the most significant US settings for contact and interaction between Anglo-Americans, indigenous peoples and Mexicans. The Tohono O'odham and the Yaqui nations have a significant presence in the city and in nearby reservations. The Latino population of Tucson is around 40 per cent and growing steadily.

UTS students who select the University of Arizona, Tucson for in-country study, undertake classes in Spanish language and Latino, Chicano and Border studies in both semesters of in-country study. Exchange students select subjects in their professional degree area with the approval of their faculty. The University of Arizona is a university with over 34,000 students. It is one of the top ranked research universities in the USA. The main campus of the University of Arizona is located in the heart of Tucson. UA has 18 colleges and 12 schools, which cover such disciplines as humanities, fine arts,

agriculture and life sciences, architecture, planning and landscape architecture, education, engineering and mines, pharmacy, public health, science, and social and behavioral sciences. In-country study students undertake subjects in Spanish language and culture, and US Latino studies.

www.arizona.edu

El Paso, Texas

Located on the US-Mexico border at the conjunction of the US states of New Mexico and Texas, and surrounded by the Chihuahuan Desert, El Paso is a thriving border city with a population of some 610,000. Latinos, mostly Mexican American, comprise 80 per cent of the city total, and Spanish is the city's dominant language. Across the Rio Grande (Rio Bravo del Norte) lies the Mexican city of Ciudad Juárez, which has a population of some 1.6 million. Together the two cities form a vast border-straddling metropolis.

UTS students who select the University of Texas at El Paso (UTEP) for in-country study, undertake classes in Spanish language and Latino, Chicano and Border studies in both semesters of in-country study. Exchange students select subjects in their professional degree area with the approval of their faculty. UTEP is the second largest university in the vast University of Texas system. UTEP is a state-run university whose teaching and research program elides neatly with that of UTS. UTEP emphasises professional education, public outreach and the internationalisation of its students' learning experiences. Given its location on the border with Mexico, and in a city that is 75 per cent Mexican American, UTEP also has the highest percentage of Mexican American students of any US university (72 per cent, plus 10 per cent Mexican nationals). UTEP is nationally recognised for its innovative teaching methods and programs designed to help students succeed, and for its vigorous programs of community outreach on both sides of the US-Mexico border. UTEP has some 19,000 students (18 per cent of whom are at graduate level); 82 per cent come from El Paso county (the second poorest county in the USA) and 55 per cent of all students are women. Approximately 58 per cent of UTEP's students are first-generation college students.

www.utep.edu

Miami, Florida

One of the most cosmopolitan and latinised cities in the United States, Miami has a population of 425,000, and its surrounding metropolitan area, the Miami-Dade Metropolitan Area, has an overall population of 5.4 million people, making it the fourth largest urban area in the USA after New York City, Los Angeles and Chicago. On the edge of the famous Florida everglades, and straddling a series of lagoons and islands, fast-paced Miami has also become one of the financial and economic powerhouses of the US south-east. The city's proximity to the islands of the Caribbean has also made it a first port of call for the region's refugees and exiles; aside from the substantial Cuban-American community that started arriving en masse after the Cuban Revolution in 1959, the city also boasts large Nicaraguan, Haitian, Dominican, Honduran and Colombian populations. Latinos (Hispanics) make up 67 per cent of the total population, with the Cuban-American community alone representing 34 per cent of the total. These figures are predicted to increase dramatically over the next few decades. Spanish does not simply rival English; it is the city's first language.

UTS students who select the University of Miami for in-country study undertake classes in Spanish language and Latino studies in both semesters of in-country study. Exchange students select subjects in their professional degree area with the approval of their faculty. The University of Miami is a private university and one of the largest in south-eastern United States. The main campus is located on 260 acres of tropical vegetation in the City of Coral Gables, a suburb just south of Miami. The university's 13 colleges and schools offer study programs at all levels. While the Coral Gables campus houses nine schools and two colleges, the university has other specialist campuses and schools in downtown Miami, Virginia Key and Biscayne Bay. The university also maintains the Koubek Center in Little Havana, which offers a range of study programs in Spanish language and Latino culture. Other notable centres include the Center for Latin American Studies, and the Institute for Cuban and Cuban-American Studies.

MAJ09390 Corporate and Commercial Law

Note: This major is only available to students enrolled in the Master of Laws (C04143) (see page 382) and the Doctor of Juridical Science (C02027).

Market crashes and corporate collapses. The rise of multinationals wielding global influence and yet too often hitting the headlines, accused of scandal and questionable ethics. These are challenging times for corporate and commercial law. Imbued with a distinctively international focus, this specialisation explores and critiques current controversies, advances a deeper understanding of law and emphasises improvement in regulation, policy and practice.

MAJ09392 International Law

Note: This major is only available to students enrolled in the Master of Laws (C04143) (see page 382).

International Law allows students to delve into the ideals and lapsed promises of human rights, interrogate the effectiveness of existing financial market regulation, or explore the inner-workings of international criminal courts or cross-border intellectual property law. Discrete areas of law in their own right, these subjects are united in their global scope and affect. The subjects offered in the international law specialisation provide students with transnational expertise.

MAJ09400 Intellectual Property

Note: This major is only available to students enrolled in the Master of Laws (C04143) (see page 382) and the Doctor of Juridical Science (C02027).

The rise of the information economy - the age of ideas - has created new areas of law to keep pace. Intellectual Property covers the broad canvas of such rights, including trademarks, patents, designs and copyrights, as well as issues of infringement. As a rapidly developing area of law, this specialisation offers students both a critical grounding in the foundations of intellectual property and an examination of key tensions - such as piracy, infringement and international trade agreements, and how indigenous rights are weighed against commercial interests of major pharmaceuticals.

Note: Many of the subjects in this major are taught by distance only. International students should be aware that their visa may require them to enrol in at least 75 per cent of subjects via face-to-face teaching.

Completion requirements

Select 24 credit points from the following options:		24cp
77898	Patent Law	6cp

MAJ09401 Business Law

The Business Law major introduces students to legal issues that impact upon the business sector. This major builds upon introductory law subjects and gives students the opportunity to study a range of subjects that assist their careers.

Completion requirements

Select 48 credit points from the following options:		48cp
STM90558	Law for Business	48cp
STM90559	Foundations of Law stream	48cp
Total		48cp

MAJ09402 Extended Economics

Knowledge of both theoretical and applied aspects of economics provides students with a strong basis for understanding economic behaviour and for evaluating economic policy. This major provides the opportunity to obtain a more extensive knowledge of economics and its fields.

Subjects in the extended economics major address a wide range of economic problems and analytical techniques.

Students intending to apply for the honours program in economics should enrol in either 23592 Game Theory, 23565 Mathematics for Economics and Business and/or 23572 Applied Microeconometrics as optional subjects.

Anti-requisites: MAJ09209 Economics, SMJ09028 Economics

MAJ09409 Colombia

Colombia is one of the most fascinating, culturally and biologically diverse countries in Latin America and is located in the north-west of the South American continent close to Panama. It has a population of over 46 million people. It was originally the centre of Gran Colombia, a post-independence confederation of Colombia, Venezuela, Panama, and Ecuador. Colombia is bordered to the northwest by Panama; to the north by the Caribbean Sea; to the east by Venezuela and Brazil; to the south by Ecuador and Peru; and to the west by the Pacific Ocean. It has a vast range of climatic conditions, from the snow-capped Andes and volcanoes, to the Amazonian jungle, the Guajira desert and fertile savannahs. Bogotá is the capital of Colombia and is located in the centre of the country at an elevation of about 2650m (8660ft) above sea level on a mountain rimmed savannah high in the Cordillera Oriental of the Andes Mountains. This gives it constant spring like weather. It was founded in 1538 by the Spanish conquistador Gonzalo Jiménez de Quesada. The new city became the vice-regal capital of New Granada in 1717. It was captured by Simón Bolívar in 1819 and was the capital of the independent nation of Great Colombia. Bogotanos preserve and cherish their churches, convents, homes (built in the ornate Spanish colonial style) and these influences are still visible. Bogotanos pride themselves on claiming their city as the Athens of South America and the city is Colombia's largest financial, political, cultural and educational centre. Its 7.3 million inhabitants include a multitude of immigrants from all over the world, which makes the capital a true microcosm of the nation. Modern highrises and skyscrapers contrast with old houses of colonial and republican architecture. Bogotá offers residents and visitors everything that a modern city can give. Cultural activities abound and its enormous selection of restaurants, bars and nightclubs offers all kinds of food and entertainment. Industries include printing and publishing, motor vehicle assembly, food processing, and the manufacture of beverages, textiles, metals goods, machinery, and electrical equipment. Many banks and corporations maintain their headquarters in the city. Railroads and highways, including the Pan-American Highway, link the city with other major centres.

Locations

Bogotá

Universidad de los Andes

The University of the Andes (Universidad de los Andes) is one of Colombia's best public universities, home to approximately 17,000 students. It is located in the centre of the city against the base of the mountains and has handsome views of the city and is close to other major universities. It is a coeducational, nonsectarian private university located in city centre Bogotá, Colombia. The University has nine faculties: Administration, Architecture and Design, Arts and Humanities, Sciences, Social Sciences, Law, Economics, Engineering and Medicine, which offer undergraduate and postgraduate programs; and the Center for Research and Training in Education (CIFE), and

the Interdisciplinary Center for Development Studies (CIDER), for postgraduate programs. It is ranked as a top tier university in Latin America, occupying sixth place in the subcontinent according to the QS Times Higher Education classification. The university was founded in 1948 by a group of Colombian intellectuals and was the first university in the country to be nonsectarian, that is, independent of political parties or influence from the state or the church. Today, the University seeks to model itself after major research universities through strategies such as greater focus on graduate education and research.

Academic calendar

- Semester 1: mid-January to early May
- Semester 2: mid-August to late November
- Summer semester: early June to late July

Pontificia Universidad Javeriana

The Pontificia Universidad Javeriana is one of the oldest private universities in Colombia, founded in 1623. Its main facilities are in Bogotá and a second campus in Cali. It has 18 schools comprising 61 departments and 181 academic programs catering to different areas of knowledge, giving the university its multidisciplinary nature. The Javeriana University in Cali offers 18 schools in four different faculties. It is located in Pance in Southern Cali and is considered to be a very prestigious university. The Javeriana has a Latin American Centre, which teaches Spanish language and culture classes. These classes are complimentary. The language centre is the oldest such language centre attached to a university in Colombia (established in the 1940s). It includes field trips (coffee plantations, craftwork centres, etc.) as part of its offerings. Students learn the vocabulary associated with the activities at the destination and then put them into practice on the fieldwork trip. The Alfonso Borrero Cabal, S.J. Library is open 24 hours a day during the week. Javeriana's students have the opportunity to participate in internship programs and in social projects, in Bogotá or nationwide, where they can apply the acquired knowledge in their field of study. Javeriana University is a research-based University. It is ranked first among private universities in Colombia for having the largest number of refereed journals, and fifth for having the most research groups recognised by the National Agency of Science and Technology for their quality and productivity. The Sport Centre offers over 30 different sports. The University has a student population of 22,000 on its main campus in Bogotá and is easily accessible by public transportation. Javeriana University offers through Centro Atico next generation resources, enhancing the learning experience. Centro Atico is the first communication and information technological resource centre in Latin America for the development of education, sound, image and design. Javeriana University has its own, high quality University Hospital.

Universidad de La Sabana, Chía, Bogotá

La Sabana is a private university situated to the north of Bogotá in the satellite city of Chía, a mostly middle-class city with Spanish colonial architecture located in the beautiful dairy cattle country of the Savannah surrounded by the Colombian Andes. The university was founded in 1979. It has recently gone through an ambitious expansion with high-tech buildings (eco-friendly designs) to house ultra-modern radio, TV and journalism courses. The university has an ultra-modern Communication's Media Production Centre. La Sabana specialises in Business/Marketing, Engineering (all types), Medicine (it offers PhDs in Engineering and medicine), Nursing/Physiotherapy/Psychology, Education, Communication/Journalism, Law (especially human rights), and it has a Humanities Institute. The university also has a clinic, a health institution that deals with all medical disciplines and is one of the most important rehabilitation centres in Latin America. The clinic is an important centre for research, teaching and community service. The university currently runs 18 undergraduate programs. There are also 31 specialisation programs and five master's programs: Education, Process Management and Direction, Business Administration, Nursing, and English Language Teaching. La Sabana has a doctoral program in Biosciences. Master's programs in Nursing include Critical Pediatric Care, Rehabilitation Management and School Health.

MAJ09410 Global Business Law

The world is increasingly becoming interconnected and the legal profession is no exception. Modern lawyers need a global perspective and the Global Business Law major is targeted at students who need to understand how legal issues and legal disputes are dealt with in an international context. This specialisation explores a broad range of important contemporary issues by considering how international law affects domestic legal relations and how legal relationships are regulated internationally.

Completion requirements

Select 24 credit points from the following options:		24cp
78101	Postgraduate Legal Research	6cp
78026	Business and Law in China	6cp
78153	International Commercial Transactions	6cp
78158	Private International Law	6cp

MAJ09425 Dispute Resolution

Mandatory dispute resolution provisions are increasingly applicable to both private and public transactions and relationships. Dispute resolution practice has become an increasingly mainstream phenomenon with the recent emergence of national accreditation for family dispute resolution practitioners and mediators. The suite of subjects offered in this major reflects the increasing presence of dispute resolution processes and practitioners in the civil, criminal and family law jurisdictions, in the workplace, in commerce and industry, and in domestic and international trade. This specialisation balances the theoretical and procedural aspects of practice as well as exploring the potential and challenges of this developing field.

MAJ10030 Global Business Law

This major is designed to have appeal to both local and international students and is based on an appreciation of the requirements of legal practitioners working in overseas law firms, as well as providing people working locally with key concepts of the international framework of business. Students undertaking this major are able to increase their knowledge and understanding in the key areas of international commercial transactions and corporate governance, finance, competition law, intellectual property protection and commercialisation and dispute resolution. Offerings addressing the rise of China's economy assist students in gaining a global perspective and ability to engage with Australia's Asian partners.

Completion requirements

Select 24 credit points from the following options:		24cp
78100	Postgraduate Legal Research	8cp
78175	Negotiation	8cp
78118	Business and Law in China	8cp
78152	International Commercial Transactions	8cp
78157	Private International Law	8cp
78124	Dispute Resolution in Commerce	8cp
78171	Crisis Negotiation	8cp
78174	Mediation Practice	8cp

SUB-MAJORS

SMJ01005 Chemistry

This sub-major provides an appropriate knowledge base for business students who aim to enter chemical or related industries. It is offered at City campus only.

Completion requirements

65111	Chemistry 1	6cp
65212	Chemistry 2	6cp
Select 12 credit points from the following options:		12cp
65202	Organic Chemistry 1	6cp
65306	Analytical Chemistry 1	6cp
65307	Physical Chemistry 1	6cp
65411	Inorganic Chemistry 1	6cp
65410	Chemical Safety and Legislation	6cp
Total		24cp

SMJ01007 Mathematics

The Mathematics sub-major provides students with an interest in the applications of mathematics with the opportunity to apply this to a business setting.

Completion requirements

35101	Introduction to Linear Dynamical Systems	6cp
35102	Introduction to Analysis and Multivariable Calculus	6cp
35212	Computational Linear Algebra	6cp
35140	Introduction to Quantitative Management	6cp
Total		24cp

SMJ01009 Statistics

This sub-major focuses on statistical techniques for the analysis of data used in industry and commerce.

Completion requirements

35101	Introduction to Linear Dynamical Systems	6cp
35353	Regression Analysis	6cp
Select 12 credit points from the following options:		12cp
35100	Introduction to Sample Surveys	6cp
35355	Quality Control	6cp
35356	Design and Analysis of Experiments	6cp
35363	Stochastic Models	6cp
Total		24cp

SMJ01010 Electronics and Computer Interfacing

68101	Foundations of Physics	6cp
68201	Physics in Action	6cp
68316	Applied Electronics and Interfacing	6cp
68415	Measurement and Analysis of Physical Processes	6cp
Total		24cp

SMJ01011 Operations Research

This sub-major is concerned with the application of mathematical techniques to provide decision support for industry and commerce.

Completion requirements

35101	Introduction to Linear Dynamical Systems	6cp
35140	Introduction to Quantitative Management	6cp
35241	Optimisation in Quantitative Management	6cp
Select one of the following:		6cp
35342	Nonlinear Methods in Quantitative Management	6cp
35344	Network and Combinatorial Optimisation	6cp
35363	Stochastic Models	6cp
Total		24cp

SMJ01012 Physics

68101	Foundations of Physics	6cp
68201	Physics in Action	6cp
68315	Imaging Science	6cp
Select one of the following:		6cp
68414	Advanced Mechanics	6cp
68415	Measurement and Analysis of Physical Processes	6cp
Total		24cp

SMJ01025 Quantitative Management

35101	Introduction to Linear Dynamical Systems	6cp
35241	Optimisation in Quantitative Management	6cp
Select 12 credit points from the following options:		12cp
35342	Nonlinear Methods in Quantitative Management	6cp
35363	Stochastic Models	6cp
35344	Network and Combinatorial Optimisation	6cp
35340	Quantitative Management Practice	6cp
Total		24cp

SMJ01026 Quantitative Management

35101	Introduction to Linear Dynamical Systems	6cp
35241	Optimisation in Quantitative Management	6cp
Select 12 credit points from the following options:		12cp
35342	Nonlinear Methods in Quantitative Management	6cp
35344	Network and Combinatorial Optimisation	6cp
35340	Quantitative Management Practice	6cp
Total		24cp

SMJ01029 Quantitative Methods

35101	Introduction to Linear Dynamical Systems	6cp
35241	Optimisation in Quantitative Management	6cp
35353	Regression Analysis	6cp
35363	Stochastic Models	6cp
Total		24cp

SMJ01030 Statistics (Life Sciences)

35101	Introduction to Linear Dynamical Systems	6cp
35353	Regression Analysis	6cp
35356	Design and Analysis of Experiments	6cp
Select 6 credit points from the following options:		6cp
35255	Forensic Statistics	6cp
35363	Stochastic Models	6cp
35100	Introduction to Sample Surveys	6cp
Total		24cp

SMJ01031 Statistics (Physical Sciences)

35363	Stochastic Models	6cp
35353	Regression Analysis	6cp
35252	Mathematical Statistics	6cp
35361	Stochastic Processes	6cp
Total		24cp

SMJ01032 Statistical Modelling

35151	Introduction to Statistics	6cp
35353	Regression Analysis	6cp
Select 12 credit points from the following options:		12cp
35100	Introduction to Sample Surveys	6cp
35355	Quality Control	6cp
35356	Design and Analysis of Experiments	6cp
35363	Stochastic Models	6cp
Total		24cp

SMJ01043 Business Information Systems Management

Select 24 credit points from the following options:		24cp
31257	Information System Development Methodologies	6cp
31255	Finance and IT	6cp
31247	Collaborative Business Processes	6cp
31245	Business Process and IT Strategy	6cp
31258	Innovations for Global Relationship Management	6cp
31276	Networked Enterprise Architecture	6cp
31282	Systems Testing and Quality Management	6cp
Total		24cp

SMJ01044 Enterprise Systems Development

48024	Applications Programming	6cp
31260	Interface Design	6cp
Select 12 credit points from the following options:		12cp
31251	Data Structures and Algorithms	6cp
48440	Software Engineering Practice	6cp
31253	Database Programming	6cp
48433	Software Architecture	6cp
Total		24cp

SMJ01045 Internetworking and Applications

31277	Routing and Internetworks	6cp
31275	Mobile Networking	6cp
41900	Fundamentals of Security	6cp
Select 6 credit points from the following options:		6cp
31284	Web Services Development	6cp
31246	Network Design	6cp
31283	WANs and Virtual LANs	6cp
31285	Mobile Applications Development	6cp
31254	e-Commerce	6cp
41900	Fundamentals of Security	6cp
48730	Network Security	6cp
Total		24cp

SMJ01046 Computing and Data Analysis

31250	Introduction to Data Analytics	6cp
31284	Web Services Development	6cp
31259	Intelligent Agents	6cp
Select 6 credit points from the following options:		6cp
35241	Optimisation in Quantitative Management	6cp
35232	Advanced Calculus	6cp
35252	Mathematical Statistics	6cp
35322	Advanced Analysis	6cp
35335	Mathematical Methods	6cp
35340	Quantitative Management Practice	6cp
35342	Nonlinear Methods in Quantitative Management	6cp
35344	Network and Combinatorial Optimisation	6cp
35355	Quality Control	6cp
35356	Design and Analysis of Experiments	6cp
35361	Stochastic Processes	6cp
35391	Seminar (Mathematics)	6cp
35393	Seminar (Statistics)	6cp
Total		24cp

SMJ01048 Environmental Sciences

91110	Experimental Design and Sampling	6cp
91154	Ecology	6cp
91145	Environmental Protection and Management	6cp
Select 6 credit points from the following options:		6cp
91120	GIS and Remote Sensing	6cp
91121	Aquatic Ecology	6cp
Total		24cp

SMJ02015 Strategic Information Technology

Select 24 credit points from the following options:		24cp
32509	Interaction Design	6cp
32531	Global Information Systems	6cp
32536	Advanced Software Modelling	6cp
32702	Contemporary Telecommunications	6cp
32208	Information Systems Strategy	6cp
32148	Enterprise Computing	6cp
42900	Sustainability and Information Systems	6cp
Total		24cp

SMJ02036 Business Information Systems

This sub-major provides students with theoretical and practical knowledge of the way in which information systems contribute to effective business. The electives provide a closer look at a variety of key aspects of information systems development and use.

Completion requirements

31266	Introduction to Information Systems	6cp
31269	Business Requirements Modelling	6cp
Select 12 credit points from the following options:		12cp
31245	Business Process and IT Strategy	6cp
31257	Information System Development Methodologies	6cp
31247	Collaborative Business Processes	6cp
31258	Innovations for Global Relationship Management	6cp
31276	Networked Enterprise Architecture	6cp
31282	Systems Testing and Quality Management	6cp
31254	e-Commerce	6cp
31777	Human-Computer Interaction	6cp
Total		24cp

SMJ02037 Information Technology

This sub-major provides a general understanding of the main aspects of the IT field, from a slightly more technical perspective than SMJ02036. Students gain an appreciation of the complexity of IT development and the many possibilities for future uses of IT in business.

Completion requirements

Select 24 credit points from the following options:		24cp
31266	Introduction to Information Systems	6cp
31270	Networking Essentials	6cp
31061	Database Principles	6cp
31268	Web Systems	6cp
48023	Programming Fundamentals	6cp
Total		24cp

SMJ02038 Information Technology

This sub-major is designed for students who have an information technology background or a keen interest in information technology. It offers the participant either a platform entry for those with a non-IT background or a more specialised entry for those with an IT background. The innovative programs cover growth areas such as computer graphics and gaming, data mining, e-business technology, human-centred design, interactive multimedia, internetworking and strategic IT management.

The ability to understand both management and technology is increasingly valued by modern enterprises, and as society continues to become more and more technology dependent it is clear those who have effective knowledge and can manage technology are well suited for leadership positions; via this sub-major participants have the opportunity to acquire knowledge, strategies and skills that cover the applications and management of technology.

Completion requirements

Select one of the following:		24cp
STM90695	Core subjects	24cp
CBK90802	Choice	24cp
Total		24cp

SMJ02039 Computer Graphics and Animation

31264	Introduction to Computer Graphics	6cp
Select 18 credit points from the following options:		18cp
31262	Introduction to Computer Game Design	6cp
31263	Introduction to Computer Game Programming	6cp
31248	Computer Graphics Project	6cp
31241	3D Computer Animation	6cp
31249	Computer Graphics Rendering Techniques	6cp
Total		24cp

SMJ02040 Software Engineering

Select 24 credit points from the following options:		24cp
31030	Project	6cp
31005	Advanced Data Analytics	6cp
31250	Introduction to Data Analytics	6cp
31253	Database Programming	6cp
31259	Intelligent Agents	6cp
Total		24cp

SMJ02043 Internetworking

31283	WANs and Virtual LANs	6cp
31246	Network Design	6cp
48730	Network Security	6cp
31274	Network Management	6cp
Total		24cp

SMJ02044 Mobile Computing

CBK90746	Mobile Computing Network choice	6cp
31285	Mobile Applications Development	6cp
Select 12 credit points from the following options:		12cp
31091	Mobile Computing Project	6cp
48730	Network Security	6cp
31275	Mobile Networking	6cp
Total		24cp

SMJ02045 Applications Development

31257	Information System Development Methodologies	6cp
Select 18 credit points from the following options:		18cp
31927	Application Development with .NET	6cp
31335	Extreme Programming	6cp
31777	Human-Computer Interaction	6cp
31100	Enterprise Development with .NET	6cp
31030	Project	6cp
41889	Application Development in the iOS Environment	6cp
Total		24cp

SMJ02047 IT Management

31735	Information Systems and Organisation Development	6cp
31245	Business Process and IT Strategy	6cp
Select 12 credit points from the following options:		12cp
31096	Managing Client/Vendor Relations	6cp
31097	IT Operations Management	6cp
31950	Networked Enterprise Design	6cp
31777	Human-Computer Interaction	6cp
31030	Project	6cp
Total		24cp

SMJ02054 Scientific Computing

35363	Stochastic Models	6cp
35212	Computational Linear Algebra	6cp
35383	High Performance Computing	6cp
Select 6 credit points from the following options:		6cp
35231	Differential Equations	6cp
48023	Programming Fundamentals	6cp
Total		24cp

SMJ02057 Scientific Computing

35212	Computational Linear Algebra	6cp
35383	High Performance Computing	6cp
Select 12 credit points from the following options:		12cp
35111	Applications of Discrete Mathematics	6cp
35140	Introduction to Quantitative Management	6cp
35101	Introduction to Linear Dynamical Systems	6cp
35102	Introduction to Analysis and Multivariable Calculus	6cp
35231	Differential Equations	6cp
35151	Introduction to Statistics	6cp
35363	Stochastic Models	6cp
Total		24cp

SMJ02059 Information Technology

Select 24 credit points from the following options:		24cp
31266	Introduction to Information Systems	6cp
31268	Web Systems	6cp
31269	Business Requirements Modelling	6cp
31270	Networking Essentials	6cp
31271	Database Fundamentals	6cp
31284	Web Services Development	6cp
48023	Programming Fundamentals	6cp
48024	Applications Programming	6cp
Total		24cp

SMJ02064 Business Information Systems Management

In the Business Information Systems Management sub-major students undertake 24 credit points from the corresponding major (MAJ02080).

Completion requirements

Select 24 credit points from the following options:		24cp
31245	Business Process and IT Strategy	6cp
31257	Information System Development Methodologies	6cp
31247	Collaborative Business Processes	6cp
31258	Innovations for Global Relationship Management	6cp
31255	Finance and IT	6cp
31276	Networked Enterprise Architecture	6cp
31282	Systems Testing and Quality Management	6cp
31097	IT Operations Management	6cp
Total		24cp

SMJ02065 Data Analytics

In this sub-major students undertake 24 credit points from the corresponding major (MAJ02081).

Completion requirements

35151	Introduction to Statistics	6cp
31250	Introduction to Data Analytics	6cp
Select 12 credit points from the following options:		12cp
31000	e-Business Trading	6cp
31259	Intelligent Agents	6cp
31256	Image Processing and Pattern Recognition	6cp
31005	Advanced Data Analytics	6cp
31050	Programming with Patterns	6cp
31075	Object-relational Databases	6cp
32146	Data Visualisation and Visual Analytics	6cp
Total		24cp

SMJ02066 Computer Graphics and Animation

The subjects in this sub-major provide the theoretical and practical knowledge that is required to understand and build modern 3D computer graphics applications. This knowledge is applied to building a ray tracer, producing a 3D computer animation and carrying out a computer graphics project. The project can be in any area of graphics; a popular topic recently has been to build a real time renderer using OpenGL.

Completion requirements

31264	Introduction to Computer Graphics	6cp
Select 18 credit points from the following options:		18cp
31262	Introduction to Computer Game Design	6cp
31263	Introduction to Computer Game Programming	6cp
31241	3D Computer Animation	6cp
31248	Computer Graphics Project	6cp
31249	Computer Graphics Rendering Techniques	6cp
31080	Digital Multimedia	6cp
Total		24cp

SMJ02069 Information Technology

Select 24 credit points from the following options:		24cp
32560	Information Systems Architecture Design	6cp
32569	Enterprise Business Requirements	6cp
32557	Enabling Enterprise Information Systems	6cp
32559	Business Systems Design	6cp
32555	Fundamentals of Software Development	6cp
32148	Enterprise Computing	6cp
Total		24cp

SMJ03029 Technology

16074	International Construction	6cp
16075	Sustainable Building Technology	6cp
16076	Building Assessment	6cp
16077	Advanced Construction Technologies	6cp
Total		24cp

SMJ03034 Computer Systems Engineering

48440	Software Engineering Practice	6cp
48450	Real-time Operating Systems	6cp
48451	Advanced Digital Systems	6cp
48570	Data Acquisition and Distribution	6cp
Total		24cp

SMJ03036 Enterprise Systems Development

In this sub-major students undertake 24 credit points from the corresponding major (MAJ03444).

Completion requirements

48024	Applications Programming	6cp
31260	Interface Design	6cp
Select 12 credit points from the following options:		12cp
31251	Data Structures and Algorithms	6cp
48440	Software Engineering Practice	6cp
48433	Software Architecture	6cp
31253	Database Programming	6cp
31100	Enterprise Development with .NET	6cp
31335	Extreme Programming	6cp
31927	Application Development with .NET	6cp
31075	Object-relational Databases	6cp
41889	Application Development in the iOS Environment	6cp
Total		24cp

SMJ03037 Internetworking and Applications

In the Internetworking and Applications sub-major students undertake 24 credit points from the corresponding major (MAJ03445).

Completion requirements

31277	Routing and Internetworks	6cp
31275	Mobile Networking	6cp
41900	Fundamentals of Security	6cp
Select 6 credit points from the following options:		6cp
31284	Web Services Development	6cp
31246	Network Design	6cp
31283	WANs and Virtual LANs	6cp
31285	Mobile Applications Development	6cp
31254	e-Commerce	6cp
31338	Network Servers	6cp
41891	Cloud Computing Infrastructure	6cp
48730	Network Security	6cp
48436	Digital Forensics	6cp
Total		24cp

SMJ03038 Software

48024	Applications Programming	6cp
48440	Software Engineering Practice	6cp
48433	Software Architecture	6cp
48430	Embedded C	6cp
48434	Embedded Software	6cp
48450	Real-time Operating Systems	6cp
CBK90366	ICT choice	18cp
Total		54cp

SMJ03039 Software

48024	Applications Programming	6cp
48440	Software Engineering Practice	6cp
48433	Software Architecture	6cp
48430	Embedded C	6cp
48434	Embedded Software	6cp
48450	Real-time Operating Systems	6cp
CBK90368	ICT choice	6cp
Total		42cp

SMJ03040 Software

48024	Applications Programming	6cp
48440	Software Engineering Practice	6cp
48433	Software Architecture	6cp
48430	Embedded C	6cp
48434	Embedded Software	6cp
48450	Real-time Operating Systems	6cp
CBK90367	ICT choice	12cp
Total		48cp

SMJ03041 Computer Systems

48430	Embedded C	6cp
48434	Embedded Software	6cp
48450	Real-time Operating Systems	6cp
48520	Electronics and Circuits	6cp
48451	Advanced Digital Systems	6cp
48570	Data Acquisition and Distribution	6cp
CBK90366	ICT choice	18cp
Total		54cp

SMJ03042 Computer Systems

48430	Embedded C	6cp
48434	Embedded Software	6cp
48450	Real-time Operating Systems	6cp
48520	Electronics and Circuits	6cp
48451	Advanced Digital Systems	6cp
48570	Data Acquisition and Distribution	6cp
CBK90368	ICT choice	6cp
Total		42cp

SMJ03043 Computer Systems

48430	Embedded C	6cp
48434	Embedded Software	6cp
48450	Real-time Operating Systems	6cp
48520	Electronics and Circuits	6cp
48451	Advanced Digital Systems	6cp
48570	Data Acquisition and Distribution	6cp
CBK90367	ICT choice	12cp
Total		48cp

SMJ03044 Telecommunications

48770	Continuous Communications	6cp
48771	Discrete Communications	6cp
48780	Mobile Communications	6cp
48740	Communications Networks	6cp
31275	Mobile Networking	6cp
48750	Network Planning and Management	6cp
CBK90366	ICT choice	18cp
Total		54cp

SMJ03045 Telecommunications

48770	Continuous Communications	6cp
48771	Discrete Communications	6cp
48780	Mobile Communications	6cp
48740	Communications Networks	6cp
31275	Mobile Networking	6cp
48750	Network Planning and Management	6cp
CBK90368	ICT choice	6cp
Total		42cp

SMJ03046 Telecommunications

48770	Continuous Communications	6cp
48771	Discrete Communications	6cp
48780	Mobile Communications	6cp
48740	Communications Networks	6cp
31275	Mobile Networking	6cp
48750	Network Planning and Management	6cp
CBK90367	ICT choice	12cp
Total		48cp

SMJ03047 Biomedical Engineering

91161	Cell Biology and Genetics	6cp
91400	Human Anatomy and Physiology	6cp
49261	Biomedical Instrumentation	6cp
49275	Neural Networks and Fuzzy Logic	6cp
Total		24cp

SMJ03048 Building Services

16308	Services 2	6cp
16424	Construction MIS	6cp
16107	Planning and Design Process	6cp
16205	Services 1	6cp
Total		24cp

SMJ03049 Mechanical Engineering

48610	Introduction to Mechanical and Mechatronic Engineering	6cp
Select 18 credit points from the following options:		18cp
48620	Fundamentals of Mechanical Engineering	6cp
48331	Mechanics of Solids	6cp
48621	Manufacturing Engineering	6cp
48641	Fluid Mechanics	6cp
48651	Thermodynamics	6cp
48661	Heat Transfer	6cp
48640	Machine Dynamics	6cp
48601	Mechanical Vibration and Measurement	6cp
Total		24cp

SMJ03050 Mechatronics

48610	Introduction to Mechanical and Mechatronic Engineering	6cp
48620	Fundamentals of Mechanical Engineering	6cp
48623	Mechatronics 2	6cp
48640	Machine Dynamics	6cp
Total		24cp

SMJ03051 Network Engineering

48720	Network Fundamentals	6cp
48740	Communications Networks	6cp
48730	Network Security	6cp
48750	Network Planning and Management	6cp
Total		24cp

SMJ03052 Software Engineering

48023	Programming Fundamentals	6cp
48440	Software Engineering Practice	6cp
48024	Applications Programming	6cp
48433	Software Architecture	6cp
Total		24cp

SMJ03053 Advanced Mechanical Analysis

Select 24 credit points from the following options:	24cp
49325 Computer-aided Mechanical Design	6cp
49322 Airconditioning	6cp
48662 Mechanical Applications	6cp
49323 Vibration Analysis	6cp
49321 Energy Conversion	6cp
49328 Turbomachines	6cp
Total	24cp

SMJ03054 Sustainable Energy Systems Analysis

Select 24 credit points from the following options:	24cp
49322 Airconditioning	6cp
49307 Internal Combustion Engines	6cp
49328 Turbomachines	6cp
49321 Energy Conversion	6cp
49316 Materials Handling	6cp
Total	24cp

SMJ03055 Automation

Select 24 credit points from the following options:	24cp
48023 Programming Fundamentals	6cp
48531 Electromechanical Automation	6cp
48622 Mechatronics 1	6cp
49928 Design Optimisation for Manufacturing	6cp
Total	24cp

SMJ03056 Advanced Manufacturing Systems

Select 24 credit points from the following options:	24cp
49325 Computer-aided Mechanical Design	6cp
49316 Materials Handling	6cp
49928 Design Optimisation for Manufacturing	6cp
48662 Mechanical Applications	6cp
49322 Airconditioning	6cp
49323 Vibration Analysis	6cp
Total	24cp

SMJ03057 Automotive Systems

Select 24 credit points from the following options:	24cp
49325 Computer-aided Mechanical Design	6cp
49286 Vehicle Design	6cp
49928 Design Optimisation for Manufacturing	6cp
49328 Turbomachines	6cp
49307 Internal Combustion Engines	6cp
49323 Vibration Analysis	6cp
Total	24cp

SMJ03058 Intelligent Systems

Select 24 credit points from the following options:	24cp
49274 Advanced Robotics	6cp
49261 Biomedical Instrumentation	6cp
49928 Design Optimisation for Manufacturing	6cp
49330 Sensors and Signal Processing	6cp
49329 Control of Mechatronic Systems	6cp
Total	24cp

SMJ03059 Sustainable Energy Systems

Select 24 credit points from the following options:	24cp
49322 Airconditioning	6cp
49328 Turbomachines	6cp
49321 Energy Conversion	6cp
49307 Internal Combustion Engines	6cp
48661 Heat Transfer	6cp
Total	24cp

SMJ03060 Manufacturing Automation

Select 24 credit points from the following options:	24cp
49312 Advanced Flow Modelling	6cp
49316 Materials Handling	6cp
49928 Design Optimisation for Manufacturing	6cp
49274 Advanced Robotics	6cp
49329 Control of Mechatronic Systems	6cp
49330 Sensors and Signal Processing	6cp
Total	24cp

SMJ03061 Engineering

Select 24 credit points from the following options:	24cp
49098 Engineering Financial Control	6cp
49306 Quality and Operations Management Systems	6cp
49309 Quality Planning and Analysis	6cp
49680 Value Chain Engineering Systems	6cp
49016 Technology and Innovation Management	6cp
49006 Risk Management in Engineering	6cp
Total	24cp

SMJ03429 Engineering Policy

Select 24 credit points from the following options:	24cp
49006 Risk Management in Engineering	6cp
49013 Managing Information Technology in Engineering	6cp
49122 Ecology and Sustainability	6cp
49001 Judgment and Decision Making	6cp
49016 Technology and Innovation Management	6cp
Total	24cp

SMJ04014 Building Surveying

16078 Fire Dynamics	6cp
16079 Performance-based Certification	6cp
16080 Fire Safety Systems	6cp
16081 Human Behaviour in Fire	6cp
Total	24cp

SMJ04015 General Practice

16082 Expert Witness	6cp
16083 Evolution of Technology	6cp
16084 Construction Practice Project	6cp
16085 Building Control and Regulations	6cp
Total	24cp

SMJ04016 Architectural Experience

11294 Architectural Experience A	6cp
11295 Architectural Experience B	6cp
11296 Architectural Experience C	6cp
11297 Architectural Experience D	6cp
Total	24cp

SMJ04023 Performative Spaces

86530 Design Studio: Performative Spaces 1	12cp
86533 Design Studio: Performative Spaces 2	12cp
Total	24cp

SMJ06020 Anaesthetics and Recovery Room Nursing

The subjects 92905 and 92760 are offered every second year. They are next available in 2015.

Completion requirements

Select one of the following:	6cp
92713 Health Breakdown	6cp
CBK90056 Nursing subjects (PG)	6cp
Select one of the following:	6cp
92869 Specialty Clinical Practice	6cp
STM90490 Clinical Accreditation Program (NSLHD)	6cp
92905 Dimensions of Anaesthesia Nursing	6cp
92760 Fundamentals of Postanaesthesia Recovery Nursing	6cp
Total	24cp

SMJ06022 Children's Nursing

92713 Health Breakdown	6cp
92869 Specialty Clinical Practice	6cp
92878 Care of the Child in Illness and Disability	6cp
92902 Care of the Acutely Ill Child	6cp
Total	24cp

SMJ06023 Critical Care Nursing

92713 Health Breakdown	6cp
92869 Specialty Clinical Practice	6cp
92918 Fundamentals of Critical Care Nursing	6cp
92919 Complex Critical Care	6cp
Total	24cp

SMJ06024 Mental Health Nursing

This sub-major is not offered in 2014.

Completion requirements

92869	Specialty Clinical Practice	6cp
92604	Mental Health Assessment	6cp
92605	Therapeutic Interventions in Mental Health Care 2	6cp
92876	Therapeutic Interventions in Mental Health Care	6cp
Total		24cp

SMJ06025 Neonatal Nursing

This sub-major is not offered in 2014.

Completion requirements

92869	Specialty Clinical Practice	6cp
92713	Health Breakdown	6cp
92871	Perinatal Development	6cp
92895	Issues in Neonatal Care	6cp
Total		24cp

SMJ06026 Neuroscience Nursing

This sub-major is not offered in 2014.

Completion requirements

92869	Specialty Clinical Practice	6cp
92713	Health Breakdown	6cp
92920	Neuroscience: Trauma and Cerebrovascular	6cp
92921	Neuroscience: Degenerative and Oncological	6cp
Total		24cp

SMJ06027 Perioperative Nursing

92869	Specialty Clinical Practice	6cp
92881	Foundations of Perioperative Nursing	6cp
92882	Techniques in Perioperative Nursing	6cp
CBK90056	Nursing subjects (PG)	6cp
Total		24cp

SMJ06032 Acute Care Nursing

92713	Health Breakdown	6cp
92869	Specialty Clinical Practice	6cp
92616	Core Concepts in Acute Care Nursing	6cp
92617	Early Interventions in Acute Care Nursing	6cp
Total		24cp

SMJ06033 Child and Family Health Nursing

92613	Principles of Child and Family Health Nursing	6cp
92614	Child and Family Health Nursing 1	6cp
92615	Child and Family Health Nursing 2	6cp
92620	Family and Community Health Practice	6cp
Total		24cp

SMJ06034 Diabetes Education and Management

92934	Clinical Management of Diabetes	6cp
92845	Primary Health Care	6cp
93006	Clinical Practice (Diabetes)	6cp
015356	Learning in Diabetes Education	6cp
Total		24cp

SMJ07002 Clinical Teaching

Select one of the following:		6cp
92713	Health Breakdown	6cp
CBK90056	Nursing subjects (PG)	6cp
92869	Specialty Clinical Practice	6cp
92848	Facilitation of Clinical Learning	6cp
92607	Education for Practice Development	6cp
Total		24cp

SMJ08037 Operations and Supply Chain

This sub-major provides participants with the opportunity to acquire knowledge of a broad range of theory and applications related to the design, planning and operation of processes and networks needed to deliver products and services to customers. It provides a range of analytical skills and expertise necessary to evaluate business operations needs and to design processes and planning and control systems to deliver these needs. Participants have the opportunity to acquire knowledge in key areas related to the efficient production and supply of goods and services.

Completion requirements

21741	Managing Operations	6cp
21743	Business Excellence	6cp

21833	International Human Resources Management	6cp
		Total 24cp

SMJ08153 Public Relations

This sub-major provides students with a specialisation in communication management within the MBA. It develops an understanding of communication theory and practice and skills in applying these to the business environment. Students explore the contexts for professional communication and develop strategies and products to communicate effectively with their customers, clients, partners and publics. These strategic communication skills equip them for work in a range of organisations and sectors within the business community. Graduates with this sub-major have the opportunity to work as public relations professionals or to incorporate their understanding and skills into their business practices.

Completion requirements

57023	Communicating with Publics	8cp
57024	Managing Public Communication Strategies	8cp
57026	Strategic Communication and Negotiation	8cp
		Total 24cp

SMJ08155 Sport Management

The Sport Management sub-major provides students with the opportunity to acquire knowledge of the sport industry, how it is structured and managed at different levels, from grassroots, community-focused sport, through to elite-level, commercially oriented sport. The sub-major enables students to acquire skills applicable for the professional management of sport, and for conceiving policies and strategies underpinning this multi-faceted role.

The sub-major provides a comprehensive range of skills and expertise expected of management professionals in the sport industry and cognate areas, such as events management and tourism management. Students acquire knowledge in the areas of sport management and the experience economy through learning strategies that cover contemporary case study analysis, theory and practical applications. By the end of the sub-major they are able to analyse contemporary challenges and issues of the sport sector; provide solutions to problems

through developing strategic plans based on sport and event studies; apply management theories, concepts and decision-making skills in the context of the sport industry; and propose solutions to the management of problematic issues in sport, such as performance-enhancing drugs, off-field player behaviour, and career transition for elite athletes.

Completion requirements

SMJ08204 Strategic Marketing

This sub-major develops competencies that allow decision-makers, such as marketing managers and business unit managers as well as general managers and chief executives, to develop, implement and evaluate marketing-oriented strategies that allow companies to compete successfully in environments in which they make decisions about business models that are affected by business-to-business, international and services contexts. It develops senior management competencies that enable organisations to implement strategic marketing decisions in a cross-functional and integrated manner.

It is only available to Bachelor of Business students undertaking the MAJ08441 Marketing major or MAJ08116 Marketing Communication major or SMJ08138 Marketing sub-major.

Anti-requisite: MAJ08063 Extended Marketing.

Completion requirements

Select 24 credit points from the following options:		24cp
24205	Business-to-Business Marketing	6cp
24331	Marketing Analytics and Decisions	6cp
24220	International Marketing	6cp
24306	Services Marketing	6cp

SMJ08208 Management

This sub-major provides participants with the opportunity to develop integrated knowledge and skills for effective change management in a global, decentralised competitive business environment.

Completion requirements

21717	International Management	6cp
21811	Global Strategic Management	6cp
21827	Change Management	6cp
21854	Innovation and Entrepreneurship	6cp
Total		24cp

SMJ08209 Community Management

This sub-major provides participants with the opportunity to acquire the knowledge and skills necessary to successfully manage non-profit organisations. It covers the special characteristics of the non-profit sector and the special challenges of managing non-profit organisations. It pays special attention to the variety of ways non-profit organisations develop their financial resources, and to the special body of laws that govern the non-profit sector.

Completion requirements

21817	Volunteer Management	6cp
21767	Not-for-Profit Sector Theory and Context	6cp
21879	Corporate Social Responsibility and Measuring Social Impact	6cp
21778	Resource Mobilisation	6cp
Total		24cp

SMJ08210 Value Creation in Services

This sub-major prepares students to thrive in a services economy and to advance their individual and collaborative potentials within the framework of a new service science

curriculum that examines the configurations of people, technology and business in the context of a service economy. It is aimed at meeting the diverse requirements of the next generation workforce and key capability requirements for value creation, innovation and collaboration in services as endorsed by the Australian government policy paper, *Powering Ideas: An Innovation Agenda for the 21st Century*.

Completion requirements

SMJ08213 Event Management

This sub-major provides students with knowledge and skills germane to managerial positions within the event management field in Australia and internationally. The areas in which this knowledge and these skills may be developed concern: marketing, risk, project and venue management, event creation, economics, and law. Learning strategies employed in this sub-major focus on linking theory to practice via case study analysis, fieldwork and applied assessments. These learning strategies are intended to enable students to: analyse contemporary challenges and issues pertaining to the public and corporate event field; apply management theories, concepts and decision-making skills in the context of specific event management related issues or problems; and project manage events of varying scale.

Completion requirements

SMJ08214 Financial Planning

The Financial Planning sub-major equips graduates with both theoretical and practical competencies required to participate in the changing financial planning industry. Graduates gain an understanding of the principal elements of the personal financial planning process, the financial system and the legal issues associated in preparing a financial plan. They acquire the technical and analytical skills to undertake general personal financial planning advice. This sub-major is only available to Bachelor of Business students undertaking a major in accounting or finance.

As part of the Financial Planning sub-major, students undertaking a major in accounting should select 25556 The Financial System; students undertaking a major in finance should select 79017 Taxation Law.

Completion requirements

79026	Estate Planning (UG)	6cp
79027	Retirement Planning (UG)	6cp
22502	Financial Planning in Australia	6cp
Select 6 credit points from the following options:		6cp
25556	The Financial System	6cp

Total		24cp

SMJ08215 Financial Services

The operation of the financial services sector is critical to the operation of the economy. Consequently, an understanding of how financial information is generated and used, together with how the financial markets operate is important. The subjects in the sub-major provide students with essential professional skills in how financial reports are prepared, how financial information may be used, and how the financial system operates.

The Accounting stream is only available to Finance major or Extended Finance major students; the Finance stream is only available to Accounting major students.

This major is not offered to students enrolled in: SMJ08116 Financial Reporting, SMJ08123 Finance, or MAJ08068 Financial Services.

Completion requirements

Select 24 credit points from the following options:		24cp
STM90704	Accounting stream	24cp

79606	Advanced Taxation Law	6cp
Total 24cp		

SMJ09034 International Studies

This sub-major uses a focus on society, politics, economics and culture as an introduction to three countries or parts of the world that play a crucial role in Australia's business environment. The subjects in this sub-major are only offered in Spring semester.

Note that Contemporary France, Contemporary Germany, Contemporary Italy, Contemporary Spain and Contemporary Switzerland are all offered at the same time and day in Spring semester; students are thus only able to enrol in one of these subjects in a given semester.

Completion requirements

Select 24 credit points from the following options:		24cp
976111	Contemporary China	8cp
976211	Contemporary Japan	8cp
976502	Contemporary Latin(o) Americas	8cp
976411	Contemporary France	8cp
976421	Contemporary Germany	8cp
976431	Contemporary Italy	8cp
976451	Contemporary Spain	8cp
976404	Contemporary Switzerland	8cp
Total 24cp		

SMJ09035 Language other than English

The LOTE sub-major enables students to develop communicative competence in a language other than English. Three consecutive 8 credit point subjects are taken from one of the following language programs: Chinese, French, German, Italian, Japanese or Spanish. Students require three semesters to complete this sub-major and are advised to start in Autumn of their second year, as not all levels of language and culture are offered every semester.

Completion requirements

Select 24 credit points from the following options:		24cp
CBK90494	Chinese Language and Culture	24cp
CBK90495	Japanese Language and Culture	24cp
CBK90497	French Language and Culture	24cp

SMJ09037 Business Law

The business person of today cannot operate successfully without an understanding of the legal and regulatory environment within which they operate. This sub-major provides wide ranging options which provide an attractive choice to students to select from to meet their interests and professional needs in the global context. This sub-major develops skills to enable students to strategically assess, critically interpret and judiciously apply information for decision-making in the contemporary dynamic business environment. The sub-major provides students with an understanding of the impact of regulation and the law to progress a career in the global business environment. Students develop an awareness and understanding of social, legal and ethical responsibilities in business for a sustainable future.

Completion requirements

Select 24 credit points from the following options:		24cp
77716	International Trade Law	6cp

77885	Legal Process and Legal Research	6cp
Total 24cp		

SMJ09048 Transnational Studies

This sub-major focuses on the global arena. How can we understand contemporary global politics? How did our current world system come to be this way? How are ideas and news about the world circulated and consumed? The three subjects in this sub-major combine politics and international relations, cultural history, media studies and other disciplines to investigate how people, nations, governments, empires, and the media have created and recreated the global world we live in.

The first subject introduces students to the global politics of power, through a variety of lenses, from 'above' and from 'below'. Students then analyse the networks of colonial expansion and the resistance to it, with particular attention to gendered, intimate and everyday relationships. These are related directly to the 'post-colonial' world, where power is no longer centred on imperial heartlands. In the third subject students explore the phenomenon of transnational media as it builds on new technologies and adapts the old, both as media empire and as citizen media, or social media.

Further information on this sub-major can be found at:
www.communication.uts.edu.au/courses/submajors.html

Completion requirements

58222	Global Politics from Above and Below	8cp
58316	Sex, Race and Empire	8cp
58317	Transnational Media	8cp
		Total 24cp

SMJ09049 Reading Australia

This sub-major is an exploration through time and place, literature and writing, film and images of what 'Australia' is. It requires students to rethink what they call 'an Australian', and reconsider where the boundaries of Australia arise and produce the possibilities for new Australias to exist. In all the subjects students are asked to 'read' Australia in new ways: read it as a particular result of contingently recorded histories and arbitrarily mythologised places. Students are also asked to question Australia as a place that has produced workable myths like the 'outback' and 'the beach' and think about why Crocodile Dundee and Mad Max never could live in Glebe and why 'multicultural Australia' doesn't quite capture the global and inter-nation flows that have helped produce Australia. In addition, students are asked to consider the critical and creative ways in which something as persuasive and pervasive as Australia makes and remakes itself through the circulations of particular knowledges.

The subjects involve the study of the many modes of knowledge production (electronic, filmic, textual) but also the many interdisciplinary forms that encourages looking at pasts and places and categories like literature and film in new and exciting ways. Students produce work in a variety of forms including essays, archives, fiction and images.

Students enrolling in this sub-major need to have a willingness to have their answers questioned; in doing so they should discover that at least one Australia they learn about is a place they have never been.

Further information on this sub-major can be found at:
www.communication.uts.edu.au/courses/submajors.html

Completion requirements

58224	Australian Pasts and Places	8cp
58320	Australian Fiction	8cp
58321	Australian Film	8cp
		Total 24cp

SMJ09050 Environmental Studies

It seems humankind want to live sustainably. In opinion surveys, environmental concerns top the list of most important issues. Environmental perspectives have risen up the agenda across key fields of policy research and social change, new media and reportage, creative writing and the 'new humanities', requiring practitioners in these fields to develop critical knowledge of the sciences and technologies at stake. Whether considering leaders of nations and corporations, environmentalist and oppositional movements, or Indigenous and other marginalised peoples, all have real issues at stake and demand voices in the debates.

The sub-major provides the scope to explore these fields in some depth. It begins with an introduction to the politics and science of climate change. Students then investigate interactions between the life sciences and the social sciences; what drives ecological degradation and what is claimed to take us beyond it into a future of 'post-nature' driven by biotechnologies and global ecological risk management. In the final subject students investigate environmental values, exploring

different cultural expressions, changing meanings of nature, and their relationship to it. Ranging across the political, the economic, the cultural and the technological, the sub-major offers a solid grounding in this vital arena.

Further information on this sub-major can be found at:
www.communication.uts.edu.au/courses/submajors.html

Completion requirements

58328	The New Economy of Post-Nature	8cp
58329	Culture, Science and Nature	8cp
		Total 24cp

SMJ09051 Bodies, Genders, Rights

This sub-major draws on social, political and cultural theory to interrogate key features of the world: from the life worlds of individual bodies and embodied experience to the ways in which these worlds are in turn shaped by political and social power structures that effect relations between peoples and between those peoples and states at the international and global level. The sub-major offers foundational intellectual tools to help students reflect widely and deeply about the nature of power, relations between peoples, and between states and peoples across time and space.

The sub-major begins with a sustained examination of the 'matter' of the body, its literal fleshiness and its troubling tendency to be naturalised, despite being a key site of social, cultural, historical and political contestation. Students think through what the body is and how it is that some bodies come to matter more than others. Thus, an engagement with the seemingly 'micro' matter of the body lays the groundwork for the following two subjects which focus in turn explicitly on the 'macro' issues of gender and human rights.

The second subject provides the opportunity to undertake a rigorous analysis of the notions of sex, gender and sexuality in a range of cultural and social contexts. The processes and mechanisms that construct and institutionalise gender are considered in a variety of contexts. How hierarchies of gender and sexuality are implicated in all aspects of social life is explored. In particular students interrogate the ways in which current issues troubling relations between peoples and states such as globalisation, questions of ethnic and cultural difference, citizenship and environmental stress can be understood as 'gendered'. Students also question practices of social exclusion and inclusion (an underpinning theme of the sub-major as a whole) based on gender and the ways in which gender in turn structures relations not only between peoples but between nations and states.

The final subject builds on the themes developed in the previous subjects to examine the way in which rights, and particularly human rights, are central to the ways in which relations between individuals, groups of peoples, nations and states are configured in the 21st century. From this standpoint, key issues and debates concerning the history and contemporary politics of human rights in the context of state formation (sovereign territorialisation) and globalisation and de-territorialisation are examined.

Completion requirements

58223	Social Bodies	8cp
58318	Gender, Culture, Power	8cp
58319	Rights and Territories	8cp
		Total 24cp

SMJ09052 Aboriginal Studies

The three subjects in this sub-major explore Australian Aboriginal culture and society, politics and history, and the legal dimensions of Indigenous rights. Drawing upon a range of disciplinary approaches (anthropology, politics, sociology and history) students explore how these traditions have produced particular knowledge about Aboriginal people and how Aboriginal ways of knowing and being, including relationships to land and water, kinship networks and society, have been interpreted as well as contested these intellectual traditions.

In the first subject, students consider Aboriginal cultural and social practices and reflect upon the mechanisms that exist to maintain and reproduce culture in a modern post-colonial nation state. In the second subject, students are introduced to the kinds of demands Aboriginal people have made of the colonial state and how the state has sought to manage and rule Aboriginal people's lives. In the third subject, students examine the legal bases for the protection of Indigenous rights, including land rights and native title.

The three subjects seek to be intellectually challenging, provide students with a depth of insight and knowledge to deal meaningfully with Aboriginal people, engage in advocacy and debates on Aboriginal issues and understand the wider international contexts in which these issues circulate. Students who complete this sub-major are equipped to make a significant contribution to the Aboriginal public policy domain and community.

SMJ10028 International Exchange

The International Exchange sub-major provides participants with the opportunity to study at an overseas institution and receive credit towards the MBA on completion of their study. It provides the opportunity to have an international study experience and to experience business operations in an international environment.

Completion requirements

99021	International Exchange Subject 1	6cp	
99022	International Exchange Subject 2	6cp	
99023	International Exchange Subject 3	6cp	
99024	International Exchange Subject 4	6cp	
Total			24cp

SMJ10030 Nanotechnology

65307	Physical Chemistry 1	6cp	
67509	Molecular Nanotechnology	6cp	
91140	BioNanotechnology	6cp	
67510	Surface Processes	6cp	
Total			24cp

SMJ10031 Physics

68416	Computational Physics	6cp	
68412	Energy Science and Technology	6cp	
68414	Advanced Mechanics	6cp	
68415	Measurement and Analysis of Physical Processes	6cp	
Total			24cp

SMJ10032 Media Studies

This sub-major invites students to investigate the role of media in their lives and in globalised social environments by exploring key media theories and carrying out original media research.

The first subject explores significant media debates and the evolution of media theories from all-powerful models of the media to more nuanced understandings of media influence, asking key questions including: What is a medium? How do people use media? How do the media 'use' people?

In the second subject students explore key research traditions, ways to study how people use media in their daily lives and ways of reflecting on how individuals shape their identity through social media and what it means to work as a media professional in contemporary Australian media industries.

The third subject equips students to analyse changing concepts of media audiences from passive recipients to active producers.

To develop students' research expertise in ways which help to prepare them for honours, postgraduate study, and careers in the media and in media research, students tackle research design, formulation of research questions, media research methods, literature reviewing, critical appraisal, and reporting their findings in research genres.

Further information on this sub-major can be found at:
www.communication.uts.edu.au/courses/submajors.html

Completion requirements

58226	Media, Mediation, Power	8cp	
58324	Investigating Media, Reflective Practices	8cp	
58325	Audiences, Users, Publics, Communities	8cp	
Total			24cp

SMJ10033 Screen Studies

In this sub-major, the first subject focuses on key movements and directors in cinema history, and key theories and debates that have defined film studies as a discipline. The second subject explores the ways in which various media (focusing on film, but also on television, video, and new media) inform and/or challenge our understanding of the past and its relationship to the present. Finally, the third subject focuses on a diverse range of contemporary films that are innovative and experimental in their structure and which are explored in conjunction with contemporary debates in film studies on the relationship between aesthetics, politics, affect, and experience. Each of the subjects are international in their focus and students engage critically and creatively with visual texts from, among other countries, France, Spain, Italy, Germany, China, Taiwan, Iran, Lebanon, Canada, the UK, Australia, New Zealand, Finland, Denmark, and the USA.

The sub-major appeals to students who have an interest in film (and other visual media), and who are keen to develop the vocabulary and skills to think and write about the history and theory of these media in an informed, critical, and scholarly way.

Further information on this sub-major can be found at:
www.communication.uts.edu.au/courses/submajors.html

Free choice of electives.

STM90202 Programming and Design stream

Free choice of electives.

STM90203 Distributed Network Computing stream

Free choice of electives.

STM90210 Accounting stream

22901	Accounting Research and Consulting Skills	6cp
22902	Financial Reporting, Capital Markets and Disclosure	6cp
22903	Contemporary Issues in Management Accounting Research	6cp
22908	Current Issues in Corporate Governance and Assurance	6cp
22906	Thesis in Accounting	24cp
Total 48cp		

STM90211 Finance and Economics stream

Select 48 credit points from the following options:		48cp
CBK90536	Finance strand	48cp
CBK90537	Economics strand	48cp
Total 48cp		

STM90212 Management stream

Subjects 21914 Readings and Reflecting on Management and 21915 Management and Organisation Seminars are only available to students who have completed MAJ08046 Extended Management.

Completion requirements

21908	Advanced Management and Organisation Research Methods	6cp
21910	Researching Organisations and Management	6cp
Select one of the following:		6cp
21907	Research Methods and Approaches in Management and Organisations	6cp
21914	Readings and Reflecting on Management	6cp
Select one of the following:		6cp
21909	Advanced Organisation and Management Theorising	6cp
21915	Management and Organisation Seminars	6cp
21912	Thesis Proposal in Management (Honours)	6cp
21913	Thesis in Management (Honours)	18cp
Total 48cp		

STM90213 Marketing stream

24901	Philosophy of Science and Theory	6cp
24770	Thesis in Marketing (Honours) 1	6cp
24771	Thesis in Marketing (Honours) 2	18cp
Select one of the following:		6cp
24902	Research Methodology and Data Analysis Techniques	6cp
24758	Readings in Marketing	6cp
Select one of the following:		6cp
24908	Research Design and Data Collection Techniques	6cp
21751	Management Research Methods	6cp
Select one of the following:		6cp
24331	Marketing Analytics and Decisions	6cp
23908	Economic Modelling	6cp
Total 48cp		

STM90216 Core subjects

Free choice of electives.

STM90225 Core subjects (SMD)

50830	Contemporary Music 1	6cp
50831	Sonology	6cp
50832	Electronic Music Composition	6cp
50833	Speech, Music, Sound	6cp
50834	Audio Production	6cp
50835	Audio Culture	6cp
50836	Sonic Art	6cp
50837	Contemporary Music 2	6cp
50838	Professional Practice (SMD)	6cp
Total 54cp		

STM90226 Core subjects

Free choice of electives.

STM90228 Core subjects

Free choice of electives.

STM90253 Project (Cultural Studies) (two semesters)

Free choice of electives.

STM90266 Latino USA: Specialist Country Studies stream

976502	Contemporary Latin(o) Americas	8cp

Total 24cp		

STM90271 Engineering practice program

48121	Engineering Practice Preview 1	3cp
48110	Engineering Experience 1	0cp
48122	Engineering Practice Review 1	3cp
48141	Engineering Practice Preview 2	3cp
48130	Engineering Experience 2	0cp
48142	Engineering Practice Review 2	3cp
Total 12cp		

STM90272 Core subjects (Engineering)

68037	Physical Modelling	6cp
33130	Mathematical Modelling 1	6cp
33230	Mathematical Modelling 2	6cp
48230	Engineering Communication	6cp
48240	Design and Innovation Fundamentals	6cp
48260	Engineering Project Management	6cp
Total 36cp		

STM90273 Core subjects (Business)

22107	Accounting for Business Decisions A	6cp
21129	Managing People and Organisations	6cp
24108	Marketing Foundations	6cp
23115	Economics for Business	6cp
25300	Fundamentals of Business Finance	6cp
26134	Business Statistics	6cp
26100	Integrating Business Perspectives	6cp
22207	Accounting for Business Decisions B	6cp
		Total 48cp

STM90274 Core subjects (Biotechnology)

65111	Chemistry 1	6cp
91161	Cell Biology and Genetics	6cp
65212	Chemistry 2	6cp
91140	BioNanotechnology	6cp
91320	Metabolic Biochemistry	6cp
91314	General Microbiology	6cp
91142	Biotechnology	6cp
91144	Plant Biotechnology	6cp
91369	Biobusiness and Environmental Biotechnology	6cp
Select one of the following:		6cp
91335	Molecular Biology 2	6cp
91359	Advanced Immunology	6cp
91132	Molecular Biology 1	6cp
91368	Bioreactors and Bioprocessing	6cp
Select 6 credit points from the following options:		6cp
91326	Analytical Biochemistry	6cp
91330	Epidemiology and Public Health Microbiology	6cp
91401	Introductory Haematology and Immunology	6cp
		Total 78cp

STM90284 Core subjects (Biotechnology)

91161	Cell Biology and Genetics	6cp
65111	Chemistry 1	6cp
91400	Human Anatomy and Physiology	6cp
65212	Chemistry 2	6cp
91320	Metabolic Biochemistry	6cp
91314	General Microbiology	6cp
91132	Molecular Biology 1	6cp
91330	Epidemiology and Public Health Microbiology	6cp
91142	Biotechnology	6cp
91326	Analytical Biochemistry	6cp
91401	Introductory Haematology and Immunology	6cp
Select one of the following:		6cp
91359	Advanced Immunology	6cp
91335	Molecular Biology 2	6cp
91369	Biobusiness and Environmental Biotechnology	6cp
91368	Bioreactors and Bioprocessing	6cp
91144	Plant Biotechnology	6cp
Select 6 credit points from the following options:		6cp
91129	Transfusion Science	6cp
91345	Biochemistry, Genes and Disease	6cp
91352	Parasitology	6cp
		Total 96cp

STM90285 Core subjects (Accounting)

22107	Accounting for Business Decisions A	6cp
22207	Accounting for Business Decisions B	6cp
22157	Australian Corporate Environment	6cp
26100	Integrating Business Perspectives	6cp
25300	Fundamentals of Business Finance	6cp
23115	Economics for Business	6cp
24108	Marketing Foundations	6cp
22605	Accounting Information Systems	6cp
26134	Business Statistics	6cp
		Total 54cp

STM90288 Core subjects

27342	Sociocultural Concepts for Leisure, Sport and Tourism	6cp
27126	Event and Leisure Industries	6cp
24108	Marketing Foundations	6cp
21129	Managing People and Organisations	6cp
27326	Diversity Management	6cp
